# HERITAGE® U.S. COIN AUCTION DECEMBER 5-7, 2019 | DALLAS

Lot 3426

# Heritage Signature® Auction #1302

# U.S. Coins

Featuring: The Lithuania Collection, Part II • The Stone Arch Collection • The Burgess Lee Berlin, M.D., J.D. Collection, Part II • The Spring Creek Collection, Part I

# December 5-7, 2019 | Dallas

#### FLOOR Signature® Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room 3500 Maple Avenue • Dallas, TX 75219

Session 1 - Premier

Thursday, December 5 • 6:00 PM CT • Lots 3001–3484

Session 2

Friday, December 6 • 2:00 PM CT • Lots 3485-3956

Session 3

Friday, December 6 • 6:00 PM CT • Lots 3957-4558

#### **ONLINE ONLY Signature® Session 4**

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4

Saturday, December 7 • 2:00 PM CT • Lots 7001–7990

#### LOT SETTLEMENT AND PICK-UP

Weekdays starting Friday, December 6, 10:00 AM – 1:00 PM CT by appointment only.

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

TX Auctioneer Licenses: Teia Baber 16624; Ed Beardsley 16632; Sarah Davies 17505; Nicholas Dawes 16784; Sophie Duncan 17901; Christopher Dykstra 16601; Fiona Elias 17126; Francesca Felgar 17902; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Emily Hartman 17922; Gregory Holman 17653; Roberta Kramer 17439; Brent Randall Lewis 17881; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Sarah Miller 18098; Rochelle Mortenson 17898; Scott Peterson 13256; Michael Provenzale 17157; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Jacob Walker 16413; Rachel Weathers 17907; Brian Wiedman 17894; Adam Williams 17893; Phillip Wooten 17656.

#### PRELIMINARY LOT VIEWING

By appointment only. Contact Matthew Tinsley 214-409-1779 or MatthewT@HA.com (All times subject to change).

Heritage Auctions, Dallas • 17th Floor 3500 Maple Avenue - Dallas, TX 75219

Monday, November 25 – Tuesday, November 26 9:00 AM – 6:00 PM CT

#### **LOT VIEWING**

Heritage Auctions, Dallas • 17th Floor 3500 Maple Avenue - Dallas, TX 75219

Monday, December 2 – Friday, December 6 9:00 AM – 6:00 PM CT

Mike Haynes Chief Financial Officer

Dear Bidder,

As this letter is written, an announcement from our Public Relations department confirms Heritage has eclipsed 1.25 million online bidder-members – a stunning number, considering that just three years ago we topped the 1 million mark. Amazingly, a quarter of a million new online bidders have signed on in the past three years alone! For consignors and collectors – and for numismatists in general – this tremendous growth is important news. The internet has changed all aspects of buying, selling, research, and marketing in the rare coin business, as it has in every walk of life.

Heritage remains committed to providing a comprehensive auction experience to our client and bidder base. Always at the forefront of electronic media and online bidding, Heritage is unmatched among other auction companies as the premier landing spot for memorabilia and collectibles – not only rare coins, but for more than 40 collecting categories. Industry-leading specialties include fine art, jewelry, sports, comics, and illustration art, as well as many kinds of historical, intellectual, and real property. Each printed catalog documents the sales, and offers tangible proof of Heritage's commitment to bidders and clients.

This current Dallas U.S. Coins Signature auction builds on momentum that carries over from the ANA auction, Long Beach, and our other second half venues. It features a loaded Premier Session on Thursday evening, December 5, plus two floor sessions on Friday – one in the afternoon, followed by an evening session. Our online-only Internet Signature® Session is on Saturday afternoon, December 7. Highlights stand out through all categories of U.S. coinage, from early type to a host of modern rarities.

Four Featured Collections headline the auction:

#### THE LITHUANIA COLLECTION, PART II

Vincent Jurgaitis is a retired member of Steamfitters L.U. 420 in Philadelphia. The son of Lithuanian parents, he discovered numismatics at a young age when viewing his father's collection of circulated Barber coins in albums.

Vince has diverse numismatic interests. He previously assembled an impressive U.S. Currency collection that was sold in a previous Heritage auction. While visiting Heritage's table at a major show, he viewed Dr. Peter Shireman's collection of Barber half dollars on display. Seeing the Shireman Collection reminded Vince of his father's collection, and rekindled his childhood interest in Barber coinage. Dr. Shireman encouraged Vince to pursue his own set. Vince invested several years building the collection of high-grade Barber halves offered here, acquiring high-quality coins with an emphasis on eye appeal.

Although he is fond of each coin that he selected for this set, Vince notes that several coins stand out for exceptional appeal. His favorites include an attractively toned 1892-S (Ex: Eugene H. Gardner Collection), plus Gem 1899-O and 1900-S coins with beautiful prooflike surfaces. A number of fine early 20th century eagles and double eagles round out the consignment. Vince thanks Heritage for producing excellent catalogs for study. They offer a resource "of great value" to build a collection. He avidly reviews our catalogs and uses them for future reference.

#### THE BURGESS LEE BERLIN, M.D., J.D. COLLECTION, PART II

We offered the main portion of Dr. Berlin's memorable collection in January 2018 at the Tampa FUN Signature event. Unknown to us at the time, a favorite coin was put aside for many years before he entrusted Heritage to sell it. We are pleased to offer it here in Dallas – a beautiful Superb Gem High Relief Saint-Gaudens double eagle with Wire Rim, one of the finest pieces known, certified MS68 NGC.

#### THE STONE ARCH COLLECTION

This compact consignment offers a quintet of early gold pieces that will have gold specialists scrambling to bid. A 1795 13 Leaves BD-2 eagle grades XF45 PCGS with CAC, while a Choice Uncirculated 1801 ten dollar gold, BD-2, is also CAC approved. An 1803 eagle is the Small Reverse Stars variety (BD-3) in nearly full Mint State, certified AU58 PCGS, CAC. A 1798 Large Eagle five represents early half eagles, graded MS62 NGC with a Large 8, 13 Stars Reverse (BD-2, R.5). The popular 1806/4 quarter eagle with 8x5 Stars (BD-1) is graded AU58 NGC to complete this small-but-impressive group of Premier Session gold.

#### THE SPRING CREEK COLLECTION, PART I

Consigned for collectors on behalf of a collector, this 152-coin consignment focuses on 18th and 19th century silver type, plus a few copper pieces added for good measure. The coins are largely in circulated condition, many with CAC endorsement, and nearly all with Choice surfaces. Early type, Bust, and Seated offerings make up the bulk of the collection, with some early Barber dates included. A stellar group of circulated Trade dollars stands out, as do many scarce dates and varieties throughout the different series.

Elsewhere in the auction, Territorial gold and high-grade type are of note. We invite friends, clients, and dealer associates to visit our World Headquarters in Dallas. We look forward to assisting you with lot viewing, buying, selling, consigning, or simply answering any questions you might have – not just about coins, but any category of collectibles. We hope you will attend the auction in person. If unable to attend, you can always follow the action and bid through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding, and online bids with HERITAGELive!®.

Our best wishes go out to you and yours for the upcoming holiday season.

Sincerely,

Greg Rohan President Todd Imhof

# **SESSION ONE**

#### **COLONIALS**

1723 Hibernia Farthing Pattern, SP64 Struck in Silver, W-12500

3001 1723 Hibernia Pattern Farthing, Silver SP64 PCGS. M. 3.2-Bc.10, W-12500, R.5. The king's nose points between IA in GRATIA on this variety, one of three known for the 1723 silver Hibernia farthing patterns. This piece almost certainly derives from the small cache that turned up in Europe in the 1970s. Gold and gunmetal toning appears mottled over silvery surfaces. Strike definition is razor-sharp on this Choice specimen. Listed on page 46 of the 2020 *Guide Book*. Population: 10 in 64 (2 in 64+), 5 finer (10/19). NGC ID# 2AT7, PCGS# 179

# (1737) Higley Copper, AG3 Friedus 3.2-C Broad Axe Variety

3002 (1737) Higley Copper, Broad Axe, J CUT MY WAY THROUGH, AG3 PCGS. Breen-242, W-8260, Friedus 3.2-C, R.6. 132.5 grains. The Higley coppers, also known as Granby coppers, were produced by Dr. Samuel Higley, a Granby, Connecticut medical doctor who purchased land that included a copper mine. According to legend, Higley was fond of paying his tab at the local tavern with his own coins. There are few facts about these coins, but a great deal of numismatic myth. The Higley coppers were the first copper coins produced in colonial America, and are incredibly important to the numismatic historian.

The central design motifs on both sides are clearly visible, while portions of the peripheral lettering are illegible on this lightly corroded dark olive-brown example. We expect considerable interest in this piece as an affordable Higley copper when compared to most examples in the marketplace. Listed on page 51 of the 2020 *Guide Book*.

Ex: Corrado Romano Collection (Stack's, 6/1987), lot 22; Stack's (1/2010), lot 4109. NGC ID# AUAX, PCGS# 213

#### LARGE CENT

**INDIAN CENTS** 

1793 S-8, B-13 Wreath Cent, VF30 Vine and Bars Edge

3003 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF30 NGC. Breen Die State II with a light crack along the diagonal reverse die bulge. The leaves over the date have a horizontal stem on this obverse die that was used for Sheldon-8, 9, and NC-4. The reverse has a triangular bow that appeared on Sheldon-8 only. This piece has intermingled chocolate and steel-brown surfaces with faint surface roughness and minor handling marks as expected on these early copper coins. Trivial rim bumps are noted at 6 o'clock on the obverse and at 6 o'clock on the reverse. Our EAC grade Fine 15. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

#### PROOF FLYING EAGLE CENT

1858 Flying Eagle Cent, PR63 Large Letters, Snow-PR1

3004 1858 Large Letters PR63 PCGS. Snow-PR1. Snow estimates a mintage of 100 1858 Large Letters proof cents. He writes: "These have deep mirrors and needle sharp strikes — unmistakable as proofs. ... I would estimate that about 50 examples exist today." This Select proof displays flashy bronze-gold surfaces with reflective fields and lightly frosted motifs. Contact is trivial. An important offering from the first year of publicly available proof coinage. NGC ID# 227C, PCGS# 2042

1859 Indian Cent, MS66+ First Year of the Design

3005 1859 MS66+ PCGS. CAC. While 1858 Indian cents exist in circulation strike and proof format, they are patterns and were not issued for actual circulation. The 1859 Indian cents introduced the design to the public, lacking a shield at the top of the reverse, making this a one-year design. This piece is spectacular, featuring sharp design motifs and splendid pale gold luster. The Plus designation in addition to the CAC endorsement place this one-year-type coin at the upper end of availability in Premium Gem condition. Population: 36 in 66 (7 in 66+), 0 finer. CAC: 17 in 66, 0 finer (10/19). NGC ID# 227E, PCGS# 2052

# 1867 Indian Cent, MS65 Red Repunched 18

3006 1867 MS65 Red PCGS. Snow-5. The 1 in the date is repunched below the base and the left serif. The Indian cents of the late 1860s are all extremely rare with full red mint color. This sharply defined piece has a bold strike and brilliant luster. The 1867 is conditionally rare, per the population data the reveals just three numerically finer pieces at PCGS and at NGC. Population: 39 in 65 (4 in 65+) Red, 3 finer (10/19). NGC ID# 227R, PCGS# 2090

## 1873 Snow-1, FS-101 Cent, MS64 Brown Fully Doubled LIBERTY

3007 1873 Doubled LIBERTY, Snow-1, FS-101, MS64 Brown NGC. The FS-101 variety of the 1873 Closed 3 Indian cent has the entire word LIBERTY doubled, unlike the less important FS-102 that only has the L doubled. The difference is important to understand, as it is the FS-101 that is recorded and priced in the *Guide Book* and demands the full attention of Indian cent specialists. This Choice Mint State piece has a few trivial marks on its dark chocolate-brown surfaces that exhibit traces of original red mint color. NGC has certified seven of these as MS64 Brown, two as MS64 Red and Brown, and one as MS65 Red and Brown (10/19). NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

# 1888 Indian Cent, MS66 Red Registry Set Contender

3008 1888 MS66 Red PCGS. The 1888 Indian cent claims an adequate mintage of 37.4 million pieces, but most of the coins were released into circulation and few were saved by contemporary collectors. As a result, the 1888 is rare in MS66 condition, especially with original red surfaces. This spectacular Premium Gem is impeccably preserved, with vibrant mint luster and outstanding eye appeal. The design elements show just a trace of the usual softness on the headdress feathers. Population: 18 in 66 (2 in 66+) Red, 1 finer (10/19). NGC ID# 228G, PCGS# 2168

# 1894 Repunched Date Cent, MS64 Red Dramatic Doubling, FS-301

3009 1894/1894 Repunched Date, Snow-1, FS-301, MS64 Red PCGS. This *Guide Book* variety features the boldest repunched date in the Indian cent series. Not only are all four digits from the initial logotype visible, but the northeast spread is dramatic. A shimmering crimson-red near-Gem that has occasional hints of ruby-red color in the protected areas. Sharply struck and highly collectible. NGC ID# 228N, PCGS# 37584 Base PCGS# 92189

# 1907 Indian Cent, MS67+ Red Surprisingly Scarce in the Finer Grades The Sole Finest Example of the Date

3010 1907 MS67+ Red PCGS. As pointed out by Dave Bowers, true Gem Indian cents from 1900-1909 are very elusive, as they were not saved like the dates were from 1880 through 1899. The late John Pittman once charged Bowers with finding him a *true* Gem 1907. We believe that John would have liked this particular coin as it has rich, warm red color over each side and is virtually flawless, with only the tiniest flecks of carbon visible beneath a glass. Exceptional overall quality. This is the only Superb Gem Red 1907 Indian cent with a Plus designation from either service. Population: 5 in 67 (1 in 67+) Red, 0 finer (10/19). NGC ID# 2294, PCGS#

#### PROOF INDIAN CENT

1872 Indian Cent, PR66 Red Among the Finest Non-Cameo Examples

3011 1872 PR66 Red PCGS. From a mintage of 950 pieces, the 1872 proof Indian cent is an elusive issue in Premium Gem condition, with the Red designation. This spectacular Premium Gem proof exhibits sharply detailed design elements and hazily reflective fields that show some modest (but undesignated) cameo contrast. The original red surfaces are impeccably preserved. Population: 7 in 66 Red, 0 finer (10/19). NGC ID# 229R, PCGS# 2305

#### LINCOLN CENTS

1914-D Cent, MS65+ Red and Brown Conditionally Rare Series Key

3012 1914-D MS65+ Red and Brown PCGS. CAC. When numismatic discussions turn to keys of the Lincoln cent series, several important issues are always named, including the 1909-S VDB cent, the 1922 "Plain" cent, and the 1955 Doubled Die Obverse. Of course, the 1914-D is also always part of the discussion. The mintage fell short of 1.2 million cents in Denver that year, and survivors are typically well worn. Mint State pieces are infrequently encountered, and Gem or finer pieces are rare. Although graded as a Red and Brown example, both sides are subdued red with no spots or marks to mention. The strike is bold and this piece presents generous eye appeal. Population: 73 in 65 (3 in 65+) Red and Brown, 4 finer. CAC: 34 in 65 Red and Brown, 2 finer (10/19). NGC ID# 22BH, PCGS# 2472

#### 1916 Cent, MS67+ Red Tied for Finest Certified, CAC

3013 1916 MS67+ Red PCGS. CAC. A new hub die gets credit for the razor-sharp strike on this high-end, Superb Gem 1916 cent. Lemon-gold and fire-orange colors resonate from finely textured surfaces, illuminated by vibrant mint luster. The reverse adds shades of lilac to the attractive color medley. Plus-graded with CAC endorsement, this Registry Set worthy 1916 shows a solitary mark above D and S of UNITED STATES, and a few tiny, inconsequential carbon flecks — none of which are of the least distraction in hand or under a glass. Population: 17 in 67+ Red, 0 finer. CAC: 21 in 67, 0 finer (9/19). NGC ID# 22BN, PCGS# 2488

# 1922 No D Cent, MS62 Brown Die Pair 2, Guide Book Variety

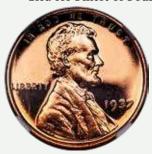

3014 1922 No D, Strong Reverse, FS-401, MS62 Brown PCGS. All cents struck in 1922 were produced at the Denver Mint. However, eager to prolong die life, press operators frequently polished the working dies to remove flowlines, and in the process, the D mintmark was effaced or partially effaced from a few of the obverses. The No D variety known as Die Pair 2 shows no trace of a mintmark on the obverse, and the reverse is a fresh die with strong details — it is the most sought-after of the various No D varieties of 1922.

This Mint State coin is rare, most Die Pair 2 coins being well-circulated. Glossy chestnut-brown surfaces with bronze-gold accents in the peripheral fields complement a lack of any wear. Grade-limiting contact is minor, if even detectible, and the strike is bold — softness in the obverse portrait is from die wear and polishing. An outstanding example of this important variety. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

#### PROOF LINCOLN CENT

1937 Cent, PR67 Red Ultra Cameo Tied for Finest of Four Known Ultra Cameos

3015 1937 PR67 Red Ultra Cameo NGC. The Mint returned to proof coinage in 1936, producing first Satin Finish cents, followed later by Brilliant Finish coins from polished dies. The 1937 proof was entirely in the Brilliant Finish, with a mintage of 9,320 pieces. This Superb Gem Red coin is something special for the Registry collector. Red Cameo examples are occasionally seen, but just four 1937 proofs are designated Red Ultra Cameo (all NGC coins), of which this piece is one of the two finest (11/19). The glimmering mirrored fields provide pleasant contrast with the creamy-pink devices, and neither side has distracting blemishes. NGC ID# 22L4, PCGS# 93338

#### THREE CENT SILVER

#### PROOF THREE CENT SILVER

1864 Three Cent Silver, MS68 None Numerically Finer at Either Service

3016 1864 MS68 NGC. Three cent silver pieces in high Mint State grades are challenging from 1862 on. Nearly the entire production of non-Proof coins dated from 1863 to 1872 was melted in 1873. This 1864 Superb Gem is a rare survivor, both in an absolute sense and conditionally so.

The gleaming obverse is partially prooflike, while the reverse coruscates with frosted silver luster, itself prooflike among the central devices. Almond-gold toning graces the margins on both sides, surrounding the vibrantly silver centers. The strike is razor-sharp despite a heavily clashed obverse die. Neither PCGS nor NGC has seen a numerically finer example, although NGC reports a single MS68 $\star$ . NGC Census: 5 in 68 (1 in 68 $\star$ ), 0 finer (10/19). NGC ID# 22ZE, PCGS# 3684

1858 Three Cent Silver, Sharp PR67 Scarce in All Grades

3017 1858 PR67 NGC. CAC. The 1858 is the first issue in the proof silver three cent series with a recorded mintage, given in the Guide Book as 210 pieces. Certified population data shows 211 pieces have been graded, although this figure is undoubtedly (highly) inflated by resubmissions. A survival of possibly 100 coins in all grades is more in line with the frequency of auction appearances: Only a couple coins are auctioned per year on average. This beautiful Superb Gem is fully struck, with both sides blanketed in uniformly blended lavender-gold and olive-gray toning. The devices are notably frosty and deliver modest contrast beneath the rich patina. Housed in a prior generation holder and rare this well-preserved. Census: 4 in 67 (1 in  $67 \pm$ ), 1 finer. CAC: 3 in 67, 0 finer (10/19). NGC ID# 27C5, PCGS# 3705

#### 1864 Three Cent Silver, PR67 Cameo Beautifully Contrasted and Toned

3018 1864 PR67 Cameo NGC. Cameo examples of this soughtafter proof issue are rare, particularly in Superb Gem condition. This example displays sharp definition and deep field mirroring. A dusting of rose-pink and sea-green toning graces each side, accenting modest cameo contrast. Census: 6 in 67 Cameo, 1 finer (10/19). NGC ID# 27CA, PCGS# 83714

#### THREE CENT NICKEL

#### 1875 Three Cent Nickel, MS67 Seldom Located as a Circulation Strike

3019 1875 MS67 NGC. For the collector seeking an overlooked series, circulation strike three cent nickels are worthy of consideration. Proofs were set aside, but only a couple of handfuls of each date have survived of the business strikes (at least in Uncirculated condition). This is a remarkably well-preserved example. The surfaces are bright and untoned with glowing mint frost and complete strike details. As one would expect, there are no marks worthy of mention. Census: 4 in 67 (1 in 67★), 0 finer (10/19). NGC ID# 22NS, PCGS# 3743

#### PROOF SHIELD NICKELS

# 1866 Rays Nickel, PR67 First-Year Five Cent Nickel Coinage

3020 1866 Rays PR67 NGC. Despite the existence of a few 1865-dated patterns that may or may not have been struck in 1865, the 1866 Rays nickel was the first regular-issue coinage of the five cent nickel denomination. A shortage of silver during and following the Civil War had the U.S. Mint looking for coinage alternatives. An alloy of 75% copper and 25% nickel was chosen for three-cent and five-cent pieces. Both denominations were previously produced in silver in the form of small diameter three-cent coins and half dimes. Coinage of both silver denominations continued through 1873. This Superb Gem represents the first year of nickel coinage in style, with delicate gold toning and faint iridescent overtones. The fields are mirrored with no spots, and the design elements are sharply defined. NGC ID# 276G, PCGS# 3817

# 1867 Rays Shield Nickel, PR66 Cameo Interesting and Rare Dannreuther-1

3021 1867 Rays PR66 Cameo NGC. The 1867 Rays Shield nickels were apparently struck, then restruck at various times, according to extensive research conducted by John Dannreuther, published in the June 2007 PCGS Rare Coin Market Report and previously summarized in the 2006 Bowers Guide Book of Shield and Liberty Head Nickels.

According to the latter reference:

"The 1867 With Rays Proof ... is a classic rarity. Probably no more than several dozen are known; there are some prooflike Mint State coins that have been mistakenly called Proofs. The mintage is unknown. Students of the series have given many opinions, including the statement that no Proofs at all were struck until several years later. John Dannreuther, who has studied the die technicalities, has demonstrated that Proofs were struck on several runs. Per the same authority, an estimated 15 originals were made in 1867, plus perhaps three or more times that many were made on at least five later production sequences. Likely, dealers with close connections to the Mint — John W. Haseltine being the prime example — simply ordered more Proofs as needed for store stock. The depth and breadth of such restriking is just beginning to be appreciated, with new leading-edge scholarship by Dannreuther and others."

Intense contrast is evident throughout, and the surfaces are mostly nickel-gray, with faint glints of rose on the obverse. We note an interesting planchet flaw or strike-through on the right part of the W in WE, and another die crack on the reverse, through the U in UNITED and the rays below, appears to connect to a small planchet lamination. A couple of other minor planchet blemishes appear on the reverse under a loupe, all Mint-made. There are no other obvious marks or contact on either side. An appealing and interesting coin (as well as a quite rare one) that should prove equally rewarding to the type collector or specialized researcher. Census: 4 in 66 Cameo (2 in 66 $\bigstar$ ), 0 finer (10/19). NGC ID# 276H, PCGS# 83818 127001 QP

#### 1867 Shield Nickel, PR67 Cameo Popular No Rays Design

3022 1867 No Rays PR67 Cameo NGC. A spectacular Superb Gem proof representative from the first year of the popular No Rays design, this coin exhibits sharply detailed, frosty design elements that contrast noticeably with the deeply mirrored fields. The impeccably preserved surfaces show a few highlights of pale jade toning. Census: 3 in 67 Cameo (1 in 67★), 0 finer (10/19). NGC ID# 5EB6, PCGS# 83821

#### 1868 Shield Nickel, PR66 Ultra Cameo None Seen in Higher Numeric Grades

3023 1868 PR66 Ultra Cameo NGC. With an estimated mintage of 600 pieces, the 1868 proof Shield nickel is an elusive issue in all grades. This spectacular Premium Gem exhibits sharply detailed design elements throughout, with deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved surfaces show some parallel horizontal striations in the reverse field and a few hints of golden-tan toning. Census: 3 in 66 Ultra Cameo (1 in 66+, 1 in 66★), 0 finer (10/19). NGC ID# 3UJH, PCGS# 93822

#### 1869 Shield Nickel, PR67 Cameo None Certified Finer

3024 1869 PR67 Cameo NGC. Outstanding field-to-device contrast appears on both sides of this splendid Shield nickel. The fields are fully and deeply mirrored, and provide a splendid backdrop for the lustrous and sharply defined devices of this Superb Gem Cameo proof. Census: 2 in 67 Cameo, 0 finer (10/19). NGC ID# AMTZ, PCGS# 83823

#### 1870 Shield Nickel, PR67 Cameo Tied for Finest Cameo at NGC

3025 1870 PR67 Cameo NGC. This delightful Superb Gem proof exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices to create a noticeable cameo effect. The virtually flawless surfaces show a few die striations in the fields and subtle highlights of pale jade toning add to the terrific eye appeal. Census: 3 in 67 Cameo, 0 finer (10/19). NGC ID# 276L, PCGS# 83824

# 1875 Shield Nickel, PR67+ Attractive Multicolor Toning

3026 1875 PR67+ NGC. The impeccably preserved surfaces of this Plus-graded Superb Gem proof are blanketed in shades of lavender and emerald-green patina, with sharply detailed design elements and deeply reflective fields underneath. Eye appeal is outstanding. From a small proof mintage of 700 pieces. Census: 2 in 67 (1 in 67+), 0 finer (10/19). NGC ID# 276S, PCGS# 3829

#### 1875 Shield Nickel, PR68 Cameo The Finest Known

3027 1875 PR68 Cameo NGC. The mintage for proofs is not known exactly, but estimated between 1,000 and 1,250 pieces. The finish on proofs of this year is variable, some are shallowly mirrored, some deeply so. This is one of the latter. The fields show exceptionally deep mirroring with starkly contrasting frosted devices. Very subtle iridescence can be seen when closely examined. The surfaces are essentially perfect. Census: 1 in 68 Cameo, 0 finer (10/19). NGC ID# 276S, PCGS# 83829

## 1876 Shield Nickel, PR68 Ultra Cameo The Finest Certified

3028 1876 PR68 Ultra Cameo NGC. NGC has certified a single PR68 Cameo 1876 Shield nickel, along with this example that they grade PR68 Ultra Cameo. PCGS has never certified an 1876 Shield nickel as PR68, regardless of the designation. Therefore, this piece is the sole finest known 1876 Shield nickel. Strong bidding competition is anticipated when this stunning Superb Gem crosses the auction black. This piece has brilliant and untoned light gray surfaces with full mirrors and excellent cameo contrast. An impressive piece for the connoisseur. Census: 1 in 68 Ultra Cameo, 0 finer (10/19). NGC ID# 276T, PCGS# 93830

#### 1877 Shield Nickel, PR67 Cameo Tied for Finest Graded Ex: Childs Collection

3029 1877 PR67 Cameo PCGS. Ex: Childs. The meager quotient of proofs struck -- various pundits pose various quantities, none large of the 1877 Shield nickel is under continuous date pressure as the proof-only key to the series, and one of only two such issues from 1866 to 1883, along with the 1878 issue, struck in a larger amount put at 2,350 pieces. (The 2016 Guide Book quotes 900 for the 1877; Bowers' series Guide Book guesses at 1,250 to 1,500 pieces, but notes that struck exceeding 900 or so were done "off the books.") In any case, the present PR67 Cameo PCGS coin is among the highest-graded survivors of the issue, regardless of contrast level — one of only eight such submissions at PCGS. The finest non-Cameo examples at PCGS are a handful of PR66 pieces. The silver-gray surfaces show a nice sharp strike with good contrast and a hint of golden patina. A small planchet flaw appears on the reverse between UNITED and STATES, as struck, a future pedigree ID. Population: 10 in 67 (1 in 67+) Cameo, 0 finer (10/19). Believed to have been purchased from the Mint by Walter H. Childs; Walter Childs Collection (Bowers and Merena, 8/1999), lot 114. NGC ID# 276U, PCGS# 83831

# 1879/8 Shield Nickel, PR68 Popular *Guide Book* Variety

3030 1879/8 PR68 PCGS. The remnants of an undertype 8 (or possibly a 9) are clearly visible below the final digit in the date on this spectacular PR68 example, which in itself is an unusual, but not unprecedented, occurrence in U.S. coinage history. The overdate aside, this is among the most impressively preserved specimens that could be imagined for the issue. While contrast is light, owing to the luminous lavender-blue and peach patina over each side, the mirrors retain considerable gleam, particularly on the reverse. Faintly frosted devices offer characteristically exquisite detail. Population: 7 in 68, 1 finer (10/19).

Ex: Central States Signature (Heritage, 4/2011), lot 5045. NGC ID# 22PG, PCGS# 3834

#### 1879 Shield Nickel, PR68 Finest Certified NGC Example

3031 1879 PR68 NGC. Only 3,200 proof Shield nickels were struck in 1879, to accompany a small business-strike mintage of 25,900 pieces. This magnificent PR68 example is the single-finest certified specimen at NGC (10/19). The design elements exhibit razor-sharp definition and the impeccably preserved surfaces include hazily reflective fields, with delicate highlights of cerulean-blue and pale gold toning. NGC ID# 22PG, PCGS# 3833

#### 1882 Shield Nickel, PR68 Cameo None Finer in Any Proof Finish

3032 1882 PR68 Cameo NGC. A large circulation strike mintage of 11.4 million pieces was supplemented by 3,100 proofs, of which none are numerically finer than this remarkable PR68 Cameo. Nickel-gray mirrored fields have a bluish tint, and are faintly iridescent when viewed at an angle — deeply reflective throughout both sides. Richly frosted devices provide blatant contrast with the glassy-smooth mirrors. This is a sharply struck and essentially flawless Cameo proof of seemingly unimprovable quality. Tied with two other PR68 Cameo coins — one at each service. NGC Census: 2 in 68 Cameo, 0 finer (10/19). NGC ID# 5EBF, PCGS# 83837

#### 1883 Shield Nickel, PR68 Final-Year of Design

3033 1883 PR68 NGC. A generous mintage of 5,419 proof Shield nickels was accomplished in 1883, the final year of the design. This spectacular PR68 specimen exhibits impeccably preserved surfaces with subtle highlights of pale jade and lavender toning. The design elements are sharply detailed and the fields are hazily reflective. Census: 1 in 68, 0 finer (10/19). NGC ID# 276Z, PCGS# 3838

#### LIBERTY NICKEL

1912-D Liberty Nickel, MS66+ Exemplary Quality for the Grade

3034 1912-D MS66+ PCGS. The number of 1912-D Liberty nickels certified in MS66 has increased slightly over recent years, heightening the importance of the few examples in this grade that are distinctly higher quality than the majority. This Plus-graded piece is clearly one of those above-average pieces, second to only a lone MS67 coin at PCGS. Lovely pastel hues adorn each side in colorful array, while the softly frosted luster is without abrasion. The usual strike weakness affects the corn ear to the left of the wreath bow, as is nearly unavoidable on this inaugural branch mint nickel. Population: 72 in 66 (8 in 66+), 1 finer (10/19). NGC ID# 277P, PCGS# 3874

#### PROOF LIBERTY NICKEL

1886 Nickel, Colorful PR68 Top of the Condition Census Sole-Finest Certified Proof

3035 1886 PR68 PCGS. This is the finest 1886 proof Liberty nickel certified. Reflective fields and satiny devices offer vivid multicolor toning, and the surfaces are beautifully preserved, elevating this vibrantly mirrored and painstakingly preserved proof above all of its Superb Gem counterparts.

High-grade 1886 proofs experience heightened demand due to the key date status of its 1886 circulation strike brethren, even though — as a proof — the date is mid-pack among other Liberty nickels. Likewise, even superior quality proofs show some of the same strike characteristics that visit most Liberty nickel dates regardless of grade. Minor strike softness is visible on some right-side obverse stars, and the problematic corn ear to the left of the wreath bow on the reverse lacks kernel separation. Still, the surface quality is just about faultless, and the eye appeal is extraordinary. Population: 1 in 68, 0 finer (9/19). NGC ID# 277U, PCGS# 3884

#### **BUFFALO NICKELS**

1917 Buffalo Nickel, MS67+ Rare Any Finer

3036 1917 MS67+ PCGS. CAC. The 1917 Buffalo nickel claims a substantial mintage of 51.4 million pieces, making it an available issue in all grades up to the MS65 level. The population drops off considerably in MS67, however, and finer coins are virtually unobtainable. This Plus-graded Superb Gem exhibits sharply detailed design elements, with fine definition on the hair above the braid and the bison's shoulder. The impeccably preserved, mostly brilliant surfaces show a few subtle hints of ice-blue and pale jade toning at selected angles. Vibrant mint luster adds to the terrific eye appeal. Population: 26 in 67 (4 in 67+), 3 finer. CAC: 6 in 67, 0 finer (10/19). NGC ID# 22RD, PCGS# 3934

#### 1920 Buffalo Nickel, MS67 Breathtaking Quality

3037 1920 MS67 PCGS. CAC. When we offered this coin 17 years ago, it was one of four similar pieces certified MS67 with none finer. Today, the population has increased dramatically, but there are still none finer at either PCGS or NGC. This example has brilliant, satiny nickel-gray luster with hints of gold toning. The strike is bold. Population: 20 in 67 (1 in 67+), 0 finer. CAC: 3 in 67, 0 finer (10/19).

Ex: Long Beach Signature (2/2003), lot 5943. NGC ID# 22RP, PCGS# 3944

#### 1923 Buffalo Nickel, MS67 Rare in Finer Grades

million pieces, the 1923 Buffalo nickel is seldom encountered in MS67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem exhibits well-detailed design elements, with a touch of softness on the hair above the braid and the bison's shoulder. The impeccably preserved lustrous surfaces display subtle highlights of ice-blue and lime-green toning. Population: 29 in 67 (1 in 67+), 1 finer. CAC: 5 in 67, 0 finer (10/19). NGC ID# 22RV, PCGS# 3949

#### 1924-S Buffalo Nickel, MS64 Seldom Offered CAC Coin

3039 1924-S MS64 PCGS. CAC. Studying this piece beneath a loupe, it is difficult to discern individual abrasions, although the suggestion of contact on some of the high points of the devices prevents a Gem grade from PCGS. Nonetheless, as is appropriate for this coin, the quality easily earns CAC recognition in MS64. Both sides have faintly iridescent golden-gray luster. This San Francisco issue is famous for poor strike sharpness, and the present coin is moderately weak in the centers. Higher-grade examples are scarce. CAC: 12 in 64, 14 finer (10/19). NGC ID# 22RZ, PCGS#

# 1924-S Nickel, MS65+ Only Five Finer at PCGS, CAC

3040 1924-S MS65+ PCGS. CAC. The 1924-S is seldom seen with full details, but this high-end Gem example comes as close to a full strike as one is likely to see. Lively mint luster illuminates the well-defined obverse, and the reverse is even sharper, with the bison's head and tail crisply struck. Die wear is mostly confined to the obverse, which shows an overall stippled effect that is visible under magnification, but unseen to the unaided eye. The feather ends are sharply defined, as are most of the central hair strands.

Sunset-gold toning drifts inward from the margins before yielding to attractive, bluish-gray centers. The PCGS Plus designation is supplemented by CAC endorsement — together, they elevate this Gem nickel to the top half-dozen seen by PCGS. A splendid condition rarity, destined to elevate almost any advanced Buffalo nickel set. Population: 4 in 65+, 5 finer. CAC: 12 in 65, 2 finer (10/19). NGC ID# 22RZ, PCGS# 3953

1927-D Buffalo Nickel, MS66 Rare Top-Grade Registry Coin One of Four This Fine at CAC

3041 1927-D MS66 PCGS. CAC. The finest 1927-D Buffalo nickels certified are Premium Gems, and these pieces are rare. Just 21 coins are reported by PCGS and NGC combined, including possible duplication. Registry collectors alone create enormous demand for these coins at auction. The present example has the distinction of a CAC green label — one of just four top-grade coins so recognized. Strike sharpness is impressive around the borders, particularly on the bison's head and the tips of the Indian's feathers. The centers are nearly as sharp, with only trivial softness observed on the bison's shoulder. Satiny luster yields warm golden and lavender toning, with no distracting abrasions visible. Population: 14 in 66 (1 in 66+), 0 finer. CAC: 4 in 66, 0 finer (10/19). NGC ID# 22S9, PCGS# 3961

1927-D Buffalo Nickel, MS66 Challenging Issue at This Level

3042 1927-D MS66 PCGS. CAC. The 1927-D Buffalo nickel claims a mintage of 5.7 million pieces, but the issue was not well-produced and high-quality examples are surprisingly difficult to locate. The dies were overused or widely spaced, causing many examples to show weak striking details and lackluster surfaces. The 1927-D is one of the most challenging issues of the series at the MS66 grade level, and finer coins are virtually unobtainable.

This spectacular Premium Gem exhibits unusually sharp definition on all design elements, with just the slightest trace of the usual softness on the hair above the braid. The impeccably preserved surfaces are lustrous and appealing, with faint hints of ice-blue and lime-green toning. Population: 14 in 66 (1 in 66+), 0 finer. CAC: 4 in 66, 0 finer (10/19). NGC ID# 22S9, PCGS# 3961

# 1928-S Nickel, MS67 Among the Finest Certified Obvious Registry Set Contender

3043 1928-S MS67 NGC. The 1928-S has long been rumored to have two mintmark sizes — a Large S and Small S — although positional differences and other factors such as die wear seem to account for most of the perceived size variations. Other 1928-S denominations have two mintmark sizes, adding to the discussion. The Heritage archives offer numerous high-grade examples for study to answer the question once and for all. This MS67 coin would fall in the Large S camp if there is indeed a discernible difference in mintmark sizes.

Lustrous, smooth surfaces and exceptional eye appeal collaborate to make this Superb Gem 1928-S one of just five pieces to be awarded such a high grade at both NGC and PCGS combined. Brilliant, satiny nickel-gray fields and devices are essentially untoned and sharply struck for the issue, while there are no marks of any significance to mention. Census: 3 in 67 (1 in 67+★), 0 finer (10/19). NGC ID# 22SD, PCGS# 3965

#### 1936-D Buffalo Nickel, MS67+ Extremely Rare in Finer Grades

3044 1936-D MS67+ PCGS. CAC. From a mintage of 24.8 million pieces, the 1936-D Buffalo nickel is scarce in MS67 condition, and finer coins are virtually unobtainable. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces show subtle hints of ice-blue toning at certain angles. Vibrant mint luster adds to the terrific eye appeal. PCGS has graded three numerically finer examples (10/19). NGC ID# 22ST, PCGS# 3978

# 1937-D Three-Legged Nickel, MS65 Early NGC Slab, CAC Green Label

3045 1937-D Three-Legged, FS-901, MS65 NGC. CAC. During the 1920s and 1930s, the branch mints made every effort to extend the life of working dies. Minor cracks and metal flowlines produced by extended stress in the die steel could often be temporarily effaced by lapping the die, a process that involved "grinding" a worn die face into a lap (a finely curved metal head that would make contact with the fields without distorting their plain) coated in an abrasive compound that would aggressively polish the most worn parts of the die. This practice extended die life in many case, but it also resulted in the weakening of shallow design elements in the die as metal was polished away. One of the most extreme cases of this phenomenon is the 1937-D Three-Legged Buffalo nickel. The reverse die was ground down to the point were the shallow forward right leg of the bison was almost entirely effaced.

This variety is sought-after today in all grades, and Gem examples are especially scarce. The present example is CAC endorsed. Smooth, satiny mint luster yields warm golden toning over each side, with no distracting abrasions seen. The bison's shoulder exhibits a touch of strike weakness, but the peripheral elements such as the bison's head and the Indian's headdress feathers are bold. Housed in a prior generation holder. Census: 0 in 65, 0 finer. CAC: 34 in 65, 6 finer (10/19). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

#### PROOF BUFFALO NICKEL

1915 Buffalo Nickel, PR67+ Popular Matte Proof Issue

3046 1915 PR67+ PCGS. The matte proof finish was not popular with contemporary collectors, but present-day numismatists value them for their artistic quality and rarity. This Plus-graded Superb Gem offers sharply detailed design elements and vibrant matte luster, under shades of ice-blue and lime-green toning. Eye appeal is terrific. Population: 81 in 67 (14 in 67+), 8 finer (10/19). NGC ID# 278U, PCGS# 3992

#### **EARLY HALF DIMES**

1795 Flowing Hair Half Dime, AU55 V-4, LM-10, Middle Die State

3047 1795 V-4, LM-10, R.3, AU55 NGC. This is an available variety, famous for its late die state wherein a heavy rim cud appears along the tops of the TY in LIBERTY and star 9. This coin is cracked in that location, but the cud has not yet fully broken away. It is a middle die state coin, already lapped on the obverse to removed clash marks, weakened many of the peripheral stars. The sharpness of Liberty's portrait, the eagle, and the wreath leaves is impressive, and neither side has significant signs of wear. The steel-gray surfaces are satiny and minimally marked. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1800 Half Dime, AU53 Rare V-3, LM-2 Variety Only 5-12 Examples Believed Known

3048 1800 V-3, LM-2, R.7, AU53 PCGS. This is a rare offering, indeed. It is an example of the R.7 V-3, LM-2 1800 half dime, one of an estimated 5 to 12 pieces known. This representative, second on the Condition Census, is mostly brilliant with a moderately subdued appearance. The strike is bold around the rims and somewhat light over the centers. Clash marks occur near stars 11 to 13. It is identifiable by an angling mark along the left side of the lower neck of Liberty. The significance of this offering cannot be overstated. Expect spirited bidding from advanced specialists. Population: 1 in 53, 0 finer (10/19). NGC ID# 2326, PCGS# 38602 Base PCGS# 4264

#### **BUST HALF DIMES**

1832 Half Dime, V-6, LM-13, MS67 Colorfully Toned, Immaculate Surfaces

3049 1832 V-6, LM-13, R.3, MS67 PCGS. Five obverse dies and 10 reverse dies combine to create 14 varieties used to strike 965,000 pieces in 1832 — the second-lowest mintage of the Capped Bust half dime series (1829-1837). The LM-13 variety shows repunching on star 12 and a filled lower loop on the 8 in the date, while the T in UNITED sits low, rotated counterclockwise. The broad stem end aligns with the serif of C in 5C.

This is a colorful and vividly toned Superb Gem LM-13 example. Pale-blue, violet, ruby-red, and golden hues occupy the margins and extend inward to silver-gray centers, with bold mint luster throughout both sides. A needle-sharp strike diminishes only slightly at the outer edges of UNITED S, and where 5 of the denomination was shallowly entered into the die. The frosted surfaces show immaculate preservation. Population (all varieties combined): 11 in 67 (2 in 67+), 2 finer (10/19). NGC ID# 232E, PCGS# 38684 Base PCGS# 4279

#### 1834 Half Dime, Splendid MS67 V-1, LM-2, Frosted Silver-White Coin

3050 1834 V-1, LM-2, R.1, MS67 NGC. Star 8 almost touches the cap, and the second A in AMERICA touches the adjacent arrowhead to confirm the LM-2 variety — the only die pair among five 1834 varieties with both of those attributes. Nearly 1.5 million 1834 half dimes were reportedly struck, which likely includes half dimes dated 1832, 1833, and possibly earlier dates. Most of the 1834 pieces were produced with the LM-2 dies. This is a brilliant and frosted Superb Gem example — sharply struck and lustrous, with finely grained surfaces and plentiful eye appeal. Census: 9 in 67 (1 in 67★), 1 finer (10/19). NGC ID# 232G, PCGS# 38702 Base PCGS# 4281

#### PROOF SEATED HALF DIME

1872 Half Dime, PR66+ Deep Cameo Just One Finer at PCGS Ex: Eliasberg

3051 1872 PR66+ Deep Cameo PCGS. Ex: Eliasberg. This sharply struck brilliant proof features extraordinarily deep mirrors and frost-white devices for stunning, white-on-black cameo contrast. We are aware of just one numerically finer piece at either service (a PR67+ Deep Cameo PCGS, the Simpson coin), although the NGC Census indicates a PR68★ Ultra Cameo piece that we have not traced. In any case, this Plus-graded Premium Gem Ultra Cameo example is the finest 1872 deep-mirrored proof we have ever offered, and it possesses the important Eliasberg pedigree. A few delicate lines on seemingly flawless, silver-mirrored fields are the only obstacles to an even finer grade. The eye appeal is spectacular. Population: 1 in 66 (1 in 66+) Deep Cameo, 1 finer (9/19). NGC ID# 2369, PCGS# 94455

#### **EARLY DIMES**

#### PROOF BUST DIME

#### 1798 Draped Bust Dime, XF40 Small 8, JR-3

3052 1798 Small 8, JR-3, R.5, XF40 NGC. The JR-3 is an elusive variety characterized by a small left-leaning 8 in the date. Zack, Scuderi, and Sherrill write "at least 30 examples known, about six of which are in MS." The present coin shows light wear on the design elements but much interior detail remains intact on Liberty's hair. The lightly abraded surfaces show some planchet adjustment marks on the bust, with highlights of lavender-gray and blue-steel toning. Census (for the variety): 1 in 40, 1 finer (10/19). NGC ID# 236E, PCGS# 38752 Base PCGS# 4467

#### 1805 Draped Bust Dime, MS63 Four Berries, JR-2

3053 1805 4 Berries, JR-2, R.2, MS63 NGC. The 1805 Draped Bust dime claims a mintage of 120,780 pieces, with two die varieties known for the date. This coin represents the more available JR-2 variety, with four berries on the branch. The design elements of this attractive Select example display just a touch of softness on the upper stars on the left and the lightly marked surfaces are blanketed in shades of lavender-gray and sea-green toning. Census: 19 in 63, 51 finer (10/19). NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

#### **BUST DIME**

1835 Capped Bust Dime, MS65 Popular JR-4 Variety

3054 1835 JR-4, R.2, MS65 PCGS. CAC. A low D in UNITED identifies the die pairing. This lustrous, sharply struck Gem displays a whisper of chestnut patina. The reverse is essentially immaculate, and only minor signs of contact are evident on the obverse. The base of the 3 in the date shows some recutting. Although JR-4 is not rare in circulated grades, Mint State examples are elusive and Gems are rare. Population (for the variety): 1 in 65, 0 finer (10/19). NGC ID# 237F, PCGS# 38882 Base PCGS# 4527

# 1835 Capped Bust Dime, JR-4, PR63 Only 10-12 Proofs Believed Known

3055 1835 PR63 PCGS. JR-4, R.7. Breen's *Proof Encyclopedia* aptly describes this variety: "Wide date, 'horned' 8, recut 3, high 5, UN even but too high. Tall 0 in 10 C." Stars 1 and 10 touch denticles at the border. The D ending UNITED is noticeably lower than the rest of the word. The mintage of this early dime issue is unknown, but minuscule by any measure. The best estimate of the number of survivors is estimated by Coin Facts as 10-12 pieces known. This piece offers smoke-gray and aqua patina over surfaces that show considerable cameo contrast. Population: 4 in 63, 6 finer (10/19). Ex: ANA Signature (Heritage, 8/2007), lot 521; FUN Signature (Heritage, 1/2008), lot 2756. NGC ID# 237P, PCGS# 4557

#### **SEATED DIMES**

#### 1850 Seated Liberty Dime, MS66 Tied for Finest Certified

3056 1850 F-109, R.4, MS66 NGC. The 1850 Seated Liberty dime claims a mintage of 1.9 million pieces, but few survivors can match the quality and eye appeal of this spectacular Premium Gem. This coin exhibits sharply detailed design elements throughout, with many parallel die striations in the fields. The well-preserved surfaces show radiant satiny mint luster, with hints of prooflike reflectivity. This coin is tied with two examples at PCGS for finest certified. Census: 1 in 66, 0 finer (10/19). PCGS# 537889 Base PCGS# 4593

#### 1859-O Dime, MS67 Colorful Toning, Medium O Mintmark None Finer at PCGS

3057 1859-O Medium O, F-103, R.3, MS67 PCGS. Two mintmark varieties exist for the 1859-O dime: Large O and Medium O. The latter is slightly scarcer, according to Fortin. This is one of two Medium O die marriages, with the obverse showing an Open 5 in the date. Intermixed shades of ice-blue and lavender toning are the hallmark of this gorgeous Superb Gem dime. Strike detail is good, and lively luster shines through the patina. Blatantly high-end. Population: 4 in 67, 0 finer (9/19). NGC ID# 2395, PCGS# 538142 Base PCGS# 4620

#### 1874-CC Dime, VF Details Key Issue in the Seated Dime Series

3058 1874-CC Arrows, F-101, R.4 — Cleaned — NGC Details. VF. The 1874-CC is a rarity in the absolute sense of the word. The issue was initially struck to the extent of just 10,817 coins, and that small number was whittled down even further as coins were put into circulation in the Western regions. Problem surfaces are commonplace for the handful of pieces that managed to avoid being lost entirely. But few collectors have the luxury of being picky when it comes to the 1874-CC dime. Only 80 or so pieces are estimated to survive (though the number of certified representatives falls well-short of that estimate), and opportunities to acquire an example even in the lowest circulated grades are noteworthy occurrences. The cleaning noted on the insert is muted to some degree by the golden-gray toning seen across each side. But both obverse and reverse also show several shallow scratches.

#### 1875-CC Seated Dime, MS67 None Finer at NGC

3059 1875-CC Mintmark Above Bow, F-107, R.3, MS67 NGC. One of the more plentiful CC-mint issues, though of course a condition rarity as a Superb Gem, this is a strong candidate for the high-end date enthusiast or Carson City collector. The design elements are well-detailed and the lustrous surfaces are impeccably preserved. Census: 4 in 67, 0 finer (10/19).

Ex: Bowers and Merena (5/2010), lot 1824; Gene Gardner; Gardner Collection, Part III (Heritage, 5/2015), lot 98248. PCGS# 538381 Base PCGS# 4673

#### PROOF SEATED DIME

1891 Dime, Brilliant PR66+ Deep Cameo Bold White-On-Black Contrast, CAC

3060 1891 PR66+ Deep Cameo PCGS. CAC. F-130, R.3. Brilliant-white, liquidlike mirrors surround the snow-white motifs of this Premium Gem Deep Cameo dime. The 1891 issue required three die pairs to strike just 600 proofs. Popular as the final Philadelphia Seated dime proof issue, this coin displays thickly frosted devices with powerfully deep, impeccable fields. CAC endorsement confirms the quality. Population: 3 in 66 (2 in 66+) Deep Cameo, 2 finer. CAC: 3 in 66, 2 finer (9/19). NGC ID# 23DG, PCGS# 94788

#### **BARBER DIMES**

1894-O Barber Dime, Toned MS65 A Rarity in Mint State

3061 1894-O MS65 PCGS. This New Orleans issue was a workhorse of commerce. Circulated survivors are plentiful, but Mint State coins are seldom offered in any grade and it is unlikely that more than a few were initially preserved for numismatic purposes. This rare Gem displays satiny mint luster with uniform sea-green and yellow-gold toning. The design elements are sharp and eye appeal is strong. Population: 5 in 65 (1 in 65+), 12 finer (10/19). NGC ID# 23DU, PCGS# 4804

#### 1905-S Barber Dime, MS67 Registry-Grade Rarity Old Green Holder, CAC Approval

3062 1905-S MS67 PCGS. CAC. This Superb Gem 1905-S Barber dime is tied for the finest certified of the date, a rarity that is worthy of the highest-rated PCGS Registry set. The strike is sharp, and each side displays dappled sea-green, blue, gold, and lilac toning. Neither side has bothersome abrasions. Housed in an old green label holder with CAC endorsement. Population: 7 in 67, 0 finer. CAC: 5 in 67, 0 finer (10/19). NGC ID# 23EW, PCGS# 4837

## **MERCURY DIMES**

1916-D Mercury Dime, AU53 First Year Denver Key

3063 1916-D AU53 PCGS. The Denver mintmark has long been a thing of great desire on first-year Mercury dimes, leading many collectors to search through pocket change and bank rolls for decades in search of this elusive key date. Only 264,000 pieces were struck. The 1916-D is far and away the rarest date in the series. This About Uncirculated example is well-detailed, lacking only split definition of the fasces bands. Both sides have slate-gray color with hints of luster. A few hairlines and other marks accompany the AU53 designation. NGC ID# 23GY, PCGS# 4906

# 1916-D Mercury Dime, AU58 Full Bands Ideal Collector-Grade Example

3064 1916-D AU58 Full Bands PCGS. CAC. As the unequivocal key date and mintmark of the series, the 1916-D was minted in small quantity and slipped by largely unnoticed during the excitement over the much higher mintage Philadelphia introductory issue, struck late in 1916. It would be the 1930s and 1940s before collectors took serious aim at the 1916-D, by which time most of the mintage was well-circulated.

This example is an exception. Minimally marked silver-gray surfaces show only a brief period in circulation before this near-Mint 1916-D was rescued from a pocket or till. The horizontal and diagonal fasces bands are unabraded and sharp, and both sides show a natural speckling of bluish-gray patina that deepens at the borders. The CAC label adds an important endorsement. NGC ID# 23GY, PCGS# 4907

# 1916-D Mercury Dime, MS63 Full Bands Requisite Series Key Issue

3065 1916-D MS63 Full Bands PCGS. If not for an urgent need for 1916-D Barber quarters late in the year, in all likelihood the inaugural 1916-D Mercury dime would not command its title as the key date and mintmark of the series. The Denver Mint struck the new dimes in late November 1916. A halt to their production soon followed to fill a large order for quarters. Just 264,000 1916-D Mercury dimes were struck prior to year end. In comparison, the Philadelphia Mint struck more than 22 million pieces of the popular new Adolph Weinman design — more than enough to satisfy the public as well as collectors.

Few Mint State 1916-D dimes were preserved, nor were they missed until many years later when mintmark collecting became important in the 1930s. This Select Mint State example is one of the few Uncirculated survivors, with traces of golden-gray toning at the borders and attractive lilac-gray surfaces. Silver mint luster illuminates a sharp strike, which earns the important Full Bands designation. Only a few scattered light abrasions deny an even finer grade. NGC ID# 23GY, PCGS# 4907

#### 1926-S Mercury Dime, MS65+ Full Bands Condition and Strike Rarity

3066 1926-S MS65+ Full Bands PCGS. This amazing Mercury dime represents a scarce issue that is elusive in high grades, and similarly challenging with a bold strike like that exhibited on this piece. Both sides are exquisitely detailed with frosty silver luster and delicate gold toning. Population: 31 in 65 (2 in 65+) Full Bands, 15 finer (10/19). NGC ID# 5LX7, PCGS# 4959

#### 1928 Dime, MS67+ Full Bands Beautiful Border Toning

3067 1928 MS67+ Full Bands PCGS. CAC. his Superb Gem Philadelphia coin is conditionally rare and seemingly pristine under a loupe. Not only are the fasces bands sharp, but the peripheral legends are boldly brought up. Silvery interiors are frosty and unabraded, surrounded by vivid forest-green, violet, and gold border toning. Eye appeal is outstanding. Population: 45 in 67 (5 in 67+) Full Bands, 2 finer. CAC: 20 in 67, 1 finer (10/19). NGC ID# 23HX, PCGS# 4967

#### 1934 Dime, MS68+ Full Bands Nearly Perfect Surfaces

3068 1934 MS68+ Full Bands PCGS. Few series are collectible in grades higher than MS65, but Mercury dimes are generally available in superior condition, at least the issues from the 1930s and 1940s. This piece is essentially perfect. The surfaces display glowing mint luster and each side is unaffected by post-striking defects. The obverse is brilliant while the reverse shows just a hint of light golden patina. Population: 36 in 68 (3 in 68+) Full Bands, 0 finer (10/19). NGC ID# 5BZ8, PCGS# 4989

# 1936-D Dime, MS68 Full Bands Only 11 Such Pieces Certified by PCGS

3069 1936-D MS68 Full Bands PCGS. Compared to other mintmarked dimes from the 1930s and 1940s, the 1936-D is on the lower side in terms of the number of high-grade survivors. Only 11 coins have been certified in MS68 by PCGS and one at NGC, while none are finer at either service (10/19). This example displays thick mint frost with the usually seen die striations in the fields. The centers are more or less brilliant, while the borders show considerable toning. NGC ID# 5C48, PCGS# 5001

#### PROOF ROOSEVELT DIME

# 1968 'No S' Dime, PR66 Part of a Five-Piece Proof Set

3070 1968 Five-Piece 1968-S Proof Set Featuring a No S Dime, PR65-PR67 PCGS. A No S dime is the centerpiece of this five-coin proof set, four of which have the mintmark for San Francisco which made its debut on proofs in 1968. When the No S dime was first reported in Coin World in the May 29 issue, it was generally thought the lack of the mintmark was either from a mint worker scouring the die too vigorously or the die was filled with debris. The simplest explanation proved to be the correct one: The mintmark had never been punched into the die. Probably only 15 to 25 No S dimes escaped in 1968, and it has remained a major modern rarity. Several similar mistakes followed when said mintmark was omitted from proofs of other years, creating a rarity each time. This PR66 representative is low in contrast but high in appeal with a canary-gold general overtone and a ring of blue-violet at the outer reverse. The obverse has the better reflective gleam.

Also included are a Lincoln cent, PR67 Red Cameo; a Jefferson nickel, PR66; a Washington quarter, PR65; and a Kennedy half dollar, PR67.

Ex: FUN Signature (Heritage, 1/2014), lot 5205. (Total: 5 coins) NGC ID# 27F3, PCGS# 5245

#### PROOF TWENTY CENT PIECES

1875 Twenty Cent Piece, PR66 Superior Quality for Type Purposes

3071 1875 PR66 NGC. First year of issue for this short-lived and ill-advised denomination. Produced as an outlet for Comstock silver, twenty cent production consumed only a tiny fraction of the silver mandated by the Bland-Allison Act for silver dollars. Only 1,200 proofs were struck in 1875, and this is one of the finest preserved examples. Each side is brilliant and the mint frost on the devices makes one wonder why a Cameo designation was not given. Census: 22 in 66, 1 finer (10/19). NGC ID# 27GZ, PCGS# 5303

# 1877 Twenty Cent, PR64 Cameo Proof-Only Issue, 510 Coins Struck

3072 1877 PR64 Cameo PCGS. Twenty cent pieces were struck for circulation only in 1875 and 1876, followed by two years of proof-only production for collectors. The 1877 is the lowest-mintage twenty cent piece, with just 510 proofs struck. The short-lived series is popular with collectors today, although not nearly as popular as it was unpopular during its brief time in circulation during the mid-to-late 1870s.

This is an attractive near-Gem proof with ice-blue toning and substantial cameo contrast. As usually seen on 1877 proofs, the coin is razor-sharp throughout both sides including the upper obverse (an area that is weak on the 1878 proof-only date). Mirrored fields show a few milk-white streaks and tiny spots on the obverse, while the reverse fields are fully mirrorlike. A few faint, delicate lines in the fields do not distract. Population: 32 in 64 (1 in 64+) Cameo, 15 finer (9/19). NGC ID# 27H4, PCGS# 85305

## **BUST QUARTERS**

#### 1818 B-2 Quarter Dollar, MS63 Outstanding Type Candidate

3073 1818 B-2, R.1, MS63 NGC. The Browning-2 die pair of 1818 is frequently encountered and an excellent candidate for a date or type collection. The Capped Bust design for quarter dollars was first issued in 1815 and next in 1818 following the fire that halted most of the Mint's operations in 1816. This Select Mint State example nicely represents the second year of coinage with a bold strike and delicate gold toning over its satiny silver luster. NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

#### 1822 B-1 Quarter, Toned MS61

3074 1822 B-1, R.2, MS61 NGC. Tompkins Die State 1/1. The 1822 quarter is a scarce date in spite of what appears to be a sufficient mintage of 64,080 coins. Only two die varieties are known, one with a flat based 2 in the denomination and the other a 25 / 50 overpunched denomination. Each side displays subdued light gray and violet patina. The strike details are flat over the high points, as usually found. There are no abrasions present that merit comment. NGC Census for the B-1 variety: 1 in 61, 2 finer (10/19). NGC ID# 23RN, PCGS# 38969 Base PCGS# 5332

# 1831 B-2 Quarter, Toned MS65 Among the Finest Known

3075 1831 Small Letters, B-2, R.2, MS65 NGC. Tompkins Die State 2/3, with extensive die cracking through the arrowheads, and diminished evidence of repunching on stars 11-13. B-2 is relatively obtainable up to AU, and is progressively more difficult in higher grades. This is among the finest known. The satiny surfaces display rose tinted centers that deepen to blue around the margins on each side, giving the coin a well-balanced appearance. Strike definition is remarkably strong on each side. A reliable pedigree identifier is a small planchet void located in the field just behind the hair of Liberty. NGC ID# 23RW, PCGS# 38981 Base PCGS# 5348

### **SEATED QUARTERS**

# 1858-O Quarter, Semiprooflike MS65 Tied Atop the Condition Census Rare in Mint State

3076 1858-O MS65 NGC. Briggs 1-A. The two die varieties listed by Briggs are difficult to distinguish. The slightly recut stars and centering of the mintmark aid in attribution. This New Orleans quarter dollar issue was struck to the healthy extent of 520,000 coins. The pieces that survive are usually seen in well-circulated condition. Coins in XF to AU are scarce and underrated, while Mint State survivors are rare in any grade. Estimates of extant Uncirculated representatives range from eight coins (PCGS CoinFacts) to as many as 40 pieces (Bowers, 2016) although that figure seems grossly out of line with the certified population data. There are only six Mint State submissions at NGC and another six at PCGS, likely including a few duplications. Among those twelve grading events, this Gem is tied with another MS65 at NGC and a single Gem at PCGS, both of which were previously included in the Eugene H. Gardner Collection.

This dazzling Condition Census example features semiprooflike fields that deliver modest cameo contrast. The sharpness of the strike is staggering. Both sides display light golden toning beneath which a few tiny ticks reside, leaving this coin with stand-out eye appeal. Census: 2 in 65, 0 finer (10/19). NGC ID# 44LC, PCGS# 5446

#### 1868-S Quarter, Toned MS63 Only 96,000 Pieces Struck

3077 1868-S MS63 NGC. Briggs 1-A. Similar to other denominations struck in the San Francisco mint in the 1860s and 1870s, the 1868-S quarter was intended to circulate, and circulate it did. Virtually no one set aside business strike coinage at this time, and it is only by happenstance that a few high-grade examples have survived. The surfaces are bright beneath variegated blue and rose-gold toning that is seen across each side. Strike details are generally well brought up with only occasional localized areas of softness. Census: 4 in 63, 4 finer (10/19). NGC ID# 23UG, PCGS# 5473

### 1871-CC Seated Liberty Quarter, Good 6 Briggs 1-A, Only Dies for the Date

3078 1871-CC Good 6 PCGS. Briggs 1-A, Flynn-RPD-001. The 1871-CC Seated Liberty quarter claims a small mintage of 10,890 pieces and Larry Briggs notes the issue is "rarely seen above VG, with most pieces seen being Good or worse." Repunching shows on he date and the major design elements are complete in outline on this Good 6 example. but the reverse rim is worn flat in places and the motto is only partially legible. Population: 5 in 6, 31 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 23UN, PCGS# 5479

#### 1873 Quarter Dollar, MS66 Open 3, No Arrows

3079 1873 Open 3, No Arrows, MS66 PCGS. An amazing example struck early in the year before the addition of arrow heads at the date. This Premium Gem has frosty silver-gray luster with lovely blue-steel toning. This is an important condition rarity that is tied for the finest certified. Population: 5 in 66, 0 finer (10/19). NGC ID# 23UV, PCGS# 5485

# 1879 Seated Liberty Quarter, MS67 Spectacular Semiprooflike Type Coin

3080 1879 MS67 PCGS. CAC. Briggs 1-A. Only one die pairing is known for the circulation-strike 1879 Seated Liberty quarter, which boasts a low mintage of 13,600 pieces. However, the proof issue, struck to the tune of 1,100 coins, is known from two die pairs. This Superb Gem business strike is conditionally rare and incredibly vibrant. Neither side is toned, and the semiprooflike fields are seemingly pristine. The border stars show minor softness, but it is hardly noticed. Population: 27 in 67 (4 in 67+), 2 finer. CAC: 21 in 67, 3 finer (10/19). NGC ID# 23VB, PCGS# 5511

#### 1881 Seated Liberty Quarter, MS68 None Seen Numerically Finer

3081 1881 MS68 NGC. Briggs 1-A. Only 12,000 business-strike Seated Liberty quarters were struck at the Philadelphia Mint in 1881, accompanied by a generous mintage of 975 proofs. Only one die was used for the business-strike production, identified by a sharp die scratch that shows between vertical lines 6 and 7 in the reverse shield. The 1881 is slightly more elusive than the previous two issues in this series, which boast similarly low mintages.

The present coin is a magnificent MS68 example, with well-detailed design elements that show just a touch of the usual softness on some star centers. The impeccably preserved surfaces radiate vibrant mint luster on both sides, with subtle highlights of pale gold and lavender toning. Eye appeal is terrific. Census: 2 in 68 (1 in 68★), 0 finer (10/19). NGC ID# 23VD, PCGS# 5513

# PROOF SEATED QUARTERS

# 1849 Seated Quarter, PR65+ Only Five PCGS Proofs Certified

3082 1849 PR65+ PCGS. Briggs 4-C. Our roster of proof 1849 Seated Liberty quarters includes six examples that grade PR63 to PR66. PCGS has graded five pieces including two in PR66 and one each in PR65+, PR65, and PR63. NGC submissions include three coins grades PR66, PR64, and PR63 (10/19). PCGS Coin Facts estimates that just three to five proofs are known. Our own roster, published when we offered the Eugene H. Gardner Collection, enumerated five distinctively different examples. Rich ocean-blue toning dominates this fully struck specimen, although the borders display narrow bands of peach and straw-gold. We know of six examples that grade PR66 to PR63. Just two are marginally finer than the present Gem proof. Detailed Census information has appeared in several past Heritage catalogs, with an abbreviated Census presented here:

- 1. PR66 PCGS. Eugene Gardner Collection (Heritage, 5/2015), lot 98376.
- 2. PR66 PCGS. Eliasberg Collection (Bowers and Merena, 4/1997), lot 1445.
- 3. PR65+ PCGS. From a numismatic holding formed in the 1950s; Long Beach Expo (Heritage, 6/2015), lot 3915. The present piece.
- PR65 PCGS. Garrett Collection (Stack's, 3/1976), lot 160.
   PR64. Thomas Elder; Albert Holden; Norweb Collection
- (Bowers and Merena, 3/1988), lot 1585. **6. PR63 PCGS.** FUN Signature (Heritage, 1/1998), lot 6781. NGC ID# 23WC, PCGS# 5543

# 1876 Seated Liberty Quarter, PR67 Starkly Contrasted Cameo Example

3083 1876 PR67 Cameo NGC. Briggs 9-J. From a generous mintage of 1,410 pieces, the 1876 proof Seated Liberty quarter is very rare in PR67 condition, with the Cameo designation, and finer coins are virtually unobtainable. This stunning Superb Gem proof exhibits sharply detailed design elements throughout, but the upper berry shows an attenuated stem, due to lapping. The deeply mirrored fields contrast boldly with the frosty devices and the brilliant surfaces are impeccably preserved. Census: 8 in 67 Cameo (1 in 67★), 0 finer (10/19). NGC ID# 23X8, PCGS# 85577

# 1880 Seated Quarter, PR67+ Cameo Delightful Contrast and Sharpness

3084 1880 PR67+ Cameo PCGS. Briggs 2-B. A rarity this fine, this high-end Superb Gem Cameo 1880 proof quarter displays stark field-device contrast and virtually flawless preservation. In addition to fully struck devices, the interiors are brilliant, while a halo of gold surrounds the outer peripheries. The border stars are all sharp. Population: 17 in 67 (2 in 67+) Cameo, 2 finer; 4 in 67 Deep Cameo, 0 finer (10/19). NGC ID# 23XC, PCGS# 85581

### **BARBER QUARTERS**

1895-O Quarter, MS67 CAC Among Finest Certified

3085 1895-O MS67 PCGS. CAC. The 1895-O is plentiful in wellworn condition, but collectors know that Mint State examples are very scarce. Most such piece are in MS62 to MS64 grades. Superb Gems are practically unheard of. In fact, this is the first appearance of an MS67 PCGS 1895-O quarter in a Heritage auction. This brilliant and lustrous piece has a bold strike for a New Orleans product, and is exceptionally devoid of contact. Liberty's cheek is particularly smooth. Encapsulated in an old green label holder. Population: 2 in 67, 1 finer. CAC: 1 in 67, 1 finer (9/19). NGC ID# 23Y5, PCGS# 5611

### 1901-S Barber Quarter, VF Details Collectible Example of This Key Date

3086 1901-S — Filed Rims — PCGS Genuine. VF Details. The 1901-S is the most challenging of the three Barber quarter keys to acquire. This VF-level example is well-detailed, showing LIBERTY complete, but light file marks on the rims and cleaning overall prevent a numeric designation from PCGS. On the reverse, two minor rim bumps are also visible at 8 and 11 o'clock. Both sides are bright with light golden toning and scattered light marks that are consistent with the level of wear.

#### 1913-S Quarter Dollar, Unc Details Important Key Date Rarity

3087 1913-S — Environmental Damage — PCGS Genuine. Unc Details. The 1896-S, 1901-S, and 1913-S Barber quarters are called the "Big Three" of the series, and those issues are the keys to a complete set. All three issues are typically found in low grades from Fair to Very Good. Higher grades examples are quite rare and in great demand. Although the surfaces are somewhat muted, this example has full luster beneath light gold and iridescent toning.

# PROOF BARBER QUARTERS

1893 Quarter Dollar, PR67 Deep Cameo Intense Field-to-Device Contrast

3088 1893 PR67 Deep Cameo PCGS. The contrast exhibited on this Superb Gem Deep Cameo proof is miraculous. Both sides are brilliant and untoned with incredible mirrored fields and fully lustrous and frosty devices. An amazing example for the advanced collector. Population: 7 in 67 Deep Cameo, 2 finer (10/19). NGC ID# 2428, PCGS# 95679

# 1907 Barber Quarter, PR68 Stunning Cameo Example

3089 1907 PR68 Cameo NGC. From a small mintage of 575 pieces, the 1907 proof Barber quarter is extremely rare in PR68 condition, with the Cameo designation. This delightful specimen exhibits razorsharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The brilliant surfaces are impeccably preserved. Census: 4 in 68 Cameo (1 in 68★), 1 finer (10/19). NGC ID# 242N, PCGS# 85693

#### STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS65 Beautiful, Frosty Mint Luster

3090 1916 MS65 PCGS. Hermon MacNeil's Standing Liberty quarter design replaced Charles Barber's Liberty head coinage in December 1916, after nearly a year of revisions and modifications to his original models, which were submitted for approval in the spring. For a time, MacNeil had been a student of Henri M. Chapu, a faculty professor and neoclassical sculptor at the Académie Julian in Paris, France, and the influence of French neoclassical tradition and allegory are apparent in MacNeil's portrayal of Liberty on the obverse of the quarter design, combined with American ideals and symbolism. The goal, in Theodore Roosevelt's words from 1905, to create a design of "some beauty" for the United States' coinage, had been achieved. However, the Mint struggled with rendering MacNeil's work in a fashion that could be fully struck with a single die impression. As a result, the inaugural coinage of the Standing Liberty quarter in late 1916 was unsatisfactory from a coinage perspective, and the design was further sharpened for the 1917 issue. The 1916 coin, then, is singular in the series for its close representation of MacNeil's original models, and for its more natural sculptural style, despite the softness of the execution in the coinage dies. With a mintage of only 52,000 pieces, it is also the governing series key.

This Gem example is exceptionally frosty and well-preserved, showing delicate lilac-champagne tinting overall with daubs of olive-russet in portions of the margins. Liberty's head is not fully struck, as some other examples of this issue show, but the luminance of the luster is enough to captivate the viewer. NGC ID# 43XR, PCGS# 5704

# 1916 Standing Liberty Quarter, MS65 Full Head Low-Mintage, First-Year Key

3091 1916 MS65 Full Head PCGS. Herman MacNeil's beautiful Standing Liberty design for the quarter was produced for the first time in 1916. Unfortunately, it was difficult to adapt the classical design to the requirements of high-speed modern coinage and production, originally scheduled to begin in July of 1916, was delayed until December. As a result, only 52,000 examples were struck at the Philadelphia Mint before the end of the year. The low mintage makes the 1916 a sought-after key to the series and its first year of design status adds to its cachet with collectors.

This delightful Gem exhibits sharply detailed design elements, with Full Head definition and just a touch of the usual softness on the shield rivets. The well-preserved surfaces are lustrous and appealing, with subtle highlights of golden-tan and lavender toning. Population: 90 in 65 (5 in 65+) Full Head, 27 finer (10/19). NGC ID# 2AMV, PCGS# 5705

# 1917 Type One Quarter, MS67+ Full Head Ex: 'Colonel' Green-Eric Newman

3092 1917 Type One MS67+ Full Head NGC. CAC. Ex: "Col." E.H.R. Green. The 1917 Type One Standing Liberty quarter saw a mintage exceeding 8 million pieces, making it a reasonably available issue in Mint State and a favorite choice of type collectors. The 1917 Type One was also a well-produced issue, and J.H. Cline (2007) states: "This date ... is probably the best overall strike of the entire series and the most available with Full Heads." This high-end Superb Gem certainly fulfills Cline's expectations, with crisp detail on the design elements and full definition on Liberty's head. The peripheries exhibit attractive reddish-gold and golden-brown patina, with more color on the obverse. The lustrous surfaces are impeccably preserved and eye appeal is terrific. Census: 70 in 67 (5 in 67+ Full Head, 1 in 67★, 1 in 67+★)

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$2.50; Eric P. Newman Numismatic Education Society; Selections From the Eric P. Newman Collection, Part II Signature (Heritage, 11/2013), lot 33402.. NGC ID# 242Z, PCGS# 5707

# 1917-D Type Two Quarter, MS67 Full Head Spectacular Superb Gem Registry Coin First at Auction in Eight Years

3093 1917-D Type Two MS67 Full Head NGC. The 1917-D Type Two Standing Liberty quarter is of the utmost rarity in Superb Gem Full Head condition. NGC lists only three coins this fine with none in higher grades, while PCGS reports two MS67 Full Head pieces and one MS68 Full Head finer (11/19). However, a more profound representation of this issue's top-grade rarity is the fact that it has been 12 years since we last offered a coin in this grade — the last piece, graded by PCGS, realized \$46,000 (Heritage, 5/2007). In fact, no MS67 Full Head coin has appeared at auction with any auction company since 2011.

This representative displays frosty, vibrant mint luster, with virtually no surface flaws aside from a tiny tick on Liberty's right (facing) knee. The shield rivets show only partial definition, but the head detail is sharp. On the reverse, the leading edge of the eagle's left (facing) wing and the troublesome right-hand border stars are well brought up. An incredible opportunity for the Registry collector to acquire one of the finer-known 1917-D Type Two quarters. NGC ID# 2435, PCGS# 5717

# 1919-S Quarter, MS62 Full Head Uncommonly Sharp for the Issue

3094 1919-S MS62 Full Head NGC. The mintage was just 1,836,000 pieces, most of which circulated to one extent or another. In Mint State, the 1919-S is a semikey issue, and Full Head examples account for only a tiny percentage of those certified. Natural lilacgray toning imbues both sides of this well-struck coin, with minimal abrasions and soft mint luster adding to the appeal. Census: 4 in 62 Full Head, 41 finer (9/19). NGC ID# 243D, PCGS# 5733

# 1928-S Quarter, MS67+ Full Head Remarkably Bright Mint Luster

3095 1928-S MS67+ Full Head NGC. Large S mintmark. The 1928-S is one of the more challenging of the late-date quarters with full detail on Liberty's head. What is noteworthy about this piece is the bright, sparkling mint luster. When that visual aspect is combined with the absence of abrasions and the completeness of strike, this becomes a quarter that specialists will certainly pursue. Census: 44 in 67 (5 in 67+ Full Head, 2 in 67★), 3 finer (10/19). NGC ID# 243Z, PCGS# 5771

# WASHINGTON QUARTERS

# 1940 Quarter, MS68 One of Four at PCGS, None Finer

3096 1940 MS68 PCGS. Only a handful of 1940 quarters have achieved the formidable MS68 grade, PCGS and NGC combined. More than 35 million pieces were struck, yet Superb Gems at the MS67 level are scarce, and finer examples are considered major rarities. Throughout the Washington quarter silver series, MS68 pieces represent the pinnacle numeric grade — there are no MS69 pieces certified by PCGS (1932-1964).

This vibrantly lustrous 1940 is brilliant at the centers, with iridescent colors emerging at various segments along the margins, gradually easing their way inward. A sharp strike approaches full details, while the eye appeal is extraordinary throughout. There are no mentionable marks or abrasions. We expect Registry Set specialists to pursue this lot with fervor. Population: 4 in 68, 0 finer (10/19). NGC ID# 244U, PCGS# 5811

#### 1948-D Quarter, MS68 The Finest Certified

3097 1948-D MS68 NGC. This amazing Superb Gem is the finest 1948-D quarter that has been certified. In fact, it is the only MS68 submitted to either grading service (10/19). This sharply defined piece has brilliant and frosty silver luster beneath lovely gold and iridescent toning splashes on the obverse, and iridescent mottling on the reverse. NGC ID# 245M, PCGS# 5837

# **EARLY HALF DOLLARS**

## 1794 Flowing Hair Half Dollar, AU Details Rare O-107, T-5 Variety

3098 1794 O-107, T-5, R.6 — Scratches — NGC Details. AU. Tompkins Die State 1/1. Granularity around OF makes confirmation of the die state difficult. This is an otherwise sharply defined O-107. No examples above VF exist in the Tompkins Condition Census, although we handled an XF45 coin that surfaced out of the Terry Brand Estate. Intermittent areas of deep-gray build up alternate with silver-gray surfaces. Numerous light scratches appear on both sides, mingling with Mint-made adjustment marks on the reverse. Many of the scratches represent removal of dark encrustation that may have covered most of both sides at one time. In terms of sharpness, we know of no O-107 that exceeds this example.

## 1795 O-125 Half Dollar, XF45 Bold Central Motifs, Two Leaves Reverse

3099 1795 Two Leaves, O-125, T-13, R.4, XF45 NGC. Tompkins Die State 2/1. The 1795 half dollar is often encountered in type specialists' collections. This piece is of a scarce variety, characterized in part by star 1 fully piercing Liberty's lower hair curl. Rich gunmetal-gray and dusky olive-gold patina coats each side, with only light wear seen over the well-defined design elements. Numerous mint-made adjustment marks are noted around the obverse periphery, causing minor softness of strike on the lower-right dentils. Only small abrasions and marks dot the surfaces on both sides. This piece will be of interest to both the type collector and the early half dollar variety specialist.

Ex: FUN Signature (Heritage, 1/2001), lot 7727; Chicago Signature (Heritage, 8/2011), lot 3910; Houston Signature (Heritage, 12/2013), lot 3624; Long Beach Signature (Heritage, 6/2014), lot 4506; Dallas Signature (Heritage, 3/2018), lot 3051; Beverly Hills Signature (Heritage, 12/2018), lot 4165; Long Beach Signature (Heritage, 6/2019), lot 3103. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052.

## 1805 Half Dollar, AU53 Better Overton-104 Variety

3100 1805 O-104, T-10, Low R.5, AU53 PCGS. Tompkins Die State 3/3. Overton-104 is among the scarcer die varieties of the 1805 half dollar. In this die state, peripheral cracks and die clashes are apparent on both sides. The present coin is lustrous in the fields, with only light wear over the high points of the devices. Strike weakness affects the stars on both sides and the clouds above the eagle, as is typical of this issue. NGC ID# 24EG, PCGS# 39275 Base PCGS# 6069

# 1806 Half Dollar, O-116, MS62 Pointed 6, Stem Through Claw Upper-End for the Variety

3101 1806 Pointed 6, Stem, O-116, T-20, R.3, MS62 PCGS. A Pointed 6, With Stem variety, showing recutting on the TY in LIBERTY and five berries on the olive branch. O-116 is fairly plentiful in the context of the Pointed 6, With Stem subtype, but most known examples show light to moderate wear. Mint State pieces are elusive but more available than many other varieties of the year. O-116 is often chosen for type or date representation, when just one example is needed for the issue.

This piece is in a late die state that displays light clash marks on both sides and extensive peripheral die cracks on the obverse. Deep gunmetal-blue and olive-gold toning around the margins frames brighter, pale lavender-gray centers. The stars are crisp on the obverse, although the centers of both sides are a trifle soft on the finer details. The surfaces are free of major abrasions. Population (all Pointed 6, Stem varieties included): 21 in 62, 35 finer (10/19). Ex: Purchased from Larry Whitlow (3/2000); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98446. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

#### **BUST HALF DOLLARS**

#### 1807 O-111a Half Dollar, XF40 'Bearded Goddess' Die Crack

3102 1807 Capped Bust, Large Stars, 50 Over 20, O-111a, R.5, XF40 PCGS. CAC. From the same dies as the "Bearded Goddess" variety, as PCGS notes on the holder, although in the earlier O-111a die state. The die crack appears clearly between the chin and neck, but only faintly onto the face and not yet turning around and coming back down to just before the 1 and to the milling. The reverse is identified by the die defect dot just below the lowest arrowhead. This piece offers slate-gray patina with lighter silver color around the device edges and high points. A collectible example of this classic Capped Bust half dollar issue. NGC ID# 357A, PCGS# 39355 Base PCGS# 39357

## 1812/1 Small 8 Half Dollar, MS63+ O-102, Guide Book Variety

3103 1812/1 Small 8, O-102, R.2, MS63+ NGC. The only Small 8 overdate variety for this year, seen here in the earlier die state before a crack forms at the date. Clash marks are nonetheless apparent. Luster shimmers beneath coatings of olive-green, gold, russet, and lavender toning, while neither side exhibits bothersome abrasions. Some weakness is seen on the border stars, but the central devices are generally well-defined. NGC ID# 24EY, PCGS# 39443 Base PCGS# 6101

# 1817 Capped Bust Half, MS64 Popular O-110 Variety

3104 1817 O-110, R.2, MS64 PCGS. The tripled dentil below star 13 and the horizontal die line from the upper arrow feathers identifies the O-110 variety. The design elements of this attractive Choice example are sharply detailed and a diagnostic die lump is evident below the base of the 7 in the date. The well-preserved surfaces are brightly lustrous, under shades of pleasing lavender-gray toning. Population: 18 in 64 (4 in 64+), 3 finer (10/19). NGC ID# 24F6, PCGS# 39502 Base PCGS# 6109

## 1818/7 Large 8 Half, O-101a, MS64+ Late Die State, Condition Census

1818/7 Large 8, O-101a, R.1, MS64+ NGC. An arcing die crack on the reverse through the olive leaves and denomination identifies the late state of the O-101 die marriage. Three die marriages are known for the overdate, including O-101 and -103, which have a large first 8 in the date, and O-102, which has a small first 8. All three varieties have a small second 8 over the underlying 7. This near-Gem O-101a coin displays bold peripheral definition with minor weakness on the eagle's left (facing) wing. Softly lustrous surfaces yield delicate rose-gold, sea-green, and lilac toning. Eye appeal is exceptional. NGC ID# 24FA, PCGS# 39541 Base PCGS# 6115

# 1820 O-108 Half Dollar, MS63+ Large Date, Square Base 2, No Knob

3106 1820 Square Base 2, Large Date, No Knob, O-108, R.2, MS63+ NGC. While the 1820 O-108 is considered a common variety, all 1820 half dollars are elusive and enjoy great demand in high grades. The finest known of the variety is the amazing MS66+ PCGS example that was offered nearly five years ago from the Pogue Collection. The next best are two MS65 pieces and two MS63 coins. This piece easily ranks among those Condition Census coins. Both sides are nicely defined with full mint frost and only a few inconsequential, grade consistent marks on each side. The surfaces host attractive reddish-gold and light gray toning. Census for all 1820 half dollar varieties: 18 in 63 (2 in 63+), 13 finer (10/19). NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

## 1828 O-110 Half Dollar, Toned Gem Square 2, Small 8s, Large Letters Tied Atop the Condition Census

3107 1828 Square Base 2, Small 8s, Large Letters, O-110, R.2, MS65 PCGS. The second T in STATES is further left relative to the I than all other 1828 Square Base 2, Small 8s, Large Letters varieties. This colorfully toned Gem is tied for finest atop the O-110 Condition Census. The devices are fully struck, and each side displays a semiprooflike appearance. Extraordinary quality. NGC ID# 24FR, PCGS# 39764 Base PCGS# 6151

## 1829 Small Letters Half Dollar, MS65 O-112a, the Late Die State

3108 1829 Small Letters, O-112a, R.2, MS65 NGC. A series of diagonal lines to the left of star 13 are missing due to die lapping, and the right-side stars are spindly as a result. Line 3 of vertical stripe 5 extends to the second horizontal stripe. The fields are mostly reflective beneath a dusting of reddish-tan obverse toning that gathers around the raised elements. The reverse shows grayish toning at the margins, mellowed by pale-gold hues toward the center. This is a sharply struck Gem Uncirculated example of the late die state, tied at the top end of the Condition Census for O-112a. NGC ID# 24FS, PCGS# 39796 Base PCGS# 6154

# 1833 O-113 Half Dollar, MS65+ Finest-Known Example of the Variety

3109 1833 O-113, R.2, MS65+ NGC. The finest O-113 half dollar documented, this Plus-graded Gem displays radiant luster and beautiful toning. Stephen Herrman's Condition Census lists another Gem, an MS65 NGC coin that last appeared in a 2007 Superior sale (Elite-Milwaukee, 8/2007), lot 185, but not this coin. This piece surpasses that one by the margin of the Plus designation. Pastel shades of multicolor toning cover each side, and there are no bothersome abrasions. Under a loupe, a few pepper specks are visible. Sharply struck and beautifully preserved. Census (all varieties included): 31 in 65 (3 in 65+, 1 in 65★), 8 finer (2/19). NGC ID# 24FX, PCGS# 39902 Base PCGS# 6163

#### SEATED HALF DOLLARS

# 1868-S Half Dollar, MS65 Important Condition Rarity

3110 1868-S WB-101, Die Pair 8, R.3, MS65 PCGS. CAC. The San Francisco Mint was immune to the gold and silver shortages that plagued the Eastern Mints during and following the Civil War. The gold and silver coins produced in San Francisco were needed in commerce and circulated extensively. The few Mint State pieces that have survived did so as a matter of chance. For the 1868-S half dollars, just 21 of the 207 PCGS-graded submissions have achieved any Mint State grade. This Gem is one of the four finest graded examples at PCGS and exhibits amazing luster and pristine surfaces beneath lovely reddish-gold and golden-brown toning. Population: 2 in 65, 2 finer. CAC: 2 in 65, 0 finer (10/19). PCGS# 800895 Base PCGS# 6324

# 1873 No Arrows Seated Half, VF35 WB-101, Rare Open 3 Variety

3111 1873 No Arrows, Open 3, WB-101, VF35 PCGS. A key variety in the Seated half series — much rarer than its No Arrows, Closed 3 counterpart and listed as its own entry in the *Guide Book*. PCGS and NGC combined have certified just 60 examples in all grades. This representative shows moderate wear but retains nice detail on both sides of the coin. Medium-gray tones show charcoal-gray accents around the devices and legends. The Open 3 halves were produced in a transitional year when the Mint first struck Closed 3 coins, then switched to the Open 3 logotype. It then transitioned to a changed weight mandating the addition of arrows at both ends of the date, before a large quantity of Open 3 coins were distributed. Population: 4 in 35, 9 finer (10/19). PCGS# 572206 Base PCGS# 6337

# 1877-S/S Seated Liberty Half, MS66 Prooflike WB-103, 'Triple S' Mintmark Variety None Certified Finer

3112 1877-S/S Type One Reverse, Very Small S, WB-103, Die Pair 8, R.3, MS66 Prooflike NGC. The mintmark is widely repunched — often referred to as triple-punched S/S/S — although machine doubling may account for one of the errant S marks. More dramatic is a partially effaced S widely left of the prominent S, making this variety a favorite among Seated half collectors. A Premium Gem example with NGC's Prooflike designation is the finest WB-103 certified we know, and it is certainly the finest with Prooflike surfaces (by three full grading points). The coin is sharply struck from freshly polished dies, with brilliant surfaces that offer mirrorlike reflectivity and faint die polish lines. There are no distracting marks — just a few tiny ticks, which perhaps prevent an even finer grade. Census: 1 in 66 Prooflike, 0 finer (10/19). PCGS# 572254 Base PCGS# 6357

## 1878-CC Half Dollar, Unc Details Seldom Seen Above XF

1878-CC WB-101, Die Pair 1, R.4 — Cleaned — PCGS Genuine. Unc Details. The 1878-CC half dollar has long been recognized as a scarce issue, most likely its difficulty lies in the implementation of the Bland-Allison Act this year, which redirected all the mints' efforts toward the production of silver dollars. The surfaces of this piece are muted with even, dull-gray patina. Strike details are complete, however, and only a single reeding mark merits mention, located above Liberty's left (facing) shoulder.

# 1887 Half Dollar, MS66 Attractive Original Toning, CAC

3114 1887 MS66 PCGS. CAC. Eugene Gardner famously called all low-mintage, late-series Seated halves "eye candy." This sweet Premium Gem 1887 is prooflike on both sides (undesignated as such on its old blue-label PCGS holder), with dappled blue and amber-gold toning — one of just 5,000 circulation strikes issued. The strike is sharp except at Liberty's head, where stars 7 and 8 lack their central details and Liberty's hair is a bit soft. A few tiny marks are well-hidden in the toning, while CAC endorsement adds to the appeal. Population: 15 in 66 (1 in 66+), 7 finer. CAC: 6 in 66, 4 finer (9/19). NGC ID# 24L2, PCGS# 572272 Base PCGS# 6369

#### PROOF SEATED HALF DOLLARS

# 1874 Arrows Seated Half, Toned PR66+ Amazing Preservation Just Five Proofs Finer at PCGS

3115 1874 Arrows PR66+ PCGS. Although frequently seen in all circulation strike grades up to the Select Uncirculated level, the 1874 Arrows is rare in Gem or finer proof grades from a reported mintage of just 700 proofs — seemingly all were distributed as part of proof sets. Walter Breen suggested 50 pieces were struck for individual sale, but more recent research indicates not. All proofs have the Small Arrows obverse, which is far rarer as a circulation strike than the Large Arrows obverse, and increases demand for proofs to represent the type.

This high-end Premium Gem proof displays colorful, original proof set toning evenly balanced throughout both sides. Reddishgold and sea-green hues deepen to cerulean-blue at the centers. Mirrored fields flash boldly at the margins and around the central motifs, tempered a bit by the intense blue toning that encompasses the central elements. Eye appeal is exceptional. Population: 1 in 66+, 5 finer (10/19). NGC ID# 27UV, PCGS# 6435

#### 1878 Half Dollar, PR67 Cameo Closed Bud Reverse

3116 1878 PR67 Cameo NGC. The Closed Bud (Type Two) reverse is the usually encountered variety for 1878 proof half dollars as the Open Bud or Type One reverse is extremely rare. This Superb Gem proof ranks among the finest that we have handled. The fields are fully and deeply mirrored with brilliant centers inside delicate gold and rich blue toning. Census: 5 in 67 Cameo, 0 finer (10/19). NGC ID# 27UD, PCGS# 86439

## BARBER HALF DOLLARS

1892-S Half Dollar, MS65 Amazing Eye Appeal, Ex: Gardner

3117 1892-S MS65 PCGS. CAC. Despite the lower-mintage Barber half issues from the Philadelphia and New Orleans mints, this San Francisco date is about equally as rare as the 1892-O and much more elusive than the 1892-P. CoinFacts estimates 40 examples survive in Gem condition or better, but the certified population seems to indicate that the total could be even smaller. The eye appeal of this Gem is absolutely amazing. On the obverse, light golden-gray centers cede to shades of orange, magenta, violet, and cobalt-blue toward the margins, while the same hues appear blended throughout the reverse. Frosty luster shines through the toning, illuminating nearly full devices with the faintest trace of softness on the eagle's left leg. Population: 21 in 65 (3 in 65+), 4 finer. CAC: 5 in 65, 4 finer (10/19).

Ex: Purchased from Larry Whitlow (11/2008); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98738.

From The Lithuania Collection, Part II. NGC ID# 24LJ, PCGS# 6464

# 1893-O Half Dollar, Resplendent Gem Ex: Friend, Dynamic Album Toning

3118 1893-O MS65 PCGS. Ex: Friend. An incredible example with fully brilliant and frosty surfaces, white at the centers and toned in gold, blue, green, and lilac closer to the borders. Both dies impart interesting clash marks and several die cracks. Nevertheless, the strike is sharp for this early New Orleans issue with only minor weakness at the shield corner, wing junction, and talon. Population: 4 in 65, 5 finer (10/19).

Ex: Larry Shepherd; The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars (Heritage, 1/2009), lot 2929; ANA Signature (Heritage, 8/2010), lot 5035; Central States Signature (Heritage, 4/2017), lot 3341.

From The Lithuania Collection, Part II. NGC ID# 24LL, PCGS# 6466

## 1894-S Barber Half Dollar, MS65 Vivid Multicolor Toning

3119 1894-S MS65 PCGS. CAC. The impression on each side of this Gem 1894-S half dollar is utterly complete without a single area of softness to report. Mottled golden-russet and ice-blue toning over glistening satin surfaces is immensely appealing and entirely natural. Destined for a fine collection. Population: 9 in 65, 6 finer. CAC: 5 in 65, 2 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24LR, PCGS# 6470

# 1897-S Barber Half, MS65 High-End, Conditionally Rare

3120 1897-S MS65 PCGS. CAC. Sharp stars on the obverse complement well-defined talons on the eagle, leaving the only mentionable strike weakness on the upper-right shield corner. This Gem 1897-S half dollar is virtually brilliant, with satiny luster and no distracting abrasions. Few examples are known finer. Population: 17 in 65 (5 in 65+), 10 finer. CAC: 4 in 65, 8 finer (10/19).

Ex: Dallas Signature (Heritage, 12/2017), lot 3098.

From The Lithuania Collection, Part II. NGC ID# 24M2, PCGS# 6479

#### 1898-O Half Dollar, MS65 Wonderfully Toned, Seldom Finer

874,000 pieces and a scarcity of coins in all grades qualify the 1898-O Barber half as a key series issue, although it is not as highly regarded as it perhaps should be. This beautifully toned example was once in the Friend Collection. It displays coruscating mint luster with vibrant shades of peach-gold, robin's egg blue, and lilacgray, perfectly matched one side to the other. The strike is uneven — reasonably bold on the obverse, but less-so on the reverse, where the eagle's neck, shield corner, wing junction and leg all show the light strike that typifies this New Orleans issue. The date is repunched, most visibly at the ball of the 9. Population: 8 in 65, 6 finer. CAC: 5 in 65, 3 finer (10/19).

Ex: Dallas Signature (Heritage, 4/2017), lot 15766.

From The Lithuania Collection, Part II. NGC ID# 24M4, PCGS# 6481

## 1899-S Barber Half, MS67 Among the Finest Known

3122 1899-S MS67 NGC. While the 1899-S is adequately available in grades up to MS64, finer examples are scarce and Superb Gems rank among the top-end series rarities. This vibrantly toned MS67 coin displays lively blue, violet, and reddish-gold toning — intensely so on the obverse, and a shade or two lighter on the reverse. Pearlescent-silver centers provide an attractive contrast to the lustrous patina. Only slight weakness at the upper-right shield junction prevents a full strike, and a few pinprick marks do not distract in the least. Census: 4 in 67, 0 finer (10/19). NGC ID# 24M8, PCGS# 6485

## 1900-S Half Dollar, MS65 Prooflike Fields, Conditionally Rare

3123 1900-S MS65 PCGS. CAC. The 1900-S Barber half is an elusive issue in any Mint State grade, and this CAC-endorsed Gem has the added appeal of deeply prooflike fields produced by fresh dies. The presence of the mintmark and slight strike weakness on the eagle's right (facing) talons and wing junction are all that differ from a true proof half dollar of this date. The coin is brilliant and shows only a few light marks. The 1900-S Barber half is a great rarity this fine. Population: 9 in 65, 6 finer. CAC: 4 in 65, 2 finer (10/19). From The Lithuania Collection, Part II. NGC ID# 57PC, PCGS# 6488

#### 1902-S Half Dollar, MS66 Fourth Rarest Mint State Issue

3124 1902-S MS66 PCGS. Ex: Shireman. This seldom-seen issue is often one of the last coins acquired by advanced collectors of the Barber half dollar series. Dr. Shireman writes:

"This issue is a bit overshadowed by the 1904-S and even somewhat by the 1901-S, but examples are few and far between in MS64 and up."

The PCGS *Population Report* supports his commend, as that service has only certified 26 examples in MS64 and finer grades. In fact, the 1902-S has the fourth lowest PCGS population in all Mint State grades. This lovely Premium Gem exhibits mostly bold details and frosty luster with brilliant silver surfaces and dappled gold toning. A hint of weakness is evident only on the eagle's right (facing) wing junction. Population: 9 in 66 (2 in 66+), 3 finer (10/19).

Ex: FUN Signature (Heritage, 1/2016), lot 5403.

From The Lithuania Collection, Part II. NGC ID# 24MH, PCGS# 6494

#### 1903-O Barber Half Dollar, MS65+ Rarely Seen This Fine

3125 1903-O MS65+ PCGS. The 1903-O Barber half issue is scarce in Mint State and rare as a Gem, despite a mintage of more than 2 million pieces. Golden-brown and teal colors appear on large portions of both sides, accented by a few splashes of plum. Pleasing satin luster adds to the eye appeal. Population: 8 in 65 (2 in 65+), 5 finer (10/15).

Ex: Central States Signature (Heritage, 4/2013), lot 2310; ANA Signature (Heritage, 8/2015), lot 5094; Houston Signature (Heritage, 12/2015), lot 3204.

From The Lithuania Collection, Part II. NGC ID# 24MK, PCGS# 6496

# 1904-S Barber Half Dollar, MS64 Elusive Series Key

3126 1904-S MS64 NGC. From a small business-strike mintage of 533,038 pieces, the 1904-S Barber half dollar is an underrated key and one of the most challenging issues of the series in high grade. Q. David Bowers notes the population data for this issue is inflated by resubmissions and crossovers and Mint State examples are much more elusive than those figures indicate. This impressive Choice example exhibits well-detailed design elements, with just a touch of the usual softness at the juncture of the shield and eagle's right (facing) wing. The well-preserved surfaces radiate satiny mint luster, with outstanding eye appeal. Census: 4 in 64, 4 finer (10/19). NGC ID# 24MP, PCGS# 6500

### 1905-S Barber Half Dollar, MS65 Underrated Condition Rarity

3127 1905-8 MS65 PCGS. Ex: Shireman. The issue's mintage of almost 2.5 million coins perpetuates the idea that the 1905-S is available through MS65 and beyond, but that is far from true. In reality, examples are rare at the Gem grade level with 12 submissions split evenly between PCGS and NGC. There are six higher grading events at the former service, and a single coin finer at the latter (10/19). Daubs of pale gold patina accent the otherwise brilliant surfaces of this frosty S-mint Gem. The issue's strong strike is on display here, though the right talon is incomplete. Trivial marks on the portrait and headband define the grade.

Ex: Harry Laibstain (5/28/1999); Dr. Peter and Janice Shireman Collection / FUN Signature (Heritage, 1/2016), lot 4129; FUN Signature (Heritage, 1/2017), lot 4457.

From The Lithuania Collection, Part II. NGC ID# 24MT, PCGS# 6503

#### 1907-S Half Dollar, Toned MS65 A Scarce Date in Mint Condition

3128 1907-S MS65 PCGS. David Lawrence, in his *The Complete Guide* to Barber Halves, writes that the 1907-S is "... the scarcest late date of the series in Mint State," and rates the issue in this condition as R.5. Glowing luster emanates from each side of this gorgeous Gem. A coat of low intensity gold-beige and bluish-gray patination enriches well cared for surfaces, which reveal a few minor marks that are well within the confines of the grade designation. The design detail is generally sharp, except for minor weakness in the upper right corner of the shield and adjacent feathers. Population: 9 in 65 (1 in 65+), 9 finer (10/19).

Ex: ANA Signature (Heritage, 2007), lot 1697; Long Beach Signature (Heritage, 6/2014), lot 4559; Central States Signature (Heritage, 4/2016), lot 3588.

From The Lithuania Collection, Part II. NGC ID# 3KVJ, PCGS# 6511

## 1907-S Barber Half, MS65 Attractive Uniform Toning

3129 1907-S MS65 PCGS. The 1.25 million pieces struck for this San Francisco half dollar issue went from the Granite Lady out into an earthquake-devastated city. Little thought was given to saving examples for the future, and the vast majority of the issue went straight into commerce. High-end survivors such as this satiny Gem are rare exceptions to the rule of heavily circulated examples. With its pleasing definition and rich rose, orange, green, blue, and violet patina, this carefully preserved coin is a winner in every respect. Population: 9 in 65 (1 in 65+), 9 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 3KVJ, PCGS# 6511

# 1908-S Half Dollar, MS66 Underrated Rarity in This Grade

3130 1908-S MS66 PCGS. Dappled tan-gold patina with traces of lilacgray colors this conditionally rare Premium Gem Barber half dollar. The strike is incomplete over the centers, but the stars, fletchings, and tailfeathers are well-detailed. The 1908-S is underrated in the upper reaches of Mint State. Gems are rare and Premium Gems extremely so. This piece deserves a place in the finest of sets. Population: 4 in 66 (2 in 66+), 2 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24N7, PCGS# 6515

## 1909-O Half Dollar, MS65 Conditionally Rare

3131 1909-O MS65 PCGS. Powerful luster emanates from both sides of this lovely Gem, each of which is visited by occasional splashes of purple, apple-green, and golden-orange. The stars and the eagle's talons exhibit pleasantly sharp definition, a significant attribute for this often softly struck O-mint issue. A few grade-consistent marks are not bothersome. Population: 9 in 65, 5 finer (10/19). Ex: Los Angeles Signature (Heritage, 8/2009), lot 1662.

From The Lithuania Collection, Part II. NGC ID# 24N9, PCGS# 6517

## 1910-S Half Dollar, Sharply Struck MS66 Lustrous and Original

3132 1910-S MS66 PCGS. CAC. The 1910-S half dollar mintage approached 2 million pieces. Mint State examples can be located with diligent searching through near-Gem, after which this issue becomes quite challenging. Reddish-brown patination imbued with whispers of bluish-green shows slightly deeper hues on the reverse of this piece. Sharply struck design elements and nicely preserved surfaces further enhance the coin's pleasing overall eye appeal. This piece displays the "Type C" mint mark seen on most 1910-S half dollars (see Lawrence, 1991). Population: 15 in 66 (2 in 66+), 4 finer. CAC: 4 in 66, 4 finer (10/19).

Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3752; Long Beach Signature (Heritage, 2/2017), lot 3795.

From The Lithuania Collection, Part II. NGC ID# 24NC, PCGS# 6520

#### 1914 Barber Half, MS65 Important Low-Mintage Issue

3133 1914 MS65 PCGS. The Philadelphia Mint half dollars of 1913, 1914, and 1915 are low-mintage issues that are elusive in higher grades. The average certified grade of the 1914, for example, is just 18, making this piece 47 points above average. Both sides are boldly defined with minimal surface marks and frosty, untoned silver luster. Population: 12 in 65 (2 in 65+), 3 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24NN, PCGS# 6530

#### PROOF BARBER HALF DOLLARS

## 1892 Barber Half Dollar, PR66+ Rare Ultra Cameo Example

3134 1892 PR66+ Ultra Cameo NGC. A Plus-graded Premium Gem proof from the first year of the Barber design, this coin exhibits fully detailed design elements with a rich coat of mint frost that contrasts profoundly with the deeply mirrored fields. The well-preserved surfaces are brilliant and appealing. Census: 3 in 66 Ultra Cameo (1 in 66+), 6 finer (10/19). NGC ID# 3TG8, PCGS# 96539

# 1897 Barber Half, PR68 Deep Cameo Intense Contrast

3135 1897 PR68 Deep Cameo PCGS. Ex: Bruce Scher. This coin is another old friend come to revisit, earlier in one of Bruce Scher's #1 PCGS Registry Sets, which included proof Barber dimes, Barber quarters, and Barber half dollars. Outstanding white-on-black deep cameo contrast projects outstanding eye appeal. The surfaces are brilliant, save for a few wisps of pale tan at the right obverse rim and parts of the reverse rim.

The strike is sharp nearly entirely throughout, showing full definition on the fletchings but a hint of softness on the upper-right shield corner and adjoining wing. This magnificently preserved Superb Gem is worthy of the finest collection of proof Barber half dollars, and it would also be an exemplary contribution to a proof silver type set. Population: 6 in 68 (1 in 68+) Deep Cameo, 0 finer (10/19). NGC ID# 24NZ, PCGS# 96544

# 1898 Half Dollar, PR68 Ultra Cameo Condition Census Example

3136 1898 PR68 Ultra Cameo NGC. A smallish mintage of 735 proof Barber half dollars was accomplished at the Philadelphia Mint in 1898. The issue was well-produced and many examples seen have sharp strikes and Cameo surfaces, but this magnificent PR68 specimen stands out, even among those high-quality examples of the coiner's art. The design elements of this remarkable piece are fully struck, with intricate detail on Liberty's hair and the eagle's talons. The virtually flawless brilliant surfaces include deeply mirrored fields that contrast profoundly with the richly frosted devices to create an intense cameo effect. Overall eye appeal is simply terrific. Census: 6 in 68 Ultra Cameo (1 in 68+★), 0 finer (10/19). NGC ID# BK9F, PCGS# 96545

# 1899 Half Dollar, PR67 Cameo Conditionally Rare, CAC

3137 1899 PR67 Cameo PCGS. CAC. Both circulation strike and proof 1899 mintages were large, but high-grade populations are less than expected from a mintage of 846 proofs. This Superb Gem proof is sharp and brilliant even with a faint translucent veil of light-gold toning. A needle-sharp strike and nicely frosted devices add eye appeal. CAC endorsement confirms the high quality, characteristic of the Philadelphia Mint in the late 1890s. Population: 8 in 67 (4 in 67+) Cameo, 5 finer. CAC: 13 in 67, 6 finer (10/19). NGC ID# 24P3, PCGS# 86546

# 1901 Barber Half Dollar, PR69★ Finest-Certified Cameo Example

3138 1901 PR69★ Cameo NGC. Only 813 proof Barber half dollars were struck in 1901, down from 912 proofs the year before. This was the final proof issue that featured many coins with the popular cameo contrast, as the Philadelphia Mint moved to a new location in 1902 and switched to an all-brilliant finish for proof coins. Few survivors can match the quality and eye appeal of the coin offered here.

This magnificent PR69 $\star$  example exhibits razor-sharp definition on all design elements and the devices sport a rich coat of mint frost that contrasts boldly with the deeply mirrored fields to produce a stunning cameo effect. The brilliant surfaces are virtually perfect, with no flaws visible to the naked eye. This coin is the single-finest certified Cameo example at either of the leading grading services. Census: 1 in 69 Cameo (1 in 69 $\star$ ), 0 finer (10/19). NGC ID# 24P5, PCGS# 86548

# 1903 Barber Half, PR68 Cameo Sole Finest Cameo Certified

3139 1903 PR68 Cameo NGC. Few proof Barber half dollars breach the lofty PR68 grade barrier, regardless of issue, but those that do are in constant demand among advanced specialists and Registry Set collectors alike. NGC has certified only three 1903 proof halves as high as PR68, with none numerically finer; of those, the present piece is the *only* one residing in the Cameo category. PCGS has certified five proofs at this level, but only one in the Cameo column (10/19). Stellar design definition and equally impressive preservation complement fully mirrored fields of this piece that display a hint of amber-gold toning over the reverse. Field-motif contrast is clear and unmistakable. NGC ID# 24P7, PCGS# 86550

## 1906 Barber Half Dollar, PR68★ Only 675 Pieces Struck

3140 1906 PR68★ NGC. Attractive highlights of lime-green and lavender toning visit the impeccably preserved surfaces of this magnificent PR68 specimen, with razor-sharp design elements and deeply mirrored fields underneath. Overall eye appeal is tremendous, as attested by the CAC sticker. From a small proof mintage of 675 pieces. Census: 5 in 68 (1 in 68★, 1 in 68+★), 0 finer (10/19). NGC ID# 24PA, PCGS# 6553

# 1907 Half Dollar, PR68 Cameo Single Finest Cameo

3141 1907 PR68 Cameo NGC. The 1907 is a scarce proof issue with 575 coins produced. Most survivors reside in non-Cameo grades. Due to the process by which proof dies were prepared during this period, very few examples were ever struck with distinct field-device contrast. In all grades, NGC reports only 15 Cameos. The present piece is not only the sole finest of these, but is also a full grade point finer than any non-Cameo certified by NGC (10/15). Sparkling mint brilliance is seen on each side with no trace of color present. The fields display bottomless pools of mirrored reflectivity, which give the coin a "black" appearance in those areas of negative space on both obverse and reverse. The devices are bright and frosted, aglow against the deep mirroring of the fields. Exceptional quality, ideal for type representation. NGC ID# 24PB, PCGS#

# 1909 Half Dollar, PR68 Cameo Original Toning, Bold Contrast

3142 1909 PR68 Cameo PCGS. Cameo proofs of Barber coinage are surprisingly collectible, and collectors can form extensive date runs without encountering the challenges of a 1901-S quarter, or, for that matter, an 1894-S dime. This splendid, totally original PR68 Cameo half dollar rests at the threshold of perfection, toned in russet, sea-green, and violet shades that leave small openings of brilliance in the center of each side. Even with the aid of magnification, one is hard-pressed to locate even the slightest imperfection. Few Barber half dollar proofs of any date could exceed the appeal and quality of the specimen offered here. Population: 3 in 68 Cameo, 0 finer (10/19).

Ex: FUN Signature (Heritage, 1/2005), lot 7508; purchased by Gene Gardner from Larry Shepherd (8/2006); Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR68 Cameo NGC), lot 98548. NGC ID# 24PD, PCGS# 86556

## 1915 Half Dollar, PR68 Important Low-Mintage Issue

3143 1915 PR68 NGC. The 1915 Barber half dollar is a key issue among circulation strikes, adding additional collecting pressure on the small number of proofs that survive. For the connoisseur who seeks the finest, this Superb Gem proof provides an important opportunity as it is tied for the finest that have been certified. Both sides are brilliant and untoned with bold strike definition and deeply mirrored fields. Although undesignated, light cameo contrast is present. Census: 8 in 68 (1 in 68★), 0 finer (10/19). NGC ID# 24PK, PCGS# 6562

## WALKING LIBERTY HALF DOLLARS

## 1917-D Obverse Half, MS65 Satiny Mint Luster

3144 1917-D Obverse MS65 PCGS. While not especially challenging in lower grades, the 1917-D Obverse is scarce in Gem condition and almost impossible to locate finer. It is also one of the small number of issues in the subset of Walkers that have the mintmark on the obverse. The mattelike surfaces have a layer of bright satiny luster and the strike details are strong throughout, and there are no mentionable abrasions. Population: 78 in 65 (2 in 65+), 6 finer (10/19). NGC ID# 24PR, PCGS# 6570

# 1917-S Walking Liberty Half, MS65 Scarce Obverse Mintmark Example Seldom Offered in Full Gem Condition

3145 1917-S Obverse Mintmark MS65 PCGS. The 1917-S is one of the key Walking Liberty issues regardless of grade, but especially in high Mint State condition. It becomes scarce in near-Gem condition, and rare in full Gem condition, both in an absolute sense and by demand. Fewer than 90 pieces are certified in MS65 and finer grades — hardly sufficient to satisfy the vast number of collectors pursuing an advanced collection of Walking Liberty halves.

This is a brilliant Gem coin, with the characteristic flat rims and vibrant, satinlike silver surfaces that draw the greatest attention of series specialists. Marks are limited to a pair of microscopic, pinpoint ticks below S of PLURIBUS on the reverse — hardly worth mention, but the only marks of any kind attributable to post-Mint origin. The strike is sharp as often seen for this well-produced issue, and eye appeal satisfies even the highest expectations. Population: 45 in 65, 4 finer (10/19). NGC ID# 26G7, PCGS#

## 1918 Half Dollar, MS65+ Registry Set Quality

3146 1918 MS65+ PCGS. CAC. Frosty mint luster reveals only trivial signs of contact on this Gem 1918 Walker, earning a Plus designation from PCGS and a green label from CAC. Liberty's head is sharp, and the branch hand is virtually full. The feathers on the eagle's trailing leg show above-average sharpness. The 1918 is scarce in this grade and rare with a Plus designation. PCGS has seen fewer than a dozen higher-grade specimens. Population: 11 in 65+, 11 finer. CAC: 41 in 65, 5 finer (10/19). NGC ID# 24PX, PCGS# 6574

# 1918 Half Dollar, MS66 Rarely Encountered Grade, None Finer

3147 1918 MS66 PCGS. While the drapery lines are typically weak, the thumb is fully outlined and the head detail is strong on this early Walking Liberty issue that is tied for the finest that has been certified. This piece has brilliant and frosty silver mint luster and faint gold toning that attests to its originality. Tied for the finest certified at PCGS or NGC, this example provides the enlarged image for the 1918 half dollar at PCGS Coin Facts where David Hall comments: "In Gem condition, the 1918 is definitely rarer than the 1916 and 1917." Population: 11 in 66, 0 finer (10/19). NGC ID# 24PX, PCGS# 6574

## 1934-S Walker, Frosty MS66+ Registry Set Contender

3148 1934-S MS66+ PCGS. CAC. The 1934-S Walking Liberty half dollar is scarce in MS66, but Plus-graded coins in this grade are rare, especially those with CAC endorsement. PCGS has seen only a dozen Superb Gems finer (10/19). This piece displays frosty, essentially untoned surfaces and bold design elements. Neither side exhibits bothersome abrasions. Population: 25 in 66+, 12 finer. CAC: 44 in 66, 7 finer (10/19). NGC ID# 24RH, PCGS# 6594

#### 1941 Half Dollar, MS68 A Prize for the Connoisseur

3149 1941 MS68 PCGS. CAC. Among the common dates in the Walking Liberty half dollar series, the 1941 is routinely available in most Mint State grades. However, in this lofty MS68 grade, the issue can hardly be called common. This Superb Gem has frosty silver luster with delicate gold and pale blue toning on both sides. Population: 29 in 68 (1 in 68+), 0 finer. CAC: 11 in 68, 0 finer (10/19). NGC ID# 24S3, PCGS# 6611

#### PROOF WALKING LIBERTY HALF DOLLAR

# 1937 Half Dollar, PR68 Stellar Preservation, Conditionally Rare

3150 1937 PR68 PCGS. Spectacular preservation earns this 1937 proof high marks for eye appeal and ranks it among the finest examples certified by either service. Delicate pastel hues grace the mirrored fields, complementing satiny luster on the devices. Liberty's branch hand is a trifle soft, but the strike is otherwise as expected for a proof issue.

Any proof Walking Liberty half dollar is a challenge to acquire in the lofty PR68 grade level, although the 1939 to 1942 issues are occasionally seen in this grade. The 1937 and 1938 coins are rare this fine, and the 1936 issue is almost unknown in this condition. The present 1937 coin is among the finest examples certified, a leading Registry Set contender. Population: 16 in 68 (1 in 68+), 0 finer (10/19). NGC ID# 5ESS, PCGS# 6637

#### PROOF FRANKLIN HALF DOLLARS

## 1950 Half Dollar, PR67 Cameo First Proof Franklin

3151 1950 PR67 Cameo NGC. The first Franklin half dollars were minted in 1948 during the proof coinage intermission at the Philadelphia Mint that began in the middle of World War II. No proofs were minted from 1943 through 1949. When production began again in 1950, few Cameo proofs were coined. Certified population data suggests that 15% of 1950 proof half dollars have cameo contrast, but the emphasis is always on higher value items. Low value coins often look rare because few are submitted. This Superb Gem has full proof brilliance with no toning on either side. The fields are mirrored, the devices are lustrous, and the eye appeal is incredible. Census: 24 in 67 Cameo (2 in 67+, 2 in 67★, 1 in 67+★), 3 finer (10/19). NGC ID# 6L9N, PCGS# 86691

## 1951 Half Dollar, PR68+ Cameo The Finest Cameo Proof

3152 1951 PR68+ Cameo NGC. An impressive Superb Gem proof, this contrasted piece has a black-and-white appearance between the fields and the devices on each side. Few of these have been certified at the top levels. In fact, this is the single finest Cameo proof 1951 half dollar that either service as examined. Census: 6 in 68 Cameo (1 in 68+), 0 finer (10/19). NGC ID# 27VB, PCGS# 86692

# 1952 Franklin Half, PR68★ Cameo Rare Registry Candidate

3153 1952 PR68★ Cameo NGC. Non-Cameo proof 1952 Franklin halves are occasionally seen as fine as PR68, and a few pieces are known in PR69. However, Cameo coins — the preferred category for Registry collectors — are rare so fine and unknown finer. NGC has not certified a single Ultra Cameo proof in this grade. The present Cameo displays inky-black fields that glimmer around resolute, frosted devices. Neither side is blemished in any discernible way, leaving this white-on-black coin with tremendous eye appeal and technical merit. Census: 15 in 68 Cameo (1 in 68+, 2 in 68★), 0 finer (10/19). NGC ID# 27VC, PCGS# 86693

## 1953 Half Dollar, PR68+ Cameo None Finer

3154 1953 PR68+ Cameo NGC. This piece is one of just four NGC submissions that have earned the PR68+ Cameo grade, with two others graded PR68 ★ Cameo. PCGS has never assigned a Plusdesignation to any PR68 Cameo example, and neither service as certified a PR69 Cameo (10/19). NGC has also certified two PR68 Deep Cameo coins with one other graded at PCGS. This is an important offering for the advanced collector. Both sides of this Superb Gem are brilliant and untoned with deeply mirrored fields serving as a back drop to the lightly lustrous devices. NGC ID# 6L9P, PCGS# 86694

# 1956 Franklin Half Dollar PR68 Deep Cameo Rare Type One Example

3155 1956 Type One PR68 Deep Cameo PCGS. Walter Breen (1988) estimated that 95% of all proof 1956 half dollars have the Type Two reverse, identified by three feather tips left of the perch, instead of the Type One subtype with four tips to the left. In addition, most proofs of the era lack dramatic white-on-black cameo contrast. But here is a coin with *both* blatant cameo contrast *and* the obsolete Type One reverse.

This frosty and flashy specimen is brilliant with immaculate surfaces. The coin is virtually perfect save for a few pinpoint retained planchet flakes of mint origin. More recently, Rick Tomaska (2011) states, "While the 1956 Type One Proof Franklin is extremely scarce in cameo, it is extremely rare in ultra or deep cameo." PCGS has not certified any 1956 proofs above the MS68 Deep Cameo level. Population: 3 in 68 Deep Cameo, 0 finer (9/19). NGC ID# 24TV, PCGS# 96686

#### **EARLY DOLLARS**

1795 Flowing Hair Dollar, VF35 B-7, BB-18, Three Leaves

3156 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, VF35 PCGS. Bowers Die State I, as usual. A Head of 1794, Three Leaves variety. This piece displays moderate wear and deep, mottled lilacgray and olive-gold toning. The strike is sharp and even, and no adjustment marks are apparent around the borders. The border dentils are complete and strong. A pleasing Flowing Hair type coin. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

# 1795 Flowing Hair Dollar, XF45 Three Leaves, B-5, BB-27

3157 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 NGC. Bowers Die State II, with a die crack from the stem toward the rim. A heavy die line in the field, near the top curl, identifies the popular BB-27 variety. This attractive Choice XF specimen shows light wear on the design elements, but retains much interior detail in Liberty's hair intact. The pleasing lavender-gray surfaces retain traces of original mint luster and a few minor marks on Liberty's jaw are the only flaws of note. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

## 1797 Draped Bust Dollar, XF40 10x6 Stars, B-3, BB-71

3158 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF40 NGC. The arrangement of the stars in a 10x6 pattern on the obverse identifies the BB-71 variety. This attractive XF specimen exhibits some light wear on the design elements, but Liberty's hair remains well-outlined and detailed. Some light planchet adjustment marks are evident on the reverse, but the surfaces are lightly abraded and retain traces of original mint luster. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

# 1800 B-8, BB-188 Dollar, AU50 Perfect Die State, Smooth Fields

3159 1800 B-8, BB-188, R.4, AU50 NGC. Bowers Die State I, perfect dies. Early dollars in perfect die states are not often seen, and for many varieties, they do not exist to any meaningful extent. BB-188 is a bit of an anomaly in that regard, as the perfect state of the dies represents a measurable portion of the survivorship, which Bowers estimates at 150 to 275 coins. BB-188 is represents the first of two uses for the obverse die and the only use of the reverse. This coin has smooth, satiny fields that lack any signs of metal flowlines or other die deterioration. Golden undertones complement natural olive-gray patina, and barely any wear is visible across the devices. A well-struck, evenly detailed Draped Bust type coin. NGC ID# 24X9, PCGS# 40074 Base PCGS# 6887

#### GOBRECHT DOLLAR

1836 Gobrecht Dollar, Judd-60 Die Alignment I, Richly Toned PR55

3160 1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR55 NGC. CAC. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State C, showing faint dentil chips above he second T in STATES. This early strike (from the last week of December) lacks any trace of the diagonal die clash line above the eagle's wing. The fields on each side show only moderate reflectivity because of the significant overlay of gray-green, rose, and blue speckled toning scattered across each side. The fields are minimally marked for a coin that was slightly circulated (or perhaps carried as a pocket piece). The striking details are also strong throughout with bold definition on the head of Liberty, the foot, and the eagle's plumage. NGC ID# 26YX, PCGS# 11227

## SEATED DOLLARS

#### 1846-O Seated Liberty Dollar, MS62 Rarely Seen Finer

3161 1846-O MS62 PCGS. OC-1, R.2. Osburn-Cushing Die State b/d, with die cracks through many obverse stars and a reverse crack from the left wing to the middle of U in UNITED. From a mintage of 59,000 pieces, the 1846-O Seated Liberty dollar is surprisingly difficult to locate in high grade. This attractive MS62 example exhibits well-detailed design elements, with a touch of the typical softness on the obverse stars. The lightly marked surfaces are blanketed in shades of cerulean-blue, magenta, and lavender-gray toning, with satiny mint luster underneath. Population: 11 in 62 (1 in 62+), 12 finer (10/19). NGC ID# 26GG, PCGS# 6933

## 1854 Seated Liberty Dollar, AU55 Elusive, Low-Mintage Issue

3162 1854 AU55 NGC. OC-1, High R.3.. Osburn-Cushing Die State b/b, with light clash marks that show best under Liberty's right arm. From a low mintage of 33,140 pieces, the 1854 Seated Liberty dollar is an elusive issue in high grade. This impressive Choice AU specimen shows just a trace of wear on the strongly impressed design elements and the lightly abraded surfaces retain traces of original mint luster. Census: 5 in 55, 26 finer (10/19). NGC ID# 24YT, PCGS# 6942

# 1855 Seated Dollar, Reflective MS62 Low-Mintage Circulation Strike Rarity

3163 1855 MS62 PCGS. OC-1, High R.3. Osburn-Cushing Die State a/a. Both proofs and circulation strikes were struck from the same die pair, making the identification of 1855 circulation strikes subjective, especially when the coin is an early strike with prooflike surfaces such as this Mint State coin. The strike is less-sharp than expected from a proof, with several star centers rounded, and some strike weakness exists through the eagle's left (facing) side.

Uncirculated business strikes are considerably scarcer than proofs, although both formats are rare for this low-mintage key issue. Just 26,000 pieces were struck — slightly under the mintage of the equally rare 1854 issue, creating a pair of mid-fifties Seated dollars that continue to challenge collectors. Both sides of the coin display mirrored fields, diminished by a few light abrasions and a thin veil of golden toning. There are no heavy marks, and much of the prooflike character survives. Population: 12 in 62, 8 finer (10/19). NGC ID# 24YU, PCGS# 6943

# 1866 Seated Dollar, MS64+ First-Year Motto Type Coin

3164 1866 Motto MS64+ PCGS. OC-1, R.2. The motto IN GOD WE TRUST was added to the reverse of the silver dollar in 1866. Two proof coins are known without the motto, but for collectors this issue is only obtainable with the motto. Circulation-strike coinage amounted to only 48,900 pieces, plus 725 proofs that were distributed through silver proof sets. This high-end Choice business strike is an ideal type coin. Representing the first year of the Motto design, it is also exceptionally well-preserved. Seated dollars of 1866 are rare in MS64, and just a handful of finer pieces are known. Subtle reflectivity in the fields complements a complete lack of toning on each side. There is some strike weakness on Liberty's head and the adjacent stars, but the interior devices are well-defined. A loupe reveals stray hairlines and light marks in the obverse fields that prevent Gem classification but do not detract to the unaided eye. Population: 28 in 64 (3 in 64+), 8 finer (10/19). NGC ID# 24Z9, PCGS# 6959

## 1871-CC Seated Liberty Dollar, VF20 Low-Mintage Key

3165 1871-CC VF20 PCGS. OC-1, High R.4. Osburn-Cushing Die State a/a. Only 1,376 Seated Liberty dollars were struck at the Carson City Mint in 1871, making it one of the most challenging issues of the series. Collectors prize examples in all grades and conditions. This impressive VF example shows some wear on the design elements, but LIBERTY remains legible and the mouse-gray surfaces are lightly abraded.

From The Spring Creek Collection, Part I. NGC ID# 24ZH, PCGS# 6967

#### PROOF SEATED DOLLARS

## 1869 Silver Dollar, PR64 Cameo Contrasted Proof Type Coin

3166 1869 PR64 Cameo PCGS. OC-P3, Low R.4. The proof 1869 Seated Liberty dollar is elusive in Cameo and Deep Cameo grades. This near-Gem example is well-contrasted, showing satiny devices and mirrored fields. Light golden toning covers each side. Under a loupe, only faint hairlines in the fields prevent full Gem classification. The strike is generally sharp, although a touch of the usual weakness is evident on the eagle's left (facing) talons. Population: 21 in 64 (1 in 64+) Cameo, 9 finer; 9 in 64 (3 in 64+) Deep Cameo, 11 finer (10/19). NGC ID# 252R, PCGS# 87017

## 1869 Silver Dollar, PR64 Deep Cameo Rare So Starkly Contrasted

3167 1869 PR64 Deep Cameo PCGS. OC-P1, High R.5. The 1869 proof Seated dollar is a rarity with Deep Cameo contrast, regardless of numeric grade. This near-Gem is tinted light golden and is well-struck everywhere save for the upper edge of the eagle's left (facing) wing. Grade-appropriate marks appear in the fields but are of little distraction. Population: 9 in 64 (3 in 64+) Deep Cameo, 11 finer (10/19). NGC ID# 252R, PCGS# 97017

#### TRADE DOLLARS

## 1874 Trade Dollar, MS65 Only Two Numerically Finer

3168 1874 MS65 PCGS. CAC. No period after FINE, as often seen on this issue. Pretty much any Trade dollar issue is a condition rarity in MS65, and early dates in the series are particularly elusive in high grade. The Trade dollar was first and foremost a trade coin, intended only for export. When it ultimately did circulate domestically, it caused a commercial use problem due to its heavier silver weight. It was never the subject of strong numismatic interest at the time of issue, and most collectors who did obtain examples often acquired proofs (which are relatively plentiful today).

We have previously handled a Gem 1874 Trade dollar on only five or six occasions, and we have never seen a finer coin, despite a few higher-graded specimens in the population data. This piece is the most attractively toned Gem 1874 that we have seen, showing natural amber, lilac, and sky-blue toning overall. The fields are moderately reflective, although strike weakness around the borders and on the eagle's right (facing) leg confirms the business strike origin of this piece. Population: 6 in 65 (1 in 65+), 2 finer. CAC: 3 in 65, 2 finer (10/19). NGC ID# 252Z, PCGS# 7034

# 1876 Trade Dollar, MS65+ Lustrous and Sharply Detailed

3169 1876 MS65+ PCGS. Type One Obverse, Type Two Reverse. The Philadelphia Mint struck 455,000 Trade dollars in 1876, and many examples circulated domestically in the early part of the year. However, the Act of July 22, 1876 demonetized the Trade dollar and the coins struck later in the year were almost all used in the China trade. This Plus-graded Gem exhibits sharply detailed obverse design elements and a faint die crack is evident through stars 11 through 13. The reverse shows just a touch of softness on the eagle's claws. The well-preserved surfaces radiate vibrant mint luster throughout and a few delicate hints of pale gold and lavender toning add to the outstanding eye appeal. Population: 29 in 65 (3 in 65+), 8 finer (10/19). NGC ID# 2539, PCGS# 7041

## 1877-CC Trade Dollar, MS61+★ Low-Mintage Branch Mint Issue

3170 1877-CC MS61+★ NGC. A small mintage of 534,000 Trade dollars was accomplished at the Carson City Mint in 1877, making the issue elusive in all Mint State grades today. This impressive MS61 specimen exhibits well-detailed design elements, with brilliant surfaces that show a mix of satiny mint luster and prooflike reflectivity in the fields. Lightly marked for the grade yet this example carries both the Plus and Star designations. Census: 22 in 61 (1 in 61+, 1 in 61+★), 47 finer (10/19). NGC ID# 253D, PCGS# 7045

#### PROOF TRADE DOLLARS

1877 Trade Dollar, PR67 Cameo Single-Finest Cameo at NGC

3171 1877 PR67 Cameo NGC. The 2020 Guide Book lists the mintage of proof 1877 Trade dollars as 510 pieces, based on monthly production reports from the Mint. Some numismatists (like Q. David Bowers) believe the production total was larger, while others (like Walter Breen) believe it was actually smaller. Whatever the mintage might have been, it is certain that a number of coins were not distributed by year's end, as 125 examples were sold at face value on January 11, 1878, probably to coin dealers. The 1877 Trade dollar is an elusive issue in proof format and examples in PR67, with the Cameo designation, are extremely rare.

This magnificent Superb Gem proof exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. Some incomplete detail in the eagle's feathers is due to lapping. The proof surface is unfinished between the eagle's claw and the branch. Vivid shades of lavender, cerulean-blue, and pale gold toning blanket the impeccably preserved surfaces and probably limit the contrast just enough to preclude an Ultra Cameo evaluation. Eye appeal is terrific. Census: 1 in 67 Cameo, 0 finer (10/19). NGC ID# 27YN, PCGS# 87057

# 1879 Trade Dollar, PR67★ Cameo Proof-Only Issue

3172 1879 PR67★ Cameo NGC. The Trade dollar had fallen out of favor by 1879, and the denomination was produced only in proof format that year. Although the denomination continued to be struck in proof every year until 1883, no more business strike examples were ever produced. Perhaps to compensate, proof mintages were somewhat inflated during this period, and the 1879 issue claims a total of 1,541 pieces.

The present coin is a spectacular Superb Gem proof, displaying profound cameo contrast between the deeply mirrored fields and the sharply detailed, frosty devices. The surfaces are largely brilliant, save for a hint of gold toning. Struck with the "first reverse" with a slight chip on the top of the 8. The left edge of the 7 appears to the right of the center of E in IN GOD WE TRUST, as described by Bowers (1993). Census: 20 in 67 Cameo (4 in 67★), 6 finer (10/19). NGC ID# 27YR, PCGS# 87059

# 1881 Trade Dollar, PR68★ Cameo Colorful Proof-Only Example

3173 1881 PR68★ Cameo NGC. The 1873 Mint Act eliminated the standard silver dollar and created a Trade dollar for use in East Asia. Although not intended for domestic circulation, the Trade dollar was authorized as legal tender in payments up to five dollars. By 1876, the price of silver had dropped to the point where it became profitable for Californians to coin silver into Trade dollars for circulation on the West Coast. The coins quickly flooded commercial channels, becoming a nuisance. The same began to take place in the Atlantic states soon after. Mid-way through 1876, the Specie Resumption Act repealed the legal tender status of the Trade dollar, but its passage had little effect on eliminating the coins from circulation. Only in 1878 was the denomination done in for good, when Treasury Secretary John Sherman halted business-strike production.

The manufacture of proofs carried on after 1878. Sales rose in 1879 once regular-issue coins were no longer available. Demand remained steady through 1880 but dropped significantly in 1881. Merely 960 proof Trade dollars were struck that year. Survivors are collectible through PR65 and become rare in PR66. Cameo examples represent roughly 30% to 40% of the certified population.

Gold and violet iridescence dominates each side, while crescents of profound cobalt-blue and light sea-green coloration adorn the peripheral areas. The hues are especially captivating on the reverse. The fields remain flashy beneath the colorful patina, explaining the acknowledged contrast. Not a single mark is apparent on either side. The strike is full, a quality that eludes many representatives of this proof-only issue. Census: 2 in 68 Cameo (2 in 68\*), 0 finer (10/19). NGC ID# 27YT, PCGS# 87061

## MORGAN DOLLARS

#### 1878 7/8 Tailfeathers Morgan Dollar VAM-38 Strong, MS66

3174 1878 7/8TF Strong, VAM-38, MS66 PCGS. Numerous die markers identify the VAM-38 variety, including prominent doubling of E PLURIBUS UNUM and the cotton blossoms, as well as the 7/5 tailfeathers of the eagle. This Premium Gem example displays blazing cartwheel luster that highlights sharp devices and exceptionally clean surfaces. The interiors are brilliant, and subtle blushes of orange-gold toning appear periodically around the borders. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

# 1878-CC Dollar, MS66+ Rarely Seen Finer

3175 1878-CC MS66+ NGC. Most 1878-CC dollars encountered in the marketplace are in mint condition, but in the lower levels. Locating an example better than the present MS66+ coin will be difficult; NGC has certified only nine specimens that grade higher and PCGS six coins finer (10/19). Brilliant surfaces display frosty silver luster. This is a highly appealing example for the Morgan dollar collector. NGC ID# 253M, PCGS# 7080

# 1878-CC Morgan Dollar, MS66+ Debut of the Type at Carson City

3176 1878-CC MS66+ PCGS. The first-year Carson City Morgan is popular with collectors, although examples are virtually uncollectible finer than MS66 for most enthusiasts. This Plusgraded Premium Gem will appeal to a plethora of Carson City dollar collectors. Semiprooflike fields and sharp, frosty devices complement each other amid brilliant, silvery luster. Liberty's cheek is largely clean, contributing to the lofty grade. PCGS lists only six finer non-Prooflike coins (11/19). NGC ID# 253M, PCGS# 7080

# 1878-CC Morgan Dollar, MS66★ Exceptional Prooflike Example

3177 1878-CC MS66★ Prooflike NGC. A delightful Premium Gem from the first year of the Morgan design, this coin exhibits razorsharp definition on all design elements and the well-preserved brilliant surfaces include deeply reflective prooflike fields. Overall eye appeal is tremendous for this first-year Carson City specimen. Census: 11 in 66 (2 in 66★) Prooflike, 1 finer (10/19). NGC ID# 253M, PCGS# 7081

## 1879-CC Morgan Dollar, MS64 Elusive Prooflike Key

3178 1879-CC MS64 Prooflike PCGS. Among Morgan dollar issue from the Carson City Mint, only the famous 1889-CC is seen less frequently than the 1879-CC. This spectacular Choice example displays sharply detailed design elements, with a rich coat of mint frosty, and deeply reflective prooflike fields. The surfaces show the expected number of minor hairlines and contact marks for the grade. Population: 90 in 64 (5 in 64+) Prooflike, 13 finer (10/19). NGC ID# 253T, PCGS# 7087

# 1879-CC VAM-3 Silver Dollar, MS63 Capped Die Reverse

3179 1879-CC Capped Die, VAM-3, Top 100, MS63 PCGS. A Top 100 Variety. In full Mint State grades, both the Capped Die and the Normal Die 1879-CC Morgan dollars are scarce and desirable. The Capped Die variety is actually a Large over Small Mintmark, with an attempt to remove the errant small mintmark before it was repunched. It was that process that resulted in numerous tiny defects in the die. This frosty Mint State piece has bright silver surfaces and it is entirely untoned. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

# 1879-O Morgan Dollar, MS66 Registry-Grade Example

3180 1879-O MS66 PCGS. The New Orleans Mint reopened for coinage operations in 1879, to help strike the millions of Morgan dollars mandated by the Bland-Allison Act of 1878. The 1879-O Morgan is plentiful in most grades, although Premium Gems are rare, and no Prooflike or Deep Mirror Prooflike examples are listed this fine at PCGS. This delightful non-Prooflike Premium Gem exhibits a sharp strike for a New Orleans issue, and the impeccably preserved surfaces radiate vibrant mint luster throughout. Neither side is toned. Population: 37 in 66 (6 in 66+), 0 finer (9/19). NGC ID# 253X, PCGS# 7090

# 1879-S Morgan Dollar, Frosty MS68+ None Are Numerically Finer

3181 1879-S MS68+ PCGS. CAC. The 1879-S is the first readily available Morgan dollar in Superb Gem condition, although most such coins are MS67s. Pieces in MS68 are significantly scarcer, and it is rare to encounter a CAC-approved coin this fine. This piece displays bright mint frost throughout and is sharply struck. Both sides are brilliant. The surface quality is remarkable — this coin earns an MS68 grade, Plus designation, and CAC approval purely off of its outstanding preservation, without the aid of semiprooflike fields which helps many other coins achieve this lofty grade. NGC ID# 253X, PCGS# 7092

# 1880-O Morgan Dollar, MS65 A Rare Issue in This Grade

3182 **1880-O MS65 PCGS.** This conditionally rare O-mint issue is virtually unobtainable any finer than the Gem level, and even MS65 examples are in exceedingly short supply. Many fine Morgan dollar collections do not have a Gem 1880-O. This is brilliant and lustrous example, with a pinpoint-sharp strike. There is not a single meaningful mark on the smoothly frosted obverse fields, and Liberty's cheek is free of all but two or three tiny ticks. The reverse strike and surfaces are equally impressive and frosty. The eye appeal is terrific on both sides. Population: 49 in 65 (5 in 65+), 2 finer (10/19). NGC ID# 2543, PCGS# 7114

# 1880-S Dollar, MS68 Dramatically Toned Reverse

3183 1880-S MS68 PCGS. The reverse of this magnificent, nearly immaculate San Francisco Morgan dollar is dramatically toned in variegated rainbow hues, including electric-blue, magenta, forest-green, and golden-orange. The obverse is brilliant and frosty with pale golden accents. PCGS reports five finer submissions (11/19). NGC ID# 2544, PCGS# 7118

# 1882-CC Dollar, MS67 Top-Grade Prooflike Example

3184 1882-CC MS67 Prooflike NGC. Available in the absolute sense, the 1882-CC Morgan dollar is conditionally scarce in the finer Prooflike grades. This piece is among the finest at NGC in this category. Both sides yield sharp, frosty design elements and brilliant, gleaming fields. There are no distracting abrasions and the eye appeal is heightened by modest cameo contrast. Census: 4 in 67 (1 in 67★) Prooflike, 0 finer (10/19).

Ex: ANA Signature (Heritage, 8/2015), lot 5516. NGC ID# 254B, PCGS# 7135

# 1883 Silver Dollar, MS67+ Untoned, Frosted, and Lustrous With CAC

3185 1883 MS67+ PCGS. CAC. With a mintage in excess of 12 million coins, the 1883 Morgan is one of the more plentiful issues overall from the 1880s, but its availability declines sharply at the MS67 grade level, and finer pieces are prohibitively rare. This virtually pristine example will please even the most discerning of collectors, with thick, frosty mint luster and untoned surfaces. The hair immediately above Liberty's ear is trifle soft, though the coin has so much "pop" that the eye appeal is uninhibited. The Plus designation and CAC endorsement confirm this coin's high quality, while PCGS reports only five numerically finer submissions. Population: 40 in 67+, 5 finer. CAC: 74 in 67, 4 finer (9/19). NGC ID# 254G, PCGS# 7142

# 1883-O Morgan, Vibrant MS67+ One Coin Certified Finer, CAC

3186 1883-O MS67+ PCGS. CAC. By 1883, Morgan dollar production was partly determined by storage capacity at the different mints. San Francisco was nearly out of space, so the New Orleans Mint stepped up production to more than 8.7 million pieces. Most went into storage and were dispersed in the 1960s. This is a brilliant and lustrous high-end Superb Gem, nearly unabraded with a mark-free cheek on Liberty and a sharp O-mint strike. Just a single coin is numerically finer at either PCGS or NGC. Population: 11 in 67+, 1 finer. CAC: 19 in 67, 0 finer (10/19). NGC ID# 254J, PCGS# 7146

#### 1884-S Morgan Dollar, MS61 Attractive for the Grade

3187 1884-S MS61 NGC. At first glance, this lustrous, golden-toned 1884-S Morgan dollar appears a couple of grade points finer than MS61. There are light handling marks on the obverse but none that stand out. However, a loupe reveals faint hairline slide marks on Liberty's cheek that keep this coin from a finer grade. There is a hint of reflectivity in the fields, and the devices are boldly struck. NGC ID# 254P, PCGS# 7156

# 1884-S Dollar, MS61 Prooflike Rare With Designated Prooflike Surfaces

3188 1884-S MS61 Prooflike NGC. The 1884-S is a noted scarcity in Uncirculated condition, with or without reflective fields. Only a single example is designated Deep Prooflike, and all Prooflike Mint State pieces are very rare. This example shows a single reeding mark behind the eye, but it is otherwise minimally abraded for the grade. We seldom offer the 1884-S with designated Prooflike fields — this is a sharply struck and flashy exception. Census: 3 in 61 Prooflike, 3 finer (10/19). NGC ID# 254P, PCGS# 7157

## 1885 Morgan Dollar, MS67+ Exceptional Surface Quality, CAC

3189 1885 MS67+ PCGS. CAC. With a mintage exceeding 17.7 million pieces, the 1885 issue was surprisingly well-produced, and even today Gem examples are readily available. High-end Superb Gem coins such as this lightly toned example are scarce in comparison, while numerically finer examples are important rarities. A Plus-graded MS67 representative, this sharply struck and CAC-endorsed coin features translucent gold toning that deepens to blue and tan-gold on the reverse. A tiny nick near the eagle's beak is the only mark to pedigree the piece. Population: 31 in 67+, 3 finer. CAC: 103 in 67, 3 finer (9/19). NGC ID# 254R, PCGS# 7158

# 1887-S Dollar, MS65 Prooflike Top-Grade Prooflike Coin at NGC

3190 1887-S MS65 Prooflike NGC. The 1887-S Morgan dollar is scarce with Prooflike fields, and in Gem condition such coins are the epitome of rare. NGC lists only three pieces in MS65 Prooflike and PCGS one, with none finer at either service. This coin displays brilliant, satiny luster with distinctive reflectivity in the fields. Appreciable cameo contrast is apparent on each side, and only the smallest of contact marks prevent an even finer grade. Census: 3 in 65 Prooflike, 0 finer (10/19). NGC ID# 2554, PCGS# 7181

# 1889-CC Morgan Dollar, AU50 The Key Carson City Issue

3191 1889-CC AU50 PCGS. There are a few Morgan dollar rarities that collectors seek in grades below Mint State. One well-known example is the 1893-S, and another is the 1889-CC. This attractive AU dollar has considerable silver luster remaining on both sides, with hints of peripheral gold toning. The 1889-CC is the undisputed king of the Carson City Morgan dollars. NGC ID# 2559, PCGS# 7190

## 1889-CC Morgan Dollar, AU53 Partially Reflective Fields

3192 1889-CC AU53 PCGS. Remnants of original luster can still be seen in the fields of this AU 1889-CC Morgan dollar and semiprooflike reflectivity can also be seen, while the lightly circulated devices show bold detail. Amber and russet hues accent champagne-gray patina, producing strong eye appeal. The 1889-CC is seldom offered in AU with this degree of originality. NGC ID# 2559, PCGS# 7190

## 1889-CC Morgan Dollar, AU58 Branch Mint Key

3193 1889-CC AU58 NGC. From a mintage of 350,000 pieces, the 1889-CC is the most elusive Morgan dollar from the famous Carson City Mint. This impressive near-Mint example exhibits just the slightest trace of wear on the sharply detailed design elements and the mostly brilliant surfaces are lightly abraded, with much prooflike reflectivity in the fields. NGC ID# 2559, PCGS# 7190

# 1889-CC Silver Dollar, MS62 Impressively Natural Surfaces, CAC

3194 1889-CC MS62 PCGS. CAC. Unquestionably the key date of the Carson City Morgan dollar subset, the 1889-CC ranks among the most-desired issues of the entire Morgan series by virtue of its small mintage (just 350,000 pieces) and the allure of its Nevada Mint history. Most of the mintage circulated in the West and few Mint State coins survive to satisfy untold thousands of silver dollar collectors and Carson City enthusiasts. This is an especially original MS62 coin, with pearlescent luster beneath rich, lilacgray toning and subtle iridescence at the margins. A bold strike complements remarkably mark-free surfaces for the grade, with just a handful of small abrasions seen under a loupe. CAC endorsement recognizes the high quality. NGC ID# 2559, PCGS# 7190

# 1889-CC Morgan Dollar, MS62 Elusive Prooflike Example

3195 1889-CC MS62 Prooflike NGC. The Carson City Mint was used as a storage and assay office from 1886 through 1888, but the facility was reactivated for coinage operations in 1889. Unfortunately, the physical plant had run down during the long layoff and it was necessary to retool and repair the buildings, as well as hire and train new staff, before normal operations could commence. The Mint was only ready to resume coin production on October 10. As a result, a meager mintage of 350,000 Morgan dollars was produced before the end of the year. Today, the 1889-CC is the most elusive Carson City Morgan dollar.

Examples with prooflike surfaces are not unusual for most Carson City mintages, but he 1889-CC is seldom seen with deeply reflective fields and frosty devices. This attractive MS62 example is an exception, with sharply detailed design elements and brilliant prooflike fields that show the expected number of minor contact marks for the grade. Overall visual appeal is outstanding. Census: 25 in 62 (1 in 62+) Prooflike, 48 finer (10/19). NGC ID# 2559, PCGS# 7191

# 1891-CC Morgan Dollar, MS66+ Only One Coin Finer at NGC

3196 1891-CC MS66+ NGC. The 1891-CC was not represented in the GSA sales of the 1970s to the same extent as early 1880 Carson City dollars, with only 5,177 Uncirculated coins included in the distribution. About an equal number of the '91-CC was part of the Redfield hoard, but many of those were lower-grade Uncirculated coins. Premium Gem coins are scarce, and finer pieces are demonstrably rare.

This Plus-graded example is housed in a new Ken Bressett autographed holder. The coin is brilliant and frosted, with smooth fields and an unblemished cheek on Liberty. The strike is sharp, with a touch of softness above the ear but otherwise bold definition throughout. Cartwheel mint luster radiates from each side. Both NGC and PCGS have seen one numerically finer coin, and a half dozen other Plus-graded pieces combined. NGC Census: 12 in 66 (2 in 66+), 1 finer (10/19). NGC ID# 255H, PCGS# 7206

# 1891-S Dollar, Top-Grade MS67 Spectacular Registry Coin One Piece Finer at PCGS

3197 1891-S MS67 PCGS. While the 1891-S is a well-produced issue, most examples grade between MS62 and MS64. Superb Gem coins are few and far between at either PCGS or NGC, even though nearly 5.3 million pieces were struck at the San Francisco Mint. That total eclipsed the combined efforts of Philadelphia and New Orleans. Despite the large mintage, demand outstrips the supply of Gem or finer pieces, and Superb Gems are in a class of their own.

This is a highly lustrous and well-frosted MS67, with brilliant-white fields and devices on both sides. Cartwheel luster radiates from the obverse and reverse centers. A sharp strike includes nearly full details on each side. Just a solitary Plus-graded MS67 is finer at PCGS. Population: 10 in 67 (1 in 67+), 0 finer (10/19). NGC ID# 255K, PCGS# 7210

#### 1892-CC Morgan Dollar, MS65+ Elusive Issue in Finer Grades

3198 1892-CC MS65+ PCGS. CAC. From a mintage of 1.3 million pieces, the 1892-CC Morgan dollar is elusive in grades above the MS65 level. This spectacular Gem exhibits sharply detailed design elements, with clash marks on both sides. The well-preserved surfaces are lustrous and appealing, with subtle hints of golden-tan toning in selected areas. PCGS has graded 41 numerically finer examples (10/19). NGC ID# 255M, PCGS# 7214

# 1892-O Silver Dollar, MS65+ Well-Preserved for the Grade

3199 1892-O MS65+ PCGS. CAC. The 1892-O is a major rarity with prooflike fields, and non-Prooflike coins are rare any finer than MS65. This Plus-graded coin is one of just two dozen Gems to earn CAC endorsement. It is frosty and lustrous with dusky tangold toning over each side. Only minor strike softness affects the centers. Liberty's cheek is clean. PCGS lists only 10 higher-grade examples, including one Prooflike piece (11/19). NGC ID# 255N, PCGS# 7216

# 1892-O Morgan Dollar, MS66 Registry Grade Specimen

3200 1892-O MS66 PCGS. The 1892-O Morgan dollar claims a mintage of more than 2.7 million pieces, but the issue was not well-produced and most examples seen are softly struck, with subdued mint luster. Some coins were released into circulation near the time of issue, making the 1892-O readily available in circulated grades. However, most of the mintage was held in government storage and a large portion of the production escaped melting under the provisions of the Pittman Act. The 1892-O was well-represented in the Treasury releases of the 1960s, making examples in lower Mint State grades easy to locate. At the Gem level, the issue becomes elusive, due mostly to its poor production, and finer examples are decidedly rare.

This delightful Premium Gem exhibits unusually sharp definition on all design elements, with just the slightest trace of blending on the hair strands above Liberty's ear. The impeccably preserved brilliant surfaces are both lustrous and appealing. Population: 8 in 66 (1 in 66+), 1 finer (10/19). NGC ID# 255N, PCGS# 7216

## 1892-S Morgan Dollar, AU58 Seldom Seen in High Grade

3201 1892-S AU58 NGC. Uncirculated examples of the 1892-S continue to gain traction as sought-after rarities in the Morgan dollar series. Brief high-point wear keeps this lightly toned and still-lustrous 1892-S from a full Mint State grade. Light abrasions exist in the obverse fields, with a few hairlines, but no marks of substance are seen across the light golden-gray fields and well-struck devices. A touch of weakness above Liberty's ear and at the eagle's breast is the result of strike plus wear. NGC ID# 255P, PCGS# 7218

# 1892-S Silver Dollar, MS61 Important Mint State Rarity

3202 1892-S MS61 NGC. While many collectors believe the 1889-CC is the scarcest Mint State Morgan dollar behind the 1893-S, the 1892-S easily claims that honor despite a mintage nearly three times that of the 1889-CC. In recent years, the 1892-S has stepped out of the '93-S shadow, and it is recognized as rare in all Uncirculated grades (and highly valued accordingly).

This is a brilliant MS61 example, with bagmark-free surfaces and bright silver luster throughout the semireflective fields. The assigned grade accounts for scattered delicate hairlines, yet other marks are simply unseen on the boldly struck surfaces. We expect strong competition when this Mint State 1892-S is called. Census: 13 in 61, 29 finer (10/19). NGC ID# 255P, PCGS# 7218

## 1893 Morgan Dollar, MS65+ Condition Rarity in Finer Grades

3203 1893 MS65+ PCGS. CAC. The low-mintage of 389,000 pieces makes the 1893 Morgan dollar a popular issue and the date is definitely rare in grades above the MS65 level. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved brilliant surfaces that radiate vibrant mint luster and outstanding eye appeal. PCGS has graded only six numerically finer examples (10/19). NGC ID# 255R, PCGS# 7220

## 1893-CC Silver Dollar, MS64 Brilliant and Well Struck

3204 1893-CC MS64 PCGS. The 1893-CC remains somewhat available at the MS64 level, although its rarity in Gem or finer grades adds pressure to near-Gem examples. This sharply struck and brilliant coin is a case in point. The fields and devices are largely free of marks or abrasions. A bit of chatter in the left obverse field includes a few pinpoint ticks on the cheek. Cartwheel silver luster enlivens both sides of this high quality final-year Carson City dollar, certainly a candidate for possible upgrade. NGC ID# 255S, PCGS# 7222

# 1893-O Dollar, Well-Struck MS64 Great Eye Appeal, Uncollectible Any Finer

3205 1893-O MS64 PCGS. All four Morgan dollar issues for the year prove challenging in high grades, none more so than the 1893-S, followed by the 1893-CC. This New Orleans ranks third, proving scarce in MS64 before quickly becoming an essentially unobtainable rarity at the Gem level (those coins regularly realize six-figure prices). PCGS has graded only six better submissions and there are another four finer pieces at NGC (10/19).

Delicate golden accents complement the frosty motifs and clean fields, but this satiny Choice Uncirculated dollar remains almost entirely brilliant. The breast feathers are crisp, and there is just a bit of blending on the curls above the ear. A great example of this challenging New Orleans issue.

## 1893-S Morgan Dollar, VF35 Sought-After Key Issue

3206 1893-S VF35 PCGS. CAC. A Choice VF representative of the rarest, most sought-after business-strike issue of the series, from a minuscule mintage of 100,000 pieces. This coin exhibits significant wear on the eagle's breast, but most of the detail in Liberty's hair remains intact and her ear is bold. The lightly abraded surfaces are blanketed in shades of lavender and steel-gray toning. NGC ID# 255U, PCGS# 7226

#### 1893-S Silver Dollar, VF35 Clear Die Characteristics

3207 1893-S VF35 PCGS. CAC. The die characteristics of genuine 1893-S Morgan dollars are clearly visible on this pleasing, light circulated example with light gray high points and rich brownishgray field toning that deepens near the borders. The 1893-S is the well-known key to a set of circulation strike Morgan silver dollars. NGC ID# 255U, PCGS# 7226

# 1893-S Morgan Dollar, XF45 Business-Strike Key to the Series

3208 1893-S XF45 NGC. From a memorably low mintage of 100,000 pieces, the 1893-S is the most elusive business-strike issue of the Morgan dollar series. This attractive Choice XF specimen retains much of the interior detail on Liberty's hair and ear and the eagle's wingtips show just the slightest wear. The lightly abraded surfaces retain traces of original mint luster. NGC ID# 255U, PCGS# 7226

# 1893-S Dollar, Brilliant AU53 Good Strike, Briefly Circulated

3209 1893-S AU53 NGC. While much of the notoriety of the 1893-S comes from its few Mint State examples — which are inarguably rare in the truest sense of the word — there can be no doubting its overall scarcity from a series-low mintage of 100,000 pieces. Some researchers believe the actual distribution was even less than that, with some of the coins melted in 1918 under authority of the Pittman Act.

This is a still-lustrous About Uncirculated example that shows only brief wear and light field abrasions. Liberty's hair over the ear and the eagle's breast lack full definition, a combination of minor strike weakness and high-point rub. A shallow reeding mark on Liberty's cheek is visible under magnification, the sole mark of any individual significance. Michael "Miles" Standish suggests that only about 12,000 gradable 1893-S silver dollars survive — a tiny number for the legions of Morgan dollar enthusiasts needing a collectible example of this preeminent 19th century key-date coin. Census: 46 in 53 (1 in 53+), 66 finer (10/19). NGC ID# 255U, PCGS# 7226

## 1894-O Morgan Dollar, MS64 Rare Any Finer

3210 1894-O MS64 NGC. This fully brilliant near-Gem has nearly pristine fields, and the eagle and wreath are unabraded. Moderate facial contact and lightly impressed centers are all that limit the grade. The 1894-O has a higher mintage than the 1893-O and 1895-O but is typically found in circulated grades and is rare above the MS64 level. The holder commemorates the *Guide Book* and is signed by Ken Bressett. NGC has graded eight numerically finer examples (10/19).

Ex: Long Beach Signature (Heritage, 6/2011), lot 4090. NGC ID# 255W, PCGS# 7230

## 1894-O Silver Dollar, MS64 Rarely Found Finer

3211 1894-O MS64 NGC. This satiny, champagne-tinted 1894-O Morgan dollar is just about well-preserved enough to earn a Gem grade, although the weakness of the strike in the centers factors into the NGC opinion of MS64. Liberty's cheek is clean. The 1894-O is a semikey date in high grade, and it is rarely seen finer than MS64. NGC ID# 255W, PCGS# 7230

# 1894-O Morgan Dollar, MS64+ Scarce Issue From the 1890s

3212 1894-O MS64+ PCGS. CAC. From 1893 to 1895, a period of turmoil at the U.S. Treasury (and for silver purchase legislation), output of Morgan dollars was unimpressive. Even the highest-mintage issue in those three years, the 1894-O, saw fewer than 1.8 million pieces struck. This MS64+ example has faint hints of gold-gray against silver surfaces with a single small fleck just to the right of the eagle's head. Softness is noted on the hair above Liberty's ear, but aside from a shallow scrape near the truncation of the bust, there are few flaws of individual significance. PCGS has graded only 16 examples as MS65 or finer (10/19).

Ex: Chicago Signature (Heritage, 8/2013), lot 5765. NGC ID# 255W, PCGS# 7230

## 1894-S Silver Dollar, MS65 Conditionally Elusive

3213 1894-S MS65 PCGS. CAC. While the 1894-S Morgan dollar is not considered a rarity at this grade level, finer examples are nearly impossible to locate, making this Gem an ideal example for an advanced collection. PCGS has certified 190 submissions as MS65, but only 19 in finer grades. This impressive Gem has mottled gold and iridescent toning over brilliant, satiny silver luster. CAC: 37 in 65, 6 finer (10/19). NGC ID# 255X, PCGS# 7232

# 1895-O Morgan Dollar, MS62 Clean for the Grade

3214 1895-O MS62 NGC. The 1895-O is among the most elusive Morgan dollars in Uncirculated condition, in part due to its low mintage of only 450,000 coins, little of which survived 19th century circulation and the Pittman Act melts of 1918. This coin is above-average in sharpness and displays smooth, satiny mint luster. The surfaces are remarkably free of noticeable abrasions for the grade, although some faint handling marks appear on Liberty's cheek beneath a loupe. NGC ID# 255Y, PCGS# 7236

### 1896 Morgan, MS66+ Deep Mirror Prooflike Registry-Grade Condition Rarity

3215 1896 MS66+ Deep Mirror Prooflike PCGS. CAC. Deep Mirror Prooflike Morgan dollars of any date are rarely seen without unsightly field abrasions that show up because of the reflectivity. This CAC-approved MS66+ 1896 coin does not show any distractions. Each side is beautifully preserved and modestly contrasted with no toning. Slight strike weakness is noted on the hair above Liberty's ear. Higher-grade Deep Mirror Prooflike 1896 dollars are virtually uncollectible. Population: 25 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 5 in 66, 0 finer (10/19). NGC ID# 2562, PCGS# 97241

# 1896-O Dollar, MS63+ Important Plus-Graded Example

3216 1896-O MS63+ PCGS. The 1 is repunched beneath the flag. Scarce in any Mint State, the 1896-O is rare in MS64 and virtually uncollectible any finer. This sharply struck Select Uncirculated example is Plus-graded with frosted, brilliant surfaces that far exceed the normal '96-O in quality. Light abrasions are visible under a loupe, the only grade-limiting factor. Population: 27 in 63+, 34 finer (9/19). NGC ID# 27ZU, PCGS# 7242

# 1897 Silver Dollar, MS66 Deep Prooflike The Finest NGC Certified Example

3217 1897 MS66 Deep Mirror Prooflike NGC. The typical 1897 Morgan silver dollar is sharply struck with frosty luster. Those with a mirror finish are rarely encountered, especially when they earn the Deep Prooflike designation of this example. Current NGC Census data reveals that just one example of every 158 submissions of 1897 silver dollars earns the Deep Prooflike description. This Premium Gem is one of those and exhibits a bold strike and untoned silver surfaces with fully mirrored fields and lustrous, frosty devices. Census: 1 in 66 Deep Mirror Prooflike, 0 finer (10/19). NGC ID# 2567, PCGS# 97247

# 1897-S Morgan Dollar, MS67 Outstanding S-Mint Type Coin

3218 1897-S MS67 PCGS. CAC. The 1897-S Morgan dollar enjoyed a well-produced mintage of 5.8 million pieces, making it an available issue in most grades and a popular branch mint type coin. This delightful Superb Gem exhibits sharply detailed design elements and impeccably preserved brilliant surfaces, with vibrant mint luster and outstanding eye appeal. Population: 33 in 67 (2 in 67+), 2 finer. CAC: 6 in 67, 1 finer (10/19). NGC ID# 2567, PCGS#

### 1899 Silver Dollar, MS67 Elusive Philadelphia Issue

3219 1899 MS67 NGC. Unlike most Philadelphia Mint issues, the 1899 had a low mintage of just 330,000 coins. Survivors are infrequently encountered at the lofty MS67 grade, and none have earned a higher numerical grade at either NGC or PCGS. This fully lustrous Superb Gem has splendid gold, russet, and blue toning on the obverse, with rich blue and lavender on the reverse. A beauty. Census: 6 in 67 (1 in 67+), 0 finer (10/19). NGC ID# 256C, PCGS# 7258

# 1899-O Silver Dollar, MS67+ Only One Piece Finer at PCGS, CAC

3220 1899-O MS67+ PCGS. CAC. This 1899-O is remarkably attractive for an often poorly struck, inelegant issue. Thickly frosted surfaces greet the eye with swirling luster effects, and the essentially unmarked surfaces display full brilliance. A sharp O-mint strike elicits every detail, especially with no distracting abrasions. As an issue, the 1899-O is anything but rare in Mint State, but Superb Gems are scarce and always in demand among Morgan Dollar specialists and high quality type collectors. The PCGS Plus designation and CAC endorsement are icing on the cake. Population: 26 in 67+, 1 finer. CAC: 79 in 67, 0 finer (10/19). NGC ID# 256C, PCGS# 7260

### 1900-O/CC Dollar, Originally Toned MS66+

3221 1900-O/CC VAM-8, Top 100, MS66+ PCGS. CAC. A Top 100 Variety. While not especially scarce, the 1900-O/CC remains a collector favorite. Seven years after the Carson City mint closed, several dies were sent to the New Orleans mint with the O mintmark stamped on top of the CC, resulting in this curious overmintmark. Originally toned with dabs of golden-russet toning, a few nearly brilliant areas can be seen on each side. Sharply defined throughout. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

### 1901 Morgan, Lightly Toned MS63 Original Luster, Rare Finer

3222 1901 MS63 NGC. The vast majority of surviving 1901 Morgan dollars in Mint State are non-Prooflike coins, and these are scarce in MS63. Higher-grade examples are rarely offered. This Select representative has satiny original mint luster. A dusting of golden toning over each side helps mask some light marks on Liberty's cheek, which prevent a finer grade from NGC. The eagle's breast is slightly soft as usual. Census: 94 in 63 (2 in 63+), 20 finer; 1 in 63 Prooflike, 0 finer (10/19). NGC ID# 256I, PCGS# 7272

# 1901 Morgan Dollar, MS63 Key Condition Rarity in the Series

3223 1901 MS63 NGC. The 1901 dollar is well-known as a condition rarity, similar to the 1884-S, both of which appear to have been "struck in AU." The satiny mint luster on this piece is unaffected by the signs of handling that afflict most 1901 dollars. To view this piece by itself, and not in the context of the thousands of AU coins that are known, one would never know how difficult this date is to locate in strict mint condition. The surfaces show touches of golden-tan color at the margins, framing the untoned centers. Sharp definition characterizes the design elements, save for minor softness on the eagle's breast, and a few minute obverse marks explain the grade. NGC ID# 2561, PCGS# 7272

### 1901 VAM-3 Dollar, AU58 The 'Shifted Eagle' Reverse

3224 1901 Doubled Die Reverse, VAM-3, AU58 NGC. A Top 100 Variety. The so-called Shifted Eagle reverse, die doubling is most evident on the tailfeathers of the eagle. The rarity of this variety is undisputed, but its significance is overshadowed by the conditional rarity of the 1901 in any grade of Uncirculated, making this AU58 DDR essentially the finest obtainable for most collectors. Much brightness remains beneath the slightest hint of pale golden patina, and each side retains noticeable portions of satiny mint luster around the devices. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

### 1902-O Morgan Dollar, MS67 Registry Grade Example

3225 1902-O MS67 PCGS. From a mintage of 8.6 million pieces, the 1902-O Morgan dollar was not a well-produced issue, and most examples seen exhibit weak strikes, subdued mint luster, and excessive bag marks. This spectacular Superb Gem is a happy exception to the rule, with sharply detailed design elements, vibrant mint luster, and impeccably preserved surfaces. A few hints of golden-tan toning add to the outstanding eye appeal. Population: 48 in 67 (2 in 67+), 0 finer (10/19). NGC ID# 256N, PCGS# 7280

# 1902-O Silver Dollar, MS67 Multicolor Toning

3226 1902-O MS67 NGC. This impressive Superb Gem 1902-O Morgan silver dollar has frosty mint luster that shines through reddish-gold, sea-green, and iridescent toning on both sides. This is a spectacular example that is tied for the finest certified at NGC and PCGS. Census: 31 in 67 (2 in 67+, 1 in 67★), 0 finer (10/19). NGC ID# 256N, PCGS# 7280

# 1902-O Morgan, Splendid MS67 Among the Finest Certified

3227 1902-O MS67 PCGS. One of the "Creole" Morgan dollar issues, unveiled in the early 1960s when the Treasury unsealed a vault filled with New Orleans Mint silver dollars. The 1902-O seldom approaches Superb Gem status, because most pieces are bagmarked and poorly struck. This is a sharp and pleasing Superb Gem, with dusk-gray toning at the obverse margins that brightens toward the center, and only brief weakness above the ear. The reverse is partially reflective and toned in dappled shades of blue, reddishgold, and tan. Amazingly, the surfaces appear almost wholly unabraded, save for a few microscopic ticks on the cheek and nose. Population: 46 in 67 (1 in 67+), 0 finer (10/19). NGC ID# 256N, PCGS# 7280

# 1902-O Morgan Dollar, MS67 Prooflike Single-Finest Prooflike Example at NGC

3228 1902-O MS67 Prooflike NGC. The 1902-O Morgan dollar claims a robust mintage of 8.6 million pieces and the issue was well-represented in the Treasury releases of the 1960s. As a result, the 1902-O is readily available in absolute terms. However, the 1902-O was not well-produced and most examples seen are flatly struck and suffer from excessive bagmarks. This remarkable Superb Gem is a major exception to the rule, with razor-sharp definition on all design elements and virtually pristine brilliant surfaces that show much prooflike reflectivity in the fields. Overall eye appeal is terrific. This coin should find a home in the finest collection or Registry Set. Census: 1 in 67 Prooflike, 0 finer (10/19). NGC ID# 256N, PCGS# 7281

### 1903-S Morgan Dollar, MS63 Better-Date San Francisco Issue

3229 1903-S MS63 NGC. The 1903-S is among the most challenging Morgan dollars to acquire that was struck in the 20th century, especially in high grade. Although coins in MS63 and MS64 are occasionally seen, these pieces are significantly scarcer than similar coins of other dates and mints. This Select example is collectible, and it is pleasing for the grade — only a singular graze on the cheek at Liberty's mouth prevents an MS64 designation from NGC. The coin is well-struck and brilliant across the interiors, with traces of lilac-gold toning around the borders. Includes a COA from Littleton Coin Company. NGC ID# 256T, PCGS# 7288

### PROOF MORGAN DOLLARS

1881 Morgan Dollar, PR67 Cameo Spectacular Contrast Conditionally Rare Proof

3230 1881 PR67 Cameo PCGS. CAC. The year 1881 is a popular one in the Morgan dollar series. San Francisco coins of this date are plentiful and often seen in extraordinary levels of preservation as type coins, and Carson City coins of this date are typically eye-catching with their vibrant luster. Somewhat overlooked by comparison is the 1881 proof. Proofs were struck to the extent of 984 pieces and were issued through silver proof sets directly to collectors. Today, a significant percentage of the proof mintage survives, but quality rarely reaches the Superb Gem grade level, even for non-Cameo coins. Cameos are especially challenging to locate this fine, and PCGS has seen only one Deep Cameo proof in this grade. The present Cameo displays virtually flawless, fully mirrored fields and sharp, frosted devices. A Deep Cameo designation must have been considered when the graders at PCGS were evaluating this piece, as it is nearly that deeply contrasted. The CAC green label on the holder attests to its outstanding quality for the grade. Population: 13 in 67 (3 in 67+) Cameo, 2 finer; 1 in 67 Deep Cameo, 0 finer (10/19). NGC ID# 27Z5, PCGS# 87316

### 1890 Dollar, PR66 Just 590 Proofs Struck

3231 1890 PR66 PCGS. Glassy-mirrored fields exist beneath rich shades of blue, violet, and reddish-gold that blanket each side of this Premium Gem proof Morgan. The intense toning obscures contrast between the sharply struck devices and flashy fields. Just 590 pieces were struck (a series-low proof mintage), and few examples survive at the PR66 level or finer. Population: 13 in 66 (1 in 66+), 11 finer (10/19). NGC ID# 27ZK, PCGS# 7325

# 1893 Morgan Dollar, PR67 Cameo First Hydraulic Press Proofs

3232 1893 PR67 Cameo PCGS. CAC. An unremarkable mintage of 792 proof Morgan dollars was accomplished at the Philadelphia Mint in 1893, a year in which business-strike production was drastically reduced at all active U.S. Mints, due to the repeal of the Sherman Silver Purchase Act. The Mint began using hydraulic coin presses to strike proofs in 1893, rather than the old screw driven medal presses. The hydraulic presses were used to great effect in later years, but the changeover was not smooth and the proofs of 1893 show some of the poorest strikes of the series. This spectacular Superb Gem exhibits sharply detailed design elements in most areas, but a touch of softness is still evident on the hair above the ear. The impeccably preserved brilliant surfaces include deeply mirrored fields that contrast boldly with the frosty devices. Eye appeal is terrific. Population: 2 in 67 Cameo, 2 finer. CAC: 1 in 67, 1 finer (10/19). NGC ID# 27ZN, PCGS# 87328

### 1904 Morgan Dollar, PR66 650 Proofs Minted

3233 1904 PR66 PCGS. Dusky golden patina and specks of deeper toning provide color to the flashy, minimally contrasted surfaces of this Premium Gem dollar. The absence of contact befits the high grade. This was the final publicly available proof mintage in the Morgan dollar series, with only 650 pieces struck. Population: 39 in 66 (4 in 66+), 9 finer (10/19). NGC ID# 2824, PCGS# 7339

## PEACE DOLLARS

### 1922-S Silver Dollar, MS66 Tied for the Finest Certified

3234 1922-S MS66 NGC. The 1922-S is an important condition rarity in the Peace dollar series. While the San Francisco Mint struck more than 17 million silver dollars that year, only 35 examples have survived in MS66 with none finer, according to the current population data at NGC and PCGS. This Premium Gem has frosty silver luster and subtle gold toning on each side. The surfaces of this impressive piece are virtually free of marks. Census: 19 in 66 (2 in 66★), 0 finer (10/19). NGC ID# 257E, PCGS# 7359

# 1923-S Peace Dollar, MS65+ Conditionally Elusive Issue

3235 1923-S MS65+ PCGS. The 1923-S Peace dollar is common enough in circulated and lower Mint State grades from a mintage of 19 million coins, but Gem or finer examples are elusive. While PCGS has certified 180 of these as MS65, only nine examples have earned the Plus-designation, and only three are finer (10/19). Delicate gold and wispy blue toning visits both sides of this sharply struck piece that features a bold strike and pristine surfaces. The Set Registry collector may find this to be an ideal candidate. Population: 180 in 65 (9 in 65+), 3 finer (10/19). NGC ID# 257H, PCGS# 7362

## 1925-S Peace Dollar, MS65 None Finer at PCGS

3236 1925-S MS65 PCGS. The 1925-S Peace dollar claims a smallish mintage of 1.6 million pieces and the issue was not well-produced. In A Guide Book of Peace Dollars, Roger W. Burdette notes the 1925-S was "the most poorly struck Peace dollar" and "perhaps the most difficult coin to find in high grades." This spectacular Gem representative offers a better-than-average strike for the issue, but some of the usual softness is still evident on Liberty's hair and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster from both sides and a few delicate highlights of golden-tan toning enhance the considerable eye appeal. Population: 44 in 65, 0 finer (10/19). NGC ID# 257M, PCGS# 7366

# 1926-D Peace Dollar, MS66+ Rarely Offered in Higher Grades

3237 1926-D MS66+ PCGS. Plentiful in lower grades, the 1926-D Peace dollar is only occasionally offered in Premium Gem condition. Plus-graded coins in this grade are scarce and represent the finest coins typically within grasp of the majority of collectors. PCGS lists only eight Superb Gems finer (11/19). This example is well-struck and satiny, with a light golden hue over each side. No distracting abrasions are seen. NGC ID# 257P, PCGS# 7368

### 1927-S Peace Dollar, MS65 Attractive, Original Surfaces

3238 1927-S MS65 PCGS. The natural surface quality of this Gem 1927-S is outstanding, with faint wisps of reddish-tan toning over otherwise brilliant and lustrous silver surfaces. A sharp strike greets the eye, and marks are almost entirely confined to the reverse, visible with magnification. Just 866,000 pieces were struck, making the 1927-S a key to the Peace dollar series in high grade. Population: 98 in 65 (8 in 65+), 2 finer (9/19). NGC ID# 26J6, PCGS# 7372

### 1928-S Peace Dollar, MS65 Only One Finer Coin at NGC

3239 1928-S MS65 NGC. The 1928-S Peace dollar claims a mintage of more than 1.6 million pieces, all struck between January 16 and February 29, 1928. The issue was not well-produced, with soft strikes being the rule, rather than the exception. Few high-quality examples were saved by contemporary collectors. As a result, the 1928-S is not difficult to locate in circulated grades and lower Mint State specimens can be found with a little patience, but this is one of the most challenging issues of the series in MS65 or better condition.

The present coin is a delightful Gem, with a better-than-average strike that shows more fine detail on Liberty's hair and the eagle's feathers than usual. The well-preserved surfaces radiate vibrant mint luster, under delicate shades of pale gold toning. Census: 41 in 65, 1 finer (10/19). NGC ID# 257W, PCGS# 7374

### **GOLD DOLLARS**

### 1851-O Gold Dollar, MS65 One Finer Example at NGC

3240 1851-O MS65 NGC. Variety 2, with a die crack through the top of Liberty's portrait. This high-production issue can be obtained in grades as fine as Choice and even Gem condition, although only four finer examples are reported at NGC and PCGS combined. This piece presents razor-sharp devices and scintillating mint luster over orange-gold surfaces. Census: 16 in 65 (1 in 65+), 1 finer (10/19). NGC ID# 25BN, PCGS# 7516

# 1852 Gold Dollar, MS68 Remarkably High-End Type One Coin Not Seen in This Grade for Years

3241 1852 MS68 PCGS. The 1852 is among the common dates in the Type One gold dollar set, popular with type collectors. However, Type One gold dollars are universally rare in Superb Gem condition, even the common dates. The 1852 is actually rarer in MS67 and higher grades than a few of the other Philadelphia dates. In MS68, though this issue's rarity expands to represent the rarity of the entire Type One series. PCGS has certified only seven Type One gold dollars in MS68, four of which are 1852 coins. Only five MS69 coins are finer across the entire Type One series (11/19). These are the finest of the fine when it comes to type coins.

This is the first Superb Gem 1852 gold dollar that we have handled since 2010, and it is the first MS68 coin that we have seen since 2005. The type coin potential is unsurpassed, but the Registry Set importance of this piece is equally spectacular. Each side displays sharp motifs and frosty, vibrant yellow-gold luster. Neither side reveals mentionable abrasions. Population: 4 in 68, 1 finer (10/19). NGC ID# 25BP, PCGS# 7517

1852-C Gold Dollar, MS64 Low Mintage, Clean Fields Popular North Carolina Issue

3242 1852-C MS64 NGC. Variety 2. The base of the 1 in the date is repunched. The Charlotte Mint reduced its gold dollar output from more than 41,000 coins in 1851 to 9,434 pieces in 1852. In fact, production was cut across all facilities, with the 1852 Annual Mint Director's Report explaining, "The demand for them [gold dollars] is very moderate compared with that for the larger coins." Doug Winter estimates 20 to 30 1852-C gold dollars survive in all Uncirculated grades. He notes that examples are "surprisingly difficult to locate with clean fields."

Liberty's portrait and the stars are uniformly sharp on this near-Gem. The dentils from 5 to 11 o'clock on that side are indistinct. The reverse is generally crisp with a touch of incompleteness on LA in DOLLAR and on the date. Warm honey-gold surfaces are softly frosted. The only mark of note is a thin abrasion on Liberty's cheek. Census: 10 in 64 (1 in 64+), 6 finer (10/19). NGC ID# 25BR, PCGS# 7518

# 1853-C Gold Dollar, MS63 Above-Average Detail

3243 1853-C MS63 NGC. Variety 1. A production of 11,515 gold dollars at the Charlotte branch mint in 1853 required a single set of dies. The coins were released into circulation and few were saved by contemporary collectors, as there was little numismatic interest in this country at the time. In addition, the issue was not well-produced and most examples seen are weakly struck, on low-quality planchets. As a result, the 1853-C is seldom seen in Mint State grades today.

This impressive Select representative is well-struck for the issue, with the usual planchet roughness and faint evidence of clashing. Light yellow-gold surfaces maintain partial original mint luster. Census: 14 in 63, 4 finer (10/19). NGC ID# 25BV, PCGS# 7522

# 1855 Type Two Gold Dollar, MS64 Sharply Struck, Rich Orange-Gold Color

3244 1855 Type Two MS64 NGC. Contrary to most Type Two gold dollars, the strike is sharp on this 1855 Philadelphia near-Gem, making it an ideal representative of the type. Frosted surfaces radiate vibrant luster and rich, orange-color, with all of the design elements crisply defined and no evidence of die clashing. A few light abrasions are hair-thin and inconspicuous, while eye appeal is blatantly strong. NGC ID# 25C4, PCGS# 7532

### 1857-C Gold Dollar, MS61+ Few Certified Finer

3245 1857-C MS61+ NGC. Variety 1. A satiny and remarkably clean apricot-gold example. Portions of the dentils are softly impressed, but the overall strike is sharp by Charlotte standards. A lamination below the mintmark is of mint origin. Struck from slightly rotated dies. The 1857-C gold dollar has a meager mintage of 13,280 pieces, and is typically encountered in XF to AU grades. NGC has certified only a baker's dozen as Mint State. Census: 7 in 61 (1 in 61+), 4 finer (10/19). NGC ID# 25CE, PCGS# 7545

# 1860-D Gold Dollar, AU55 Low-Mintage Branch Mint Issue

3246 1860-D AU55 PCGS. CAC. Variety 12-P. From a minuscule mintage of 1,566 pieces, the 1860-D gold dollar is a challenging issue in the Dahlonega Mint series. This impressive Choice AU example shows just a trace of light wear on the design elements, but the devices show the typical weak strike for this issue. Many letters in the obverse legend are softly rendered, with U in UNITED just an indistinct blob. Some clash marks show on the reverse, but the pleasing orange-gold surfaces are lightly abraded and retain much of their original mint luster. Population: 12 in 55, 25 finer. CAC: 2 in 55, 7 finer (10/19). NGC ID# 25CS, PCGS# 7556

## 1873 Closed 3 Gold Dollar, MS64 Rare Low-Mintage Type

3247 1873 Closed 3 MS64 PCGS. Rare in near-Gem condition and seldom seen finer, the 1873 Closed 3 has a stated mintage of just 1,825 pieces, although the Bowers' reference suggests that figure is too low. The date shows the balls of 3 nearly touching (essentially fully closed) in clear contrast to the Open 3 variant. This Choice example displays gleaming rich-gold, semiprooflike surfaces and a sharp strike except at LIBERTY, which is almost entirely missing, as usual for the type. A few light abrasions are grade-consistent and of little note. Population: 8 in 64, 3 finer (10/19). NGC ID# 25DA, PCGS# 7574

## 1880 Gold Dollar, MS68+ Remarkable Surface Preservation

3248 1880 MS68+ PCGS. CAC. The low mintage of the 1880 gold dollar is not its only draw for collectors. It also has a high survival rate in Uncirculated grades, even in MS68. The two services combined have certified a total of 54 pieces in this grade, and each company has also graded a single example MS69. This availability in Gem (and finer) condition makes the 1880 gold dollar available for only a slight premium over a type coin price, a terrific deal for the collector who can then combine high grade with a remarkably low mintage. This is an exceptional piece that qualifies for "wonder coin" status. Each side displays bright mint frost as well as semireflective fields. Deep, even reddish-orange color covers both obverse and reverse, and the strike details are complete. Population: 30 in 68 (2 in 68+), 1 finer. CAC: 25 in 68, 1 finer (10/19). NGC ID# 25DJ, PCGS# 7581

### 1883 Gold Dollar, MS68 Among the Finest at PCGS

3249 1883 MS68 PCGS. This extraordinary 1883 gold dollar is a circulation strike use of the the JD-2 proof dies, confirmed by a radial die crack that runs past U in UNITED into the left obverse field, with the date positioned low and slightly right compared to other reverse dies. The glittering fields are partially prooflike, while the immaculate surfaces are primarily orange-gold in coloration, with intervening areas of lilac and lemon-gold hues. A full strike exists except for weakness of ERT in LIBERTY, partially effaced when the dies were polished. Population: 22 in 68 (1 in 68+), 0 finer (10/19). NGC ID# 25DM, PCGS# 7584

### 1883 Gold Dollar, MS67 Prooflike Spectacular Reflective Fields

3250 1883 MS67 Prooflike PCGS. A short radial die crack near U in UNITED confirms that this is a circulation strike, although it would not be surprising if this coin was once numbered among the 1883 proofs. The fields are wholly prooflike on both sides, surrounding lightly frosted, sharply struck motifs. Only the letters ERT of LIBERTY are not fully brought up, while all other elements are crisp. The bow knot is fully struck. Wisps of orange toning embellish attractive yellow-gold Superb Gem surfaces. This is sole Prooflike certified at PCGS as of (10/19). PCGS# 87584 Base PCGS# 77584

### 1885 Gold Dollar, MS68 Condition Census Rarity

3251 1885 MS68 NGC. This spectacular, high-end Superb Gem is among the finest 1885 gold dollars known, a distinction that makes it incredibly rare and a commanding type coin. Other than a touch of softness on the wreath bowknot, the devices are sharp, and they attractively complement a hint of reflectivity in the fields. Each side is satiny with rich yellow-gold color and no bothersome abrasions. Census: 7 in 68, 0 finer (10/19). NGC ID# 25DP, PCGS# 7586

### PROOF GOLD DOLLARS

# 1885 Gold Dollar, PR66 Cameo Elusive This Fine

3252 1885 PR66 Cameo NGC. JD-1, R.4. High-end 1885 proof gold dollars are rare. 1,105 pieces were struck, although significantly fewer coins are known today. Only about 30 pieces were issued as part of complete proof sets in January 1885. The remainder of the mintage was either sold as individual coins or melted without ever leaving the Mint. The largest delivery of this issue was in the fourth quarter of the year, totaling 640 of the 1,105 pieces struck.

Although Walter Breen referenced four varieties of the 1885 proof gold dollar, John Dannreuther's recent comprehensive die variety study of proof gold identifies only two varieties. This piece represents JD-1, the slightly more plentiful of the two varieties, which shows less Longacre doubling on the letters in STATES. Mirrored fields glimmer around satiny, sharp devices, with yellow-gold and peach-orange hues intertwined across each side. The preservation and contrast are excellent, producing good eye appeal. Census: 12 in 66 Cameo (1 in 66★), 12 finer; 6 in 66 Ultra Cameo, 9 finer (10/19). NGC ID# 25EV, PCGS# 87635

# 1885 Gold Dollar, PR67+ Deep Cameo Registry Grade Example

3253 1885 PR67+ Deep Cameo PCGS. CAC. JD-1, R.4. A generous mintage of 1,105 proof gold dollars was accomplished in 1885, using two obverse dies and one reverse die to strike all the proofs. This coin represents the JD-1 variety, with a small lump on Liberty's forehead. Probably 100-150 examples of the JD-1 are extant in all grades today. The reverse die was also used to produce the JD-2 proof variety and some circulation strike coinage in 1885.

The present coin is a Plus-graded Superb Gem, with razor-sharp definition on the design elements and strong Longacre doubling on many features. The impeccably preserved yellow-gold surfaces include deeply mirrored fields that contrast boldly with the frosty devices. Eye appeal is terrific. Population: 5 in 67 (3 in 67+) Deep Cameo, 0 finer. CAC: 6 in 67, 0 finer (10/19). NGC ID# 25EV, PCGS# 97635

# 1886 Gold Dollar, PR66 Scarcer JD-2 Variety

3254 1886 PR66 PCGS. JD-2, Low R.6. The 1886 proof gold dollar enjoyed a relatively generous mintage of 1,016 pieces, with two die varieties known for the date. This coin represents the JD-2 variety, with die lumps above the eye lid and the date placed low on the reverse. The JD-2 is much more elusive than the JD-1 variety, with a surviving population of 30-50 examples in all grades.

The present coin is a spectacular Premium Gem proof, with sharply detailed design elements throughout. The virtually flawless yellow-gold surfaces display hazily reflective fields with a few subtle hints of rose patina. Overall eye appeal is outstanding. Population: 9 in 66 (1 in 66+), 1 finer (10/19). NGC ID# 25EW, PCGS# 7636

### 1886 Gold Dollar, PR64 Deep Cameo Few Deep Cameo Proofs Are Known

3255 1886 PR64 Deep Cameo PCGS. JD-1, R.4. PCGS has certified only eight Deep Cameo examples of the 1886 proof gold dollar. This piece is the lowest-grade of the lot, but it is still an immensely attractive proof due to the depth of mirroring in the fields and the sharpness of the satiny devices. A loupe reveals a few hairlines in the fields that limit the grade, but only a diagonal one in the field extending downward from Liberty's nose prevents this coin from receiving Gem classification. Eye appeal is outstanding. Population: 1 in 64 Deep Cameo, 7 finer (10/19). NGC ID# 25EW, PCGS# 97636

# 1887 Gold Dollar, PR65 Cameo Bright Yellow-Gold Color

3256 1887 PR65 Cameo PCGS. JD-1, Low R.5. Two reverses are known to have struck 1,043 proof gold dollars in 1887. This variety has the 7 centered under the A in DOLLAR. According to John Dannreuther, about 125 to 200 JD-1 representatives are believed extant, compared to 30 to 50 of JD-2. This gorgeous Gem with profound Cameo contrast features rich orange-gold color, impressively glassy fields, and pinpoint detail, as expected. There is an as-made lint mark between AR. Population: 9 in 65 Cameo, 9 finer (10/19). NGC ID# 25EX, PCGS# 87637

# EARLY QUARTER EAGLE

1806/4 8x5 Stars Quarter Eagle, AU58 BD-1, Rare Terminal Die State Heavy Obverse Rim Cud

3257 1806/4 8x5 Stars, BD-1, High R.4, AU58 NGC. Bass-Dannreuther Die State c/b, with a heavy rim cud about the LI in LIBERTY. Early gold specialist Harry W. Bass, Jr. once owned what was long thought to be the only BD-1 quarter eagle in die state c/b, purchased in a 1970s Stack's auction. The Bass Museum Sylloge describes that coin, in the Core Collection:

"This is the terminal *die state* for this variety, apparently unique. This same coin served for the illustration in several editions of Wayte Raymond's *Standard Catalogue of United States Coins.*"

In our April 2012 Central States Signature we handled a second example, graded AU55 PCGS. Like the Bass Core Collection coin, that piece was weakly struck at the centers, particularly on the reverse. Here, more than seven years later, we offer a third die state c/b representative, this one graded AU58 NGC. This is only the second example documented in private hands. Like the other pieces, it is weakly struck in the centers, and this coin also has remnants of planchet adjustment marks (mint made) on the lower part of Liberty's bust. Both sides are bright yellow-gold, and light surface chatter is consistent with the grade. The importance of this late die state coin for the early gold specialist is unsurpassed.

From The Stone Arch Collection. NGC ID# BFVW, PCGS# 45512 Base PCGS# 7654

# **CLASSIC QUARTER EAGLES**

### 1835 Classic Quarter Eagle, MS63 Rare in High Grade

3258 1835 MS63 NGC. Breen-6141, Variety 6, R.2. The 1835 is collectible in Mint State, but it is not nearly as plentiful as a few of the other Classic Head quarter eagles in this condition, particularly in MS63 and finer grades. This Select example is conditionally rare. Both sides have satiny straw-gold luster with only light handling marks to limit the grade. Strike weakness is restricted to the center of the shield and the highest hair curls on Liberty's portrait. Census: 15 in 63, 7 finer (10/19). NGC ID# 25FT, PCGS# 7693

### 1838-C Two and a Half, AU53 Scarce C-Mint in AU Grades

3259 1838-C AU53 PCGS. Breen-6147, Variety 20, R.3. The obverse mintmark is widely repunched — a rather spectacular Mint blunder — although it slips by of little notice on this sole variety of the lowest-mintage Classic Head quarter eagle. Just 7,880 pieces were struck from a single die pair, making the 1838-C a key to the six-year type. It joins the 1839-C as the only two Charlotte representatives of the Classic Head quarter eagle motif. This is a lustrous, greenish-gold coin, with partially reflective fields and only minor, widely scattered tiny marks. Eye appeal is strong. Population: 13 in 53, 35 finer (9/19). NGC ID# 25FZ, PCGS# 7697

# LIBERTY QUARTER EAGLES

### 1854 Two and a Half, MS65 Rarely Offered in Gem Condition

3260 1854 MS65 PCGS. The bulk of the 1854 quarter eagle's Mint State survivorship grades in the MS61 to MS64 range. Gems are decidedly rare, and only a handful of finer pieces are known. This coin displays a sharp strike from clashed dies, with semiprooflike fields around the devices. Rich peach-orange luster adorns each side, with few noticeable abrasions. Population: 10 in 65, 2 finer (10/19). NGC ID# 25HX, PCGS# 7769

### 1854 Quarter Eagle, MS66 The Finest at PCGS

3261 1854 MS66 PCGS. The 1854 is scarcer in Mint State than the previous two Philadelphia issues, and Gem examples are rarely seen. This Premium Gem has no peers at PCGS, where it is the sole-finest 1854 quarter eagle. NGC reports one other MS66 coin plus one finer. Sharp devices and original wheat-gold luster showcase a luminous cartwheel effect throughout vibrant, frosted surfaces. Light die clashing appears above the eagle's wings.

This is a highly appealing coin that is virtually free of marks or distractions of any kind. A faint, pinpoint thin line arcs from the tip of the bust truncation through Liberty's chin, visible only with close attention under a strong loupe. The strike is needle-sharp. PCGS Population: 1 in 66, 0 finer (10/19). NGC ID# 25HX, PCGS# 7769

## 1888 Liberty Quarter Eagle, MS66 Rarely Seen This Fine

3262 1888 MS66 PCGS. The 1888 Liberty quarter eagle claims a mintage of 16,001 pieces, a small production total in absolute terms, but actually larger than most quarter eagle issues of this era. The 1888 is definitely rare at the MS66 grade level, however, and finer coins are virtually unobtainable. This well-detailed Premium Gem shows just a touch of softness on the eagle's leg and the flawless peach-gold surfaces radiate vibrant mint luster throughout. Population: 11 in 66 (2 in 66+), 0 finer (10/19). NGC ID# 25LC, PCGS# 7840

### PROOF LIBERTY QUARTER EAGLES

1891 Liberty Quarter Eagle, PR66 Flashy Deep Cameo Example

3263 1891 PR66 Deep Cameo PCGS. JD-1, High R.5. A modest mintage of 80 proof Liberty quarter eagles was produced in 1891, all struck from a single pair of dies. The obverse shows the base of an undertype 1 below the primary final digit and the reverse shows no doubling on OF AMERICA, distinguishing it from the business-strike reverse. John Dannreuther estimates the surviving population at 35-45 examples in all grades.

The present coin is a delightful Premium Gem proof, with sharply detailed, frosty design elements that contrast profoundly with the deeply mirrored fields to produce a stunning cameo effect. The virtually pristine yellow-gold surfaces exhibit the slight orange-peel texture of the best 19th century proofs. Overall eye appeal is terrific. Population: 8 in 66 (3 in 66+) Deep Cameo, 0 finer (10/19). NGC ID# 288E, PCGS# 97917

# 1894 Quarter Eagle, PR66+ Deep Cameo Rare High-End, CAC-Approved Proof Type Coin

3264 1894 PR66+ Deep Cameo PCGS. CAC. JD-1, Low R.5. The 1 in the date is centered between two border dentils, identifying the proof die pair for the 1894 quarter eagle. Proof coinage in 1894 amounted to 122 pieces, although high-grade Deep Cameo survivors are downright rare today. This Plus-designated, CAC-approved Premium Gem showcases remarkable depth of mirroring in the fields, with starkly contrasted, frosty devices. One short, stray hairline in the right obverse field near the hair bun is perhaps all that keeps this piece from definitive Superb Gem classification. Population: 6 in 66 (2 in 66+) Deep Cameo, 4 finer. CAC: 7 in 66, 3 finer (10/19). NGC ID# 288H, PCGS# 97920

# 1902 Two and a Half, PR64 Collector-Grade Proof Gold

3265 1902 PR64 PCGS. JD-1, R.4. A glittering collector-grade proof Liberty quarter eagle, fully struck with incredible depth of mirroring in the fields. The 1902 proofs are rarely seen with cameo contrast, although the eye appeal of this piece in no way suffers without it. The preservation is quite exceptional for the grade, and each side displays rich yellow-gold color. Population: 34 in 64, 19 finer (10/19). NGC ID# 288S, PCGS# 7928

# 1904 Liberty Quarter Eagle, PR66 Nice Cameo Example

3266 1904 PR66 Cameo NGC. JD-1, R.4. The Philadelphia Mint struck 170 proof Liberty quarter eagles in 1904, with the coins delivered in quarterly batches throughout the year. A single die pair was used to strike the proofs, with the 1 in the date positioned near the dentils and the vertical stripes in the shield thinned at the bottoms. Unlike the proofs of the two previous years, the 1904 coins are occasionally seen with frosty devices and cameo contrast. John Dannreuther estimates the surviving population at 100-130 examples in all grades today.

This spectacular Premium Gem proof exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields to create a noticeable cameo effect. The pleasing yellow-gold surfaces are virtually flawless and overall eye appeal is terrific. Census: 18 in 66 Cameo (1 in 66+, 2 in 66★), 8 finer (10/19). NGC ID# 26LF, PCGS# 87930

# 1906 Quarter Eagle, PR65+ Cameo Bold Contrast, Vivid Color

3267 1906 PR65+ Cameo PCGS. CAC. JD-1, R.4. The mintage of proof Liberty quarter eagles increased slightly in 1906, to 160 pieces. The issue also benefits from a good survival rate and John Dannreuther estimates 100-120 examples have survived in all grades. A single pair of dies was used to strike the proofs (JD-1), with the 1 in the date close to the bust and the 6 closer to the dentils and a diagonal line sloping up to the left between the third and fourth set of vertical stripes in the shield.

The present coin is an impressive Gem proof, with sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The vivid orange-gold surfaces show only minimal signs of contact and overall eye appeal is outstanding. Population: 1 in 65+ Cameo (this coin), 12 finer. CAC: 8 in 65, 7 finer (9/19). NGC ID# 288W, PCGS# 87932

1911-D Indian Quarter Eagle, MS64+ Low-Mintage Branch Mint Key

3268 1911-D MS64+ PCGS. The 1911-D boasts the lowest mintage of the Indian quarter eagle series at a meager 55,680 pieces. One of only three branch mint issues in the series, the 1911-D has been a sought-after series key since the 1930s, as evidenced by the description of the example in lot 886 of the William B. Hale Collection (B. Max Mehl, 11/1939), in the Denver Mint Quarter-Eagles section of the catalog:

"1911 About uncirculated, with considerable luster. Rare and in great demand. Listed at \$15.00 in very fine con

Most examples seen today are in lower Uncirculated grades and the 1911-D is quite elusive in grades above MS64. This Plusgraded Choice example exhibits sharply detailed design elements throughout and the all-important mintmark is unusually bold. The well-preserved orange-gold surfaces are lustrous and appealing. PCGS has graded 27 numerically finer examples (10/19). NGC ID# 7KR7, PCGS# 7943

1908 Indian Quarter Eagle, PR66 Impeccable First-Year Matte Proof

3269 1908 PR66 NGC. JD-1, R.4. The deep, olive-gold color and sandblast matte finish of 1908 proof quarter eagles proved to be an acquired taste. The public had little interest in the unusual looking proofs, and the Mint suffered much criticism of the format. Between 1908 and 1915, the Mint experimented with different techniques and finishes for proof gold, but in 1908 only the oddly colored and decidedly unbrilliant matte proof surface prevailed. In 1915, proof coinage ceased altogether.

Today's collectors have an affinity for the distinctive 1908 proofs. 500 pieces were struck, of which 236 pieces were sold. The balance of the mintage was melted. Recent research by John W. Dannreuther suggests 100 to 120 pieces survive in all grades. This Premium Gem example displays the expected coarse, sandblast finish that tends to blur the fine details of Bela Lyon Pratt's design, yet there are no marks of post-Mint origin on this exceedingly well-preserved coin. Census: 36 in 66, 34 finer (10/19). NGC ID# 289G, PCGS# 7957

# 1908 Quarter Eagle, PR67 First Indian Proof

3270 1908 PR67 NGC. JD-1, R.4. The Mint introduced the innovative incuse Indian design by Bela Lyon Pratt on the quarter eagle in 1908. The new design made it impractical to produce proofs with the old brilliant finish, so a matte, or sandblast, finish was used. The 1908 proofs have darker surfaces than other proofs of this era because a coarser grain of sand was used to impart the new finish. Anticipating a large demand from collectors, 500 proofs were struck and delivered on November 27. Unfortunately, the public did not appreciate the new finish and only 236 examples were distributed. The unsold examples were melted after the end of the year. John Dannreuther estimates the surviving population at 100-120 examples in all grades.

This spectacular Superb Gem exhibits sharply detailed design elements and virtually pristine mustard-brown surfaces with the characteristically subdued matte luster. Eye appeal is tremendous. Present-day collectors appreciate the artistic qualities of the matte finish and auction appearances of these rare proofs always inspire stiff competition. Census: 33 in 67 (2 in 67+), 1 finer (10/19). NGC ID# 289G, PCGS# 7957

### THREE DOLLAR GOLD PIECES

1856 Three Dollar Gold, MS64+ Beautifully Smooth, Lustrous Surfaces

3271 1856 MS64+ NGC. Although widely viewed as a common date in the series, the 1856 three dollar gold piece is anything but plentiful in MS64. NGC has not certified a single Gem example finer, and PCGS lists only four submissions in higher grade than the Choice level. This piece, Plus-graded and luminous, is the sole finest coin at NGC (11/19). The silky-smooth antique-gold luster shimmers beneath a light and reveals no singular abrasions. A finer grade — indeed, perhaps a finer grade by more than one point — might have been achieved were it not for some faint hairline-like slide marks on the obverse that are visible with a loupe at certain angles. Both sides are otherwise lovely. The strike shows areas of localized weakness, including the bottom of Liberty's bust and the reverse wreath bow. Census: 9 in 64 (1 in 64+), 0 finer (10/19). NGC ID# 25M8, PCGS# 7974

## 1864 Three Dollar Gold, AU58 Rare CAC-Approved Example

3272 1864 AU58 PCGS. CAC. The 1864 three dollar gold piece is scarce in Mint State, and even high-end AU coins are challenging to acquire. Examples in these grades with CAC recognition are decidedly rare. This near-Mint coin displays exceptional color and surfaces, yielding orange-gold luster in the protected portions of the fields with natural olive patina over the worn places. The strike is sharp, especially so on the wreath bowknot, which is often weak. Population: 25 in 58, 44 finer. CAC: 7 in 58, 6 finer (10/19). NGC ID# 7HSK, PCGS# 7985

# 1868 Three Dollar Gold, MS64 Sharp and Prooflike Conditionally Rare

3273 1868 MS64 PCGS. The 1868 had a small mintage of 4,850 coins, and while the survival rate is surprisingly high for the date, it was not as well-saved as later low-mintage three dollar dates. Most Uncirculated survivors grade in the MS61 to MS63 range, making this near-Gem example undeniably scarce. Finer examples are exceedingly rare. This Choice coin is not a proof, but it is prooflike and shows nearly enough sharpness to cause a second look. Cameo contrast appears on each side through rich, orange-gold patina. A few stray marks in the fields are all that preclude a Gem designation. Eye appeal is exceptional. Population: 15 in 64, 7 finer (9/19). NGC ID# 25MP, PCGS# 7989

# 1878 Three Dollar Gold, MS65+ Shimmering Orange-Gold Luster

3274 1878 MS65+ PCGS. Variety 2. The 1878 issue is known for its plentiful mintage (82,304 pieces), and it is a preferred type coin based on the high production quality and ready availability, even in Gem or finer grades. Struck in large quantity in anticipation of paper bill redemptions that never occurred, many 1878 three dollar pieces remained undisturbed at the Philadelphia Mint. Several high-grade examples escaped melting, and few pieces circulated. This high-end Gem is one of the fortunate survivors. Fine-grained surfaces hold extraordinarily vibrant, frosted luster across both sides. A sharp strike adds to the tremendous visual appeal. Population: 17 in 65+, 96 finer (10/19). NGC ID# 25MZ, PCGS# 8000

### 1880 Three Dollar Gold, MS64 Deeply Prooflike, CAC Green Label

3275 1880 MS64 PCGS. CAC. A popular date, boasting a scant mintage of only 1,000 coins, the 1880 three dollar gold is collectible in most grades due to contemporary collectors and dealers setting aside numerous examples. Nonetheless, few pieces are known with CAC endorsement. This Choice example displays mirrored fields and sharp devices, bathed in right orange-gold color. Scattered, insignificant abrasions do not detract. Population: 64 in 64 (6 in 64+), 27 finer. CAC: 20 in 64, 7 finer (10/19). NGC ID# 25N3, PCGS# 8002

# 1882 Three Dollar Gold, MS63 Reflective Fields, Sharp Devices

3276 1882 MS63 PCGS. A collectible, low-mintage issue from the later portion of this popular series. Most 1882 three dollar gold pieces exhibit prooflike fields, as the dies were not used long enough to fully erase the initial polish of the fields (only 1,500 pieces were struck). This Select example is deeply reflective with natural honey-gold and peach-orange hues. The strike is sharp, and the devices have attractive, frosty luster. Population: 43 in 63, 37 finer (10/19). NGC ID# 25N5, PCGS# 8004

# 1882 Three Dollar Gold, MS64+ Important Low-Mintage Issue

3277 1882 MS64+ PCGS. Demand for the three dollar gold pieces waned as time went on late in the 19th century as it did for the gold dollars. Just 23,000 circulation strikes were minted from 1879 to 1889, inclusive, the figure including a mere 1,500 coins in 1882. The entire 1,500 coins mintage was delivered on December 23, suggesting that the demand for these coins was for Christmas. An additional 76 proofs were struck throughout the year to meet collector demand. Two different reverse dies allow immediate identification. Circulation strikes have a repunched 2 in the date, while proofs have a normal 2. This near-Gem has a bold strike and satiny yellow-gold luster with reflective fields providing light contrast. A lovely example for the connoisseur. Population: 24 in 64 (2 in 64+), 13 finer (10/19). NGC ID# 25N5, PCGS# 8004

### 1887 Three Dollar Gold, MS65 Scarce Late-Series Issue

3278 1887 MS65 NGC. The 1887 three dollar gold piece claims a mintage of 6,000 pieces, a minuscule production in absolute terms, but fairly large in the context of the series. The issue is more difficult to locate than the number produced would suggest. It is likely that many examples never left government storage and were melted at a later date. This sharply detailed Gem exhibits well-preserved yellow-gold surfaces with reflective prooflike fields and outstanding eye appeal. Census: 14 in 65, 6 finer (10/19). NGC ID# 25NA, PCGS# 8009

### PROOF THREE DOLLAR GOLD PIECES

# 1862 Three Dollar Gold, PR64 Deep Cameo Deeply Frosted Early Strike, CAC

3279 1862 PR64 Deep Cameo PCGS. CAC. JD-1, High R.6. The Philadelphia Mint's expectations for proofs were low in 1862. Uncertainties about the Civil War outcome tempered demand, and as the fighting and casualties intensified, just 35 proofs were struck — a sharp reduction from previous proof mintages in 1860 and 1861, when 119 and 113 proofs respectively were made. Never popular with the general population even before the war, a nominal circulation-strike mintage of 5,750 three dollar pieces was produced, most of which quickly disappeared into hoards.

Fortunately, surviving 1862 proofs are easily distinguished from prooflike circulation strikes. The obverse die was used to strike proofs in 1861, 1862, and 1863, while the reverse die is unique to the 1862 proofs. Circulation-strike 1862 coins show the date closer to DOLLARS, while proofs have the date positioned lower toward the bow and slightly left.

According to recent research by John Dannreuther, 1862 three dollar proofs exist in small number, with only 14 to 16 pieces known. Most 1862 proofs lack Deep Cameo contrast, prompting Dannreuther to note:

"This date seems to either have little frost, or qualifies for Deep Cameo, as the dies were heavily frosted, but lost this feature after only a dozen or so of the 35 coins were struck."

Interestingly, five of the top six proofs known are Deep Cameo examples (including the present coin), seemingly representing the earliest proofs made. This rich, yellow-gold example is CAC-endorsed, with impressively frosted devices that that contrast boldly with flashy and well-mirrored, jet-black fields. A loupe reveals some minute graininess in the left obverse field — referred to as an "aura" by Q. David Bowers, who observed similar traits on other 1862 proofs — and the coin has a few widely scattered wisplike hairlines, accounted for in the assigned grade. A distinct wire rim encircles the pinpoint-sharp strike on both sides.

Heritage has offered only three 1862 Deep or Ultra Cameo proofs in the past dozen years, the finest a PR66 Ultra Cameo NGC coin that realized \$70,500 in our FUN Platinum Night auction in January, 2013 as lot 5838. A PR65 Deep Cameo PCGS brought \$69,000 in 2007 as lot 3122 in that year's January FUN Platinum Night offering. We expect close attention from gold specialists when this near-Gem Deep Cameo 1862 example is called. NGC ID# 28A2, PCGS# 98025

Session One, Auction #1302 | Thursday, December 5, 2019 | 6:00 PM CT

### **EARLY HALF EAGLES**

1795 Small Eagle Five Dollar, AU53 BD-3, Pleasing Type Coin

3280 1795 Small Eagle, BD-3, High R.3 AU53 PCGS. Bass-Dannreuther Die State c/b. Star 11 is squeezed between Y of LIBERTY and star 12, touching each element — the quickest way to identify the BD-3 Small Eagle obverse, which is shared with BD-2 and BD-4. The BD-3 reverse shows four berries in aligned pairs left and right. While this variety is the most-available die marriage of the Small Eagle fives, only 175 to 225 pieces exist in all grades. Overall, fewer than 1,000 Small Eagle fives survive, combining all 12 varieties of this rare and important gold type.

Bright green-gold surfaces retain glimpses of mint luster and traces of prooflike reflectivity around the raised devices. Light wear exists on the portrait as well as on the eagle's head, neck, and leg. Abrasions are limited to some wispy hairlines and a light abrasion from chin to neck. NGC ID# 25ND, PCGS# 519852 Base PCGS# 8066

1798 Large Eagle Five, MS62 BD-2, Large 8, 13 Stars Reverse Shattered Die State

3281 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-2, R.5, MS62 NGC. Bass-Dannreuther Die State c/b, a very late stage. Both dies are shattered in this die state, and the cracks on this coin are more advanced than the typical die state c/b representative. The crack from the lower reverse rim through the branch stem now connects to the network of cracks at the eagle's head, and the crack from the N in UNITED connects to the B in PLURIBUS, where it joins a bisecting crack that spans the breadth of the eagle's wingspan. The only thing keeping this piece from strict terminal die state classification is that the crack at the N in UNITED does not yet connect to the rim at that point.

BD-2 is a Large 8, 13 Stars Reverse variety of the 1798 half eagle. It is believed that fewer than 70 pieces survive in all grades, and the dramatic die cracks of many examples encourage heightened intrigue and demand. This Mint State example is a condition rarity. Although a trifle weak on the vertical shield stripes, the borders are well-defined on both sides. Grade-limiting abrasions are minor and mainly on the obverse, while both sides have luminous straw-gold coloration.

From The Stone Arch Collection. NGC ID# BFX6, PCGS# 507322 Base PCGS# 8078

1799 Small Stars Five Dollar, MS62 Rare BD-4 Variety Estimated 10-12 Pieces Known Likely the Finest Extant, Ex: Childs

3282 1799 Small Reverse Stars, BD-4, R.7, MS62 NGC. Bass-Dannreuther Die State a/a. Both dies are perfect with no lapping, clash marks, or die cracks, as normally seen, and the reflective fields suggest an early strike from newly prepared dies. In Early U.S. Gold Coin Varieties, A Study of Die States 1795-1834, John Dannreuther described two die states, perfect or with reverse clash marks. He further suggested that a terminal die state with later reverse die damage should exist. Indeed, such a coin does exist, as an example of BD-4 with two retained cuds on the reverse appeared as lot 2260 in a Bowers and Merena March 2003 auction.

Still, only 10 to 12 examples of the BD-4 variety are known, according to Dannreuther, and perhaps fewer pieces actually exist. When this piece was handled in 1999, at the same time that the first Bass gold sale was being prepared, and with both Bass specimens available for side-by-side study, the cataloger wrote: "This is apparently a very rare variety with most examples well circulated. In fact, this example, which is nicer than either in the Harry W. Bass, Jr. Collection, may be finest known for the die marriage."

Even today, the likely status as finest known of the variety remains unchanged. Minor surface abrasions are confined to the open areas of the obverse and reverse fields. The brilliant, green-gold surfaces and reflective fields of this lovely specimen host delicate splashes of pale-orange toning. The present offering represents an incredible opportunity for the advanced early half eagle specialist.

Ex: Walter H. Childs Collection (Bowers and Merena, 8/1999), lot 689; FUN Signature (Heritage, 7/2012), lot 4833; Long Beach Signature (Heritage, 2/2013), lot 3947; ANA Signature (Heritage, 8/2018), lot 5238. PCGS# 519876 Base PCGS# 8081

1803/2 BD-1 Five Dollar, MS62 Sharp Overdate, Lightly Toned

3283 1803/2 BD-1, R.4, MS62 PCGS. Bass-Dannreuther Die State b/d. Two leftover obverse dies from 1802 were overdated with the 1803 date, then combined with three reverses to create four die pairs. The BD-1 obverse accounts for three of the four 1803/2 varieties, all with a broken right foot on T in LIBERTY. A total of 33,506 half eagles were struck from the four combined die marriages.

This is a boldly struck and attractive BD-1 example, lacking a bit of definition on two of Liberty's forehead curls and at the opposing shield junction. The 3/2 overdate is clear of the bust truncation, and represents one of the most spectacular overdates in the early gold series. An underdigit 2 is clear and uneffaced. Lustrous honey-gold surfaces display dappled soft-gray toning, with only light abrasions and sharp stars. Population: 59 in 62 (1 in 62+), 38 finer (10/19). NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

# 1803/2 Half Eagle, MS61 Rare BD-2 Variety Semiprooflike Fields

3284 1803/2 BD-2, R.5, MS61 NGC. Bass-Dannreuther Die State d/c. This late die state shows a bisecting crack on the reverse from the U in UNITED, through the eagle's beak, to the E in STATES. Light field chatter slightly subdues semiprooflike mirroring, but no major abrasions are noticed. The left side of the shield and the eagle's left (facing) talons exhibit strike weakness (areas in close proximity to the major reverse die crack).

On the obverse, bold strike doubling is visible on all relief elements. Dramatic repunching of the date is seen for all 1803 varieties, of which BD-2 is the rarest, with only 40 to 50 pieces known. Uncirculated examples, such as this eye-appealing piece, are in strong demand among early gold collectors, drawn to the semiprooflike fields and minimally marked, well-preserved surfaces. Overdate specialists are sure to compete for this splendid 1803/2 as well. PCGS# 504949 Base PCGS# 8084

# 1803/2 BD-4 Five Dollar, MS62 Bold Impression, 'Perfect T' in LIBERTY

1803/2 BD-4, R.4, MS62 PCGS. Bass-Dannreuther Die State b/c, with a crack through the base of the date. The three other 1803/2 varieties lack the lower right serif on the T in LIBERTY. BD-4 has a fully formed T. According to John Dannreuther, about 6,000 to 9,000 BD-4 half eagles were included in the total mintage of 32,506 or so pieces for the year (the Guide Book mintage is higher but may include some 1802-dated coins).

Soft mint luster glistens over the yellow-gold surfaces of this impressively preserved 216-year old half eagle. Faint wispy lines and tiny ticks appear throughout, but the nearly full impression and overall eye appeal more than compensate for those trivial issues. This is an outstanding example of the type. NGC ID# 25NY,

PCGS# 504951 Base PCGS# 8084

# 1804 Capped Bust Right Five, MS64 Small 8 Guide Book Variety, BD-1

3286 1804 Small 8, BD-1, High R.4, MS64 NGC. Bass-Dannreuther Die State b/b, with a die crack through 0 in the date and a retained cud above T in UNITED. A substantial mintage of 30,475 Capped Bust Right half eagles was accomplished in 1804, with seven die varieties known for the date. This coin represents the scarce BD-1 variety, with a Small 8 (John Dannreuther notes it is really a Normal 8) in the date and a graver's line from the point of the shield to the eagle's beak on the reverse. The BD-1 has a surviving population of 70-90 examples in all grades. This was the only use of the reverse die, but the obverse was used again to strike the BD-2 variety of this date.

The present coin is a spectacular Choice example, with sharply detailed design elements and a few planchet adjustment marks on the bust. The pleasing antique-gold surfaces retain much original mint luster and show only minor signs of contact. Eye appeal is outstanding. Housed in an NGC holder commemorating the *Guide Book* signed by Ken Bressett. Census: 9 in 64 (1 in 64+), 0 finer (10/19). PCGS# 519891 Base PCGS# 8085

# 1806 BD-6 Half Eagle, AU58 Knob 6, Seven Stars Left, Six Right

3287 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU58 NGC. Bass-Dannreuther Die State a/b with light reverse clash marks. Minor reverse adjustment marks weaken the details along the left side of the shield and into the wing. The remaining detail suggests a strong strike for this example that retains nearly full yellow-gold luster. An attractive example destined for a type set or advanced half eagle collection. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

# 1806 BD-6 Half Eagle, AU58 Knob 6, 7x6 Stars

3288 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU58 PCGS. The 1792 Mint Act authorized gold quarter eagles (\$2.50), half eagles (\$5), and eagles (\$10). The "work horse" gold denomination was the half eagle that was produced in more years and in greater quantities than either of the other two denominations. From 1796 to early 1834, the Philadelphia Mint coined \$160,655 in quarter eagles and \$1,325,920 in eagles, based on mintage figures reported in the *Guide Book*. For comparison, in the single decade from 1800 to 1809, half eagle production totaled more than \$2,113,035. Among those early 1800s half eagles, the 1806 BD-6 with the Knob 6 date and the stars arranged seven left and six right is the most plentiful variety. It is the quintessential type coin. This near-Mint example exhibits brilliant and nearly complete luster and frosty greenish-yellow surfaces. An exceptional example. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

# 1806 Knob 6 Half Eagle, Unc Details BD-6, Distinctive Star Arrangement

3289 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Cleaned — NGC Details. Unc. Bass-Dannreuther Die State a/b with light reverse clash marks. Two die characteristics identify this variety at a glance. It is the only 1806 variety that has the distinctive Knobbed 6 with a pronounced ball at the top right of that digit. This is also the only 1806 variety with the stars arranged seven left and six right. All others have eight stars to the left and six to the right. Either feature identifies the variety at a glance. This example has full luster and no evidence of wear, although it has been lightly cleaned. Horizontal adjustment marks appear on the obverse.

1806 Half Eagle, MS62 Knob 6, 7x6 Stars, BD-6 Lustrous Honey-Gold Type Coin

3290 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS62 PCGS. Bass-Dannreuther Die State e/f. This hardy die pair produced an estimated 35,000 to 50,000 of the 64,093 total half eagles in 1806. Identified by the distinctive Knob 6 in the date and 7x6 star arrangement (all other 1806 variants feature a Pointed 6 and 8x5 star pattern), about 600 to 900 pieces are believed extant, making this the most collectible variety for the year and one of the most popular early half eagles for type purposes. The dies were subject to frequent clashing and lapping, resulting in multiple die states. This is either the last or second-to-last state, with a rust lump on the R in LIBERTY and clashing on each side.

The highest design points show a hint of strike softness, as do the second and third vertical shield bars, but this lustrous MS62 five dollar gold piece is generally well-defined. More impressive are the relatively smooth honey-gold surfaces that deliver lovely eye appeal for the grade. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1808 Half Eagle, Bold MS61 Closed 5D, BD-3, Attractive Color

3291 1808 Close 5D, BD-3, R.4, MS61 PCGS. Bass-Dannreuther Die State b/e, extensively clashed on each side. BD-3 is one of two non-overdate varieties for the year. It shares an obverse with BD-4. The two reverses are differentiated by the spacing of the first A in AMERICA relative to the wing. It is wide on BD-3 and narrow on BD-5. This die also shows 5D relatively close with the D entirely under the fletching. Dannreuther believes that probably a few more than 100 examples of this 1808 die marriage still exist from a mintage in the range of 10,000 to 15,000 coins.

Orange and olive-gold color dominates this Uncirculated Draped Bust Left half eagle. Luster issues from the protected areas, illuminating a multihued alloy spot at star 12 and deep reddish accents around AMERICA. Each side is needle-sharp with peppered abrasions. Adjustment marks occur around the upper obverse rim. NGC ID# 25PA, PCGS# 507604 Base PCGS# 8102

# 1809/8 Half Eagle, BD-1, AU55 Sharp and Attractive, Luster Remains

3292 1809/8 BD-1, High R.3, AU55 PCGS. Bass-Dannreuther Die State b/b. BD-1 is the sole 1809 variety, traditionally described an overdate, although researchers are divided about the underdigit. Some suggest an 8, while others believe it is a misplaced 9, and still others are unconvinced either way. This is a Choice About Uncirculated example, sharply defined, with still-vibrant greenishgold color. Marks are minimal, while plentiful mint luster remains. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

# 1810 BD-4 Half Eagle, MS61 Large Date, Large 5, Ideal for Type

3293 1810 Large Date, Large 5, BD-4, R.2, MS61 PCGS. Bass-Dannreuther Die State c/b. A vertical die crack extends between 81 up toward Liberty's clasp. John Dannreuther estimates the Large Date, Large 5 BD-4 die pair was used to strike between 75% to 90% of the 100,287 half eagles minted in 1810. Consequently, this variety represents one of the most collectible half eagles struck from 1795 to 1834 (Motto).

This Uncirculated Draped Bust Left type coin showcases bright yellow-gold surfaces and good design detail. Softness is virtually limited to the shield and adjacent feathers. A few faint hairlines exist in the otherwise smooth and lustrous fields. Reddish tan accents on the high points add eye appeal. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

# 1810 BD-4 Half Eagle, MS64 Large Date, Large 5, Middle Die State

3294 1810 Large Date, Large 5, BD-4, R.2, MS64 PCGS. Bass-Dannreuther Die State b/b. The 1810 BD-4 variety is not only the most-available die marriage for the date, it is among the most frequently seen varieties of all early half eagles. Type collectors and date specialists alike prefer the variety for its availability across most grades. Struck from the second use of its obverse die and the sole use of its reverse, the BD-4 displays large numerals in the date and a large, squat 5 in the denomination.

This Choice Uncirculated example displays thick, frosted luster over sharply struck lemon-gold surfaces. The coin is struck with clashed dies, easily visible on both sides and especially prominent on the obverse above the back of Liberty's cap. Marks are relatively few for the assigned grade. We note some parallel die striations on Liberty's cheek, which were not fully eliminated even with a sharp strike. Original mint luster gives this near-Gem five dollar exceptional eye appeal. Population (Large Date, Large 5 variety): 38 in 64 (1 in 64+), 4 finer (10/19). NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

### 1812 BD-1 Half Eagle, AU58+ BD-1, Wide 5D

3295 1812 Wide 5D, BD-1, R.3, AU58+ NGC. Bass Dannreuther Die State a/a with no evidence of die clashing. There are just two die varieties known for 1812 half eagles. That with the Wide 5D reverse is seen more frequently than the other variety with the Narrow 5D denomination. Faint hairlines, scattered marks, and other minor imperfections are evident but entirely trivial. An attractive yellow-gold example. Census: 1 in 58, 0 finer (10/19). NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

### 1826 Capped Head Left Five, AU Details Scarce BD-1 Variety

3296 1826 BD-1, R.5 — Cleaned — NGC Details. AU. Bass-Dannreuther Die State a/e. Just the faintest trace of wear shows on the strongly impressed design elements of this scarce early half eagle, and the antique-gold surfaces are lightly abraded, with a slightly flat aspect due to the noted cleaning. John Dannreuther estimates the surviving population at just 30-40 examples in all grades.

# 1828 Half Eagle, XF Details Rare BD-4 Variety Seldom Seen as a Date

3297 1828 BD-4, High R.6 — Surfaces Smoothed — PCGS Genuine. XF Details. Bass-Dannreuther Die State a/b. Any offering of an 1828-dated half eagle, overdate or not, is a remarkable occurrence. The two 1828/7 varieties, BD-1 and BD-2, are ranked High R.7 (three to five known) and Unique, respectively. The two nonoverdate 1828 half eagle variants, BD-3 and BD-4, are R.8 (three to four known) and High R.6 (12 to 15 known).

Surface smoothing is evident in the fields before and behind the head, likely to remove abrasions, and some polishing or whizzing has been done. Other signs of treatment are visible in the reverse fields, on either side of the wings, where the surfaces are a bit overbright. Even so, the repairs, at least on the obverse, are not all that obtrusive, and given the rarity of the *date*, not terribly distracting. This piece should see some spirited bidding from astute early gold collectors.

1833 Small Date Half Eagle, MS61
Extremely Rare BD-3 Variety
Possibly Unique in Private Hands, Ex: Norweb

3298 1833 Small Date, BD-3, High R.7, MS61 PCGS. Bass-Dannreuther Die State b/b. BD-3 is by far the rarest of the three 1833 half eagle varieties; in fact, it is among the rarest die pairings of any early half eagle issue. It shares its obverse die with BD-2, the other Small Date (or, more accurately, Close Date) die pairing, although the reverse, which distinctively features the period in the denomination close to the D rather than distant, is unique to the BD-3 marriage. Only one die state is documented, showing a light peripheral crack through OF, the wing tip, and the AM in AMERICA. An earlier, uncracked die state likely existed at one time since this is the only use of the reverse die, but it was probably eradicated by the vast private gold melts of the 1830s that decimated the survival of the 1833 half eagle overall.

Concerning the BD-3 die marriage, John Dannreuther writes in Early U.S. Gold Coin Varieties:

"Some numismatists have suggested that fewer than one-half dozen coins exist of this variety, and the author concurs. Perhaps a few more coins are extant, but the number known is unlikely to exceed seven or eight."

This survival estimate has been largely unchanged since Walter Breen published his monograph on early half eagles in 1966, where he called BD-3 (Breen I-1) a High R.7 variety. The Bass-Dannreuther reference (2006) retains that rarity factor, suggesting that three to five pieces are known. However, we believe that BD-3 is slightly rarer still, bordering on an R.8 ranking.

The present coin's pedigree has been traced back to a 1953 Hollinbeck sale, but the earliest confirmed documentation of the Bass coin is only in 1973, when Bass acquired it from Numismatics, Ltd. Efforts to locate additional representation of the variety in old auction catalogs have yielded little data. BD-3 coins were plated in two early Chapman sales, including S.H. Chapman's 1907 auction of the David S. Wilson Collection and Henry Chapman's 1912 offering of the George H. Earle Collection, as well as later in A. Kosoff's 1962 "Illustrated History" catalog of the Judd Collection. However, in each case, the quality of the plate was insufficient to positively match the coin to a known specimen today. Going by strike, each plate shows a coin that appears too sharp to be the Norweb specimen, although it remains possible that all three were earlier appearances of the Bass coin. If so, then it is unlikely that more than two BD-3 specimens exist.

"Colonel" E.H.R. Green at one point had a staggering seven 1833 half eagles, but their varieties are unknown. Waldo Newcomer's collection contained only BD-1 and -2 coins, and the piece in the Farouk sale was a BD-1 proof. The John Story Jenks Collection, auctioned by Henry Chapman in 1921, contained a Small Date 1833, but as only the obverse was plated, it is not known if the piece was a BD-2 or BD-3. In his 1966 monograph, Breen listed William Woodin's 1914 ANS exhibit coin as a BD-3, but it was actually a BD-2. The Smithsonian's 1833 half eagle is a BD-2, and the permanent ANS coin is a BD-1.

In our estimation, available data reveals the capacity for there to be as many as three or four BD-3 representatives extant. However, if examples do survive in addition to the Bass and Norweb specimens, they have been tightly held off of the auction market for at least half of a century. We would not be surprised if future research is able to prove that only two representatives are known.

Both the Bass and Norweb coins exhibit moderate strike weakness on the hair curl in front of Liberty's ear and on the eagle's left (facing) wing, although the Norweb specimen more so. This piece is straw-gold with semiprooflike fields that transition to delicate luster amid the peripheral stars and legends. The surfaces are largely devoid of singular abrasions, showing mainly light lines in the fields that limit the grade. However, a small mark in front of Liberty's forehead and another next to the eagle's neck below the M in UNUM serve as reliable pedigree markers.

Among 1833 half eagles of any variety, this coin would be an attractive, high-end piece. Add in the extreme rarity of the BD-3 die pairing, and this piece becomes one of the most important coins in this auction. We anticipate intense collector interest as this coin makes its first auction appearance in more than two decades. Population (both Small Date varieties): 2 in 61, 5 finer (10/19).

#### Roster of 1833 BD-3 Half Eagles

- 1. MS61 PCGS. Auction Sale (Hollinbeck Coin Company, 3/1953), lot 645D; The Norweb Collection, Part I (Bowers and Merena, 10/1987), lot 783; Four Landmark Collections (Bowers and Merena, 3/1989), lot 620; Public Auction Sale (Stack's, 5/1994), lot 661; Central States Signature (Heritage, 4/2017), lot 4263. The present coin.
- 2. Ungraded. Purchased from Numismatics, Ltd., (6/9/1973); Harry W. Bass, Jr. Foundation; ANA Money Museum. Bass Sylloge 3162.

- B. Ungraded. George H. Earle Collection (Henry Chapman, 6/1912), lot 2404, realized \$57.50.
- C. Uncirculated. J. Hewitt Judd; Illustrated History United States Coins (Kosoff, 1962), lot 85. PCGS# 519954 Base PCGS# 8158

### **CLASSIC HALF EAGLES**

1834 Classic Half Eagle, MS64 Plain 4, McCloskey 4-C

3299 1834 Plain 4 MS64 NGC. Second Head, Breen-6502, McCloskey 4-C, R.4. Ken Bressett Signature holder honoring the Guide Book of United States Coins. The 4 in the date appears to touch Liberty's hair curl, and the 8 is the so-called "block" style. The obverse die is cracked from the border between strase 6 and 7 to the hair curls. A scarce variety and the only use of the obverse die. The reverse die also appears with obverse dies 2 and 3. At ClassicHalfEagles.com, nine reported varieties of 1834 Classic Head half eagles are known from five obverse dies and four reverse dies. This well struck example has original honeygold color over semi-reflective surfaces, and is clean for the grade. A shallow pinscratch above the eagle's beak performs duty as a pedigree marker. Census: 45 in 64 (1 in 64+, 2 in 64★), 9 finer (10/19). NGC ID# 25RR, PCGS# 8171

# 1838 Small Arrows, Large 5 Half Eagle McCloskey 2-B, Sharply Struck MS63

3300 1838 MS63 PCGS. Breen-6515, McCloskey 2-B, R.1. The D in the denomination centered below the branch stem characterizes the Small Arrows, Large 5 reverse, one of two known varieties for this final year of the 1838 Classic Head fives. The lustrous yellow-gold surfaces of this Select specimen exhibit sharply struck design elements, while scattered light marks determine the grade. A small, light copper-alloy spot is visible on the lower neck below the curl. Ex: Houston Money Show Signature (Heritage, 12/2014), lot 4566. NGC ID# 25S4, PCGS# 8176

#### LIBERTY HALF EAGLES

1840-D Half Eagle, MS60 Variety 3-B, Tall Mintmark

3301 1840-D Tall D MS60 PCGS. Variety 3-B. Two mintmark sizes are known for the 1840-D half eagle, recorded as the Small D and Tall D varieties, and they should have separate *Guide Book* listings, in our opinion. A quick review of our Permanent Auction Archives reveals that the Tall D variety represents about 90% of the known population for 1840-D half eagles. PCGS has certified 93 out of 100 examples as the Tall D, recommending this variety as the proper choice for the date/mintmark collector. This pleasing Mint State example has myriad trivial marks on its satin yellow-gold luster, with no distracting marks on either side. Population: 1 in 60, 6 finer (10/19). NGC ID# 25SG, PCGS# 8198

# 1842-C Large Date Half Eagle, MS62 Uncommonly Well-Preserved Conditionally Rare

3302 1842-C Large Date MS62 NGC. Variety 1. Although not as scarce as the Small Date variety, the Large Date 1842-C is rare in its own right in any Uncirculated grade. A larger date format was introduced in 1842 across several denominations, replacing the date logotypes from 1841, which were smaller numerals. In theory, the 1842 Small Date variant was struck first, followed by its Large Date counterpart.

This is a medium green-gold example, with attractive frosted luster throughout lightly abraded fields. The strike is above-average for the issue, with only nominal weakness at the eagle's head and neck. Traces of reflectivity surround the central devices. NGC and PCGS show a combined total of eight numerically finer pieces, a number that may be inflated by resubmissions. Mint State branch mint gold from the 1840s always represents an important opportunity for gold specialists. Census: 2 in 62, 5 finer (10/19). NGC ID# 25SW, PCGS# 8209

# 1847-C Half Eagle, Sharp MS60 A Rarity in Uncirculated Grades

3303 1847-C MS60 NGC. CAC. Variety 1. Although readily available in circulated grades, the 1847-C is seldom seen in any Uncirculated condition. Doug Winter notes: "It becomes very scarce in properly graded AU58 and is both very rare and undervalued in full Mint State." This sharply struck, frosted example is CAC endorsed with natural deep, green-gold color and glowing mint luster beneath the toning. A loupe reveals microscopic abrasions and tiny ticks, but no significant marks. This coin displays great, original eye appeal. Census: 6 in 60, 7 finer. CAC: 2 in 60, 5 finer (10/19). NGC ID# 25TN, PCGS# 8233

# 1849-C Half Eagle, MS62 A Rarity in Mint Condition

3304 1849-C MS62 NGC. Variety 1. Ex: Bass Collection. The Mint State population of 1849-C half eagles is higher than it was at the time of the Bass sale, although such pieces are still rare, particularly above MS61. Doug Winter estimates that only 10 to 15 Uncirculated coins survive in all grades. This piece is a trifle softly struck on the horizontal shield lines, but elsewhere definition is stronger. Scattered abrasions limit the grade, including a hair-thin diagonal line on Liberty's cheek. The coloration is bright yellowgold and the fields are semireflective. A Mint State 1849-C half eagle is an important rarity in this specialized series. Census: 4 in 62, 7 finer (10/19).

Ex: ANA Sale (RARCOA, 8/1970), lot 1545; Harry W. Bass, Jr. Collection, Part III (Bowers and Merena, 5/2000), lot 423; FUN Signature (Heritage, 1/2018), lot 6136. NGC ID# C5XD, PCGS#8241

### 1852 Half Eagle, MS64 Only One Finer at PCGS

3305 1852 MS64 PCGS. Large quantities of gold flowed from the California gold fields to the U.S. Mint at Philadelphia, and to the branch mints during the early 1850s. In 1852, the Philadelphia Mint coined 573,901 half eagles, the fifth largest mintage of the denomination from 1795 through 1879. Higher mintages occurred in 1834, 1843, 1847, and 1861, all at Philadelphia. Despite the large number of coins produced, few have survived in higher grades. PCGS has certified only 105 Mint State examples, including just 33 that grade higher than MS62. This Choice Mint State piece has frosty light yellow-gold luster, trivial grade-consistent marks, and a sharp strike. Population: 13 in 64 (2 in 64+), 1 finer (10/19). NGC ID# 2Y7R, PCGS# 8250

# 1852-D Five Dollar, MS61 Always Challenging in Mint State

3306 1852-D MS61 NGC. Variety 32-V. As one might expect, the 1852-D half eagle is rare in Mint State despite its plentiful mintage of 91,584 pieces. All Uncirculated Dahlonega half eagles command a premium regardless of date, given the popularity of branch mint gold among multiple collector groups. This is sun-gold example, with smooth and partially reflective fields that show only light abrasions. The strike is sharp in most areas, lacking definition on a few star centers and at the eagle's right (facing) claw and arrows. Census: 10 in 61 (1 in 61+), 6 finer (9/19). NGC ID# 25UC, PCGS# 8252

# 1853 Five Dollar, MS63+ Seldom Available at This Level

3307 1853 MS63+ PCGS. The 1853 is available in absolute terms, but Select Uncirculated survivors are scarce, and only a handful of coins qualify for higher grade levels. This high-end No Motto half eagle enjoys frosted, peach-gold surfaces. The stars exhibit crisp detail, while softness occurs on the forecurls, fletchings, and right talon. Peppered ticks are consistent with the grade. Population: 12 in 63 (1 in 63+), 4 finer (10/19). NGC ID# 25UD, PCGS# 8253

## 1856-C Liberty Half Eagle, AU58 Challenging Branch Mint Issue

3308 1856-C AU58 NGC. Variety 1. Scarce at the AU58 level and rare in Uncirculated grades, the 1856-C ranks among the more challenging Charlotte half eagles. Mint luster remains at the margins of this orange-gold example. Tiny marks are are frequent (visible under a loupe), although this coin is less abraded than most of the issue. The curls around Liberty's face are a bit weak from an incomplete strike, combined with a trace of wear to justify the assigned grade. Full obverse denticles exist, indicating an early strike. Census: 35 in 58 (2 in 58+), 14 finer (10/19). NGC ID# 25UW, PCGS# 8267

### 1858 Half Eagle, MS63 Rare No Motto Issue

3309 1858 MS63 NGC. Once the San Francisco Mint began operations in 1854, there was no need to transport gold to Philadelphia or the other distant mint facilities. In 1858, the Philadelphia Mint struck just 15,136 half eagles, for example. The mintage of smaller denomination gold coins was limited, even at the San Francisco Mint, as double eagles took precedence. This Select Mint State rarity has brilliant lemon-yellow luster with reflective fields. The strike is average, with some central weakness on both sides. Census: 2 in 63, 6 finer (10/19). NGC ID# 28BY, PCGS# 8276

# 1858-S Five Dollar, AU58 Underrated Date, Few Are Finer

1858-S AU58 NGC. All Federal gold coin was in demand throughout West Coast commerce upon opening of the San Francisco Mint in 1854. The half eagle amounted to "small change" in a red-hot economy that preferred double eagles. Except for 1856 and 1857, S-mint fives were struck in small quantity and circulated to attrition. Few (if any) pieces were numismatically saved. The 1858-S had a mintage of just 18,600 pieces, and only two Mint State survivors are known today. The balance of 100 or so pieces that exist show some level of circulation. This near-Mint example displays apricot-gold color and some deep-gray accents, with areas of microgranularity and myriad tiny marks. It retains its sharp strike and subtle mint luster at the margins. Census: 11 in 58 (1 in 58+), 1 finer (10/19). NGC ID# CLAM, PCGS# 8279

### 1860-D Five Dollar, AU58 Scarce Large D Variety

3311 1860-D Large D AU58 NGC. Variety 46-EE. This newly discovered variety is very scarce and may provide the successful bidder with added value when compared to the more frequently encountered Variety 46-FF Large D variant. The mintage was 14,635 pieces, and a relatively high percentage were set aside for some unknown reason, leaving an estimated 225 to 275 pieces today in all grades. This is a remarkably attractive coin that displays rich reddish-tinted surfaces with significant portions of mint luster remaining on each side. Weakly struck in the centers, as usual. NGC ID# 25VH, PCGS# 98286

# 1861-C Five Dollar, MS60 Variety 1, Die State III

3312 1861-C MS60 NGC. Variety 1. Die State III, with a die crack through the tops of AMERI. This is the latest die state, and might have been one of the 887 examples struck in the Charlotte mint while it under Confederate control, although there is no way to prove such a claim. Aside from a single MS63 example that appears in the population data for both NGC and PCGS, the few Mint State examples of this issue hover around the MS60 to MS61 level. NGC has certified one (the present piece) in MS60, five in MS61, and one in MS63. Perhaps as many as half a dozen different Mint State examples of this issue survive today. Although both sides exhibit myriad marks, there are none that stand out among the others. The surfaces have satiny yellow luster and the strike is typically sharp. Census: 1 in 60, 6 finer (10/19). NGC ID# 25VL, PCGS# 8289

# 1869 Half Eagle, AU58 Only 1,760 Circulation Strikes

3313 1869 AU58 NGC. With one of the lowest mintages in the entire Liberty Head half eagle series, the 1869 issue is surprisingly overlooked by even seasoned collectors. Just 1,760 pieces were struck, and auction appearances are sparse. This near-Mint example displays partially prooflike surfaces (to be expected with such a low mintage). Vibrant orange-gold surfaces host a reasonably sharp strike, which lacks crispness only on Liberty's central curls and the eagle's neck. Light abrasions on both sides determine the assigned grade. Census: 9 in 58, 2 finer (10/19). NGC ID# 25W7, PCGS# 8317

### 1879-S Half Eagle, MS64 Conditional Rarity

3314 1879-S MS64 PCGS. CAC. The majority of the 426,200 half eagles struck in San Francisco in 1879 entered circulation, and high level Mint State pieces survived as a matter of chance. There were few collectors on the west coast at the time, and a collection of half eagles quickly became an expensive proposition. This Choice Mint State piece is a lovely example with faint peripheral blue toning that frames the lustrous orange-gold surfaces. Population: 12 in 64, 1 finer. CAC: 2 in 64, 0 finer (10/19). NGC ID# 25X9, PCGS#

### 1882-S Half Eagle, MS66 Tied for Finest Certified

3315 1882-S MS66 NGC. The Premium Gem grade level is as good as it gets for the 1882-S, a conditionally challenged half eagle from a plentiful mintage of 969,000 pieces. This is a splendid example, with frosted rich-gold surfaces and a razor-sharp strike. Only a few shallow grazes and tiny marks are seen on either side, while eye appeal is exceptional. Only a handful of MS66 coins exist, and neither NGC nor PCGS report a finer example. NGC Census: 3 in 66, 0 finer (10/19). NGC ID# 25XJ, PCGS# 8360

# 1886-S Half Eagle, MS66 Sole-Finest at PCGS

3316 1886-S MS66 PCGS. With a large mintage of more than 3.2 million pieces, the 1886-S is readily available in most grades including the lower Mint State ranks. Gem or finer examples are rare, seen less often than surrounding San Francisco dates despite their lower mintages. Premium Gem examples are virtually unknown, with just one example at PCGS and another sole example at NGC. None are finer at either service.

This is the solitary PCGS coin certified MS66. Richly frosted, straw-gold surfaces display attractive rose-gold undertones, while cartwheel mint luster radiates from each side. A sharp strike exists throughout. A few light marks flank the eagle, yet the obverse is virtually unmarked and eye appeal is spectacular. Population: 1 in 66, 0 finer (10/19). NGC ID# 25XV, PCGS# 8370

# 1891-CC Half Eagle, MS64 Only Two Finer at PCGS

3317 1891-CC MS64 PCGS. Variety 2-A. Repunched second 1 in the date. The glowing surfaces are lustrous and boast deep, unusually attractive copper-red, green-gold, and peach toning. The design motifs are boldly struck, as numerous wispy marks limit the grade. A common date that becomes elusive at the near-Gem grade level. Population: 93 in 64 (6 in 64+), 2 finer (10/19). NGC ID# 25Y5, PCGS# 8378

# 1893-CC Five Dollar, MS64+ Rare at This Grade Level Just Four Pieces Certified Finer

3318 1893-CC MS64+ NGC. CAC. Variety 1-A. The Carson City Mint was in full swing throughout the first half of 1893, only to have all coinage operations suspended at mid-year. Just 60,000 half eagles were struck. While sufficient 1893-CC half eagles survive for collectors in lesser grades, near-Gem examples are rare and finer pieces are nearly unobtainable, tucked away in advanced collections.

This high-end Choice Uncirculated example displays both the NGC Plus designation and CAC endorsement. Gleaming orange-gold surfaces show only incidental tiny ticks, while the strike is super-sharp in all respects. Traces of prooflikeness surround the portrait, while the balance of the coin is smoothly frosted and highly lustrous. Eye appeal is that of a fully Gem coin. Census: 10 in 64 (1 in 64+), 4 finer. CAC: 3 in 64, 0 finer (10/19). NGC ID# 25YB, PCGS# 8384

# 1894-O Five Dollar, MS64 The Single Finest Certified

3319 1894-O MS64 NGC. Variety 1. The 1894-O is the final Liberty Head half eagle struck at the New Orleans Mint, and one of only three With Motto issues of this type. Mint State coins are elusive and most grade MS61 or lower. In MS63, the 1894-O five is decidedly rare, and this near-Gem example is the sole finest certified (10/19). Shimmering, frosty mint luster shimmers across orange-gold surfaces, illuminating well-struck design elements and strong eye appeal. The only mentionable abrasions include a small scrape near star 5 on the obverse, and on the reverse between the F in FIVE and the U in UNITED. NGC ID# 25YF, PCGS# 8388

# 1900-S Five Dollar, MS65+ Condition Rarity

3320 1900-S MS65+ PCGS. CAC. The 1900-S has a lower mintage than some of its contemporaries, like the 1899-S and certainly the plentiful 1901-S. However, collectors should be able to obtain a satisfactory example through MS64 without a problem. The dramatic population decline at the Gem level, however, makes this otherwise collectible date a challenging condition rarity.

Thickly frosted yellow-gold surfaces present crisp detail on the stars, portrait, and on every element of the eagle and its accoutrements. The fields are expectedly unabraded. Population: 8 in 65 (2 in 65+), 5 finer. CAC: 3 in 65, 2 finer (10/19). NGC ID# 25YV, PCGS# 8401

#### INDIAN HALF EAGLES

1908-S Indian Half Eagle, MS64 Low-Mintage, First-Year Issue

3321 1908-S MS64 PCGS. The Indian design was introduced on the half eagle denomination in 1908 and the San Francisco Mint struck a small mintage of 82,000 examples with the new motifs. This attractive Choice example exhibits sharply detailed design elements, with just the slightest trace of softness on the eagle's shoulder. The lustrous orange-gold surfaces show only insignificant signs of contact. Population: 90 in 64 (13 in 64+), 74 finer (10/19). NGC ID# 65K3, PCGS# 8512

# 1908-S Five Dollar Indian, MS64+ Rare CAC-Approved Example

3322 1908-S MS64+ PCGS. CAC. From a mintage of only 82,000 coins, the 1908-S half eagle is a semikey issue in high grades. Choice and finer examples are scarce, and such coins are rare with CAC labels. This is the lowest-mintage of the three first-year Indian Head issues. The current coin displays luminous peachgold mint luster and exceptionally smooth fields. The devices are sharply struck and the coin produces splendid eye appeal. Mike Fuljenz writes of this issue: "The luster is excellent and it certainly ranks as one of the best San Francisco issues of this type." Indeed, this example is highly appealing. NGC ID# 65K3, PCGS# 8512

# 1909 Half Eagle, MS65+ Glowing Luster, Rare Any Finer

3323 1909 MS65+ PCGS. In Gem condition, the 1909 is about equally rare compared to the more highly heralded 1909-D. This Plus-graded example is sharply struck and free of all but a few inconsequential, tiny marks. Mint luster radiates from smooth, finely frosted rich-gold surfaces. PCGS reports just nine finer examples. Population: 9 in 65+, 9 finer (9/19). NGC ID# 28DH, PCGS# 8513

# 1909-O Indian Five, AU50 Rarest Indian Half Eagle

1909-O AU50 NGC. Some other issues are more difficult to locate in high grade, but the 1909-O is the rarest Indian half eagle in absolute terms, thanks to its low mintage of 34,200 pieces. This attractive AU specimen exhibits some light wear on the headdress and the eagle's shoulder, but the pleasing orange-gold surfaces show only minor abrasions. NGC ID# 25ZK, PCGS# 8515

#### 1909-O Indian Half Eagle, AU55 Branch Mint Key Issue

3325 1909-O AU55 NGC. Only 34,200 Indian half eagles were struck at the New Orleans Mint in 1909, the final year of coinage operations at the fabled Southern facility. This attractive Choice AU specimen exhibits just a trace of wear on the incuse design elements and the lightly abraded yellow and rose-gold surfaces retain traces of original mint luster. NGC ID# 25ZK, PCGS# 8515

# 1909-O Half Eagle, AU55 Only O-Mint Indian Five

3326 1909-O AU55 NGC. The 1909-O is the only Indian half eagle from the fabled New Orleans Mint, making it extremely popular with branch mint type collectors. This impressive Choice AU specimen exhibits strongly impressed design elements with just a trace of wear in areas like the eagle's shoulder. The lustrous orangegold surfaces are lightly abraded on this popular branch mint key. NGC ID# 25ZK, PCGS# 8515

#### 1910 Indian Head Five, MS65 Rare Any Finer

3327 1910 MS65 NGC. While occasionally offered in attractive Gem Uncirculated condition, the 1910 seldom exceeds the MS65 level. This lustrous, orange-gold example is sharply struck and shows just a two or three inconsequential marks on the reverse — seemingly poised for an even finer grade. Attractive lilac overtones add to the substantial eye appeal. Census: 32 in 65, 3 finer (10/19). NGC ID# 28DK, PCGS# 8517

# 1911 Half Eagle, MS65+ Rivals the Four Finer Survivors

3328 1911 MS65+ PCGS. The 1911 is plentiful in most grades and only becomes challenging in near-Gem condition. Like a majority of other dates in the Pratt half eagle series, however, survivors in MS65 are genuinely difficult to obtain. The raised fields were prone to grade-limiting ticks, explaining the dearth of high-grade examples available to discerning collectors.

This coin is a remarkable exception, rivaling the finest certified examples. Frosty luster rolls over medium yellow-gold surfaces that show only small ticks and superficial grazes. They are confined mainly to the upper-right reverse field. Well struck. Population: 73 in 65 (5 in 65+), 2 finer (10/19). NGC ID# 28DP, PCGS# 8520

# 1913-S Five Dollar, MS63+ Rarely Seen Finer

3329 1913-S MS63+ PCGS. The quality of an Indian five collection is in large part judged by the eye appeal and technical grade of two San Francisco issues — the 1912-S and 1913-S. Both are challenging to find with vibrant surfaces and a sharp strike. This Plus-graded Select Uncirculated 1913-S will solve half of the quandary, with lustrous and light orange-gold color and a boldly defined motifs. The mintmark is readable, and the eagle's legs are well-defined — two of the typical trouble spots on a 1913-S. The upper headdress shows sharp feather, although the lower feathers lack crisp definition. Abrasions and marks are limited on the obverse to a tick on the cheek and a small depression near star 10. Only light, grade-consistent marks are scattered across the reverse fields. PCGS reports few pieces any finer. Population: 2 in 63+, 18 finer (10/19).

NGC ID# 25ZP, PCGS# 8526

# 1915 Five Dollar, MS65 Among the Finest Certified

3330 1915 MS65 PCGS. Attractive reddish-orange surfaces join a sharp strike and vibrant mint luster to confirm the Gem grade of this pleasing 1915 Indian five. Marks are limited to a few parallel abrasions near star 6 and some widely scattered light marks that visit the reverse fields. The 1915 is scarce in full Gem Uncirculated condition, and the only finer pieces certified are seven MS65+coins at PCGS by virtue of their Plus designation. Population: 68 in 65 (7 in 65+), 0 finer (10/19). NGC ID# 28DX, PCGS# 8530

#### 1916-S Five Dollar Indian, MS64 Rarely Seen Finer

3331 1916-S MS64 PCGS. The San Francisco Mint was alone in striking 240,000 half eagles in 1916 — the denomination's final year of issue before its swan song in 1929. Those coins were struck at the Philadelphia Mint, though, and are generally uncollectible. This wheat-gold near-Gem is well-defined in the centers. Slight buckling around the rims softens peripheral detail somewhat. Mint luster is rich and frosty. PCGS has only graded 15 finer submissions (10/19). NGC ID# 28DY, PCGS# 8532

# **EARLY EAGLES**

# 1795 BD-1 Ten Dollar, XF Details

3332 1795 13 Leaves, BD-1, High R.3 — Altered Surfaces — PCGS Genuine. XF Details. Undetermined die state. Apparently the altered surfaces have eliminated the usual die state markers for this variety. Each side is densely populated with small abrasions that seem to have been intentionally done in order to diminish several planchet voids and presumably larger marks as well; in the process, diagnostic die cracks were also eliminated. The surfaces are bright yellow-gold and a couple of more recent scratches bear mentioning. One is between star 10 and the obverse denticles, the other runs vertically down the breast of the eagle. Well-defined for the grade.

# 1795 13 Leaves Eagle, Choice XF BD-2, CAC Approved

3333 1795 13 Leaves, BD-2, High R.4, XF45 PCGS. CAC. Bass-Dannreuther Die State a/d, as often seen, with no peripheral obverse cracks. The reverse is lapped. BD-2 is one of the two most plentiful 1795 eagle varieties, although with an estimated population of only 90 to 110 pieces, it remains scarce in all grades. In Early U.S. Gold Coin Varieties, John Dannreuther writes of this issue:

"As noted under BD-1, this variety is a little more than twice as scarce as that variety, the most available 1795 eagle, but this is still considered the other available variety of this date and type. In other series, a coin with a hundred or so examples known would be considered quite rare."

This Choice XF example is CAC endorsed. Luster clings to the peripheral fields and design recesses amid bright straw-gold hues. Strike weakness in the centers is the result of planchet filing at the mint, and remnants of the adjustment marks are still visible on the eagle's breast. However, wear is light. Visual appeal is outstanding for the grade, hence the CAC green label.

From The Stone Arch Collection. NGC ID# 25ZU, PCGS# 45711 Base PCGS# 8551

# 1801 BD-2 Ten Dollar, AU58 Spines in Cap

3334 1801 BD-2, R.2, AU58 NGC. Bass-Dannreuther Die State a/a. There are no clash marks present, although this near-Mint coin does display the vertical spines in Liberty's cap, the result of die damage of an unknown nature. One theory is that the spines are from a small set screw that may have fallen out of the press and lodged between a planchet and the obverse die. Whatever the case, the spines readily identify the die variety, which is popular as a type coin with early gold collectors. In Early U.S. Gold Coin Varieties, John Dannreuther estimates that 600 to 800 examples of BD-2 survive. However, a great many are impaired in some way. This piece has satiny yellow-gold surfaces and a bold strike. Light, scattered abrasions are in keeping with the grade. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

# 1801 BD-2 Ten Dollar, MS64 Upper-End for the Grade Bright, Semireflective Fields

3335 1801 BD-2, R.2, MS64 PCGS. CAC. The year was 1801. Thomas Jefferson was elected as our third president, the United States had meagerly grown to 16 states and we were at war with Tripoli. Meanwhile, our fledgling first Mint in Philadelphia was struggling for survival. David Lange elaborates in his History of the United States Mint and Its Coinage: "The late 1700s and early 1800s were the United States Mint's darkest days, and it seemed that the end was near. Declaring the Mint a failure, many in Congress wanted to abolish it." He goes on to add that, "in 1801, bullion deposits dropped off dramatically, and the Mint again was threatened with extinction. Only the previous year, the Senate had passed a resolution that called for abolishing the U.S. Mint and placing a contract for coining with the Bank of the United States. The lack of federal coinage was blamed on inefficiency and incompetence, while the real reasons were little understood by Congress." Amid the economic and political turmoil of the time, Mint Director Elias Boudinot managed to keep the coining presses in motion. Over 1 million cents were struck, with mintages of the half dimes, dimes, half dollars, and dollars reaching into the tens of thousands of coins each. Interestingly, the only 1801-dated denomination struck in gold was that of the eagle. The recorded mintage of 44,343 tens in 1801 likely included some coins dated 1800 and, as suggested by noted collector and early gold researcher Harry W. Bass, Jr., some pieces dated 1799 as well. Nonetheless, the 1801 eagle is one of the more available issues in the Capped Bust ten dollar series.

The estimated number of survivors of the 1801 ten dollar is in the range of 600 to 800 pieces. That suggests a survivor rate of approximately 2%, which is consistent with other coins minted in the early years of the first Mint. Only the 1799 is more readily available in all grades, making either date the usual choice for type collectors. Those seeking Gem examples, however, will require much patience as PCGS and NGC combined have graded only five 1801 tens at the MS65 level. Even near-Gems, such as the current offering, are scarce with a mere 37 examples thus certified at PCGS (10/19).

This is a spectacular piece. The fields are bright with a confirmed reflectivity on each side. The central design elements are fully brought up and the only area of softness is on the peripheral stars on the obverse. Bright yellow-gold color. A magnificent early ten and a rare opportunity for the gold type collector.

Ex: West Palm Beach Signature (Heritage, 6/2008), lot 2104.

From The Stone Arch Collection. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

# 1803 BD-3 Eagle, Lustrous AU58 CAC Endorsement, Small Reverse Stars

3336 1803 Small Reverse Stars, BD-3, R.4, AU58 PCGS. CAC. Bass-Dannreuther Die State c/d, clashed. Among 1803 eagle varieties, BD-3 is plentiful with an estimated survivorship of 150 to 200 pieces. Nonetheless, few examples earn CAC recognition for high quality. The variety represents the third die marriage of this obverse in 1803, which was the only obverse die employed that year. The reverse die was previously employed for some 1801 eagle coinage and is seen here in its second and final use.

The present coin displays smooth, lustrous surfaces with rich olive-gold and peach-orange hues. Little discernible wear is present, although moderate strike weakness affects the lower portion of Liberty's bust, the left-hand obverse stars, and the clouds and stars above the eagle on the reverse.

From The Stone Arch Collection. NGC ID# 2629, PCGS# 45737 Base PCGS# 8565

# LIBERTY EAGLES

# 1838 Liberty Ten, AU53 Resumption of the Denomination

3337 1838 AU53 PCGS. Apparently the U.S. government felt in the early 1800s that the gold eagle, or ten dollar gold piece, was unnecessary as production stopped after the 1804 eagles were minted. Aside from a small quantity of 1804-dated proof pieces that were struck in the mid-1830s for presentation set purposes, the denomination remained dormant until 1838, when production began again with a mintage of 7,200 coins that were all struck during the last week of December. This greenish-gold example has a sharp strike, although the stars are weak. The still lustrous surfaces exhibit myriad inconsequential marks. Slight prooflike mirrored finish remains in the protected areas of the reverse. Population: 3 in 53, 20 finer (10/19). NGC ID# 262D, PCGS# 8575

# 1839 Liberty Eagle, AU55 Head of 1840, 'Small Letters' Rarity

3338 1839 Small Letters, Head of 1840, AU55 NGC. The Small Letters 1839 Liberty Head ten is known to many collectors as the Type of 1839, Head of 1840, with a remodeled Liberty portrait and smaller reverse lettering. While the new style has reverse letters that are described as Small Letters in the literature, in actuality they are only slightly smaller than the Type of 1838 with Large Letters. Measurements of several letters in the legend and denomination show a height of 1.7 mm. on the Large Letters reverse, and 1.5 mm. on the Small Letters reverse. In practice, the remodeled portrait with its date fully beneath the neck truncation are more reliable pick-up points to identify the new Christian Gobrecht design.

The Type of 1839 is significantly scarcer than the earlier Type of 1838 issue. Coinage was about half that of the Large Letters coin (12,447 vs 25,801 pieces), and the later issue's survivorship is estimated at only about 50 to 80 coins, according to Q. David Bowers in A Guide Book of Gold Eagle Coins (published in 2017). This Choice About Uncirculated example displays partially lustrous fields and pleasing straw-gold color. Detail is sharp for the grade, although there are moderate abrasions on each side. A small edge mark above star 8 may be a test cut. Census: 10 in 55, 6 finer (9/19). NGC ID# 54XJ, PCGS# 8580

# 1844-O Ten, AU58 Original Surfaces

3339 1844-O AU58 NGC. Variety 5. Of the 118,700 coins struck of this issue, it is estimated that today 300 to 350 examples remain in all grades. Two-thirds of those survivors, though, are in VF or XF grades. AU examples are worth taking note of. The deeper orangegold color of this piece suggest it is original and untampered. The remaining luster, however, is interrupted by a number of medium to larger-sized abrasions on each side. NGC ID# 554G, PCGS# 8591

# 1844-O Ten Dollar, AU58 Interesting Variety 4 Example

3340 1844-O AU58 PCGS. Variety 4. The 1844-O ten is an interesting issue with a surprisingly high number of survivors, even in AU grades. This piece was struck from the same die pairing used on the unique PR64 1844-O ten. Not much "proofiness" remains, but a bit of semireflective glimmer can be seen in the fields. The central devices are fully struck, while the peripheral stars show high-point softness. Numerous small abrasions are peppered across each side. Population: 12 in 58 (1 in 58+), 5 finer (10/19). NGC ID# 554G, PCGS# 8591

# 1852-O Ten Dollar, AU55 Choice Surfaces, Seldom Seen Finer

3341 1852-O AU55 NGC. Variety 1. A small mintage of 18,000 pieces followed the much larger 1851-O production of 263,000 pieces. Still, the 1852-O is moderately available in comparison to other low-mintage eagles, although it is rare in Mint State. This is a Choice About Uncirculated survivor, with frosted straw-gold surfaces and glints of mint luster around the raised devices. Only tiny marks exist on the well-preserved, sharply struck surfaces. A bold "shield ring" adds interest to the reverse, which shows the mintmark entirely left of the feather tip. Census: 22 in 55, 10 finer (10/19). NGC ID# 263D, PCGS# 8609

#### 1853-O No Motto Ten, AU58 Sharp New Orleans Eagle

3342 1853-O AU58 NGC. Variety 1. At least six die pairs were required to strike just 51,000 1853-O eagles. This variety shows lapped neck curls, with no "shield ring" seen on the reverse. Branch mint eagles are always in demand, and while the 1853-O is available in circulated grades, it is rare in full Mint State. This is a near-Mint example with semireflective fields and sharply struck motifs. The still-lustrous, brassy-gold surfaces display soft-gray accents at points of slight wear that determine the assigned grade. Census (all varieties combined): 44 in 58 (2 in 58+), 6 finer (9/19). NGC ID# 263F, PCGS# 8612

# 1853-O No Motto Ten, AU58 Sharp New Orleans Eagle Unlisted Die Pair

3343 1853-O AU58 PCGS. Undocumented Variety. Both the obverse reverse dies are known for this attractive, near-Mint 1853-O eagle, but they are unlisted when paired together. The obverse shows repunching at the base on 1, 5, and 3 of the date, while the reverse has the mintmark high and close to the feather tip, plus a shield ring and numerous vertical shield lines extending into the horizontal lines above. A total of three obverse dies and six reverse dies are known for the 1853-O, combining for either seven or eight varieties. This is a smoothly lustrous near-Mint example of the undocumented die pair, with sharply struck devices and attractive orange-gold color. The reflective fields show a few light hairlines of minimal distraction. Population (all varieties combined): 23 in 58 (2 in 58+), 4 finer (10/19). NGC ID# 263F, PCGS# 8612

# 1855-O Liberty Eagle, AU58 Variety 2, Normal Date

3344 1855-O AU58 NGC. Variety 2. Doug Winter reported two varieties of 1855-O eagles, one with a repunched date and the other with a normal date as offered here. Our own analysis suggests that the first variety is actually the result of machine doubling. However, additional varieties may be awaiting discovery as four obverse dies were shipped to New Orleans for the 1855-O eagle coinage. The 18,000 coin mintage was a sharp drop from previous years as the San Francisco Mint operated for their first full year in 1855. This example ranks among the finest of survivors. Just two Mint State pieces are known, along with a small number of AU58 and AU55 examples. While lightly marked, this example has nearly full mint luster with satiny yellow-gold surfaces. An appealing example for the advanced collector. Census: 10 in 58, 0 finer (10/19). NGC ID# 263M, PCGS# 8617

### 1858-O Eagle, AU58 Scarce New Orleans Issue Partially Prooflike

3345 1858-O AU58 PCGS. Variety 1. A vibrant, sun-gold example with partially prooflike fields, the reflectivity diminished only slightly by field chatter and light abrasions. With a circulation strike mintage of 20,000 pieces, the typical 1858-O survivor grades VF or XF-to-low-AU. Near-Mint or Uncirculated examples are scarce-to-rare — highly sought by branch mint gold specialists. Orange accents add eye appeal to the sharply struck central devices of this attractive AU58 coin. Housed in a previous generation green label holder. Population: 14 in 58 (1 in 58+), 9 finer (9/19). NGC ID# 55GX, PCGS# 8626

### 1868 Ten Dollar, AU58 An Absolute and Condition Rarity

3346 1868 AU58 PCGS. A limited mintage of 10,630 eagles was produced at the Philadelphia Mint in 1868. At the time, silver and gold were scarce due to hoarding during and following the Civil War. Nobody trusted paper money during those difficult times. This Choice AU example has myriad, trivial marks on its light yellowgold surfaces that exhibit nearly full mint luster. Population: 13 in 58, 6 finer (10/19). NGC ID# 264N, PCGS# 8653

# 1871-CC Ten Dollar, AU58 Renowned Carson City Rarity

3347 1871-CC AU58 NGC. Variety 1-A. The Comstock Lode is famous for its vast yield of silver ore, yet gold was found in abundance as well. In 1871, a large amount of gold was taken from Comstock, although most of it went to the San Francisco Mint. Carson City received a mere 25% of the gold output. South America was the beneficiary of some 1871-CC eagles, although most of the 8,085-piece mintage circulated in local commerce. Few Mint State pieces were saved or otherwise preserved, with just three Uncirculated examples shown on the combined NGC and PCGS population reports.

This near-Mint example is rare as well. About a dozen pieces exist at the AU58 level, and Rusty Goe estimates perhaps just over 100 1871-CC eagles exist in all grades combined. The recent Bowers' *Guide Book of Gold Eagle Coins* suggests 90 to 110 pieces survive in all grades. Soft luster remains throughout both sides of this straw-gold coin. A trace of high-point wear tempers an otherwise sharp strike, with tiny abrasions scattered across both sides, seen under a loupe. A short bit of struck-in mint grease runs from the underside of the eagle's right (facing) wing to the first A in AMERICA. Census: 9 in 58, 2 finer (10/19). NGC ID# 264X, PCGS# 8661

#### 1874-S Ten Dollar, AU55 Only 10,000 Coins Minted

3348 1874-S AU55 NGC. Not only was the mintage quite low, but most of those coins entered circulation. Today, the average certified grade hovers around the XF40 level. Choice AU or finer pieces are scarce. This example has scattered grade-consistent handling marks over the lustrous light yellow surfaces. Census: 14 in 55, 7 finer (10/19). NGC ID# 2659, PCGS# 8671

# 1879-CC Ten Dollar, XF Details Only 1,762 Pieces Produced

3349 1879-CC — Cleaned — NGC Details. XF. Variety 1-A. The 1879-CC ten dollar has the lowest mintage of any gold coin produced at the Carson City mint. Probably only 40 to 50 examples are extant and about half of those are VF or lower in grade. This piece shows bright surfaces from cleaning, but there are no abrasions worthy of singular mention. Weakly struck in the centers, as usually seen.

# 1880-O Ten Dollar Liberty, AU58 Scarce, Low-Mintage Issue

3350 1880-O AU58 NGC. Variety 1. The 1880-O Liberty eagle claims a small mintage of just 9,200 pieces, making it an elusive issue in all grades. This attractive near-Mint example displays just the slightest trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Doubling shows on the stars on the left. Census: 30 in 58 (1 in 58+), 9 finer (10/19). NGC ID# 265U, PCGS# 8689

### 1881-O Ten Dollar, AU58 Prooflike The Only Prooflike Coin Certified

3351 1881-O AU58 Prooflike NGC. Variety 1. This near-Mint 1881-O Liberty eagle may have been among the earliest strikes from a mintage of 8,350 coins. The fields are deeply reflective, and there is no evidence of die deterioration or lapping. A die crack that is usually present along the base of STATES is not seen. This piece is distinguished as the only Prooflike 1881-O eagle certified (10/19). Both sides display sharp detail and rich orange-gold coloration. Barely a trace of friction is evident, along with light field chatter. Census: 34 in 58 (2 in 58+), 15 finer; 1 in 58 Prooflike, 0 finer (10/19). NGC ID# 265Y, PCGS# 8693

#### 1882-O Ten Dollar, Reflective AU58 Seldom Offered Finer

3352 1882-O AU58 PCGS. Variety 1. This piece is in an early die state, before cracks develop through AMERICA. The fields are deeply prooflike in the protected areas, while the open expanses and the high points of the central devices display slight friction. This bright yellow-gold coin is sharp and minimally abraded. Finer, Uncirculated 1882-O tens are scarce. Population: 13 in 58, 18 finer (10/19). NGC ID# 55GJ, PCGS# 8697

# 1898 Liberty Ten Dollar, MS65 Swirling Mint Frost, Conditionally Scarce

3353 1898 MS65 PCGS. CAC. This plentiful Liberty Head eagle issue establishes its conditional scarcity at the Gem level, and only a handful of coins are known in higher grades. Light orange-gold color and swirling mint frost blanket smooth, boldly struck surfaces. A fantastic coin for type or Registry purposes. Population: 10 in 65, 2 finer. CAC: 5 in 65, 0 finer (10/19). NGC ID# 267G, PCGS# 8740

# 1901 Ten Dollar, Frosty MS67 20th Century Liberty Head Type Coin

3354 1901 MS67 NGC. Commonly viewed as available overall, the 1901 Liberty eagle is really only plentiful in grades through MS65. In MS66, the date is scarcely seen, and only a handful of Superb Gems are known. This piece is one of seven MS67 coins at NGC with none finer. PCGS lists only a single coin in this grade, also with none finer. This is only the third individual Superb Gem example that we have handled in the last decade. Luster engulfs each side in radiant straw-gold and peach-orange hues, complementing sharp design features. Neither side has a single notable abrasion, earning this piece a place among the finest-certified 1901 Liberty eagles. A tremendous opportunity for the 20th century gold type collector. Census: 7 in 67, 0 finer (10/19). NGC ID#7LHF, PCGS#8747

# 1901-O Ten Dollar Liberty, MS64 Almost Unobtainable Any Finer

3355 1901-O MS64 PCGS. Variety 1. Widely recognized as one of the more available With Motto tens, as well as an O-mint, and a 20th century issue, there is a generous number of survivors available. However, at the MS64 level that is not the case, and the 1901-O is almost non-existent any finer. PCGS has only certified 23 other pieces at the MS64 level, with a single coin finer (10/19). The mint luster on this piece is thick and satiny with only slight interruptions by several smaller abrasions. NGC ID# 267R, PCGS# 8748

#### 1903-S Liberty Eagle, MS66 Seldom Seen Any Finer

3356 1903-S MS66 PCGS. CAC. The 1903-S Liberty eagle claims a substantial mintage of 538,000 pieces, but examples in MS66 condition are rarely seen and finer coins are prime condition rarities. This impressive Premium Gem offers well-detailed design elements, with just a touch of softness on some star centers. The well-preserved peach-gold surfaces are lustrous and appealing. Population: 34 in 66 (5 in 66+), 4 finer. CAC: 13 in 66, 0 finer (10/19). NGC ID# 267X, PCGS# 8754

# **INDIAN EAGLES**

#### 1909-S Indian Eagle, MS64 Better San Francisco Issue

3357 1909-S MS64 PCGS. Few examples of the 1909-S Indian eagle survive in high grade. This date is scarce in MS64, and higher-grade representatives are rarely offered. The current piece displays good strike sharpness and the expected satiny yellow-gold luster, with minimal abrasions for the grade. Eye appeal is pleasing. Population: 55 in 64 (6 in 64+), 34 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 28GP, PCGS# 8864

# 1911-D Ten Dollar, MS61 Series-Low Mintage of 30,100 Coins

3358 1911-D MS61 NGC. The Denver Mint coined all four denominations of gold coins in 1911, but only the double eagle was minted in substantial numbers. The eagle had a production of 30,100 coins, the lowest mintage of the Indian With Motto series. The facility also produced 72,500 half eagles and 55,680 quarter eagles. This pleasing Mint State piece has scattered surface marks as the grade suggests, yet it retains full mint brilliance and displays a sharp strike, especially on the lower headdress feathers. NGC ID# 28GU, PCGS# 8869

#### 1912-S Indian Eagle, MS64+ Challenging Issue in High Grade

3359 1912-S MS64+ PCGS. CAC. From a mintage of 300,000 pieces, the 1912-S Indian eagle is a challenging issue in MS64 condition, and finer coins are rare. This Plus-graded Choice example offers well-detailed design elements, with just a trace of softness on Liberty's curls and the eagle's shoulder. The pleasing orange-gold surfaces are lightly marked for the grade, with vibrant mint luster and outstanding eye appeal. Population: 84 in 64 (28 in 64+), 16 finer. CAC: 30 in 64, 3 finer (10/19). NGC ID# 269G, PCGS# 8872

#### 1913-S Ten Dollar, MS62 Low Mintage of 66,000 Coins

3360 1913-S MS62 PCGS. A mere 66,000 coins constituted the entire mintage of 1913-S ten dollar gold pieces, explaining the issue's rock-solid status as a series semikey. Frosty mint luster glistens softly from the protected areas, though it is somewhat subdued in the open fields. Each side offers light yellow and rose-gold color and good design detail. Notoriously challenging in better condition. NGC ID# 28GZ, PCGS# 8874

# 1913-S Eagle, MS62 Key Date in All Grades

3361 1913-S MS62 PCGS. Reddish-gold coloration is profound and includes delicate lavender accents, furthering the eye appeal. Slight central softness occurs on each side, and numerous scattered abrasions are entirely in line with the MS62 assessment. The 1913-S ten dollar gold piece was struck to the measly extent of 66,000 pieces and is a key date in all grades. Finer coins are scarce. NGC ID# 28GZ, PCGS# 8874

#### 1915 Indian Ten, MS65+ Low High-Grade Survival

3362 1915 MS65+ PCGS. CAC. The 1915 Indian eagle is a plentiful issue in lower Mint State grades, as more than 350,000 were minted, and few entered circulation. The average certified grade for this issue is about MS61. However, Gem and finer examples are rare, as the population data reveals. This Gem has extraordinary eye appeal that results from a high degree of frosty mint luster and brilliant light yellow-gold surfaces. Population: 79 in 65 (8 in 65+), 15 finer. CAC: 23 in 65, 11 finer (10/19). NGC ID# 28H5, PCGS# 8878

#### 1915-S Ten Dollar Indian, MS62 Low-Mintage S-Mint Issue

3363 1915-S MS62 PCGS. The 1915-S Indian eagle claims the second lowest San Francisco Mint production total of the series, at a meager 59,000 pieces. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that are minimally marked for the grade. Overall eye appeal is strong for this scarcer S-mint issue. NGC ID# 28H6, PCGS# 8879

#### LIBERTY DOUBLE EAGLES

# 1850 Twenty Dollar, AU58 Attractive First-Year Issue

3364 1850 AU58 PCGS. The 1850 maintains its popularity with collectors from its combination of first-year status and availability in higher grades. This is a high-end AU that retains much mint frost that is intermingled with semireflectiveness in the fields. The strike details are strong throughout and the surfaces display rich olive-gold color. Slightly abraded. NGC ID# 268F, PCGS# 8902

# 1850-O Twenty Dollar, XF45 In-Demand New Orleans Type One Issue

3365 1850-O XF45 PCGS. CAC. Variety 1. Scarcest of three known varieties for the year, this somewhat available O-Mint issue is in demand given the scarcity of all Type One New Orleans double eagles. This Choice XF example displays natural orange-gold coloration with olive-gold overtones. Only pinprick marks, while numerous, dot the surfaces and mint luster is still seen around the devices. This scarce die pair shows the 1 in the date centered between dentils, and the mintmark centered between the tailfeathers and N in TWENTY. CAC endorsed for eye appeal and surface quality. Population: 91 in 45, 79 finer. CAC: 22 in 45, 19 finer (10/19). NGC ID# 268G, PCGS# 8903

# 1850-O Double Eagle, AU58 Inaugural Branch Mint Twenty Condition Rarity

3366 1850-O AU58 NGC. Variety 1. The first-year double eagle production in New Orleans totaled 141,000 coins, of which virtually all circulated in local commerce. While several O-mint twenties are extremely rare, the 1850-O's reputation as an available issue continues to be overstated. Few examples exist above the About Uncirculated level, and fewer still with uncompromised, original surfaces.

This near-Mint example displays the deep greenish-gold color often sought but seldom found for an 1850-O. Mint luster lingers beneath the rich patina, while olive-gray accents occupy high points of the devices. As expected, frequent small bagmarks pepper the semireflective fields, but there are no overly distracting abrasions. The New Orleans strike is surprisingly sharp. Census: 19 in 58, 7 finer (10/19). NGC ID# 268G, PCGS# 8903

#### 1851-O Double Eagle, AU55 New Orleans Type Coin

3367 1851-O AU55 NGC. Variety 2. Mintmark placement on the reverse and a few small die lumps around ER in LIBERTY on the obverse aid in identifying this 1851-O double eagle variety. Early New Orleans issues such as the 1851-O are relatively available due to higher mintages brought about by large gold deposits from California. But in AU55, the 1851-O is conditionally elusive and in high demand. This piece is sharp and has some satin luster in the fields. Bright straw-gold surfaces are lightly abraded but still pleasing. NGC ID# 268J, PCGS# 8905

# 1852-O No Motto Twenty, AU58 High-Grade New Orleans Type Coin

3368 1852-O AU58 PCGS. Variety 1. This is the only known die pair employed in the production of 190,000 double eagles at the New Orleans Mint in 1852. That mintage represented nearly a 40% decline over the previous year's total, but the 1852-O remains one of the most collectible O-mint twenties and it is one of the few issues from that facility that can be found through AU58, although such coins are scarce.

Hair and feather detail stands out strongly on this borderline Uncirculated example. A few stars are slightly soft, and a touch of rub appears on the highest points, limiting the grade. Orange-gold surfaces display the usual number of scattered abrasions. Considerable field reflectivity brightens each side, adding to the overall eye appeal. Only twenty submissions have graded higher at PCGS (10/19). NGC ID# 268L, PCGS# 8907

#### 1853-O Twenty, AU Details Fully Struck

3369 1853-O — Cleaned — NGC Details. AU. Variety 1. Yes, the surfaces are overbright from cleaning, but a remarkable amount of definition is seen on the devices. There is most likely little or no actual wear from circulation on this piece, and when it was produced the full details that were engraved in the dies were transferred to the coin. There are no post-strike abrasions worthy of mention.

# 1853-O Double Eagle, AU50 From a Modest Branch Mint Production

3370 1853-O AU50 NGC. Variety 1. Only 71,000 Liberty double eagles were coined at the New Orleans Mint in 1853, a sharp decline in production due to the anticipated opening of the San Francisco Mint the following year. This attractive AU specimen displays only light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded, outside of a scrape on the reverse, above the denomination. NGC ID# 268N, PCGS# 8910

#### 1853-O Double Eagle, AU55 Seldom Found Finer

3371 1853-O AU55 NGC. Variety 1. Following substantial mintages from 1850 to 1852, the New Orleans double eagle production dropped markedly in 1853 and deposits of California gold diminished following the opening of the U.S. Assay Office. New Orleans deposit records, preserved in the Fort Worth branch of the National Archives, indicate that a large percentage of gold deposited at that facility was from California. The deposit records give the date, name of the depositor, type of gold, amount, and other details. The New Orleans Mint accepted 60 gold deposits on March 1, 1853, totaling 7,809 ounces of gold (before assaying). Of that total, 7,600 ounces were described as California gold, 122 ounces were Australia gold, and 87 ounces were mixed coins. All other deposits throughout the year reveal similar percentages. There is less than a 3% chance that this piece does not contain California gold. This Choice AU double eagle has faint green and orange overtones on its pleasing light yellow surfaces with ample luster and minimal signs of handling. Census: 41 in 55, 33 finer (10/19). NGC ID# 268N, PCGS# 8910

#### 1856-S Double Eagle, MS61 Brilliant and Lustrous

3372 1856-S MS61 PCGS. Variety 17G. Similar to the remarkable 1857-S shipwreck finds, the 1856-S was recovered in quantity from the S.S. Central America and other sunken vessels. Most Uncirculated examples trace back to one of the wrecks. More than 1,000 1856-S pieces were salvaged from the S.S. Central America alone, many of which grade in Mint State today. This sharp MS61 twenty is of unknown provenance, struck from dies featuring a Full Serif on U in UNITED and a high, right S mintmark. The crossbar of A in STATES is broken. Gleaming medium-gold surfaces show scattered tiny marks. Eye appeal is terrific for the grade. NGC ID# 2692, PCGS# 8919

# 1857 Double Eagle, MS61 Scarce Mint State Example

3373 1857 MS61 NGC. Scarce in Mint State with no substantial shipwreck recoveries to influence the population reports in a meaningful way, the 1857 Philadelphia issue becomes challenging at the MS61 level. This example displays bright and lustrous surfaces with numerous minor marks but no heavy abrasions. A short curlicue of deep toning flanks the eagle's beak. The strike is sharp overall, with isolated weakness at the hair bun and lower curls. Census: 20 in 61 (1 in 61+), 16 finer (10/19). NGC ID# 2693, PCGS# 8920

# 1857-O Liberty Head Twenty, AU55 Original Color, Scarce This Fine

3374 1857-O AU55 NGC. Variety 1. While the 1857-O is more available than some of the ultra-rare O-mint double eagles, it is scarce-to-rare in its own right, especially in Choice About Uncirculated and finer grades. Most the of the 30,000-piece mintage circulated, and the handful of shipwreck recoveries have had little effect on the certified population. Those collectors working on a full set of New Orleans double eagles will find the 1857-O challenging in grades finer than XF.

This is a lightly abraded AU55 coin, well-struck with pleasing orange-gold color. Marks are limited to normal bagmarks and surface chatter, but no heavy contacts exist. We note a single curved, shallow field abrasion between Liberty's portrait and stars 3 and 4. Mint luster remains at the margins around semireflective fields. A few delicate hairlines on each side do not disturb the natural eye appeal. Census: 29 in 55, 32 finer (10/19). NGC ID# 2694, PCGS# 8921

#### 1857-S Liberty Twenty, MS65 Vibrant Luster, Vivid Color

3375 1857-8 MS65 NGC. Although not stated on the holder, chances are this spectacular Gem 1857-S spent most of its life on the ocean floor. Frosted surfaces are finely grained and exceedingly lustrous, while the strike is needle-sharp. Significantly, the die pair is the Spiked Shield variety, commonly seen on surviving 1857-S twenties from the S.S. Central America. NGC ID# 2696, PCGS# 8927

1857-S Double Eagle and Pinch of Gold Ex: S.S. Central America, MS65+

3376 1857-S Spiked Shield, S.S. Central America With Pinch, MS65+ PCGS. CAC. The 1857-S double eagle affords collectors an opportunity to own a Gem or finer Type One double eagle without breaking the bank, thanks to the thousands of recoveries from the S.S. Central America shipwreck. Recently recovered pieces are certified alongside a pinch of gold — historically, the amount of gold dust needed to buy a drink in an 1857 California saloon.

This dual window PCGS holder houses a high-end Gem 1857-S twenty, plus a pinch of ocean-salvaged gold dust. The double eagle displays exceptionally attractive frosted and finely grained yellow-gold surfaces — sharply struck, with only a few tiny marks visible under a loupe. Flashy mint luster completes the outstanding eye appeal. The holder is signed by Bob Evans, Chief Scientist, and endorsed by CAC. PCGS# 670713 Base PCGS# 670830

# 1857-S Twenty With Pinch of Gold, MS66 Ex: S.S. Central America

3377 1857-S Spiked Shield, S.S. Central America With Pinch, MS66 PCGS. The wreck of the S.S. Central America precipitated financial chaos on Wall Street and throughout the banking world in 1857, such was the size of treasure lost in gold coin, bars, and gold dust from California. Even more tragic was the loss of 425 passengers and crew, including the ship's captain, Commander William Lewis Herndon, who chose to go down with the ship.

A second round of recoveries from the shipwreck received special packaging by PCGS — a dual-window holder, here with a Premium Gem 1857-S double eagle and a pinch of gold dust (also recovered from the S.S. Central America). Gold coins were remarkably well-preserved in deep, cold ocean depths, with some of the double eagles in their original, freshly minted condition. This MS66 example ranks among the 50 finest-found according to PCGS population statistics. Spectacular sun-gold surfaces show only a few tiny ticks, with a razor-sharp strike. Population: 36 in 66 (9 in 66+), 4 finer (10/19). PCGS# 670713 Base PCGS# 670830

# 1859 Liberty Double Eagle, AU55 Low-Mintage Type One Issue

absent from shipwreck finds and seemingly ignored by early collectors, the 1859 is not only a low-mintage issue (just 43,597 pieces struck), but it is one of the three scarcest Type One double eagles from the Philadelphia Mint (excluding the ultra-rare 1861 Paquet reverse). Most survivors exist in VF to XF condition, with occasional About Uncirculated examples seen at auction. This Choice AU specimen represents one of the top levels of availability, since fully Mint State coins are important rarities.

Wheat-gold surfaces show signs of limited circulation and moderate high-point wear. The date is notably repunched, with a disembodied segment above 1 and the upper curve of 8 narrowly recut. Light abrasions and marks pepper the surfaces, which at one time were partially reflective. The reverse is rotated about 15° clockwise. Soft mint luster accompanies a bold strike. Population: 18 in 55, 24 finer (10/19). NGC ID# 269A, PCGS# 8926

# 1859-S Liberty Twenty, MS61 Rare Type One Issue in High Grade

3379 1859-S MS61 NGC. The 1859-S Liberty double eagle claims an adequate mintage of 636,445 pieces and the issue is not difficult to locate in circulated grades. Despite the recovery of 67 examples from the S.S. *Republic*, the 1859-S is rare in all Mint State grades, however.

The present coin is an impressive Mint State example of this popular Type One issue, with sharply detailed design elements and unusually smooth orange-gold surfaces. A few minor surface marks near star 4 and an amber alloy spot in the same area can serve as pedigree markers. Satiny mint luster adds to the outstanding eye appeal. Census: 10 in 61, 7 finer (10/19). NGC ID# 269C, PCGS# 8928

#### 1860-S Double Eagle, MS60 Seldom Offered in Mint State

3380 1860-S MS60 PCGS. The S.S. Brother Jonathan and S.S. Republic shipwrecks yielded a few 1860-S double eagles, although most of the mintage simply circulated throughout the West Coast. Mint State examples are rarely encountered. This richly toned orange-gold example displays olive-gray accents on the high points, with soft mint luster peeking through the natural patina. Field chatter exists, yet marks are fewer than anticipated for the MS60 level and eye appeal excels. A bold strike attends both sides. Population: 12 in 60, 31 finer (10/19). NGC ID# 269F, PCGS# 8931

# 1861 Twenty Dollar, MS62 Sharp, Frosted, and Appealing

3381 1861 MS62 NGC. This is one of the finer 1861 double eagles brought up from the S.S. Republic, which yielded about 500 such pieces, primarily in grades of AU58 to MS62. Frosted yellowgold surfaces show only minor abrasions, while the strike is sharp and mint luster shines brightly from the finely textured surfaces. Although nearly 3 million pieces were struck and numerous shipwreck examples boost the population reports, the 1861 is always in demand for Mint State Type One representation. PCGS has certified only 61 finer examples including eight in MS62+ (10/19). NGC ID# 269G, PCGS# 8932

# 1861-O Double Eagle, AU53 Historically Important Issue

3382 1861-O AU53 NGC. Variety 1. The only recorded die variety for the 17,741 double eagles coined at New Orleans in 1861. Early in the year, the New Orleans Mint was operated under the Union, the State of Louisiana, and the Confederacy. Doug Winter suggests that the Union struck 5,000 pieces from January 1 to 26, the State of Louisiana struck 9,750 pieces from January 26 to March 31, and the Confederate government struck 2,991 coins from April 1 to April 30. Like most surviving 1861-O double eagles, this example has a weak date. Actually, it is the bottom part of the date that is weak. Some prooflike surface remains in the protected areas on this still partially lustrous green-gold double eagle. Census: 17 in 53, 30 finer (10/19). NGC ID# 269J, PCGS# 8934

# 1863 Liberty Double Eagle, XF45 Circulated Type One Issue

3383 1863 XF45 PCGS. Gold coins scarcely circulated at any time during the Civil War and immediately thereafter, yet at some point this 1863 double eagle acquired 15 points of wear in commerce. Pleasing orange-gold color reveals moderate rub on the high points, while tiny marks dot the surfaces. Minor rim bumps are seen near 3:30 and 9:30 on the reverse, although not visible on the obverse. Relatively few examples survive from the 142,790-piece mintage. NGC ID# 269P, PCGS# 8939

# 1865-S Double Eagle, MS64 From the S.S. Brother Jonathan Treasure

3384 1865-S MS64 NGC. The S.S. Brother Jonathan catastrophe occurred in a gale in late July 1865 off the coast of Northern California near Crescent City. Under difficult conditions, the ship safely arrived in the sheltered harbor of Crescent City on Saturday, July 29, 1865. The next day, the ship headed out to continue the journey but the weather would not permit a safe journey so Captain DeWolfe ordered the ship back to harbor. Coming down from an ocean crest, the ship crashed onto an uncharted rock and broke apart. More than a century passed until the treasure was recovered in the late 1990s. Most of the treasure came to the market in 1999. This Choice Mint State piece has the look of the recovered treasure with its distinctive orange-gold luster. A few scattered marks on each side prevent a higher grade for this piece. The recovery of the S.S. Brother Jonathan was one of three important treasure discoveries (along with the S.S. Central America and the S.S. Republic) that all happened within a few years, and changed the numismatic landscape for these large gold coins. NGC ID# 269V, PCGS# 8944

# 1866-S Liberty Double Eagle, AU58 First Issue With Motto

3385 1866-S Motto AU58 PCGS. CAC. The San Francisco Mint switched to the popular Motto design in 1866, after producing a small mintage of No Motto coins early in the year. This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. Population: 48 in 58 (3 in 58+), 33 finer. CAC: 19 in 58, 3 finer (10/19). NGC ID# 26B2, PCGS# 8950

#### 1867 Type Two Twenty, MS62 Semireflective Fields

3386 1867 MS62 PCGS. This 1867 is solid for the grade, but there is just a bit more for the collector looking for something out of the ordinary. The fields on each side are semireflective. When combined with the thick mint frost seen elsewhere the effect resembles a cameo. Rich, even reddish-gold luster is interrupted by the abrasions one would expect from a coin in this grade. NGC ID# 2697, PCGS# 8951

#### 1867 Twenty Dollar, MS62 Scarce in This Condition

3387 **1867 MS62 NGC.** In Mint State, the 1867 double eagle is elusive with good eye appeal. Most coins grade MS60 or MS61. In MS62, the date is genuinely scarce, and just a handful of pieces are known finer. This coin displays a bold strike and bright, satiny yellow-gold luster. Scattered light abrasions, which define the grade, are not overly distracting for the grade. Census: 40 in 62 (1 in 62+), 3 finer (10/19). NGC ID# 269Z, PCGS# 8951

#### 1867 Twenty Dollar, MS62+ Remarkably Clean Surfaces

3388 1867 MS62+ NGC. The 1867 is one of the more frequently seen Type Two issues in the double eagle series. Numerous examples have come from European sources over the years, but most are AU or lower-end Unc examples. This Plus-graded MS62 is poised at the tipping point of near-unavailability any finer. At NGC, only three pieces have been certified finer than MS62. The mint luster on this piece is thick and frosted and the surfaces are remarkably clean, clearly suggestive of an even higher grade. NGC ID# 269Z, PCGS# 8951

# 1867-S Double Eagle, MS61 Formidable Challenge Any Finer

3389 1867-S MS61 NGC. Despite its nearly million-piece mintage, the 1867-S exists almost exclusively in circulated condition. Uncirculated examples congregate at the lowest levels (MS60 to MS61), with a solitary MS63 coin at the top of the Condition Census. Overall, the 1867-S is considered the second-rarest Type Two twenty from the San Francisco Mint. Many pieces were melted, while others simply disappeared by attrition.

This example embodies originality. Dusky orange-gold surfaces display deep-gray bag grime on the high points, the "dirty gold" look preferred by purists who demand unsullied surfaces. Mint luster glows beneath the rich patina throughout both sides. Numerous tiny marks and abrasions dot the well-struck surfaces, yet few pieces can be considered any finer. Census: 18 in 61, 6 finer (10/19). NGC ID# 26A2, PCGS# 8952

#### 1870 Liberty Double Eagle, MS61 Scarce Type Two Twenty in Mint State

3390 1870 MS61 NGC. The 1870 Philadelphia Mint double eagle plays second fiddle to both the 1870-CC and 1870-S twenties, although it is rare in its own right. An ideal target for those needing a Type Two twenty, the 1870 had a small circulation strike mintage of 155,150 pieces, some of which have trickled back from European holdings (but not many). Even advanced collections often lack a Mint State example. This minimally marked, thickly frosted coin displays attractive orange-gold color with faint reddish-gold accents. Slight weakness at the hair bun does not diminish the appeal. Census: 18 in 61, 18 finer (10/19). NGC ID# 26A7, PCGS# 8957

# 1871 Double Eagle, MS61 Conditionally Rare

3391 1871 MS61 NGC. With a mintage of just 80,120 coins, the 1871 is an important component of a Liberty double eagle collection. While considered scarce in circulated grades, the 1871 is a rarity in Mint State grades. Just 18 of the 293 NGC certified 1871 twenties grades MS60 or finer. This lovely example has brilliant and frosty yellow gold luster with outstanding eye appeal for the grade. While some scattered marks are evident on each side as expected for the grade, there are none of any consequence. A lovely piece and an important opportunity for the advanced collector. Census: 8 in 61 (1 in 61★), 4 finer (10/19). NGC ID# 26AA, PCGS# 8960

# 1871-CC Twenty Dollar, Choice XF Rare Second-Year Issue

3392 1871-CC XF45 NGC. Variety 1-A. The second-year Carson City twenty is not the legendary rarity of its 1870-CC predecessor, but is much rarer than most Liberty double eagle issues, and even most CC-mint issues from the facility. From the production of 17,387 pieces, fewer than 2% have survived. Problem-free examples are desirable in all grades. This straw-gold representative shows moderate wear on Liberty's curls and the eagle's wingtips, but there are no distracting abrasions, and glimmers of luster remain. Despite the meager mintage, two die marriages are known, distinguished by slight differences in the date position. Variety 1-A is about twice as available as Variety 2-A. NGC ID# 26AB, PCGS# 8961

# 1873-S Double Eagle, MS62+ Closed 3, Few Known Finer

3393 1873-S Closed 3 MS62+ PCGS. CAC. Struck prior to receipt of new Open 3 dies, 1873 Closed 3 double eagles circulated heavily in the West and few pieces were preserved in collector hands. Although the Open 3 twenties are rarer, Mint State Closed 3 examples are scarce-to-rare, and seldom exceed the MS62 grade. This frosted, orange-gold example is Plus-graded with CAC endorsement. Mint luster glows throughout the sharply struck surfaces, and only light bagmarks are seen with a loupe. Well under a dozen pieces exist in finer grades at both services combined. Population: 8 in 62+, 3 finer. CAC: 16 in 62, 0 finer (10/19). NGC ID# 26AL, PCGS# 8969

# 1874-CC Double Eagle, AU58 Scarce Variety 5-A

3394 1874-CC AU58 NGC. Variety 5-A. There are six die pairs identified for the 1874-CC double eagles from five obverse dies and two reverse dies. Varieties 1-A, 2-A, 3-A, and 4-A are common varieties that each represent 20 to 30% of the total population for the date. Just 3% of the 1874-CC population is from die pair 3-B, and only 5% is from die pair 5-A as offered here. This example shows a trace of wear yet retains nearly full luster on its pleasing orange-gold surfaces. A few scattered marks are expected for the grade. NGC has only certified 18 finer examples of the 1874-CC twenty (10/19). NGC ID# 26AP, PCGS# 8971

# 1875-CC Twenty Dollar, Lustrous MS62 Impressively Smooth, Vibrant Fields

3395 1875-CC MS62 PCGS. Variety 2-B. The mintage was moderate — just 111,151 pieces produced — yet many 1875-CC twenties found a home in overseas holdings, and have since returned to increase the ranks of Mint State examples certified. The vast majority of Mint State coins exist at the MS62 grade or lower. This is an especially attractive and minimally abraded MS62, with lustrous orange-gold surfaces and sharply struck motifs. It offers an easily discernible lack of bagmarks that pepper most Carson City double eagles. Nor does it show any of the bank-to-bank handling and recounting marks typical of repatriated pieces. We note a few light grazes on Liberty's frosted portrait, and some minor areas of struck-in mint grease around star 13. PCGS has certified just nine Plus-graded coins at the MS62 level, and 32 finer examples (10/19). NGC ID# 26AT, PCGS# 8974

# 1876-CC Liberty Twenty, AU58 Popular Carson City Type Coin

3396 1876-CC AU58 PCGS. CAC. Variety 5-B. The 1876-CC Liberty double eagle claims a relatively large mintage of 138,441 pieces, making it an available issue and a popular choice with branch mint type collectors. This impressive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster. NGC ID# 26AW, PCGS# 8977

# 1877-CC Twenty, AU55 Remarkably Clean Surfaces

3397 1877-CC AU55 NGC. Variety 2-C. First year of the new type, the mintage of 42,625 pieces suggests the 1877-CC should be more available than it actually is. Recent repatriations from European holdings have increased the availability somewhat, but this is still an issue that is seldom located finer than AU. This is a remarkably attractive piece that displays even, light reddish patina and semireflective fields. The strike is strong throughout and we do not see any mentionable abrasions. Nice piece for an AU type set. NGC ID# 26AZ, PCGS# 8983

# 1877-CC Liberty Double Eagle, AU58 First Type Three Issue

3398 1877-CC AU58 NGC. Variety 1-A. The design of the double eagle was modified to the Type Three motif in 1877, with the denomination spelled out as TWENTY DOLLARS. This was the only major design change that occurred during the Carson City Mint's years of operation. Mintage of double eagles declined somewhat at the Carson City facility in 1877, to 42,565 pieces, and few examples were saved for numismatic purposes. Today, the 1877-CC is scarce in the higher ranges of AU, and Mint State specimens are rare.

This attractive near-Mint specimen exhibits just a trace of high-point wear on the sharply detailed design elements. The vivid orange-gold surfaces retain much of their original mint luster and show only a few scrapes and roller marks on the obverse. The overall eye appeal is outstanding for the grade. NGC has graded 24 numerically finer examples (10/19). NGC ID# 26AZ, PCGS# 8983

#### 1879-S Double Eagle, MS62 Lustrous, Colorful Example None Finer at NGC

3399 1879-S MS62 NGC. European holdings have increased the Mint State populations at the low end of the grading scale, although the 1879-S remains extremely rare in MS63 or finer grades. This scarce MS62 example offers substantial original eye appeal, with attractive orange-gold color that intermixes with peach-gold centers. Mint luster remains strong throughout both sides, while the strike is consistently sharp on both sides. Myriad small marks and abrasions determine the assigned grade. Census: 54 in 62, 0 finer (10/19). NGC ID# 26B9, PCGS# 8991

#### 1879-S Double Eagle, MS62 None Are Finer at NGC

3400 1879-S MS62 NGC. This is among the finest 1879-S double eagles at NGC (10/19). Although more than 1.2 million Liberty Head twenties were struck at San Francisco in 1879, many circulated or were exported for trade. Mint State coins known today are almost all heavily bagmarked. This piece shows gradeconsistent abrasions, but its eye appeal is actually high-end for the issue. Detail is sharp, and the natural wheat-gold and greenish hues reflect satiny cartwheel luster. Census: 54 in 62, 0 finer (10/19). NGC ID# 26B9, PCGS# 8991

# 1879-S Twenty Dollar, MS62 High-End for the Issue

3401 1879-S MS62 PCGS. Mint State 1879-S double eagles survive primarily in the MS60 to MS61. MS62 coins are scarce and represent the finest pieces that most collectors see. None are finer than this at NGC, and PCGS has seen only 10 higher-grade examples (10/19). We have not handled a higher-grade example in a decade. This piece is satiny and well-struck. Rich peach-orange surfaces yield scattered light abrasions, consistent with the grade. NGC ID# 26B9, PCGS# 8991

# 1879-S Double Eagle, MS62 Frosty Luster, Rarely Offered Finer

3402 1879-S MS62 PCGS. The luster on this piece is slightly frostier than that seen on many other 1879-S double eagles in this grade, and grade-limiting abrasions are scattered, posing little distraction. Well-struck design elements complement the natural yellow-gold color. The 1879-S double eagle is scarce in this grade, and only 10 finer coins are certified, all at PCGS (10/19). NGC ID# 26B9, PCGS# 8991

# 1882-CC Double Eagle, AU58 Minimally Marked

3403 1882-CC AU58 PCGS. Variety 1-B. No double eagles were struck at Carson City in 1880 or 1881, but the 1882-CC twenty boasts a moderate mintage of 39,140 pieces. This is a peach-gold and sea-green example with substantial glowing luster. There are fewer marks than anticipated for a briefly circulated Old West double eagle, though a few specks of struck-in grease (as made) are noted near Liberty's nose and the 1 in the date. NGC ID# 26BF, PCGS# 8997

# 1883-CC Double Eagle, MS61 Elusive in Uncirculated Grades

3404 1883-CC MS61 PCGS. Variety 1-B, showing the mintmark centered between the Y and D in TWENTY DOLLARS. There are suggestions of reflectivity in the fields, although softly frosted luster is dominant. The devices are well-struck. Both sides have natural greenish-gold coloration and grade-appropriate abrasions. The 1883-CC double eagle is somewhat scarce in Mint State, and coins grading finer than the present are rare. Population: 80 in 61, 32 finer (10/19). NGC ID# 26BH, PCGS# 8999

# 1884-CC Double Eagle, MS61 Mint State Carson City Type Coin

3405 1884-CC MS61 PCGS. Variety 1-A. The familiar X-shaped die scratches on Liberty's neck near the lower hair curls identify the only known die pair for the 1884-CC double eagle, despite a mintage in excess of 81,000 coins. This piece is well-detailed and shows original yellow-gold and greenish hues. Scattered abrasions limit the grade, although they are not as severe as they are on many other Carson City double eagles in this grade. NGC ID# 26BK, PCGS# 9001

### 1884-CC Double Eagle, MS62 Few Finer Pieces Are Known

3406 1884-CC MS62 NGC. The availability of the 1884-CC makes it popular among type collectors, as few Carson City double eagles are available in Mint State. Carson City coinage amounted to 81,139 twenties, complementing a production of 916,000 double eagles on the West Coast. Only 71 proofs were struck at Philadelphia in 1884, but no circulation strikes. The Carson City issue circulated some domestically, but was also used in the foreign trade. Many of the surviving coins on the market are repatriated from overseas vaults.

This MS62 coin is high-end for the date, finer than the typical Uncirculated coin. Sharp devices complement frosty yellow-gold luster, which is lightly abraded but does not have any singular imperfections. Some tiny coppery discolorations are visible near star 5 on the obverse and the LIBE in LIBERTY. Eye appeal is pleasing. Census: 47 in 62, 6 finer (10/19). NGC ID# 26BK, PCGS# 9001

# 1884-CC Twenty Dollar, MS62 Only Seven Coins Finer at PCGS

3407 1884-CC MS62 PCGS. Variety 1-A. The appeal of the Carson City Mint and its coinage is almost inherently understood by collectors. The Nevada facility was relatively short-lived, produced many low-mintage issues, and was deeply connected with the gold and silver mining operations that were so fundamental to Western expansion. In 1884, the CC-mint produced 81,139 double eagles. They were intended for local circulation and export. The few Mint State survivors that exist are purely the result of chance. Most derive from overseas sources, where the coins sat in vaults rather than being sent to the melting pot for recoining.

This frosty orange-gold twenty displays a crisp impression. Each side has a number of bagmarks and other grazes and abrasions, but none are overly distracting. There are only seven finer grading events at PCGS (10/19). NGC ID# 26BK, PCGS# 9001

#### 1889-CC Twenty Dollar, MS60 Popular Carson City Gold Relic

3408 1889-CC MS60 NGC. Variety 1-A. Resumption of coinage operations at the Carson City Mint did not commence until late in the year, when a moderate mintage of double eagles was followed by a small production of silver dollars. Demand is high for both issues, although the silver dollars are significantly rarer than the double eagles in that regard. This is a semireflective double eagle — one of 30,845 pieces struck — that shows a minimum of bagmarks across the sharply struck, orange-gold surfaces. A scattering of delicate hairlines influences the grade. Census: 23 in 60 (1 in 60+), 43 finer (10/19). NGC ID# 26BV, PCGS# 9011

# 1889-S Double Eagle, MS64+ Exceptionally Well-Preserved

3409 1889-S MS64+ NGC. Hundreds of 1889-S double eagles were added to the survivorship in recent years with the discovery of the Saddle Ridge Hoard. While some of these coins graded as fine as MS64, near-Gem coins are still scarce compared to lower-grade examples, and higher-grade coins are decidedly rare. This Plus-graded example is sharp and luminous with smooth, frosty peach-orange luster. Only the faintest of grazes on Liberty's cheek prevent Gem classification at NGC. Census: 47 in 64 (9 in 64+, 1 in 64+, \$\pi\$), 9 finer (10/19). NGC ID# 26BW, PCGS# 9012

# 1889-S Liberty Twenty, MS64+ Conditionally Rare Any Finer

3410 1889-S MS64+ PCGS. The 1889-S Liberty double eagle is a scarce issue in MS64 condition and finer coins are rare. This Plusgraded Choice example displays razor-sharp definition on all design elements and the lustrous orange-gold surfaces are remarkably well-preserved. Overall eye appeal is terrific. Population: 91 in 64 (19 in 64+), 5 finer (10/19). NGC ID# 26BW, PCGS# 9012

#### 1890 Double Eagle, MS63 Scarce So Fine

3411 1890 MS63 PCGS. Mint State examples of the 1890 double eagle are scarce finer than MS62, and rarely is a Choice or finer example seen. This Select representative offers sharp design elements and frosty yellow-gold mint luster. Light surface chatter on Liberty's cheek and in the field limits the grade, but the patina is original. Population: 57 in 63 (1 in 63+), 7 finer (10/19). NGC ID# 26BX, PCGS# 9013

#### 1890-CC Liberty Double Eagle, AU58+ Lustrous and Colorful

3412 1890-CC AU58+ PCGS. CAC. Variety 2-B. A Plus-graded near-Mint representative of this popular branch mint type issue, with only the slightest wear on the high points of the design elements and a touch of softness on some star centers. The lightly abraded orange-gold surfaces retain much of their original mint luster and the overall presentation is most attractive. NGC ID# 26BY, PCGS# 9014

# 1891 Twenty Dollar Liberty, AU55 Formidable Late-Series P-Mint Rarity

3413 1891 AU55 PCGS. With an anomalous mintage of just 1,390 pieces, the 1891 is an unusual and unexpected gold rarity from the 1890s. Both PCGS CoinFacts and the Garrett and Guth reference estimate that about 100 pieces survive in all grades. Upon mintage, most of the coins struck circulated to one extent or another. As a result, the 1891 is a formidable rarity of the Liberty double eagle series, which is replete with other many other great rarities.

This is a Choice About Uncirculated example with intensely deep, orange-gold color. Not surprisingly, the surfaces are partially prooflike — and would be fully prooflike if not for the normal chatter and friction from its time in circulation. Much of the original gold flash remains, undiminished at the margins and throughout protected areas of the sharply struck motifs. Population: 10 in 55, 18 finer (10/19). NGC ID# 26C2, PCGS# 9016

#### 1892 Twenty Dollar, AU50 Partial Luster, Original Patina

3414 1892 AU50 NGC. With a mintage of only 4,430 pieces, the 1892 Liberty double eagle is an enticing issue for the collector of better-date gold pieces. It is the last of the ultra-low-mintage dates from the Philadelphia Mint. The 1892 is scarce in AU grades and rare at the Mint State level. The present coin displays original bronze-gold and copper-orange patina with hints of luster remaining the protected peripheral fields. Well-defined with only light wear. NGC ID# 26C5, PCGS# 9019

# 1892-CC Twenty Dollar, AU58 Scarcer Carson City Issue

3415 1892-CC AU58 NGC. Variety 1-A. Although less rare than the 1891-CC, the 1892-CC is more challenging to locate than the 1890-CC, or the Carson City issues from the mid 1870s. The 1892-CC mintage of 27,265 pieces is less than 3% of its San Francisco counterpart. The present lightly marked Borderline Uncirculated representative is principally caramel-gold, though glimpses of reddish patina are noted on the dentils near AMERICA and obverse star 12. An interesting strike-through is seen on the field near Liberty's nose. NGC ID# 26C6, PCGS# 9020

# 1893-S Double Eagle, MS64 Prohibitively Rare Any Finer

3416 1893-S MS64 PCGS. Frosty peach-orange mint luster forms cartwheel bands around each side of this near-Gem 1893-S double eagle. It is a well-struck coin, and neither side exhibits significant abrasions. The 1893-S Liberty Head double eagle is scarce in MS64, and Gems are prohibitively rare. This is among the finest pieces generally available. Population: 65 in 64 (2 in 64+), 2 finer (10/19). NGC ID# 26CA, PCGS# 9024

# 1900 Twenty Dollar, MS63 Prooflike Highly Collectible Subset

3417 1900 MS63 Prooflike PCGS. CAC. With the new policy by PCGS of certifying gold and silver coins as Prooflike — beyond the usually seen series such as Morgan dollars — new avenues of collecting have opened. One series with good potential is Liberty double eagles. This is a uniformly bright, non-contrasted yet deeply mirrored example. Numerous, small abrasions are scattered across each side, as one would expect from the grade, but none deserve singular mention. This is the only Prooflike certified so far in MS63 and none are finer, but it is still early for PL designation. Surely with a mintage of 1.8 million pieces others will be certified ... or will they? PCGS# 802476 Base PCGS# 9037

# 1902-S Double Eagle, MS64 Important Condition Rarity

3418 1902-S MS64 PCGS. The 1902-S double eagle is the issue normally encountered with the 1902 date as the Philadelphia production was limited to just over 30,000 coins. In San Francisco, the coinage continued until more than 1.7 million double eagles were produced. Most of those coins were exported, and repatriated examples are typically AU to MS63. The present Choice Mint State piece has fully brilliant and lustrous yellow-gold surfaces with traces of orange. Population: 85 in 64 (8 in 64+), 6 finer (10/19). NGC ID# 26CV, PCGS# 9042

### 1902-S Double Eagle, MS64 Only Six Finer at PCGS

3419 1902-S MS64 PCGS. For the Liberty double eagle Registry collector, the MS64 grade is ideal for the 1902-S. Lower grade MS63 pieces are extremely common while higher grade MS65 pieces are nearly impossible to obtains. PCGS has certified just six finer, and NGC has graded just three finer (10/19). This piece has a bold strike and frosty honey-gold luster with minimal, grade-consistent marks. Population: 85 in 64 (8 in 64+), 6 finer (10/19). NGC ID# 26CV, PCGS# 9042

#### HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty Dollar, AU55 Notable Wire Rim Around the Obverse

3420 1907 High Relief, Wire Rim AU55 NGC. The wire rim is pronounced around most of the obverse, and also over much of the reverse. The surfaces are bright, yellow-gold over each side of this Choice AU example, which give off a greenish-gold cast. As expected, the design elements are intricately detailed, even with a slight bit of friction evident. A few small contact marks are consistent with the grade. Because of the design and the high relief it was struck in, these pieces were extensively saved by collectors at the time. As a result, many are known in relatively high grades, but more affordable pieces in AU, such as this one, are elusive. NGC ID# 26F2, PCGS# 9135

### 1907 Twenty Dollar High Relief, AU58 Wire Rim

3421 1907 High Relief, Wire Rim AU58 PCGS. "Of excessive concavity" is how the April 1914 issue of The Numismatist described a 1907 Saint-Gaudens High Relief double eagle in the collection of the American Numismatic Society. The ANS did not have an example of the MCMVII Ultra High Relief twenty until 1945, when it received one on loan from the Arthur J. Fecht. The author of the 1914 Numismatist listing must have been referring to one of the two MCMVII High Relief double eagles in the ANS collection since 1907, donated by J. Sanford Saltus. Although not as dramatic as its Ultra High Relief counterpart, these 1907 High Relief twenties remain distinguished by their "excessive concavity," which enhances the dramatic depth between the fields and raised devices, the combination producing the magnificence of Augustus Saint-Gaudens' design as he envisioned it. This High Relief shows just the slightest hint of friction over the high points, yet the concavity of the fields is still abundantly clear. The piece is bright overall and well-struck with no distracting contact marks. NGC ID# 26F2, PCGS# 9135

#### 1907 High Relief Twenty, Unc Details Wire Rim Variant

3422 1907 High Relief, Wire Rim — Cleaned — NGC Details. Unc. It is no small thing to have a life-long skill that will pay the bills when other sources of income dry up. Augustus Saint-Gaudens had such a skill as a cameo-cutter. He was apprenticed to Louis Avet at the age of 13, and his skills increased to a master's level over the next decade. He was able to help support himself and his family in New York City, later he supplemented what little money his family sent him while he was in school at the École des Beaux Arts in Paris, and finally when he set up as a sculptor in Rome after the Franco-Prussian War. This early and continuing craft as a cameo-cutter helped develop his later skills as a sculptor, and much later (1905-1907) this experience working in a small space gave him the background to adapt his masterworks, the bust of Nike and the figure of Victory from the Sherman Memorial, to the ten and twenty dollar gold coins. The high relief he used to "sculpt" the double eagle gives this coin a singular and unexcelled appearance, as well as a popularity with collectors that has only increased in the more than a century since the coins' creation. This is a sharply impressed example of Saint-Gaudens' paramount work in U.S. coinage. All the sculptural quality remains, but the surfaces are overbright from cleaning. Each side is refreshingly free from abrasions.

#### 1907 High Relief Twenty Dollar, Unc Details Wire Rim

3423 1907 High Relief, Wire Rim — Cleaned — NGC Details. Unc. The March 1913 issue of The Numismatist published an article about the then-new Buffalo nickel by James Earle Fraser, and it documents the evolution of the depiction of Liberty on American coinage. The author cites a quote by August Saint-Gaudens, who "once stated that his conception of a symbol of Liberty was that of 'a leaping boy." However, the leaping or striding figure of Liberty that appears on his twenty dollar gold piece, was actually modeled after the Nike of Samothrace, a motif he had previously adapted for his Sherman Memorial in New York City's Central Park. Saint-Gaudens' Liberty is represented as the winged Greek goddess of victory (Nike). An instant success with critics and collectors alike, the now-iconic MCMVII High Relief twenty dollar design captured the essence of Liberty as never seen before on American coinage. This bright sharply detailed example shows one identifying mark, a planchet void actually, seen below and to the left of the end of the branch on the obverse.

# 1907 High Relief Twenty Dollar, MS63 Upper-End Example of the Wire Rim Variant

3424 1907 High Relief, Wire Rim MS63 PCGS. CAC. It has been well-documented that Augustus Saint-Gaudens' design for the obverse of the twenty dollar gold piece was inspired by his figure of Victory, which accompanies the Sherman Monument at the southeast corner of New York's Central Park. Writing in the November 1998 issue of The Numismatist, Jason Kuhl explains: "For Saint-Gaudens, this sculptural group — and the coin that followed — represented the culmination of a life-long quest to simultaneously depict the real and the ideal." In the case of the twenty dollar, Saint-Gaudens' vision of Liberty features the sculptor's hallmark: remarkably lifelike drapery and attention to detail. But it also captures the essence of the nation's strength, its potential, and the place it would come to occupy on the world stage during the 20th century. This forward-looking depiction of American Liberty is well-depicted on this MS63 example of the short-lived High Relief design. The surfaces display bright satin mint luster and there are only slight, shallow contact marks on each side that limit the grade. Fully struck, of course, with almost a complete wire rim or "fin" around each side. NGC ID# 26F2, PCGS# 9135

# 1907 High Relief Twenty, MS64 Wire Rim Variant Three-Dimensionality in Coin Form

3425 1907 High Relief, Wire Rim MS64 NGC. When Augustus Saint-Gaudens is recalled today it is primarily as the master of late-19th century American sculpture. What is little considered are the influences upon him. In his *Reminiscences* (1913), he reflects on a specific work by his friend and fellow-sculptor Paul Dubois:

"... his 'Joan of Arc' is, to my thinking, one of the greatest statues in the world. I know of but one or two that I would rank higher. For elevation, distinction, and nervousness of style it is extraordinary."

While Saint-Gaudens did not infuse the High Relief twenty with a "nervousness of style" he does point to a commonality both sculptors shared: the translation of realism and feeling into their sculptural works. This is a lovely three-dimensional coin that exhibits subdued satiny mint luster and light, even reddish patina over each side. There are no marks apparent at arm's length. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS68 Wire Rim Example, One of the Finest Pieces Known

3426 1907 High Relief, Wire Rim MS68 NGC. In the June 1927 issue of *The Mentor*, Augustus Saint-Gaudens' son, Homer, wrote what can be considered not only the theme sentence for the magazine article but also the mission statement for the life of the great sculptor:

"To Augustus Saint-Gaudens an artist was an interpreter of beauty in the world. A work of art was the artist's vision of his subject, colored by the light of his imagination, and expressed in symbols which conveyed to his public what he had seen, in terms that would make others see and believe and revel in the vision in a like manner."

Saint-Gaudens was not a child prodigy or a "born artist." Being an artist and sculptor was rather a life-long goal, something he constantly trained for and worked toward. His childhood sketches were unremarkable, and it was not until he was 13 years old and apprenticed to the cameo cutter Avet that he began to show promise as an artist. When he was 19 years old he persuaded his father to book passage for him on a ship bound for France with the ultimate goal of the furtherance of his artistic education at the prestigious École des Beaux Arts. His enrollment in the academy was not a given, and he spent a year cutting more cameos in Paris while waiting to be admitted to the art school as a student of François Jouffrey. Once admitted, Saint-Gaudens' talents consistently increased - always a result of constant study and long hours of work — until he left Paris as Prussian troops advanced on the city, arriving in Rome in 1871. Once in Rome, Saint-Gaudens returned to cameo cutting until he received his first monumental commission, "Hiawatha." After completion of "Hiawatha" he returned to America. Commissions were slow at first, but he began to make friends with influential artists such as John La Farge, Stanford White, and J.Q.A. Ward. Commissions began to come his way until he was years behind on their delivery. But learning was a life-long pursuit, and his son said Saint-Gaudens continued learning and re-connecting with the artistic community in Paris until 1899. Then his health began to decline and it was a struggle to keep up with his promises and commissions.

One of the promises he made was in early 1905 to President Theodore Roosevelt. The president believed American coins in circulation at that time to be of "atrocious hideousness." He and the sculptor both agreed the highest artistic achievement in coinage was accomplished in Hellenistic Greece with many of those coins struck in high relief. Roosevelt persuaded Saint-Gaudens that he could redesign American coinage, and he promised the sculptor no interference from Mint personnel (a problem he had experienced in the past). These ambitions were gradually scaled back to the ten and twenty dollar gold pieces, and both denominations were finally struck in 1907. Saint-Gaudens remained a believer in the concept of high relief on circulating coins, but because of his increasingly debilitating stomach cancer, his assistant, Henry Hering, was left to deal with Chief Engraver Charles Barber and resolve the inherent conflict between the artistic goal of high relief and the commercial needs of circulating coinage. Almost a month after Saint-Gaudens died, President Roosevelt directly intervened with Mint personnel and demanded his "pet crime" (the striking of the new ten and twenty dollar gold pieces) begin. For four months High Relief double eagles were produced, and at the end of the year only 12,367 examples had been struck. Still, it was enough to satisfy the president. An instant secondary market arose for the coins. Anyone with connections to a bank sought out at least one piece for their collection. The enduring collectibility of the High Relief double eagles is a testament to another statement made by his son, Homer, similar to the opening quote: "He believed his task in art was to arouse in others emotional enthusiasm and enjoyment through what he presented to their eyes." This particular High Relief certainly embodies the "emotional enthusiasm and enjoyment" the sculptor spent his life pursuing. The surfaces display uncommonly thick mint luster and each side is almost devoid of post-striking contact, certainly none is evident to the unaided eye. Rich reddish tinted patina covers the mint luster throughout. Exceptional quality combines with generations of curatorial preservation to make this one of the finest High Relief twenties known.

From The Burgess Lee Berlin, M.D., J.D. Collection, Part II. NGC ID# 26F2, PCGS# 9135

#### 1907 High Relief Saint-Gaudens Twenty Flat Rim, Unc Details

3427 1907 High Relief, Flat Rim — Cleaned — NGC Details. Unc. The scarcer Flat Rim variant of Augustus Saint-Gaudens' High Relief double eagle. This piece has been lightly cleaned in the past, but the brass-gold surfaces remain satiny and lustrous. The High Relief Saint was immediately sought-after both as a collectible and as a work of art. Many examples were preserved, making this artistically exceptional gold issue accessible for collectors today.

# 1916-S Twenty Dollar, MS66+ Thick Mint Luster and Attractive Patina

3430 1916-S MS66+ NGC. The 1916-S twenty has an estimated 9,000 pieces that survived the great meltings of the mid-1930s, but to us it has always seemed like a scarcer issue than other twenties from the teens. It is virtually non-existent any finer than MS66, with only three higher-graded examples (all by NGC). The mint luster on this piece is typical of the better examples seen with thick mint frost and rich reddish-gold patina. A highly attractive example that definitely deserves its Plus status. NGC ID# 34NJ, PCGS# 9169

#### SAINT-GAUDENS DOUBLE EAGLES

# 1909-D Twenty Dollar, MS64 Important Low-Mintage Denver Issue

3428 1909-D MS64 PCGS. Coming from a production of only 52,500 coins, the 1909-D is one of the three lowest-mintage With Motto Saint-Gaudens double eagles in the series — only the 1908-S and 1913-S have lower mintage figures. The 1909-D is predictably elusive in Mint State compared to most other dates, and it is rare at the Gem level. This near-Gem has well-struck devices and softly frosted yellow-gold luster. No singular abrasions are worthy of mention.

From The Lithuania Collection, Part II. NGC ID# 26FD, PCGS# 9152

# 1922-S Double Eagle, MS64+ Rarely Seen in Finer Grades

3431 1922-S MS64+ PCGS. This San Francisco issue is famously rare in Gem condition, and MS64 coins are only marginally available. This Plus-graded MS64 coin stands apart from its peers, offering collectors a higher-quality coin without the tremendous cost associated with the Gem grade level. This piece displays bold relief elements and satiny orange-gold and peach coloration. A few tiny, scattered contact marks are not bothersome. PCGS lists 23 finer representatives (10/19). NGC ID# 26G4, PCGS# 9174

#### 1911-D Saint-Gaudens Twenty, MS66+ Elusive Issue in Finer Grades

3429 1911-D MS66+ PCGS. CAC. From a substantial mintage of 846,500 pieces, the 1911-D Saint-Gaudens double eagle can be located in MS66 condition with a little patience, but the issue is rare in higher grades. This Plus-graded Premium Gem exhibits sharply detailed design elements throughout and the virtually flawless orange-gold surfaces radiate vibrant mint luster from both sides. PCGS has graded 11 numerically finer examples (10/19). NGC ID# 26FK, PCGS# 9158

# 1924-D Double Eagle, MS63 A High Mintage Rarity

3432 1924-D MS63 PCGS. More than 10 million double eagles were coined at the three mints in 1924, including just over 3 million in Denver. While the Philadelphia issue is one of the most plentiful dates, those of Denver and San Francisco are series keys. Those branch mint issues apparently remained in the United States at a time when large quantities of gold were exported to Europe and South America. The majority of the Denver and San Francisco coins were melted in the 1930s, creating today's rarities. This Select Mint State piece has frosty light yellow gold luster and excellent surfaces that are free of the unsightly marks that often plague this issue. NGC ID# 34VF, PCGS# 9178

# 1924-D Twenty Dollar, MS64 Heavily Melted Denver Issue Few Pieces Known in Finer Grades

3433 1924-D MS64 NGC. Unlike the Philadelphia issue of this year, the 1924-D Saint-Gaudens double eagle presents a challenge for collectors in MS64, and it is genuinely rare in finer condition. Although more than 3 million pieces were struck, significant quantities were later melted. Offered here is a lustrous, frosty near-Gem with boldly rendered design elements and rich peach-gold, orange, and lilac-rose coloration. A couple of small marks on Liberty's legs are all that deny an even finer grade. NGC ID# 34VF, PCGS# 9178

#### 1924-S Twenty Dollar, MS63 Better San Francisco Issue

3434 1924-S MS63 PCGS. This San Francisco issue is seen far less often than its mintage of nearly 3 million coins would suggest. The present example is well-struck, and eye appeal is further heightened by frosty apricot-gold luster that cartwheels freely when rotated beneath a light. A few scattered abrasions are not obtrusive. Ex: Long Beach Signature (Heritage, 9/2015), lot 4264. From The Lithuania Collection, Part II. NGC ID# 26G9, PCGS# 9179

# 1925-S Twenty Dollar, MS62 Scarce, Heavily Melted Issue

3435 1925-S MS62 PCGS. The San Francisco mint manufactured doubles eagles from January through July 1925. A total of 3.7 million pieces were struck, of which Roger Burdette estimates 1,500 examples survive, mostly in circulated grades through MS62. Finer examples are very scarce. This piece has good peripheral detail with central softness. The opposite is usually true. Radiant luster sweeps across lightly abraded yellow-gold surfaces. NGC ID# 26GC, PCGS# 9182

# 1926-D Saint-Gaudens Twenty, MS61 Heavily Melted Denver Issue

3436 1926-D MS61 NGC. The Denver Mint struck 481,000 double eagles in 1926, most of which were later melted in the 1930s. For years, this issue was rare in any grade, and only since small groups of the coin were discovered in repatriated foreign trade holdings has it become collectible to a wider array of gold specialists. This piece, graded MS61, is more accessible than the rare higher-grade coins, and it is appealing for the grade. A shallow graze in the field beneath the olive branch on the obverse is noted, but other abrasions are minor or otherwise less obtrusive. Satiny luster yields warm orange-gold hues, and each side has well-struck design elements. Census: 14 in 61, 71 finer (10/19). NGC ID# 26GE, PCGS# 9184

#### 1926-S Twenty Dollar, MS64 Frosted Mint Luster

3437 1926-S MS64 PCGS. Only three mintmarked twenties from the 1920s are occasionally available, the 1926-S, 1922-S, and 1923-D. It is estimated that 2,000 pieces are extant today of the 1926-S, and probably no more than 50 coins have been certified finer than MS64. This attractive example displays even, frosted mint luster and light reddish-gold color. There are few abrasions for the grade. NGC ID# 26GF, PCGS# 9185

#### 1926-S Double Eagle, MS64 Seldom Offered in Higher Grades

3438 1926-S MS64 PCGS. Satiny mint luster complements well-struck design elements on this near-Gem 1926-S double eagle, while a few light, scattered contact marks deny a finer grade. Orange-gold coloration is original, and eye appeal is pleasing. This San Francisco issue is occasionally seen in MS64, but finer coins are rare and out of reach for the average collector. PCGS lists 44 finer submissions (10/19).

From The Lithuania Collection, Part II. NGC ID# 26GF, PCGS# 9185

#### COMMEMORATIVE SILVER

1921 Alabama Half Dollar, MS67 2x2 Variety, Condition Rarity

3439 1921 Alabama 2x2 MS67 PCGS. Noted designer and sculptor Laura Gardin Fraser created the distinctive design of this commemorative half, which was originally planned to be a quarter dollar denomination with James Monroe and Woodrow Wilson on the coin until a change of plans was necessitated by the unexpected election of Warren G. Harding in 1920. The final design featured the jugate portraits of William Wyatt Bibb (Alabama's first governor) and Thomas E. Kilby (the then-current governor) despite violating federal law forbidding the portrayal of any living individual on U.S. coins or currency. An impressive (albeit warlike) eagle, with no olive branch, graces the coin's reverse.

Production included two varieties — one with the "special" 2x2 mark in the right obverse field, a reiteration of the 22 stars representing Alabama's place as the 22nd state to enter the Union. The large X between the numerals represents the red St. Andrew's cross that appears on the state flag. The 2x2 variety is notably scarcer than the plain variety, although exact mintages are debatable.

The present coin is an exceptional example of this normally grade-challenged issue. The strike is bold, minimizing the planchet marks often seen on examples with a weaker strike. Lovely lilac, green, and gold toning provides terrific eye appeal. Strong mint luster rolls across the surfaces. Neither PCGS nor NGC have certified a numerically finer example. Population: 8 in 67 (2 in 67+), 0 finer (10/19). Ex: ANA Signature (Heritage, 8/2014), lot 5772. NGC ID# BYEZ, PCGS# 9225

#### 1937-S Arkansas Half, MS67 None Are Finer at PCGS

3440 1937-S Arkansas MS67 PCGS. The state of Arkansas was admitted to the Union in 1836, but the centennial coinage celebration began in 1935 and continued until 1939. In 1937, there were 5,506 pieces struck in the San Francisco mint. Very few examples have attained the high grade of this coin. Each side shows bright, sparkling mint luster and variegated golden and blue toning is (mostly) seen around the margins. Remarkably clean surfaces for this challenging issue. Population: 12 in 67 (3 in 67+), 0 finer (10/19). NGC ID# BYFD, PCGS# 9243

#### 1938-S Arkansas Half Dollar, MS67 Tied for Finest

3441 1938-S Arkansas MS67 NGC. After three years of centennial celebration, the Arkansas half dollars were offered for the fourth year in 1938. Sales were disappointing and only 3,150 sets were sold, with 1,000 unsold sets returned to the mint for melting. As with previous issues, the 1938 halves were prone to heavy abrasions on the jugate busts on the obverse. This is a refreshingly clean example whose satin-like mint luster shines through the light golden toning seen on each side. Census: 9 in 67 (1 in 67+, 1 in 67★), 0 finer (10/19). NGC ID# BYFH, PCGS# 9247

## 1939 Arkansas Half Dollar, MS67 Tied for the Finest Certified and Endorsed

3442 1939 Arkansas MS67 PCGS. CAC. When Congress approved the issue of half dollars to commemorate the Arkansas Centennial in May 1934, they likely did not anticipate that the series would span several years. The authorization was for 500,000 coins and the first of those coins were issued in 1935, a year before the actual Arkansas centennial on June 15, 1936. Sales were sluggish and continued through 1939 when the present specimen was one of just 2,104 pieces actually distributed. This Superb Gem is tied with a few others for the finest certified, and it is tied with one other for the finest that CAC has endorsed. Light golden-brown toning appears on both sides of this sharply struck piece, with rich peripheral gold on both sides. A lovely example. Population: 6 in 67 (1 in 67+), 0 finer. CAC: 2 in 67, 0 finer (10/19). NGC ID# BYFJ, PCGS# 9249

#### 1935/1934 Boone Half Dollar, MS68 Tied for Finest Known

3443 1935/34 Boone MS68 NGC. After the initial success of the 1934 Boone half dollar, the commemorative celebration continued (after Congressional legislation) by placing 1934 above PIONEER YEAR on the reverse, and 10,000 coins were struck in the Philadelphia mint. This near-perfect example is tied with seven others at both services combined for finest known. The surfaces are smooth and softly lustrous with an even layer of light gray and blue toning. Exceptional quality. Census: 4 in 68, 0 finer (10/19). NGC ID# 34SZ, PCGS# 9262

## 1924 Huguenot Half Dollar, MS68 Unsurpassed Registry Coin

3444 1924 Huguenot MS68 NGC. The design for the Huguenot-Walloon Tercentenary commemorative features the portraits of two Huguenot martyrs (Admiral Gaspard de Coligny and William the Silent) who both died long before the 1624 settlement the coins commemorate. This magnificently preserved example is among the few finest known and offers unsurpassed Registry Set potential. Each side displays deeper shades of peach, plum, and steel-blue patina over bright underlying mint luster. Obviously well cared for since minted. The eye appeal is terrific. Census: 3 in 68 (1 in 68★), 0 finer (10/19). NGC ID# BYGT, PCGS# 9314

## 1938 New Rochelle Half, SP65 Only 50 Specimens Believed Struck

3445 1938 New Rochelle, SP65 NGC. Both grading services now acknowledge the Specimen status of certain New Rochelle half dollars. Allegedly, only 50 presentation pieces were struck. These pieces are distinguished by the profound depth of mirroring seen in the fields on each side. This particular example also shows just the slightest hint of toning, which allows the essentially brilliant surfaces to fully exhibit the reflective fields. NGC ID# BYN6, PCGS# 99335 Base PCGS# 9335

#### 1926-S Oregon Trail Half, MS68 Colorful Iridescence

3446 1926-S Oregon MS68 PCGS. Pleasing iridescent colors decorate smooth, semireflective surfaces of this Superb Gem 1926-S Oregon Trail half. The first-year San Francisco issue was produced in large quantity — more than 83,000 pieces were distributed from a mintage of 100,000 coins plus 55 assay pieces. This attractive, lightly toned MS68 example is sharply struck through the centers, weakening only briefly at the borders. Marks are almost entirely absent, while eye appeal is terrific. Population: 12 in 68 (1 in 68+), 0 finer (10/19). NGC ID# BYH7, PCGS# 9341

## 1936 Oregon Trail Half, MS68 Impeccable Preservation

3447 1936 Oregon MS68 PCGS. CAC. Despite lower mintages, the later issues in the Oregon Trail series (1936-1939) are reasonably available in Gem or finer grades, with most of the coins sold to dealers or speculators. A large percentage of the coins were well-preserved as a result. Still, the 1936 issue becomes rare at the MS68 level. This lightly toned yet colorful example features dappled lemon-gold and lime-green shades, with violet and pale-blue accents. A sharp strike extends to the borders on both sides, with highly lustrous and nearly mark-free surfaces. CAC endorsement confirms the high quality. PCGS has seen just one finer example. Population: 12 in 68 (1 in 68+), 0 finer. CAC: 13 in 68, 0 finer (10/19). NGC ID# BYHB, PCGS# 9345

## 1937-D Oregon Half Dollar, MS68 Outstanding Color and Preservation

3448 1937-D Oregon MS68 PCGS. CAC. Ex: Bruce Scher/Aurora Borealis. Flamboyant multicolor toning glows brightly throughout both sides, with spectacular shades of orange, aqua, emerald-green, ruby-red, and lemon-gold. Vibrant mint luster shines through the intense toning. The strike is razor-sharp, including the peripheries (not always the case for even high-grade Oregons). CAC endorsement is an especially meaningful award at the Superb Gem MS68 level. Population: 66 in 68 (8 in 68+), 2 finer. CAC: 40 in 68, 0 finer (10/19). NGC ID# BYHG, PCGS# 9347

#### 1946 Booker T. Washington Half, MS68 Tied for Finest Known

3449 1946 Booker T. Washington MS68 PCGS. CAC. The availability of the 1946 Booker T. Washington half in lower grades sometimes overshadows its extreme rarity in MS68, a fact not to be overlooked by the serious commemorative collector. This stellar example boasts unsurpassed technical quality that is heightened by vibrant, mint-fresh luster. The obverse exhibits rich pine-green, lemongold, amber-red, and violet toning, while the reverse shows similar hues around the periphery, with iridescent champagne over the center. Population: 2 in 68, 0 finer. CAC: 4 in 68, 0 finer (10/19). NGC ID# BYJS, PCGS# 9404

#### 1951-S Booker T. Washington Half, MS68 Finest Known at Either Service

3450 1951-S Booker T. Washington MS68 NGC. The Booker T. Washington halves were among the half dollars produced with the least amount of care. The result, of course, is they are now among the most elusive in high grades. On this piece, the face of Washington lacks most of the usual heavy graininess and abrasions. The surfaces are brilliant and show glowing mint luster with just a hint of reflectivity in the fields. Finest known. Census: 1 in 68, 0 finer (10/19). NGC ID# BYKB, PCGS# 9426

#### **COMMEMORATIVE GOLD**

#### 1904 Lewis and Clark Gold Dollar, MS66+ Glowing Frosty Surfaces

3451 1904 Lewis and Clark Gold Dollar MS66+ PCGS. This is the slightly more collectible Lewis and Clark gold dollar issue compared to the 1905. Nevertheless, examples are scarcely seen as fine as this glowing yellow-gold Premium Gem awash in frosty mint luster. The typical areas of die erosion are present in the fields on each side, but there are no abrasions to report. PCGS counts 29 higher grading events (10/19). NGC ID# BYLF, PCGS# 7447

### 1904 Gold Dollar, MS67 First Lewis and Clark Issue

3452 1904 Lewis and Clark Gold Dollar MS67 PCGS. The Lewis and Clark commemorative gold dollars were issued in 1904 and 1905 to provide souvenirs at the Lewis-Clark Exposition that was held in Portland, Oregon. This Superb Gem is absolutely amazing with pristine surfaces that exhibit frosty lemon-yellow luster and delicate blue overtones. Population: 27 in 67 (3 in 67+), 2 finer (10/19). NGC ID# BYLF, PCGS# 7447

# 1904 Lewis and Clark Gold Dollar, MS67★ Deeply Reflective, Richly Colored

3453 1904 Lewis and Clark Gold Dollar MS67★ NGC. The 1904 Lewis and Clark gold dollar is a rarity in Superb Gem condition. This piece is deeply reflective in the fields, earning a Star designation from NGC. The strike is sharp, and the orange-gold surfaces reveal no evidence of the die wear that often affects the margins of this type. Finer examples of this issue exist, but they are inaccessible for most collectors. Census: 30 in 67 (1 in 67+, 6 in 67★, 2 in 67+★), 1 finer (10/19). NGC ID# BYLF, PCGS# 7447

## 1904 Lewis and Clark Gold Dollar, MS67+ Glittering Registry Set Candidate

3454 1904 Lewis and Clark Gold Dollar MS67+ PCGS. CAC. A two-headed coin, the Lewis and Clark gold dollar commemorates explorations by Meriwether Lewis and William Clark from 1803 to 1806 — struck in conjunction with the Lewis and Clark Exposition in Portland, Oregon. Although the centennial exposition drew more than 2.5 million visitors, just 10,025 1904 pieces were sold at \$2.50 each from a mintage of 25,000 pieces. The 1904 becomes scarce at the Gem level and it is rare in Superb Gem condition.

This Plus-graded Superb Gem ranks among the finest half-dozen pieces certified at PCGS. Lilac and orange highlights add eye appeal to the frosted, rich-gold surfaces. Fine granularity at the legends and adjacent to the portraits adds an extra dimension of luster to the surfaces, typical of die problems that characterize the issue. CAC endorsement confirms the outstanding visual appeal. Population: 3 in 67+, 2 finer. CAC: 9 in 67, 0 finer (10/19). NGC ID# BYLF, PCGS# 7447

## 1915-S Panama-Pacific Gold Dollar Lovely Coloration, MS67+

3455 1915-8 Panama-Pacific Gold Dollar MS67+ PCGS. CAC. Beautiful, satiny luster glistens on this high-end Superb Gem, yielding peach-orange, rose-gold, and lilac-green tints across each side. Strike sharpness is impeccable. The Pan-Pac gold dollar is scarcely seen in this grade, and no numerically finer pieces are reported. With the Plus designation and CAC endorsement, this example is something special. Population: 85 in 67 (5 in 67+), 0 finer. CAC: 21 in 67, 0 finer (10/19). NGC ID# BYLH, PCGS# 7449

## 1915-S Pan-Pac Quarter Eagle, MS67+ A Condition Census Example

3456 1915-S Panama-Pacific Quarter Eagle MS67+ NGC. The Panama-Pacific quarter eagle was not well-received in 1915, at least in artistic circles, where many individuals criticized the design by Charles Barber and George Morgan. The obverse depiction of Columbia seated on a hippocampus was intended to represent the use of the newly completed Panama Canal. Today, the issue has become an iconic member of the classic commemorative series.

This luminous, peach-gold coin showcases virtual perfection when viewed beneath a loupe, both in strike and preservation. Luster is satiny and the design elements are sharp. Eye appeal is exceptional. The example offered here represents an unparalleled opportunity for the classic commemorative specialist to acquire one of the technically finest and most visually impressive Pan-Pac quarter eagles known. Census: 4 in 67+, 1 in 67\*, 3 finer (10/19). NGC ID# BYLP, PCGS# 7450

## 1915-S Panama-Pacific Fifty, MS64 Scarcer Round Version 483 Examples Sold

#### 3457 1915-S Panama-Pacific 50 Dollar Round MS64 PCGS.

CAC. The Panama-Pacific International Exposition came to a close on December 4, 1915. More than 18 million people had visited the fair over the course of nine and a half months, including 450,000 visitors on its final day of operation. Although most of the exhibition's buildings were dismantled, the PPIE certainly left its mark on the city of San Francisco, and on American coinage. About 600 acres of bayside sand dunes and marshland had to be filled in the lead up to the Panama-Pacific International Exposition. Although nearly every structure was dismantled afterward, the area the fair occupied became vital to the growth of San Francisco. According to the National Parks Service:

"After the fair ended, construction workers re-graded most of the [PPIE] site along the waterfront for subdivisions and redevelopment. By the 1920s, real estate developers built the picturesque neighborhood now known as the Marina District. Today's Marina Green is a remaining garden element and the Yacht Harbor, which now provides slips to over 700 vessels, was originally the fair's passenger and freight slips."

San Francisco's bustling Marina District can trace its roots directly back to the exhibition that took place there in 1915. The Palace of Fine Arts, one of the few remaining vestiges of the fair, is an iconic tourist attraction and a popular venue for weddings and corporate events. Similarly, the San Francisco Civic Auditorium, now known as the Bill Graham Civic Auditorium, was built for the PPIE (though not on the fairgrounds) and remains an important multipurpose theater in the heart of the city.

Like the Marina District, Palace of Fine Arts, and the Civic Auditorium, the Panama-Pacific International Exposition left behind a trove of collectible souvenirs, these enormous fifty dollar gold pieces being chief among them. Both Round and Octagonal variants were designed by California sculptor Robert Aitken and struck to the extent of 1,500 pieces. However, their prohibitive issue price, \$100 each, limited sales to 483 of the former and 645 of the latter.

This spectacular Choice specimen of the scarcer round design exhibits sharply defined design elements and well-preserved, textured orange-gold surfaces that radiate vibrant mint luster and terrific eye appeal. The outstanding quality and appearance of this example is certified by CAC. PCGS has graded 38 numerically finer examples (10/19). NGC ID# BYHP, PCGS# 7451

## 1915-S Panama-Pacific Fifty, MS62 Iconic Octagonal Version

#### 3458 1915-S Panama-Pacific 50 Dollar Octagonal MS62 PCGS.

The legislation authorizing the production of gold and silver coins in commemoration of the Panama-Pacific International Exposition stipulated, among other things: "That the Secretary of the Treasury shall cause to be coined at the United States mint at San Francisco not exceeding three thousand gold coins of the denomination of \$50 each ... " and " ... one-half of the issue of \$50 gold coins herein authorized shall be similar in shape to the octagonal \$50 gold pieces issued in California in eighteen hundred and fifty-one."

The prodigious San Francisco-born sculptor Robert Aitken was chosen to design both variants of the Panama-Pacific fifty dollar gold piece. Aitken was recommended by the Commission of Fine Arts and gladly accepted the offer, writing to Mint Director George E. Roberts in September 1914:

"In answer to your letter of the eleventh instant asking if I would be in a position to undertake to make designs for one of the souvenir coins that may be issued in commemoration of the Panama-Pacific International Exposition. Permit me to state that I would consider myself honored if commissioned to prepare such designs."

By mid-January 1915, the design process was well underway. Aitken was only formally awarded the commission on January 21 after the authorizing legislation had been passed, but his January 23 acceptance letter was accompanied by the preliminary sketches he had been working on for months. Several small modifications were made at the request of Treasury Secretary William G. McAdoo, but Aitken ultimately got it right the first time. His depiction of Minerva on the obverse and her owl on the reverse, along with symbols of California and references to the Panama Canal perfectly captured the essence of the exhibit. Aitken's powerful design, combined with the coins' physical stature and distinctive shape, make these large fifty dollar Octagonal gold pieces some of the most sought-after Pan-Pac collectibles and favorites among American coin collectors. Of course, the \$100 price tag was too steep for the average collector in 1915 and only 645 octagonal fifties were sold.

The present coin is an attractive MS62 example, with welldetailed design elements and lightly marked, textured orange-gold surfaces. Vibrant mint luster radiates from both sides and eye appeal is outstanding. NGC ID# BYHP, PCGS# 7452

## 1915-S Panama-Pacific Fifty, MS63 Historic Octagonal Variety 645 Examples Distributed

3459 1915-S Panama-Pacific 50 Dollar Octagonal MS63 PCGS. CAC. A celebration of the completion of the Panama Canal and the rebirth of the city of San Francisco after the earthquake and fire of 1906 called for something extravagant, something monumental. The 1915 Panama-Pacific International Exposition delivered on both counts. It spanned two and half miles and covered 600 acres at a cost of \$15 million. According to the National Parks Service:

"The creation of the Panama-Pacific International Exposition required the construction of a grand and elegant city that was only to last eleven months. Almost all of the fair buildings were constructed in wood frame and covered in a material composed of gypsum (plaster of Paris) and hemp, was designed to look like Italian marble. As the Chief of Color, Jules Guerin designed a palette of soft and harmonious paint colors that would enhance the imitation travertine. In studios, commissioned artists and workers constructed over 1,500 individual sculptures with wood, wire, and faux marble material. The fair's ongoing vegetation and landscape needs were intensive. The landscape architects had to ship in over 30,000 full-grown trees and thousands of shrubbery to turn the acres of sand dunes and landfill into sophisticated, large-scale gardens."

Is it any surprise, then, that the United States Mint saw the Panama-Pacific International Exposition as an opportunity to produce the largest commemorative coinage in its history? These massive fifty dollar gold pieces weigh more than two and a half troy ounces and measure 46 millimeters in diameter, paralleling the size and scale of the PPIE itself. The coins carried an equally hefty price tag of double face value at the time of issue, limiting sales to just 645 Octagonal pieces. The remainder of the 1,500 coins struck were melted. Their size, weight, limited distribution, and the intricate design by Robert Aitken make the 1915-S Octagonal fifties among the most sought-after coins not just in the classic commemorative series, but in all of American numismatics.

This impressive Select example exhibits sharp definition on all design elements and the textured orange-gold surfaces are lightly marked for the grade. Both sides radiate vibrant mint luster and the outstanding eye appeal and technical quality is attested by the CAC sticker. NGC ID# BYHP, PCGS# 7452

#### MODERN BULLION COINS

#### 1990 Silver Eagle, MS70 Low PCGS Population

3460 1990 Silver Eagle MS70 PCGS. While large quantities of silver eagles were submitted to NGC through an arrangement with a major dealer, few coins found their way to PCGS. As a result, the population figures are widely divergent. For example, NGC has certified 323 of these 1990 Silver Eagles as MS70, while PCGS has only graded 41 examples in MS70 (10/19). The present piece is one of those 41, a perfect example with a bold strike, satiny luster, and brilliant silver surfaces. NGC ID# 26JC, PCGS# 9836

## 1994 Silver Eagle, MS70 Mercanti Signature

3461 1994 Silver Eagle, Mercanti Signature, MS70 PCGS. The 1994 one-ounce Silver Eagle claims a low mintage in the context of the series, at 4.2 million pieces. This spectacular specimen exhibits fully struck design elements and vibrant mint luster, with technically perfect surfaces throughout. Eye appeal is extraordinary. Housed in a holder signed by Chief Engraver John M. Mercanti. NGC ID# 26JL, PCGS# 530889 Base PCGS# 9876

## 1995-W Silver Eagle PR70 Deep Cameo Unchallenged Series Key

3462 1995-W Silver Eagle PR70 Deep Cameo PCGS. The West Point mintmark is to modern coins as the Carson City mintmark is to the issues of the 19th century — it is often associated with low mintages and greater collector appeal, and many of the most sought-after modern issues are West Point Mint products. Such is the case with the 1995-W proof Silver Eagle. It has the distinction of being the only Silver Eagle struck at West Point prior to the year 2000, and it was distributed in such small numbers — just 30,125 pieces — that it reigns as the series key today across circulation strikes and proofs. Without doubt, a top-grade Deep Cameo example of this issue is a must-have for the advanced Silver Eagle collector. Offered here is a PR70 Deep Cameo with untouched, untoned surfaces and a full strike. It is flawless in all respects. NGC ID# CFWX, PCGS# 9887

#### 1995-W Silver Eagle, PR70 Deep Cameo First Silver Eagle With a W Mintmark

3463 1995-W Silver Eagle PR70 Deep Cameo PCGS. In 1995, a Silver Eagle bearing the West Point mintmark was a new curiosity, something of tremendous appeal to collectors. Up to that time, bullion and proof Silver Eagles had been coined almost exclusively at the Philadelphia and San Francisco mints. The West Point Mint did strike some bullion pieces in 1986, the first year of issue, but they did not bear a mintmark to distinguish them from Philadelphia and San Francisco coins.

The occasion of the 1995-W proof was the 10th anniversary of the bullion coin program, signed into law in 1985. To commemorate the milestone, a special proof set of five bullion denominations was produced at the West Point Mint, with all coins bearing the W mintmark. This set included the four Gold Eagle denominations of \$5, \$10, \$25, and \$50, as well as the Silver Eagle. Although the gold proofs could be purchased apart from the five-coin anniversary set, the Silver Eagle could not — its entire distribution was limited to the number of sets sold, which was merely 30,125. The consensus is that the purchase price of the set (\$999) capped sales. Whatever the case, the 1995-W proof Silver Eagle emerged from the West Point Mint not only as the first Silver Eagle with a W mintmark, but also as a true modern rarity.

The piece offered here is in flawless PR70 Deep Cameo condition, the grade sought-after by Registry Set collectors. The devices shimmer like frost, while the fields glimmer of mercury-like liquidity. A beautiful example of this iconic modern issue. NGC ID# CFWX, PCGS# 9887

#### 1999 Silver Eagle, MS70 One of 11 Perfect PCGS Coins

3464 1999 Silver Eagle MS70 PCGS. If the 1999 American Silver Eagle does not particularly stand out as a rare issue with 7.4 million coins struck, consider this: Of the nearly 10,000 grading events at PCGS, only 11 have successfully achieved an ultimate MS70 technical assessment (10/19). This Registry essential is absolutely pristine, fully struck, and brilliant. NGC ID# 26JX, PCGS# 9947

#### TERRITORIAL GOLD

C. Bechtler Gold Dollar, Original AU55 Struck on a 30-Grain Planchet, K-1

3465 (1831-1834) C. Bechtler Dollar, 30 G., AU55 PCGS. K-1, R.4. One of only two distinct Christopher Bechtler gold dollars, this one struck on a 30-grain planchet and the other struck on a 28-grain flan. This piece has unquestionably original surfaces that display deep, gray-lilac patina surrounding the devices and traces of prooflikeness beneath the toning. There are no obvious abrasions on either side. Housed in an early PCGS blue label holder with barcode on the back. Listed on page 397 of the 2020 Guide Book. NGC ID# 2B94, PCGS# 10064

## 1852 U.S Assay Office Fifty, XF40 900 Thous., K-14 Variety

3466 1852 Assay Office Fifty Dollar, 900 Thous. XF40 NGC. K-14, R.5. The 900 Thous. fifty dollar gold slugs were produced by the Assay Office as an emergency measure in response to federal legislation requiring all customs duties to be paid in coins of at least .900 fineness. The coins were actually produced in January (13,800 examples) and February (10,000 examples) of 1853, but they were backdated 1852. This impressive XF example displays lightly abraded surfaces for such a large gold coin that spent time in circulation. The design elements are well-detailed and lightly worn, though some of the usual softness shows on the eagle and shield. Rim bumps are minimal and the overall presentation is most attractive. Census: 4 in 40, 45 finer (10/19). NGC ID# ANHH, PCGS# 10019

## 1854 Kellogg & Co. Twenty, XF45 K-1b, Late Territorial Issue

3467 1854 Kellogg & Co. XF45 PCGS. K-1b, Short Arrows, R.5. When the San Francisco Mint was authorized, the U.S. Assay Office ceased operations at a time when no other private coiners were produced gold coinage for the region. Due to delays at the Federal Mint, Kellogg & Co. filled the coinage void with their \$20 gold pieces in early 1854 under Kellogg & Richter. The following year, they produced twenty dollar gold pieces under the operation of Kellogg & Humbert. Traces of luster remain on this Choice XF example that saw light use at the time it was issued. Mostly trivial marks are evident, with a few larger marks that will help track the provenance. Listed on page 412 of the 2020 Guide Book. NGC ID# ANHY, PCGS# 10222

## 1849 Mormon Five Dollar, AU55+ Highly Sought Territorial Issue, K-2

3468 1849 Mormon Five Dollar AU55+ NGC. K-2. R.5. The early Mormon gold issues circulated primarily within the community, struck as a public convenience at the urging of Brigham Young. Relying on only the natural gold alloy of silver and no other changes to the composition, the coins wore quickly and the rudimentary minting facilities issued few sharp strikes. Some gold eagles were struck in 1848, followed by five dollar gold pieces in 1849, 1850, and 1860. Even if struck to match federal standards, the soft gold coins were soon underweight from wear and by fineness.

This 1849 example circulated but briefly, as indicated by the NGC Choice About Uncirculated grade and Plus designation. Natural greenish-gold color survives, while a soft strike is accentuated by smooth wear. The Clasped Hands motif and All-Seeing Eye were carried over from a trial 1848 ten dollar design. As might be expected, most 1849 Mormon pieces were lost to attrition or melting. Listed on page 414 of the 2020 Guide Book. NGC ID# 2BCE, PCGS# 10262

## 1860 Kagin-2 Five Dollar, AU53 Clark, Gruber & Co.

3469 1860 Clark, Gruber & Co. Five Dollar AU53 NGC. Kagin-2, R.4. Clark, Gruber & Co. set up their banking and coining business in Colorado shortly after the discovery of gold and long before the Centennial State was a state at all. In fact, these coins were minted before Colorado was a territory. When Kansas became a state in 1861, the western portion of Kansas Territory, along with parts of Nebraska Territory, Utah Territory, and New Mexico Territory, became Colorado Territory in 1861, and the state of Colorado in 1876. This lovely example recounts those glorious days of gold with its green-gold luster and exceptional eye appeal. Listed on page 415 of the 2020 Guide Book. NGC ID# ANJZ, PCGS# 10136

## 1861 Clark, Gruber & Co. Quarter Eagle, MS61 Popular Colorado Gold Issue, K-5

3470 1861 Clark, Gruber & Co. Quarter Eagle MS61 NGC. K-5, R.4. Clark, Gruber & Co. was easily the soundest and most respected financial organization in Colorado's early gold rush years. Already well established as a commodities merchant and outfitter for the local populace and prospective miners from their base near Fort Leavenworth, Kansas, the company was well-positioned to establish a successful banking business in Kansas and later expand to Denver in 1859. Their private coining business was needed to avoid the costly, time-consuming, and dangerous transport of gold dust to the Philadelphia Mint.

In 1860 and 1861, the company's coinage operations in Denver operated 24 hours a day. In 1861, the firm's coinage was declared "to be of professed value, or slightly higher" by a Philadelphia Mint assay report. In 1863, the U.S. Government purchased Clark, Gruber's coinage operations, building, and equipment, a precursor to the Denver Mint. This Mint State quarter eagle represents one of Clark, Gruber's later issues. The well-struck greenish-gold surfaces show few marks and faint, light hairlines. Census: 13 in 61, 14 finer (10/19). NGC ID# ANJY, PCGS# 10139

#### CALIFORNIA FRACTIONAL GOLD

## 1853 BG-420 Liberty Head Gold, MS64 Prized First Period 50 Cent Piece

3471 1853 Liberty Round 50 Cents, BG-420, Low R.7, MS64 NGC. In the September 2003 Bowers and Merena catalog of the Jay Roe Collection, the cataloger noted that the MS62 PCGS example from that collection was recorded as the second finest known on the roster that includes one example in the Smithsonian Institution and several others that are well worn. The present piece is certified MS64 and is likely the finest known example of the variety. This piece, produced by maker M. Deriberpie whose initial D appears at the bottom of the obverse, has reflective surfaces and brilliant lemon-yellow luster. This example is the finest certified. Census: 1 in 64, 0 finer (10/19). NGC ID# 2BKA, PCGS# 10456

#### 1853 Arms of California Half, MS61 Humbert Motif Reverse, BG-435

1853 Arms of California 50 Cents, BG-435, Low R.5, MS61 NGC. BG-435 ranks among the most significant die marriages of the entire California fractional gold series, as it is the sole variety that imitates the Great Seal of California, a design at the time only four years old. In addition, the reverse copies the eagle, ribbon, shield, and branch motif from the obverse of the then-current Humbert fifty dollar slugs. BG-435 is the first and last of nine varieties shown on the cover of the 2003 Jay Roe catalog. This butter-gold example is unabraded and attractive. Census: 1 in 61, 5 finer (10/19). NGC ID# 2BKU, PCGS# 10471

# 1871 BG-718A Liberty Quarter Dollar, MS65 Finest of Only Two or Three Known Specimens

3473 1871 Liberty Octagonal 25 Cents, BG-718A, R.8, MS65 PCGS. The cataloger of the Jay Roe Collection that was sold in September 2003 noted that just two examples are known of BG-718A, a variety that was discovered by Rick Montgomery while grading coins at PCGS about 1990. The Roe specimen is MS64 PCGS and this piece is MS65 PCGS. Now a third example has been certified as MS64 and none have been graded at NGC. There may still be only two pieces known, as stated in the Roe catalog. The reality may be clouded by resubmissions. There also are two MS62 pieces graded; again, upgrades or resubmissions?

Two of the possibly three known specimens are distinctly different die states. This piece has a perfect reverse die and the Roe coin has a heavy die crack outside the left branch of the wreath at about 9 o'clock. (We do not know any details about the newly certified third coin.) Both sides of this near-Gem have bright green-gold luster with reflective fields and frosty devices that impart light cameo contrast.

Ex: FUN Signature (Heritage, 1/2012), lot 6880. NGC ID# 2BMX, PCGS# 10955

#### 1882 Indian Round 25 Cents, MS65 Prooflike Rare BG-892, Six or Seven Pieces Known

3474 1882 Indian Round 25 Cents, BG-892, High R.7, MS65 Prooflike NGC. This "Young Head" round Indian 25 cent gold was a suppressed issue from the end of Period Two (1858-1882), struck in gold-plated silver on copper by Nast, Greenzweig & Co. of San Francisco. Rare as a type as well as a condition rarity, the coin is tied for finest-known with designated Prooflike surfaces. Greenish-gold color gleams across both sides of this sharply struck Gem Prooflike example, with traces of the underlying silver at the portrait and along the high points of the reverse wreath. NGC Census: 3 in 65 Prooflike, 0 finer (10/19). PCGS# 710753

#### **PATTERNS**

1850 Annular Cent Struck in Billon Judd-119 Original, PR65

3475 1850 One Cent, Judd-119 Original, Pollock-134, Low R.6, PR65 PCGS. Ex: NGSA 30 Years. The obverse displays the denomination CENT at the top, the date 1850 at the bottom, two rosettes at the sides, and a perforation in the center. The shattered reverse has the inscriptions USA and ONE TENTH SILVER around. Struck in billon (10% silver, 90% copper) with a plain edge and medal turn. Billon pieces with the central perforation are considered Originals even though they may show heavy die cracks. Deep gray patina covers both sides of this example with little reflectivity evident from the fields. NGC ID# 2A57, PCGS# 11511

## 1858 Flying Eagle Cent in Copper-Nickel Small Letters, Judd-192, PR65+

3476 1858 Flying Eagle Cent, Judd-192, Pollock-235, Snow-PT13, R.5, PR65+ PCGS. CAC. The obverse is the familiar Small Letters 1858 cent. The pattern reverse generally resembles the 1860 regular issue reverse, but there is no shield at the top and the wreath is closed. Struck in copper-nickel with a plain edge. The fields are deeply reflective and each side displays slight mellowing of color. NGC ID# 29BC, PCGS# 11842

## 1858 Hooked-Neck Flying Eagle Cent Struck in Copper-Nickel, Judd-204, PR64 Cameo

3477 1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR64 Cameo PCGS. CAC. Flying Eagle cent pattern with a hooked-necked eagle in flight on the obverse. The reverse has an oak wreath with a broad, ornamented shield at the top. Struck in copper-nickel with a plain edge. Examples are also known in copper. The fields are deeply mirrored and the coin overall displays bright, light — almost white — color that one associates with copper-nickel strikes. The devices are nicely frosted and present contrast against the depth of reflectivity in the fields. PCGS# 134065

# 1864 Three Cent Silver in Copper Judd-375, PR64 Red and Brown

3478 1864 Three Cent Silver, Judd-375, Pollock-443, R.7, PR64 Red and Brown PCGS. An alleged die trials strike with the design of the as-issued three cent silver, but struck in copper with a plain edge. USPatterns.com maintains these pieces were "deliberately made in the early 1870s and sold as part of complete off-metal sets of the silver coinage of this year containing quarter, half dollar, and dollar which had the reverses of 1866 with the motto "In God We Trust" above the eagle." The surfaces are mostly mellowed with faint glimmers of red still visible around the devices. Fully struck with no carbon spotting apparent. NGC ID# 29GZ, PCGS# 70546

## 1865 With Motto Half Dollar in Silver Judd-429, PR66

3479 1865 Half Dollar, Judd-429, Pollock-502, Low R.7, PR66 PCGS. The obverse die is the traditional Liberty Seated design adopted for regular coinage in 1865. The reverse features the familiar perched eagle with scroll and motto above that was adopted for regular issues in 1866. Struck in silver with a reeded edge. Unlike previous years when With Motto coinage was produced, some of the 1865 halves may be actual transitional pieces. About a dozen examples are known in silver with a similar number in copper. Much original brilliance remains, especially on the reverse; while each side shows light blue and rose toning as well. Fully struck. NGC ID# 29JF, PCGS# 60614

#### 1870 Standard Silver Half in Aluminum Judd-955, PR66 Cameo

3480 1870 Standard Silver Half Dollar, Judd-955, Pollock-1099, High R.7, PR66 Cameo PCGS. Ex: Bass. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST is placed on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in aluminum with a reeded edge. Less than a half dozen are believed known of this reeded edge variant with a similar number known with a plain edge. Silver and copper strikes were also produced; the "type" issue for this obverse / reverse pairing being the silver examples. The fields display unfathomable reflectivity with strongly contrasting mint frost. The surfaces are problem-free with no traces of oxidation. PCGS# 505671 Base PCGS# 61201

#### 1870 William Barber Seated Dollar in Copper Judd-1005, PR65 Brown

3481 1870 Dollar, Judd-1005, Pollock-1137, Low R.6, PR65 Brown PCGS. The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed and a Liberty pole stands behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse is the design used for regular-issue coinage in 1870. Struck in copper with a plain edge. Over a dozen examples are known in copper and with a plain edge, and pieces were also struck in silver and aluminum. The surfaces display iridescence over each side with brightly mirrored fields. Fully struck. NGC ID# 29ZS, PCGS# 61252

# 1875 Quarter Eagle in Copper Judd-1434, PR64 Brown

3482 1875 Quarter Eagle, Judd-1434, Pollock-1577, High R.7, PR64 Brown PCGS. Regular dies Coronet quarter eagle from 1875. Struck in copper with a reeded edge. Only four or five pieces are believed extant and a couple are gilt (for obvious reasons). There could be no legitimate reason to strike a quarter eagle in copper, so the inescapable conclusion is these were produced for sale to collectors. Another two or three pieces were struck in aluminum. This is a non-gilt piece, and while labeled Brown by PCGS, there is a surprising presence of original, yellow-red luster (although admittedly it is subdued). The fields are still brightly mirrored and this coin is fully struck. Housed in an old green label PCGS holder. NGC ID# 2ABV, PCGS# 61741

## **INGOTS**

S.S. Gairsoppa Silver Ingot World War II Recovery Massive 72.7-Pound Ingot

**3483 S.S.** *Gairsoppa* **Silver Ingot. Bombay Mint. 1060.5 Ounces.** Richard Ayers, the S.S. *Gairsoppa*'s 31-year-old second officer, washed up on the Cornish shore 13 days after his vessel succumbed to a Nazi U-boat torpedo 300 miles off the southwest coast of Ireland on February 17, 1941. He was the only man to survive.

Ayers and 30 of the ship's 85 crew members (seven Europeans, 23 lascars, or Indian seamen) had successfully deployed a single lifeboat, managing to escape the initial German barrage. They navigated the treacherous waters of the North Atlantic, surviving on rations of biscuits, condensed milk, and a pint of water a day, at least for the first eight days. Their staple foodstuffs eventually ran out. By the end of the next five days all but seven men had capitulated to the starvation, delirium, and freezing temperatures. Then on day 13 the lifeboat capsized as the surviving *Gairsoppa* sailors spotted land. Four drowned immediately in their weakened state. Ayers and two others managed to right the boat, but waves once again threw them into the sea. Robert Hampshire, an 18-year-old radio officer became the 83rd casualty. Norman Thomas, a 20-year-old gunner, managed to make it to the rocky shore before another swell took his life, the 84th and final one lost in the tragedy. An unconscious Richard Ayers eventually made it to safety, the only one capable of recounting the sinking.

The S.S. Gairsoppa was a 5,273-ton, 399-foot cargo steamship built in 1919 for the British India Steam Navigation Company by the Palmers Shipbuilding & Iron Company in Hebburn-on-Tyne. It was named for a town on the southwestern coast of India famed for its spectacular waterfall. During World War II, the S.S. Gairsoppa was in the service of the Ministry of War Transport. It was in that capacity that the ship set sail from the port at Calcutta in December 1940 bound for Liverpool carrying 2,600 tons of pig iron, 1,765 tons of tea, and up to 7 million ounces of silver for the war effort. It traveled up the western coast of Africa to Freetown, Sierra Leone, where it stopped on Jan 30, 1941 to join a military convoy (SL-64) for protection. From there the Gairsoppa continued toward Liverpool. However, 300 miles southwest of Galway Bay, Ireland the ship and the convoy were slowed down by heavy storms. The Gairsoppa's travails were compounded as its fuel supply of coal ran out. Having no other choice, the ship detached from the convoy and headed alone toward Galway, leaving it defenseless against the German wolfpacks.

Sure enough, on February 16 a German plane flying overhead spotted the vulnerable *Gairsoppa* limping toward Ireland. U-boats in the area were alerted. Ernst Mengersen, commander of the submarine U-101 and an eventual recipient of the Knight's Cross of the Iron Cross in the Kriegsmarine, honed in and fired a first G7a torpedo at 6pm, missing because of the waves. Two more torpedoes were launched at 11:28pm and 11:32pm, with the latter hitting the starboard side. The *Gairsoppa* caught fire and sank within 30 minutes as machine-gun fire pelleted the crew members trying desperately to escape.

The wreck of the *Gairsoppa* drifted to its final resting place three miles below the surface of the ocean, where it remained undisturbed for 70 years. Although it was known that the ship contained nearly 240 tons of silver, the massive amounts of pressure exerted on the robots, lights, claws, and cables required to bring up the haul of silver ingots made the task impossible until recently. The British government contracted Odyssey Marine Exploration for the job in 2010, the same company responsible for the recent recoveries from the S.S. Republic and S.S. Central America. By 2013, more than 3 million ounces of silver, including at least 1,200 ingots had been brought up from the ocean floor. A fraction of those were saved for the numismatic market.

This is one of 462 bars of this type extant. Although more were discovered aboard the S.S. Gairsoppa, most were melted for bullion. All 462 ingots fall within a fairly tight range of 1,000 to 1,100 ounces with a fineness of .999. The ingot has a distinctive trapezoidal shape and it measures 90 x 287 x 100 mm. The top side is laid out vertically and the impressions read: Bombay Mint hallmark / JZ0423 / 5 / FINENESS / 999.2 / 1060.5 / OZS. Charcoal patina is seen on each side and there are scattered bits of rust in the recessed areas on the sides. A rare and unusual ingot.

## 1959-Dated Round Hallmark Silver Ingot San Francisco Mint, 23.26 Ounces

3484 1959 San Francisco Mint Round Hallmark Silver Ingot. 23.26 Ounces. This is a nicely laid out 20-ounce class mint ingot with plenty of heft in-hand. The Round Dated Hallmarks are most frequently seen from 1956 or 1959, but the 1959s are seen less often of the two. Likewise, among the 1959 ingots, those from lot 37 (stamped on the lower edge) are the most commonly encountered along with lot 38. The hallmark is tilted just a bit to the left and is well-centered on the top side. Below the hallmark is 965 / 23.26 OZS / 999.75 FINE. The surfaces are bright throughout with tothing evident. The recesses in the devices retain patina, which gives the imprints a distinctive contrast against the brightness of the ingot. An interesting feature seen on this bar is the top of the fineness punch that is clearly imprinted above 999.75 in the form of a straight line.

## End of Session One

## **SESSION TWO**

## **COLONIALS**

1652 Pine Tree Shilling, XF Details Noe-2 Straight Tree Variety

3485 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk — Repaired — PCGS Genuine. XF Details. Noe-2, W-700, Salmon 2-C, R.5. 61.41 grains. An area of possible repair exists at SETS of MASATHVSETS, with general porosity at the margins and around the pine tree. The wavy flan is otherwise well-defined and attractively toned, with the reverse considerably sharper than the obverse. Large Planchet shillings range from 27-31 mm — this one is at the low end of that scale, with portions of the legend partially off the flan as a result. Listed on page 41 of the 2020 Guide Book.

## 1778-79 Brass Rhode Island Ship Medal, AU55 Betts-562, VLUGTENDE Removed

3486 1778-79 Rhode Island Ship Medal, VLUGTENDE Removed, Brass, AU55 NGC. Betts-562, Breen-1139, Whitman-1730, R.3. The Whitman Encyclopedia of Colonial and Early American Coins rates these brass pieces with VLUGTENDE removed as URS-10 (250-499 known) that is equivalent to R.3 on the Sheldon scale. The other brass pieces with branches (wreath) below the ship are rated URS-9 (125 to 249 known). However, certified population data at NGC and PCGS suggest that they are about equal in rarity with 81 of the former and 83 of the latter graded at those services. A trace of high-point wear appears on the smooth chocolate-brown surfaces that exhibit light yellow splashes. Census (including those certified as copper): 3 in 55; 9 finer (10/19). Listed on page 52 of the 2020 Guide Book. NGC ID# 26LC, PCGS# 588

## 1778-79 Brass Rhode Island Ship Medal, Unc Details Betts-562, Breen-1139, Whitman-1730

3487 1778-79 Rhode Island Ship Medal, VLUGTENDE Removed, Brass — Obverse Scratched — NGC Details. Unc. Betts-562, Breen-1139, Whitman-1730, R.3. The initial production of these medals included the word VLUGTENDE on the obverse below Admiral Howe's warship, creating confusion at the time of issue, that word meaning "fleeing" and suggesting that Admiral Howe and his war party were fleeing from Rhode Island. A few were released without alteration, and those pieces are extremely rare today with only two known. The majority of those pieces had the word physically scraped off the obverse, leaving a blank depression below the ship that some might think is damage, but it is not. That is the way they were distributed at the time of production. The pale brownish-yellow surfaces exhibit a few minor scratches at the upper right obverse. Listed on page 52 of the 2020 Guide Book.

# 1778-79 Brass Rhode Island Ship Medal, AU58 Betts-563, Mysterious European Production

3488 1778-79 Rhode Island Ship Medal, Branches Below Ship, Brass, AU58 NGC. Betts-563, Breen-1141, Whitman-1740, **R.4.** The Rhode Island Ship medals were produced in Europe, although there is some disagreement about the production location. Some suggest that they were British-produced propaganda pieces marking an English victory, with inscriptions intended for a Dutch audience. Christopher McDowell suggests that these are Dutchproduced jetons with a political theme designed to poke fun at the English who themselves were forced to retreat from Newport, Rhode Island, in 1779. The reference to Admiral Howe's flag and the year 1779, is, according to McDowell, a reference to Admiral Howe's resignation of his military commission immediately following the 1778 battle in disgust at the Admiralty's handling of the war in North America. King George III was himself gravely disappointed in Admiral Howe's failure to destroy the French fleet in the waters outside Rhode Island, at the same time the Dutch people were delighted in 1780 at the departure of such a fearsome foe as Admiral Howe from the English Navy, as the Dutch and English, while still allies, were clearly on a collision course for war. The pale yellow obverse has faint scratches visible with a glass, while the reverse is olive-brown with splashes of yellow. Census (including those certified as copper): 1 in 58; 11 finer (10/19). Listed on page 52 of the 2020 Guide Book. NGC ID# 2AUM, PCGS# 587

## 1778-79 Brass Rhode Island Ship Medal, Unc Details Betts-563, Branches (Wreath) Below the Ship

3489 1778-79 Rhode Island Ship Medal, Branches Below Ship, Brass—Cleaned—NGC Details. Unc. Betts-563, Breen-1141, Whitman-1740, R.4. Examination of the basic varieties suggests the order they were produced and distributed. Those with the engraving anomaly having VLUGTENDE below Admiral Howe's flagship were produced first. Those include the pieces with that word scraped away. Most likely, the error pieces were not intended to be distributed, but a small number reached collectors' hands. Those pieces with VLUGTENDE removed were distributed first, and these pieces with the branches below the ship were released afterward. Hints of medium brown toning appear on this light yellow example that retains luster on both sides. Bulged planchet irregularities are noted on both sides and likely result from the production method of hot metal work. Listed on page 52 of the 2020 Guide Book.

#### 1778-79 Brass Rhode Island Ship Medal, MS61 Betts-563, Breen-1141, Whitman-1740

1778-79 Rhode Island Ship Medal, Branches Below Ship, Brass, MS61 NGC. Betts-563, Breen-1141, Whitman-1740, R.4. At the time these medals were issued, the Dutch were debating the merits of joining the Russian led Treaty of Armed Neutrality, which was strongly opposed by the English. Most scholars believe these pieces were struck about 1780. They are clearly contemporary pieces, as the first publication of these medals took place in 1787. According to Christopher McDowell's study that appeared in the December 2018 issue of the Journal of Early American Numismatics, these medals were first illustrated in a Japanese numismatic book titled Seiy sempu (Notes on Western Coinage). The book was written by a feudal lord with close ties to the Dutch East India Company. At the time, only Dutch ships were permitted to trade with the Japanese. This pleasing Mint State example has smooth walnut-brown surfaces with a small area of corrosion on the obverse. Census (including those certified as copper): 3 in 61; 8 finer (10/19). Listed on page 52 of the 2020 Guide Book. NGC ID# 2AUM, PCGS# 587

#### 1778-79 Brass Rhode Island Ship Medal, MS61 Betts-563, Flight of the Continental Army

3491 1778-79 Rhode Island Ship Medal, Branches Below Ship, Brass, MS61 NGC. Betts-563, Breen-1141, Whitman-1740, R.4. The Battle of Rhode Island followed the siege of Newport by the Continental militia. As the militia abandoned the siege and withdrew to the north, British forces attacked the Americans following the arrival of British warships. While the battle ended inconclusively, it is considered a British strategic victory, with Royal forces remaining on Aquidneck Island, depicted on the reverse of these medals. The Battle of Rhode Island was the first skirmish following the entry of France in support of the American cause. This piece has attractive chocolate-brown surfaces that exhibit traces of yellow along with light-colored inorganic material on both sides. Census (including those certified as copper): 3 in 61; 8 finer (10/19). Listed on page 52 of the 2020 Guide Book. NGC ID# 2AUM, PCGS# 587

## 1778-79 Brass Rhode Island Ship Medal, MS62 Betts-563, Only Two Finer at NGC

1778-79 Rhode Island Ship Medal, Branches Below Ship, Brass, MS62 NGC. Betts-563, Breen-1141, Whitman-1740, R.4. The obverse of the Rhode Island Ship medals depicts the flagship of British admiral Lord Richard Howe is anchored with the peripheral legend DE ADMIRALS FLAG van ADMIRAL HOWE 1779 (THE ADMIRALS FLAG OF ADMIRAL HOWE 1779). The reverse shows Aquidneck island is the central motif with three warships to the left, about two dozen troops on the island, and soldiers fleeing in thirteen small boats to the right. The peripheral legend reads D'vlugtende AMERICAAN ENvan RHODE YLAND Augt 1778 (THE FLEEING AMERICANS OF RHODE ISLAND AUGUST 1778). Lustrous greenish-yellow surfaces exhibit faint bulges likely from the manufacturing process. Census (including those certified as copper): 6 in 62; 2 finer (10/19). Listed on page 52 of the 2020 Guide Book. NGC ID# 2AUM, PCGS# 587

#### 1778-79 Pewter Rhode Island Ship Medal, AU58 Betts-563, Breen-1142, Whitman-1745

3493 1778-79 Rhode Island Ship Medal, Branches Below Ship, Pewter, AU58 NGC. Betts-563, Breen-1142, Whitman-1745, R.6. The Rhode Island Ship medals were produced in brass and pewter. The pewter medals have also been described as "white " while the brass examples have been described as "Beta brass;" a high zinc brass alloy that has the resembles gold when new. Some brass pieces were silvered and can be confused with pewter. Past knowledge suggested that some were struck in copper and the grading services continue to differentiate between brass and copper. However, current research shows that none of these were actually coined in copper. This pewter example is virtually Mint State with only a trace of wear. Considerable luster remains on the light gray surfaces that show some darker gray toning. A splendid example of this elusive composition Rhode Island Ship medal. Rarity ratings in the Whitman Colonial Encyclopedia suggest that only 10 to 20 pewter examples are known although certified census data (26 certified) suggests a higher surviving population. Census: 1 in 58; 1 finer (10/19). Listed on page 52 of the 2020 Guide Book. NGC ID# 2AUN, PCGS# 585

#### 1785 Nova Constellatio Copper, MS63 Brown Pointed Rays, Large Date, Crosby 3-B

3494 1785 Nova Constellatio Copper, Pointed Rays, Large Date, MS63 Brown NGC. Crosby 3-B, W-1895, R.2. Crosby 3-B represents one of the more collectible Nova Constellatio copper varieties. This Select Uncirculated example is in a typically late die state with heavy rust lumps throughout the obverse. Both sides are smooth with areas of appealing mahogany-brown and goldenorange color. A popular colonial type. Listed on page 56 of the 2020 Guide Book. Census (all Pointed Rays, Large Date varieties): 2 in 63 Brown, 5 finer (10/19). NGC ID# 2AZ3, PCGS# 813

3495 1783 Chalmers Shilling, Long Worm VG10 PCGS. Breen-1012, W-1790, R.4. The fence is between letters N and I. A pleasing Long Worm shilling, unevenly worn at the centers but sharper at the peripheries. Iridescent shades glimmer at the borders, while bluish-gray and olive-gold toning imbues both sides. The central clasped hands motif is featureless from circulation wear, although the legends are nearly complete. An affordable option for this popular and scarce Colonial issue by John Chalmers, the early Maryland goldsmith and silversmith. Listed on page 53 of the 2020 Guide Book. Population: 4 in 10, 42 finer (9/19). NGC ID# 2AUT, PCGS# 595

#### HALF CENT

3496 1854 C-1, B-1, R.1, MS65+ Red and Brown PCGS. While 1855 half cents are plentiful with red mint luster, all other Braided Hair issues are elusive with any trace of red, and this piece has nearly full, brilliant red mint luster with splashes of brown, primarily on the obverse. Population: 29 in 65 Red and Brown (2 in 65+), 2 finer (10/19). Our EAC grade MS65.

From The Spring Creek Collection, Part I. NGC ID# 26YY, PCGS# 35331 Base PCGS# 1231

#### LARGE CENTS

## 1793 Chain Cent, Fine Details S-2, B-2, AMERICA

3497 1793 Chain, AMERICA, S-2, B-2, High R.4 — Excessive Corrosion — PCGS Genuine. Fine Details. Breen Die State II, with a die bulge through the date. Wear is fairly light for the Fine Details designation from PCGS, although the uniformly granular surface texture softens the definition of Liberty's hair and facial features. LIBERTY and the date are also weakened by corrosion, although both remain readable. The reverse legends are clear, and both sides have chocolate-brown and olive color. Our EAC grade

# 1793 Wreath Cent, VG10 S-9, Vine and Bars Edge

3498 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, VG10 PCGS. This widely collected variety features a horizontal twig beneath the three leaves, and a Tall 7 in the date. Liberty's three lowest hair locks are close to the border. The reverse has a large, kidney-shaped bow. While the reverse is granular, the obverse is comparatively smooth with a nearly full date and sharp LIBERTY. Substantial wear is the sole grade-determining obverse factor, since there are no distracting marks. The reverse is less-smooth, but the elements are well-defined for the grade. Olive-brown and steel color adds appeal. Our EAC grade VG8. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

3499 1794 Head of 1793, S-19b, B-3b, R.4, Good 6 PCGS. The doubled chin protrudes despite the expected wear on this well-circulated cent. Pleasing, chocolate-brown surfaces shows wear at the date, which is ghostlike but distinguishable, and LIBERTY retains sharpness for the grade, weakening at RTY. Small pits and microscopic roughness includes a pair of short marks or planchet defects at 7 o'clock on the obverse, while the reverse is well outlined, with only scattered small marks. Our EAC grade Good 5. NGC ID# 223N, PCGS# 35519 Base PCGS# 1362

3500 1799 S-189, B-3, R.2, Fair 2 NGC. Sheldon-189 is the most frequently encountered variety of the elusive 1799 large cent. This example represents a fairly typical level of wear for the issue, although it stands apart from many of its peers by having a boldly outlined portrait of Liberty and a clear date. Much of LIBERTY is also visible, although details and legends on the reverse are significantly weaker. Both sides have deep walnut-brown patina and scattered abrasions and marks. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

#### 1803 S-255, B-14 Large Cent, AU58 Small Date, Small Fraction

3501 1803 Small Date, Small Fraction, S-255, B-14, R.1, AU58 PCGS. Luster glimmers from Liberty's hair, the wreath, and the legends. The deep walnut-brown surfaces are only moderately abraded, with two thin lines on the upper neck noted for pedigree purposes. A few specks of debris are present near STATES. Our EAC grade VF20. Population: 24 in 58 (1 in 58+), 33 finer (10/19). NGC ID# 224G, PCGS# 36380 Base PCGS# 1482

## 1803 S-260 Cent, Near-Mint Small Date, Large Fraction CAC, Old Green Label Holder

3502 1803 Small Date, Large Fraction, S-260, B-19, R.1, AU58 PCGS. CAC. Breen Die State III. A late die state with buckling apparent above the 3 in the date. This charming Borderline Uncirculated Draped Bust type coin displays light wear on Liberty's forehead and shoulder. Primarily golden-brown, though hints of gunmetal toning visit portions of the left obverse. Void of reportable contact, and encased in an old green label holder. Our EAC grade AU50. CAC: 10 in 58, 23 finer (9/19). NGC ID# 224G, PCGS# 36404 Base PCGS# 1485

3503 1813 S-293, B-1, R.2, VF35 PCGS. Exceptional olive-brown surfaces show trivial marks of no consequence on this lovely Choice VF 1813 cent. The left obverse and right reverse borders are ill-defined. This is a scarce date among the few Classic head large cent issues. Our EAC grade VF25.

From The Spring Creek Collection, Part I. NGC ID# 224X, PCGS# 36514 Base PCGS# 1570

3504 1853 MS64 Red PCGS. Grellman Die State b. A splendid orangegold Choice cent. The stars are incomplete, but the remainder of the strike is bold. Abrasions are essentially absent, and flecks are isolated to Liberty's jaw and between stars 7 and 8. Our EAC grade MS64. Ex: Houston Money Show (Heritage, 12/2015), lot 3534. NGC ID# 226K, PCGS# 1903

## 1856 Cent, MS65 Red Newcomb-10, Upright 5 Logotype

3505 1856 Upright 5 MS65 Red PCGS. N-10, R.1. Die State b. Frosty copper-orange luster adorns this Gem, complementing a lack of mentionable abrasions. Scattered flecks on both sides are virtually unavoidable on this type in the Red color category. The strike is sharp in the centers and lacking only a trifle on select peripheral stars. Our EAC grade MS65. Population: 7 in 65 Red, 0 finer (11/19). NGC ID# 226N, PCGS# 1921

3506 1857 Large Date, N-1, R.1, MS66 Red and Brown NGC. Diagnostic die chips below the ear and on C in AMERICA are joined by a square defect between dentils below 8 to confirm the N-1 variety. Smooth, light-brown surfaces reveal plentiful underlying mint red color. The dentils are sharp, signifying an early die state, and the central strike is bold. A few of the stars are rounded (1, 10, 12, and 13) as usually seen for the Large Date variety, even in high Uncirculated grades such as this Premium Gem. We note a group of Mint-made, shallow planchet voids below EN of CENT. Our EAC grade MS63. NGC ID# 226P, PCGS# 389635 Base PCGS# 1929

#### **FLYING EAGLE CENTS**

## 1857 Flying Eagle Cent, MS65 Elusive in Higher Grades

3507 1857 MS65 PCGS. CAC. Exceptionally well detailed, this Gem Flying Eagle cent has fully brilliant surfaces with frosty goldentan luster. This is the first affordable year of small cents for the budget-minded collector. A glass reveals trivial marks and a few inconsequential carbon spots. PCGS has only certified 24 numerically finer examples. CAC: 75 in 65, 10 finer (10/19). NGC ID# 226P, PCGS# 2016

#### 1857 Flying Eagle Cent, MS65+ Bright Semiprooflike Fields

3508 1857 MS65+ NGC. CAC. The Flying Eagle cent series is one of the shortest, yet one of the most collectible, of all United States coins. Most view the 1856 cents as patterns, although the mintage was high enough to be collectible, the 1857 is the first official year of production, and the 1858 is the third and final year, and it is split into Large and Small Letters variants. This is an exceptionally attractive coin. One of the most noteworthy features are the bright semiprooflike fields on each side. The strike is generally strong with only slight softness evident on the eagle's tailfeathers. NGC ID# 226P. PCGS# 2016

#### 1858 Flying Eagle Cent, MS66 Large Letters Obverse

3509 1858 Large Letters MS66 PCGS. A light die crack connects the border to the third feather from the left on the obverse of this lovely Premium Gem that exhibits satiny tan luster. A small planchet flake is evident at the top of the reverse. Population: 48 in 66 (7 in 66+), 3 finer (11/19). NGC ID# 2277, PCGS# 2019

## **INDIAN CENTS**

3510 1859 MS65 PCGS. Always in demand by type and first-year date collectors, the 1859 copper-nickel cents represent a one-year type that ensures its ongoing popularity. This Gem example displays fire-orange borders and orange-tan centers. Marks are minimal, nor are there any bothersome carbon flecks. A single pinpoint dot of deeper toning exists below N in ONE. Scarce at the MS65 level, and rare any finer. NGC ID# 227E, PCGS# 2052

#### 1859 Laurel Wreath Cent, MS65 Green Label Holder, Green CAC

3511 1859 MS65 PCGS. CAC. Despite a mintage of more than 36 million cents, this one-year type is elusive at the Gem grade level and is rarely seen finer. Bronze-gold patina complements satiny luster on this well-struck representative. The surfaces show only inconsequential imperfections. Housed in a green label holder. CAC: 52 in 65, 17 finer (10/19).

Ex: Central States Signature (Heritage, 4/2014), lot 3012; Central States Signature (Heritage, 4/2015), lot 3162. NGC ID# 227E, PCGS# 2052

- 3512 1865 Fancy 5 MS65 Red PCGS. Bright golden-orange surfaces are free of abrasions and show only a few scattered pepper specks. The Fancy 5 1865 Indian cent has typical strike softness on the upper headdress feathers and the wreath bow, but the eye appeal is established at the Gem Red grade level. Population: 50 in 65 (2 in 65+) Red, 17 finer (11/19). NGC ID# 227N, PCGS# 2084
- 3513 1869 MS65 Brown PCGS. CAC. Much of the 6.4-million piece mintage was returned to the Mint for melting, making the 1869 a rarity in Gem or finer grades. Despite the MS65 Brown designation, this coin shows significant mint red throughout both sides. Bluishbrown overtones account for the color designation. CAC-endorsed, the coin displays a notably sharp strike and minimal marks. Population: 31 in 65 (1 in 65+) Brown, 2 finer. CAC: 13 in 65, 0 finer (10/19). NGC ID# 227T, PCGS# 2094
- 3514 1869/69 Snow-3, FS-301, MS65 Red and Brown PCGS. CAC. Gem examples of the 1869 cent survive solely by chance, with millions of the issue lost during the Mint's wholesale mass melting of bronze cents during the era. This Red and Brown Gem displays dusky-blue toning over rich mint-orange surfaces. Repunching is clearly visible on 69 of the date. CAC endorsement confirms the sharp strike and high quality surfaces, with only a few trivial ticks seen under a loupe. NGC ID# 227T, PCGS# 37475 Base PCGS# 2095
- 3515 1870 Pick-Axe, FS-303, Snow-27, MS65 Red and Brown PCGS. CAC. The distinctive die gouge of this variety, forming the shape of a pick-axe between Liberty's neck and the lowest headdress feather, earns this Cherrypickers' variety fame among Indian cent collectors. This Gem example displays a sharp strike and original, satiny copper-orange luster. A dusting of chestnut-brown toning over each side prevents a full Red designation. PCGS# 569247 Base PCGS# 2098

#### 1873 Indian Cent, MS66 Red and Brown Open 3 Date Variant

- 3516 1873 Open 3 MS66 Red and Brown PCGS. CAC. Snow-7. A prominent lump appears on Liberty's neck on this scarce variety. Mostly medium brown surfaces exhibit considerable mint red and lovely blue overtones. This might be the finest known Snow-7. Population: 9 in 66 Red and Brown, 0 finer. CAC: 5 in 66, 0 finer (11/19). NGC ID# 227Y, PCGS# 2107
- 3517 1877 XF40 PCGS. CAC. A well-detailed example of the key 1877 Indian cent, showing only light wear with localized areas of strike weakness. This piece is deeply toned chestnut-brown, giving the surfaces and almost matte appearance that does not reflect light. Nonetheless, the problem-free quality of the coin earns CAC recognition. NGC ID# 2284, PCGS# 2127
- 3518 1880 MS65 Red PCGS. Coppery-red color deepens at OF AMERICA, while traces of die clashing are seen within the wreath. A sharply struck red Gem, with scattered carbon flecks visible with a loupe. Scarce in MS65 Red despite the large mintage of nearly 39 million pieces. Population: 54 in 65 Red, 31 finer (9/19). NGC ID# 2287, PCGS# 2138
- 3519 1884 MS65 Red PCGS. CAC. A splendid orange-red Gem. The strike is sharp, and a virtual absence of contact or carbon confirms the quality. Visual imperfections are limited to a small tick on the jaw, and a fleck concealed in the wreath west of the C in CENT. Certified in an old green label holder. Population: 55 in 65 Red, 21 finer. CAC: 6 in 65, 6 finer (9/19). NGC ID# 228B, PCGS# 2150

## 1886 Cent, MS65 Red Type One, Green Label Holder

- 3520 1886 Type One MS65 Red PCGS. A splendid Gem that boasts lustrous and virtually unblemished fire-red surfaces. An aqua freckle on the wreath near 9 o'clock provides an identifier. The Longacre doubling on the obverse legend as is characteristic of Type One as the position of the lowest headdress feather between the IC in AMERICA. Housed in an old green label holder. Population: 27 in 65 Red, 7 finer (9/19). NGC ID# 228D, PCGS# 2156
- 3521 1894 MS66 Red NGC. The 1894 Indian cent, a slightly better date in circulated grades, is rare in MS66 Red. Only two Superb Gem Red coins are reported finer (11/19). This piece displays frosty pumpkin-orange luster and surfaces that are free of abrasions. The strike is well-executed, and only light pepper specks are visible with a loupe. Census: 14 in 66 (1 in 66+) Red, 1 finer (10/19). NGC ID# 228N, PCGS# 2189

#### 1895 Indian Cent, MS66+ Red Registry Set Contender

- 3522 1895 MS66+ Red PCGS. A common date in most grades, the 1895 Indian cent becomes conditionally scarce in MS66 Red, and Plus-graded pieces in this grade are rare. Moreover, higher-grade coins are out of reach for most enthusiasts. The piece offered here is vibrantly lustrous, yielding copper-red and golden-orange hues. Both sides are well-struck, and only a few microscopic pepper specks are discernible with a loupe. Population: 65 in 66 (12 in 66+) Red, 5 finer (10/19). NGC ID# 228P, PCGS# 2192
- 3523 1902 MS66+ Red PCGS. Fiery copper-orange color combines with vibrant mint luster, providing this high-end Premium Gem 1902 cent with a freshly minted appearance. The diamonds, wreath, and shield show crisp definition, and the feather tips are fairly well-struck. Fifteen finer submissions at PCGS (11/19). NGC ID# 228X, PCGS# 2213

## 1905 Cent, MS66+ Red A Rarity Any Finer

3524 1905 MS66+ Red PCGS. Lovely copper-orange, gold, and rose-red hues adorn frosty mint luster on this high-end Premium Gem Red type coin. Strike sharpness is excellent, and neither side has obvious abrasions or spotting. The 1905 is a common date in most grades, although pieces grading as fine as the present are conditionally scarce. Higher-grade examples are rare. Population: 70 in 66 (10 in 66+) Red, 3 finer (10/19). NGC ID# 2292, PCGS# 2222

#### 1906 Cent, MS66+ Red Elusive This Fine

3525 1906 MS66+ Red PCGS. A luminous copper-orange example of this late-series type coin issue, showing a bold strike and careful preservation. The 1906 is conditionally elusive in this grade, and only three finer Red coins are reported by PCGS and NGC combined. A rarity with the Plus designation. Population: 55 in 66 (5 in 66+) Red, 3 finer (10/19). NGC ID# 2293, PCGS# 2225

#### 1909-S Indian Cent, MS65 Red Above-Average Strike Sharpness

3526 1909-S MS65 Red PCGS. The 1909-S boasts the lowest mintage in the Indian cent series, even lower than the key-date 1877 (309,000 vs 852,500 pieces). Red Uncirculated examples are often available, but such coins are elusive in Gem and finer condition. This piece displays frosty copper-orange luster and has few abrasions. Only trivial signs of carbon are evident beneath a loupe. The strike is above average for the issue, particularly on the headdress feathers, which are well-defined. NGC ID# 2298, PCGS# 2240

#### PROOF INDIAN CENTS

3527 1866 PR65 Red Cameo PCGS. Bright golden-red is seen over each side of this deeply reflective proof, and there is an area of deeper crimson-red in the center of the obverse. The devices are pleasingly frosted, a bonus that provides strong cameo contrast over splendidly preserved, glassy surfaces. A few minute lint marks and a couple of planchet flakes are noted in the right obverse field. Population: 10 in 65 (1 in 65+) Cameo, 4 finer (11/19). NGC ID# 229], PCGS# 82287

## 1869 Cent, PR66 Red Cameo Razor-Sharp Cameo Rarity

- 3528 1869 PR66 Red Cameo NGC. NGC has certified a total of only 16 proof 1869 Indian cents with a Cameo designation, six Red and Brown coins and 10 Red (10/19). Only one of the Red coins is finer than the present. Razor-sharp detail complements mirrored fields and satiny devices. Rich golden-orange coloration is uniform across both sides. Census: 5 in 66 Red, 0 finer; 4 in 66 Red Cameo, 1 finer (10/19). NGC ID# 4ZW5, PCGS# 82296
- 3529 1873 Closed 3 PR66 Red and Brown NGC. All proofs are of the Close 3 type, with a reported mintage of 1,100 pieces. While many of the proofs survive, the Red and Brown population tops out at the PR66 level, where this richly colored example is tied for finest of the format at both NGC and PCGS combined. The strike is needle-sharp. Attractive blue color mingles with mint red and violet undertones for exceptional eye appeal. Census: 20 in 66 Red and Brown, 0 finer (10/19). NGC ID# 229S, PCGS# 2307
- 3530 1878 PR65 Red Cameo PCGS. A minority of the known Red proof 1878 Indian cents qualify for a Cameo designation. This piece is starkly contrasted. Although a golden-orange hue is dominant, both sides reveals wisps of lilac and mint-green in the fields when tilted beneath a light. An eye-appealing coin in all respects. Population: 16 in 65 Red Cameo, 8 finer (9/19). NGC ID# 4YVB, PCGS# 82323

- 3531 1883 PR67 Brown NGC. CAC. Snow-PR6. The 3 is lightly repunched north. Deep sea-green and ruby-red colors bathe the obverse. The reverse has a lilac border and a peach-gold center. A pristine and aesthetically pleasing high-grade specimen. Census: 19 in 67 (1 in 67★) Brown, 0 finer. CAC: 8 in 67, 0 finer (10/19). NGC ID# 842U, PCGS# 2336
- 3532 1886 Type Two PR66 Red and Brown NGC. The majority of the Type Two proof 1886 Indian cents at NGC are designated Brown. Fewer than two dozen Red and Brown coins are reported at that service, along with a lone Red coin in PR65. This Premium Gem Red and Brown example displays deeply flashy fields with pinegreen and coppery-pink hues. Neither side has mentionable strike softness. Census: 5 in 66 Red and Brown, 0 finer (10/19). NGC ID# 22A8, PCGS# 92346

#### LINCOLN CENTS

## 1909 VDB Cent, MS67+ Red Spectacular Registry-Quality Type Coin

3533 1909 VDB MS67+ Red PCGS. CAC. This plentiful first and single-year VDB Lincoln cent issue boasts of a mintage of nearly 28 million coins. Although many were saved in high grades, few can match the quality or eye appeal of this Superb Gem with added recognition from both PCGS and CAC. Fiery orange surfaces appear pristine. Mint luster glimmers across the smooth fields and pinpoint devices. The linear scratch over Lincoln's ear is on the holder, not the coin. There are two finer submissions at PCGS. CAC: 66 in 67, 0 finer (11/19). NGC ID# 22AZ, PCGS# 2425

## 1909 VDB Cent, MS67+ Red Colorful Registry-Grade Rarity CAC Endorsed

- 3534 1909 VDB MS67+ Red PCGS. CAC. The PCGS Plus designation, coupled with CAC endorsement, are important measures of quality and eye appeal at the Superb Gem level. This overtly natural 1909 VDB displays lilac highlights surrounded by vibrant, pumpkin-orange hues. Mint luster coruscates across both sides. Only a few minuscule flecks and minute marks exist on the lively, frosted surfaces. Population: 53 in 67+ Red, 2 finer. CAC: 64 in 67, 0 finer (10/19). NGC ID# 22AZ, PCGS# 2425
- 3535 1909-S VDB MS64 Red and Brown PCGS. The well-preserved original red surfaces of this attractive first-year key have mellowed to light brown in some areas. The design elements are sharply detailed and the designer's initials are bold. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 22B2, PCGS# 2427

- 3536 1909-S VDB MS64 Red and Brown PCGS. A boldly rendered, satiny near-Gem with well-balanced Red and Brown coloration. Original orange-gold luster on each side emerges from beneath a woodgrain pattern of olive-brown toning, with good eye appeal overall. Housed in an old green label holder. NGC ID# 22B2, PCGS# 2427
- 3537 1909-S VDB MS64 Red and Brown NGC. CAC. Tightly speckled blue overtones fade under bright light to reveal nearly full mint red color throughout both sides of this near-Gem 1909-S VDB. The coin is sharply struck with virtually no marks to mention, with the designer's initials boldly brought up at the lower reverse. CAC endorsement recognizes the Choice, finely grained surfaces. NGC ID# 22B2, PCGS# 2427

#### 1909-S VDB Cent, MS65 Red and Brown Attractive Color

3538 1909-S VDB MS65 Red and Brown PCGS. The collectorfavorite 1909-S VDB cent can be found in most grades, but seldom are examples offered with such attractive toning. Fuscia and violet shades around the borders meld with vibrant copper-orange centers. Uniformly strongly struck, including Mr. Brenner's initials at the lower reverse. The key to the series with a low mintage of 484,000 coins. NGC ID# 22B2, PCGS# 2427

#### 1909-S VDB Lincoln Cent, MS64 Red Original Luster, Key Date

3539 1909-S VDB MS64 Red PCGS. This Choice Mint State example is well-struck and displays consistent bronze-gold luster, characteristic of most 1909-S VDB Lincoln cents. Abrasions are minimal. Two flecks near the E in AMERICA represent minimal carbon on this piece, and eye appeal is pleasing for the grade. Ex: Long Beach Signature (Heritage, 6/2015), lot 3177. NGC ID# 22B2, PCGS# 2428

#### 1909-S VDB Cent, MS65 Red Green-Label Holder

- 3540 1909-S VDB MS65 Red PCGS. Just 484,000 of these coins were minted in San Francisco before a public outcry forced the Mint to remove designer Victor David Brenner's initials from the reverse, creating an important rarity in the Lincoln cent series. This lovely Gem is housed in a green-label PCGS holder. A glass is required to see the trivial, grade-consistent flecks on the obverse, while none are evident on the reverse. NGC ID# 22B2, PCGS# 2428
- 3541 1909-S MS66 Red NGC. CAC. The first-year, branch mint 1909-S ranks among the lowest mintage business issues of the Lincoln cent series. This high-grade example displays the bold strike, vibrant luster, unblemished surfaces, and uniform orange-gold color associated with the Premium Gem level. Housed in a former generation holder. Census: 62 in 66 (1 in 66★) Red, 6 finer. CAC: 50 in 66, 3 finer (9/19). NGC ID# 22B4, PCGS# 2434

#### 1911-S Cent, MS66 Red and Brown Scarce Early S-Mint

3542 1911-S MS66 Red and Brown PCGS. CAC. The well-preserved surfaces of this Premium Gem Lincoln cent show a mix of light brown and original red patina, with bright, satiny mint luster underneath. The design elements are sharply detailed throughout and eye appeal is outstanding. Population: 2 in 66 Red and Brown, 0 finer. CAC: 1 in 66, 0 finer (10/19). NGC ID# 22B9, PCGS# 2448

#### 1914-D Lincoln Cent, MS63 Brown Low-Mintage Series Key

3543 1914-D MS63 Brown PCGS. CAC. From a small mintage of 1.1 million pieces, the 1914-D Lincoln cent is an elusive key to the series, especially in high grade. This attractive Select specimen exhibits lightly marked, slightly granular steel-brown surfaces, with satiny mint luster shining through the patina. The design elements are sharply detailed throughout. A few hints of lilac and olive toning add to the outstanding eye appeal. NGC ID# 84BX, PCGS# 2471

## 1914-D Cent, MS64 Red Pleasing Color and Sharpness

- 3544 1914-D MS64 Red PCGS. A sharp example, satiny with burntorange coloration. The surfaces appear to be original, and a few flecks on each side offer a testament to that conclusion. No distracting abrasions are visible. The key date status of the 1914-D earns it popularity in all grades, although series specialists often prefer Red Mint State pieces, which are in the minority. NGC ID# 22BH, PCGS# 2473
- 3545 1914-S MS64+ Red PCGS. CAC. A lovely orange-gold representative of an early and conditionally rare branch mint issue. A lens reveals a few minuscule obverse flecks. The strike is good save for blending near the top of the O in ONE. The dual honors of CAC endorsement and the PCGS Plus designation are important recommendations for this high-end Choice Uncirculated 1914-S. Population: 137 in 64 (8 in 64+) Red, 53 finer. CAC: 12 in 64, 8 finer (10/19). NGC ID# 22BJ, PCGS# 2476
- 3546 1919-D MS65+ Red PCGS. An impressively sharp coin, highend for the Gem grade level with vibrant copper-orange and golden luster. A loupe reveals scattered light flecks, none of which are out of line for the grade. Finer Red 1919-D Lincoln cents are rare. Population: 81 in 65 (8 in 65+) Red, 21 finer (11/19). NGC ID# 22BZ, PCGS# 2518
- 3547 1922 No D, Strong Reverse, FS-401, AU50 PCGS. CAC. Die Pair 2, showing a strong reverse and sharp second 2 in the date. The mintmark is entirely effaced on this variety, which is worth substantially more than the many Weak D cents known. This example is satiny with smooth chocolate-brown surfaces. The CAC green label is well-earned. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

## 1922 No D Cent, Unc Details FS-401, Strong Reverse

- 3548 1922 No D, Strong Reverse, FS-401 Cleaned NGC Details. Unc. Die Pair 2. This is a clear Die Pair 2 coin, showing bold reverse detail and a sharp second 2 in the date. Detail is strong overall, with no wear apparent, although the brass-gold and chestnut-brown color reveals slightly muted surfaces that appear to have been lightly cleaned. An accessible Unc-level example of this important *Guide Book* variety.
- 3549 1924 MS66+ Red PCGS. CAC. This vibrantly lustrous, highend Red example of the 1924 Lincoln cent displays sharp motifs and largely carbon-free surfaces. Most of each side displays vivid pumpkin-orange color, save for a dash of silvery-rose luster at 12 o'clock on each side. Rare so fine with a Plus designation, and even rarer in higher grades. Population: 22 in 66+ Red, 12 finer. CAC: 26 in 66, 1 finer (11/19). NGC ID# 22CC, PCGS# 2551

- 3550 1924-S MS65 Red and Brown PCGS. This satiny Gem Red and Brown coin displays blended copper-red and auburn-brown patina, with well-struck design elements. No distracting abrasions or spots are observed. Neither PCGS nor NGC have certified a finer example in Red and Brown. Population: 39 in 65 Red and Brown, 0 finer (10/19). NGC ID# 22CE, PCGS# 2556
- 3551 1928-S MS65 Red and Brown PCGS. CAC. Mint red predominates at the margins and surrounds the raised devices, while bluish-brown shades occupy the high points and confirm the Red and Brown designation. Gems are scarce, and finer examples number in the single digits. This CAC-endorsed piece will be an upgrade for many top Registry Set collections, both in technical quality and eye appeal. Population: 20 in 65 (3 in 65+) Red and Brown, 1 finer. CAC: 6 in 65, 1 finer (10/19). NGC ID# 22CT, PCGS# 2592
- 3552 1931-D MS66 Red PCGS. Original red color dominates the fields and yields to a few reddish-brown accents. The 1931-D is far less available than its low-mintage 1931-S counterpart, a situation that is clearly illustrated by its certified population at the Premium Gem grade. Nearly mark-free surfaces are well-struck and softly lustrous. Housed in an old green label holder. Population: 58 in 66 (6 in 66+) Red, 1 finer (9/19). NGC ID# 22D3, PCGS# 2617
- 3553 1934 MS68 Red PCGS. A spectacular fire-orange Superb Gem with unrivaled satin luster and sharp relief elements. No carbon spotting is visible. The 1934 Lincoln cent's availability declines at the Superb Gem Red level, and MS68 Red coins are rare. This is among the finest pieces certified and a Registry Set contender. Population: 28 in 68 Red, 0 finer (10/19). NGC ID# 22D9, PCGS# 2635

## 1943-S Steel Cent, MS68 Tied for the Finest Certified

- 3554 1943-S MS68 PCGS. CAC. Nearly 200 million steel cents were coined at San Francisco in 1943, yet only 169 of those have survived in MS68 condition according to PCGS and NGC (10/19). Less than half of that total also carries the CAC endorsement. This amazing piece is boldly defined with satiny gray luster that exhibits hints of pale blue. A stunning piece for the advanced collector. CAC: 60 in 68, 0 finer (10/19). NGC ID# 22E8, PCGS# 2717
- 3555 1955 Doubled Die Obverse, FS-101, AU55 PCGS. CAC. A splendid example for the grade, showing light chestnut-brown surfaces with an orange undertone, complementing bold relief details that have little wear. Awarded a CAC green sticker and housed in an old green label holder. The ideal collector coin for this variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3556 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC. An attractive Select example of this extremely popular *Guide Book* and *Cherrypickers* variety, with well-detailed design elements and lightly marked olive-brown surfaces that retain much original mint luster, under the patina. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2875
- 3557 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS. The most famous doubled-die error of the Lincoln cent series, but by no means the rarest, except by demand. No self-respecting Lincoln cent collection can be without the famous Mint faux pas. This is a glossy MS63 Brown example, with traces of Mint red at the borders. A crisp strike exceeds the expected sharpness, while a few small marks and carbons decide the assigned grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

#### 1955 FS-101 Cent, MS64 Brown Doubled Die Obverse

3558 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC. The famously broad spread on the obverse legends instantaneously identifies this popular *Guide Book* variety. Smooth, glossy Brown surfaces will delight the most discerning collector. Steel accents adorn each side. Reverse definition is excellent, while the portrait exhibits unimportant and expected softness. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

## 1958-D Lincoln Cent, MS67+ Red Among the Finest Certified

3559 1958-D MS67+ Red PCGS. CAC. The 1958-D Lincoln cent represents the final year of the Wheat Ears reverse. Examples can be found in all grades up to the MS67 level with little trouble, but none have been certified in higher numeric grades (10/19). This Plus-graded Superb Gem exhibits impeccably preserved original red surfaces, with vibrant mint luster on both sides. Overall eye appeal is terrific. NGC ID# 22FR, PCGS# 2851

#### 1992-D Lincoln Cent, MS62 Red and Brown Close AM, FS-901 Variety

3560 1992-D Close AM, FS-901, MS62 Red and Brown PCGS. Officially, the Mint did not adopt the Close AM configuration of AMERICA until 1993 cents were struck, begging the question of why a Close AM was found on a select few 1992 Philadelphia and Denver-minted business strikes. In addition, the designer's initials "FG" are located farther from the lower right side of the Lincoln Memorial building than on normal 1992 cents. Many have speculated the Close AM cents were part of a test run for die changes planned for 1993. Philadelphia coins with the Close AM are extremely rare, while the D-Mint coins of the modified legend are slightly more available — yet only about 15 examples are known. Listed as #37 in the Scott Schechter and Jeff Garrett reference 100 Greatest U.S. Modern Coins. A necessity for the major variety Registry Set. Population: 3 in 62 Red and Brown, 4 finer (10/19). Ex: ANA Signature (Heritage, 8/2015), lot 3282; Long Beach Signature (Heritage, 2/2016), lot 3546. PCGS# 391428 Base PCGS# 83100

#### PROOF LINCOLN CENTS

- 3561 1909 PR66+ Brown PCGS. This amazing matte proof first-year Lincoln cent has rich and highly lustrous brown surfaces beneath a wonderful display of sky-blue and lavender toning on each side. Population: 26 in 66 (3 in 66+) Brown, 1 finer (10/19). NGC ID# 22KS, PCGS# 3303
- 3562 1909 PR66 Red and Brown NGC. A spectacular Premium Gem example of this first-year matte proof issue, with lustrous original red surfaces that have mellowed to light chestnut in a few areas. The design elements are sharply detailed throughout. Census: 20 in 66 Red and Brown, 2 finer (10/19). NGC ID# 22KS, PCGS# 3304
- 3563 1911 PR66+ Red and Brown NGC. The Mint struck 1,725 matte proof Lincoln cents in 1911. This beautifully textured Premium Gem features golden-brown surfaces with copper and bluish accents. Victor David Brenner's portrait of Lincoln is remarkably strong. Census: 15 in 66 (1 in 66+) Red and Brown, 1 finer in this category (9/19). NGC ID# 22KU, PCGS# 3310
- 3564 1911 PR65 Red PCGS. The original red surfaces of this delightful Gem are impeccably preserved, with vibrant mint luster on both sides. The design elements are sharply detailed throughout and overall eye appeal is outstanding. Population: 23 in 65 Red, 14 finer (10/19). NGC ID# 22KU, PCGS# 3311

## 1912 Cent, PR67 Brown Among the Finest Proofs Certified

3565 1912 PR67 Brown NGC. NGC and PCGS combined have seen only nine proof 1912 Lincoln cents in Superb Gem condition, including seven Brown coins and two Red and Brown pieces (10/19). This Brown example is fully struck and luminous, with thick matte luster. Rich violet and steel-blue hues adorn each side. Eye appeal is outstanding. Census: 4 in 67 Brown, 0 finer; 2 in 67 Red and Brown, 0 finer (10/19). NGC ID# 22KV, PCGS# 3312

3566 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC. Fully polished dies were used to strike this all-brilliant cent, one of 5,569 proofs issued (some with Satin Finish, and the rest as Brilliant Finish proofs). Vibrant, flame-orange color occupies both sides, interrupted by a few pale lilac accents on each side. Flashy mirrors surround equally reflective devices. CAC endorsement speaks to the quality surfaces and sharp strike. CAC: 56 in 65, 31 finer (10/19). NGC ID# 22L3, PCGS# 3335

## 1936 Cent, PR66 Red Brilliant Finish Registry Candidate

3567 1936 Type Two — Brilliant Finish PR66 Red PCGS. Fire-orange coloration adorns the liquidlike fields of this high-end Red Brilliant proof. There is a hint of contrast on the obverse, but it falls shy of earning a Cameo designation. A few microscopic pepper specks are visible beneath a loupe. Finer Red coins are rare. Population: 72 in 66 (5 in 66+) Red, 2 finer; 4 in 66 Red Cameo, 1 finer (10/19). NGC ID# 22L3, PCGS# 3335

## 1940 Lincoln Cent, PR67 Red Exemplary Registry Coin

3568 1940 PR67 Red PCGS. This is an impressive Superb Gem proof, showing rich pumpkin-orange color and flashy, deeply mirrored fields. We cannot find any troublesome hairlines or handling marks whatsoever on the gleaming, vibrant-red surfaces. The 1940 proof is rare in PR67 condition and unknown finer at PCGS in any color or format. Population: 22 in 67 Red, 0 finer (10/19). NGC ID# 22L7, PCGS# 3347

3569 1960 Small Over Large Date, FS-102, PR68 Red PCGS. FS-102 is actually a doubled die obverse, but this popular *Cherrypickers'* variety is best known as a Small Date Over Large Date proof. The design elements are sharply detailed throughout and the fields are deeply mirrored. The original red surfaces are free of visible flaws and eye appeal is terrific. Population: 12 in 68 Red, 1 finer (11/19). NGC ID# 22LL, PCGS# 38163 Base PCGS# 3413

#### 1990 No S Cent, PR69 Red Ultra Cameo Popular Modern Proof Mint Error

3570 1990 No S, FS-101, PR69 Red Ultra Cameo NGC. A number of proof cents were struck in 1990 at the San Francisco Mint with a die that lacked a mintmark. The coins were unknowingly released to the public in proof sets and were later discovered. Most No S coins have since been broken out of their proof sets for certification, although occasionally an intact set comes to market. This No S proof is by itself here, certified by NGC in near-flawless condition. Each side is sharp and starkly contrasted, yielding rich copper-pink color and dramatic eye appeal. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

#### TWO CENT PIECES

- 3571 1864 Small Motto MS64 Red and Brown PCGS. CAC. A lovely example of this scarce and highly sought-after key issue. An unknown, but small, number of coins were struck of this variety. This piece is free from any blemishes and has retained more than half of its original mint red color. Seldom offered with CAC endorsement. NGC ID# 22N8, PCGS# 3580
- 3572 1865 MS66 Red PCGS. Second year of issue and struck in a year when the two cent piece still enjoyed a generous production run. In this case, 13.6 million pieces were minted. This is a full red coin that has retained its unmellowed mint luster since it was encapsulated in an early, first-generation PCGS holder. Population: 56 in 66 (4 in 66+) Red, 2 finer (10/19). NGC ID# 22NA, PCGS# 3584

#### 1869 Two Cent, MS66 Red Rarely Seen This Fine

3573 1869 MS66 Red PCGS. Save for a few splashes of reddish-violet toning around IN GOD WE, this Premium Gem two cent displays effusive copper-orange color. Vibrant frost heightens the eye appeal. The olive leaves, shield lines, and wreath exhibit strong definition. Spindly cracks appear on each side. Two minuscule specks of aqua residue are noted on the obverse. We last handled an 1869 two cent of comparable quality all the way back in January 2016, attesting to the issue's rarity at this impressive grade level. Population: 5 in 66 (2 in 66+) Red, 1 finer (10/19). NGC ID# 22ND, PCGS# 3605

3574 1870 MS65 Red and Brown PCGS. CAC. Later dates in the two cent series (those after 1865) are far scarcer than the first two years. This lovely Gem 1870 exhibits rich, orange mint luster with light brown toning on each side. Sharply struck devices add depth to the bold eye appeal. Population: 43 in 65 (1 in 65+) Red and Brown, 7 finer. CAC: 21 in 65, 4 finer (10/19).

Ex: ANA Signature (Heritage, 8/2015), lot 3309. NGC ID# 22NE,

Ex: ANA Signature (Heritage, 8/2015), lot 3309. NGC ID# 22NE, PCGS# 3607

## 1872 Two Cent Piece, MS64 Brown Scarce, Final-Year for Circulation Strikes

3575 1872 MS64 Brown PCGS. A mere 65,000 coins were struck in 1872, the final year of circulation-strike two cent pieces. The date is scarce across the board, particularly in near-Gem and Gem conditions. This is a pleasing Choice Uncirculated example, with reddish undertones contributing to the overall chestnut-brown color. Semireflective fields surround sharply struck devices for strong eye appeal. Population: 12 in 64 Brown, 6 finer (10/19). NGC ID# 22NG, PCGS# 3612

#### PROOF TWO CENT PIECES

#### 1864 Two Cent, PR66 Red and Brown Large Motto, Fantastic Eye Appeal

3576 1864 Large Motto PR66 Red and Brown PCGS. CAC. At least 100 of these Large Motto two cent proofs from the first year of issue were manufactured. Although no formal designation was awarded, this piece displays noticeable contrast between the devices and flashy fields. Gorgeous copper-orange color dominates with violet accents. Population: 14 in 66 Red and Brown, 1 finer. CAC: 8 in 66, 0 finer (10/19). NGC ID# 274T, PCGS# 3622

### 1866 Two Cent, PR66 Red and Brown Important CAC Example

3577 1866 PR66 Red and Brown PCGS. CAC. Ex: 1994 Collection. Subtle cameo contrast appears on each side of this Premium Gem proof, although a hint of chestnut, olive, and lilac toning in the fields on each side prevents both a Cameo designation and a full Red grade. The strike is sharp, and only a few microscopic pepper specks appear beneath a loupe. Population: 28 in 66 (5 in 66+) Red and Brown, 0 finer. CAC: 21 in 66, 0 finer (10/19). NGC ID# 274V, PCGS# 3631

#### 1872 Two Cent, PR66 Red Reflective Fields

3578 1872 PR66 Red NGC. This piece is tied for the finest proof 1872 two cent piece in the Red color category, and no Red Cameo examples have been reported by NGC (11/19). Sharp, satiny devices stand in contrast to mirrored fields, while the whole of both sides displays peach-orange coloration. Census: 8 in 66 Red, 0 finer (11/19). NGC ID# 2752, PCGS# 3650

#### THREE CENT SILVER

- 3579 1851 MS66+ PCGS. This Plus-graded Premium Gem represents the first year of the three cent denomination. The design elements are sharply detailed, with light clash marks on both sides. The virtually pristine, lustrous surfaces show a few subtle highlights of lavender and pale gold toning. PCGS has graded 27 numerically finer examples (11/19). NGC ID# 22YX, PCGS# 3664
- 3580 1851-O MS64+ PCGS. An impressive Choice example of this popular branch mint issue, with well-detailed design elements and some light clash marks on both sides. The well-preserved, lustrous surfaces are blanketed in shades of lavender-gray and pale gold toning. NGC ID# 22YY, PCGS# 3665

#### 1853 Three Cent Silver, MS65 Well-Preserved Brilliant Surfaces

3581 1853 MS65 PCGS. CAC. The 1853 silver three cent piece claims a large mintage of 11.4 million pieces, but the issue becomes scarce at the MS65 grade level. This attractive Gem exhibits sharply detailed design elements, with a few faint clash marks on both sides. The well-preserved brilliant surfaces radiate vibrant satiny mint luster throughout. NGC ID# 22Z2, PCGS# 3667

## 1853 Three Cent Silver, MS67 Registry Grade Example

3582 1853 MS67 PCGS. This delightful Superb Gem three cent piece exhibits well-detailed design elements, with just a touch of softness on some stars. A spidery die crack is evident on the reverse from the rim at 2 o'clock to the numeral III. The impeccably preserved surfaces radiate vibrant mint luster, with highlights of emerald-green and lavender toning. Population: 15 in 67 (3 in 67+), 0 finer (11/19). NGC ID# 22Z2, PCGS# 3667

#### 1853 Three Cent Silver, MS67+ Tied for Finest Certified

3583 MS67+ NGC. This Plus-graded Superb Gem three cent piece is tied with three coins at PCGS and one other example at NGC for the title of finest certified (10/19). This coin exhibits sharply detailed design elements and virtually pristine brilliant surfaces that show some microscopic amber alloy spots on close inspection with a loupe. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 22Z2, PCGS# 3667

#### 1858 Three Cent Silver, MS66 Elusive Type Two Design

3584 1858 MS66 PCGS. Type Two three cent silver pieces were a short-lived series that was produced from 1854 through 1858. They are also the most difficult to locate in high grades. This holds true also for the 1858 even though some 1.6 million pieces were produced that year. This piece retains much of the original mint brilliance with a light overlay of golden-russet patina. Sharply struck with almost complete definition on the leaves on the reverse. Population: 53 in 66 (5 in 66+), 14 finer (10/19). NGC ID# 2227, PCGS# 3674

## 1862/1 Three Cent Silver, MS67 Frosty With Peripheral Toning, FS-301

3585 1862/1 FS-301 MS67 NGC. Diagnostics include the crack through the 1 and the tine off the lowest point of the star. According to the Cherrypicker's Guide: "The overdate is believed to be due more to economy (the Mint having used a good die [from] another year) than to error." This peripherally toned, heavily clashed example is frosty and well-preserved with good detail on the shield lines, reverse, stars, and olive leaves. NGC ID# CBR7, PCGS# 38580 Base PCGS# 3681

3586 1864 AU53 PCGS. CAC. From a mintage of 12,000 pieces, this impressive AU53 specimen exhibits just a trace of wear on the strongly impressed design elements, with some prominent clash marks on the obverse. The lightly abraded surfaces are blanketed in shades of lavender-gray and sea-green toning, with traces of original mint luster underneath.

From The Spring Creek Collection, Part I. NGC ID# 22ZE, PCGS# 3684

#### PROOF THREE CENT SILVER

- 3587 1865 PR65 Cameo NGC. CAC. The lightly toned surfaces of this Gem Cameo three cent silver proof maintain considerable brilliance at the centers, accentuating field-device contrast. The coin comes from a mintage of 500 proofs, which accompanied a mere 8,000 circulation strikes in 1865. Census: 8 in 65 Cameo, 11 finer in this category. CAC: 5 in 65, 6 finer (10/19). NGC ID# 27CB, PCGS# 83715
- 3588 1869 PR65 NGC. This spectacular Gem proof example displays sharply detailed design elements and well-preserved surfaces. The hazily reflective fields show highlights of violet and burnt-orange toning, with outstanding eye appeal. Census: 40 in 65, 26 finer (10/19). NGC ID# 22ZR, PCGS# 3719

## 1869 Three Cent Silver, PR67 Only 600 Pieces Struck

- 3589 1869 PR67 NGC. From a small mintage of 600 pieces, the 1869 proof silver three cent piece is a condition rarity at the PR67 level, and finer coins are virtually unobtainable. This delightful Superb Gem proof exhibits sharply detailed design elements and deeply reflective fields throughout. The immaculate surfaces are blanketed in vivid shades of emerald-green and cerulean-blue toning. Census: 9 in 67 (1 in 67+★), 0 finer (10/19). NGC ID# 22ZR, PCGS# 3719
- 3590 1871 PR66 NGC. A bright light reveals rainbow iridescence at the obverse border and throughout the well-preserved reverse surfaces, while a sharp strike attend both sides. An adequate mintage of 960 proofs a fair number of Premium Gem or finer examples, although few can match the original toning and high surface quality of this glittering proof. Census: 20 in 66 (1 in 66★), 9 finer (10/19). NGC ID# 27CG, PCGS# 3722

#### PROOF THREE CENT NICKELS

## 1865 Three Cent Nickel, PR65 Deep Cameo Starkly Contrasted Rarity

3591 1865 PR65 Deep Cameo PCGS. A fully struck, starkly contrasted Deep Cameo proof with Gem-quality surfaces and near-brilliant silver color. The proof 1865 three cent nickel is scarce in Deep Cameo grades, and such coins are rare finer than the present example. Eye appeal is outstanding. Population: 7 in 65 Deep Cameo, 13 finer (10/19). NGC ID# 52MV, PCGS# 93761

3592 1866 PR66 Ultra Cameo NGC. From an estimated mintage of 725 pieces, the proof 1866 three cent nickel is seldom encountered with Ultra Cameo surfaces. This spectacular Premium Gem exhibits detailed design elements on the obverse, but the reverse shows some incomplete detail, due to lapping. The impeccably preserved surfaces include deeply mirrored fields that contrast profoundly with the frosty devices. Census: 9 in 66 Ultra Cameo (2 in 66★), 9 finer (10/19). NGC ID# 275L, PCGS# 93762

#### 1877 Three Cent Nickel, PR65 Ultra Cameo Rarely Offered as an Ultra Cameo

3593 1877 PR65 Ultra Cameo NGC. Needle-sharp definition on the devices complements softly frosted luster, while the fields contrast with reflectivity. Neither side shows toning, and the preservation is outstanding for the grade. The 1877 three cent nickel is a proof-only issue, boasting a limited mintage of 900 coins. Census: 2 in 65 Ultra Cameo, 0 finer (10/19). NGC ID# 275X, PCGS# 93773

## 1879 Three Cent Nickel, PR68 Top-Grade Registry Coin

3594 1879 PR68 PCGS. Available in lower grades, the 1879 proof three cent nickel is scarce in Superb Gem condition, and only a handful of pieces are known in PR68. This top-grade Registry coin displays fully struck design elements and a hint of cameo contrast. Delicate iridescence adorns the surfaces. Eye appeal is outstanding. Population: 4 in 68, 0 finer (10/19). NGC ID# 275Z, PCGS# 3775

#### 1885 Three Cent Nickel, PR67+ Cameo Among the Finest Cameos at CAC

3595 1885 PR67+ Cameo PCGS. CAC. Cameo proof 1885 three cent nickels are rarely offered this fine, especially with CAC endorsement. PCGS lists three Deep Cameo coins, but they grade only PR66. This high-end Superb Gem displays full sharpness and outstanding cameo contrast. The silvery surfaces are untouched. Population: 16 in 67 (2 in 67+) Cameo, 1 finer. CAC: 18 in 67, 0 finer (10/19). NGC ID# 2767, PCGS# 83781

#### SHIELD NICKELS

#### 1866 Rays Shield Nickel, MS66 First Year of Nickel Coinage

3596 1866 Rays MS66 PCGS. Impressive cartwheel sheen and dusky caramel-gold toning confirm the originality of this unabraded and typically struck Premium Gem. A scarce type coin in such lofty grade, since the Rays design was used for only the initial two years of the nickel five cent piece. This piece is tied for the finest that PCGS has certified. Population: 57 in 66 (1 in 66+), 0 finer (10/19). NGC ID# 22NX, PCGS# 3790

3597 1867 Rays MS65 NGC. The date is repunched, most visibly at 1 and 67, with a die crack from the left edge of 1 to the shield. Numerous repunched dates are known for the 1867 Rays nickel. Most are shown in *Cherrypickers*', although this exact variety is not. Lustrous and partially reflective fields surround sharply struck devices, with nearly mark-free Gem surfaces and pleasing nickelgray color. Census: 54 in 65 (1 in 65+), 14 finer (10/19). NGC ID# 22NY, PCGS# 3791

## 1883 Shield Nickel, MS67 Colorful, Virtually Flawless Example

3598 1883 MS67 PCGS. CAC. Eye appeal is unrivaled for this final-year Shield nickel, and so is its technical grade. A medley of pastel tones colors the entirety of each side. The coin is fully struck and appears flawless. Population: 22 in 67 (2 in 67+), 0 finer. CAC: 13 in 67, 0 finer (10/19). NGC ID# 22PH, PCGS# 3813

#### PROOF SHIELD NICKELS

#### 1866 Rays Nickel, PR66 Cameo Important First-Year Issue

3599 1866 Rays PR66 Cameo NGC. The Philadelphia Mint employed the nickel composition for the five cent coinage for the first time in 1866, having had some experience with the copper-nickel cent during the previous decade. The composition proved challenging for Mint employees, and many poorly produced pieces survive. This Premium Gem Cameo proof is an exception, having full design definition, brilliant mirrored fields, and strong field-to-device contrast. An outstanding first-year nickel coinage for the advanced collector. Census: 27 in 66 Cameo (2 in 66★), 13 finer (10/19). NGC ID# 276G, PCGS# 83817

## 1867 No Rays Shield Nickel, PR66 Cameo Well-Contrasted and Sharp

3600 1867 No Rays PR66 Cameo NGC. Most proof 1867 Shield nickels were struck after the rays were removed from the reverse design. Nonetheless, even examples of this issue are rare in Premium Gem Cameo condition. The present coin displays full strike sharpness and light golden toning, with good contrast against the mirrored fields. Census: 14 in 66 Cameo (1 in 66+, 3 in 66★), 3 finer; 2 in 66 (1 in 66★) Ultra Cameo, 1 finer (10/19). NGC ID# 5EB6, PCGS# 83821

#### 1873 Shield Nickel, PR67 Cameo Closed 3

3601 1873 Closed 3 PR67 Cameo NGC. This high-grade example was struck on a well-produced planchet that shows very little granularity. The mintage for the 1873 proof nickel is uncertain, but estimated widely between 1,100 and 1,650 pieces. All are of the Closed 3 variant. The deeply mirrored fields contrast nicely against the softly frosted devices, and each side shows just the slightest bit of iridescence over the otherwise brilliant finish. Census: 5 in 67 Cameo (1 in 67★), 0 finer (10/19).

Ex: Central States Signature (Heritage, 4/2011), lot 3029. NGC ID# 276P, PCGS# 83827

3602 1876 PR67 Cameo NGC. Delicate tints of almond-gold coloration deny absolute brilliance, but this Superb Gem has dazzling field reflectivity and outstanding preservation. Minimal carbon is limited to the scrollwork atop the shield. Superb Gem representatives with designated Cameo contrast are very rare despite a considerable mintage of 1,150 proofs. Census: 8 in 67 Cameo (1 in 67+), 1 finer (10/19). NGC ID# 276T, PCGS# 83830

#### 1878 Shield Nickel, PR67 Cameo Fully Mirrored Fields

3603 1878 PR67 Cameo PCGS. The proof-only 1878 Shield nickels are usually found with little mirroring or contrast. Less than 7% of all PCGS submissions are rated as Cameo and only five pieces have earned the Deep Cameo designation. This Superb Gem, with strong field-to-device contrast exhibits delicate gold toning on both sides. Population: 9 in 67 (1 in 67+) Cameo, 0 finer (10/19). NGC ID# 276V, PCGS# 83832

## 1879/8 Shield Nickel, PR65+ Deep Cameo Only a Few Deep Cameos Are Known

3604 1879/8 PR65+ Deep Cameo PCGS. CAC. One of only two Deep Cameo examples of the 1879/8 proof Shield nickel certified at PCGS. That service has not seen a single normal date proof with Deep Cameo surfaces. NGC lists a lone Ultra Cameo, graded PR66 (11/19) This piece is fully struck and brilliant, showing deep mirroring in the fields and strong contrast on both sides. Population: 1 in 65 (1 in 65+) Deep Cameo, 1 finer. CAC: 1 in 65, 0 finer (11/19). NGC ID# 3LYZ, PCGS# 93834

3605 1881 PR67+ Cameo NGC. NGC has certified only a single Ultra Cameo 1881 proof Shield nickel, graded PR66. This PR67+ Cameo is finer. The 1881 proof is rare this high grade. The present coin displays brilliant, starkly contrasted devices and liquidlike mirroring in the fields. A loupe reveals some planchet roughness in the fields that was not fully smoothed out by the polished dies. Census: 27 in 67 Cameo (3 in 67+, 1 in 67★), 1 finer (10/19). NGC ID# 276X, PCGS# 83836

3606 1883 PR67 Cameo NGC. CAC. All 1883 proof Shield nickels were struck with non-overdated dies (unlike the 1883 Shield nickel circulation strikes, which have multiple 3 /2 varieties and other overdates). This deeply mirrored and sharply struck Superb Gem proof radiates lilac and rose toning from smooth, unmarked glassy fields. Frosted devices stand out against the lovely patina. Immaculate surfaces show only a few tiny, faint-gray flecks. Census: 15 in 67 Cameo (1 in 67+), 0 finer. CAC: 10 in 67, 0 finer (10/19). NGC ID# 276Z, PCGS# 83838

#### LIBERTY NICKELS

## 1883 With Cents Liberty Nickel, MS66+ CAC-Approved Type Coin

3607 1883 With Cents MS66+ PCGS. CAC. The last of three major nickel types struck in 1883, the With Cents Liberty issue is moderately elusive in MS66 and it is rare finer. This Plus-graded CAC coin displays traces of light golden color but is mainly brilliant. Luster is vibrant and beautifully preserved, and the only notable strike weakness is seen on the corn ear to the left of the wreath bow. PCGS lists 17 Superb Gems finer (9/19). NGC ID# 22PH, PCGS# 3844

3608 1903 MS67 NGC. This spectacular Superb Gem exhibits sharply detailed design elements in most areas, with just a trace of softness on the lower wreath. The impeccably preserved surfaces radiate vibrant mint luster, under delicate shades of lavender-gray and pale gold toning. Overall eye appeal is terrific. Census: 4 in 67, 0 finer (10/19). NGC ID# 277E, PCGS# 3864

#### PROOF LIBERTY NICKELS

## 1884 Nickel, PR67 Cameo Sharp and Starkly Contrasted

3609 1884 PR67 Cameo PCGS. The circulation strike of 1884 is one of the key dates in the series, and many date collectors choose proofs as a more affordable alternative in high grade. This Superb Gem Cameo proof displays stark silver-white surfaces that are well-contrasted. The razor-sharp strike of the devices is an added appeal. Population: 20 in 67 (6 in 67+) Cameo, 0 finer (10/19). NGC ID# 22PV, PCGS# 83882

3610 1886 PR67 PCGS. A blizzard of reddish-tan speckles forms the natural patina of this Superb Gem proof nickel. The 1886 is scarce in circulation strike format, trailing only the 1885 in that regard, but in proof format both dates are well represented in the series except in the highest proof grades. This original PR67 example is sharply struck with essentially full details. Reflective fields provide substantial mirroring beneath the toning. Population: 35 in 67 (2 in 67+), 1 finer (9/19). NGC ID# 277U, PCGS# 3884

## 1886 Liberty Nickel, PR67+ Key Date in High Grade

3611 1886 PR67+ NGC. Date collectors often rely on proof examples to take the place of the low-mintage business-strike 1886 Liberty nickel in their collections. This Plus-graded Superb Gem exhibits sharply detailed design elements and hazily reflective fields, with a lintmark at the first S in STATES that can serve as a pedigree marker. Census: 19 in 67 (1 in 67+, 3 in 67★, 1 in 67+★), 0 finer (10/19). NGC ID# 277U. PCGS# 3884

## 1893 Liberty Nickel, PR67+ Superlative Eye Appeal, CAC Endorsed

3612 1893 PR67+ PCGS. CAC. In a year of national recession, just 2,195 proofs were issued. This visually impressive 1893 proof may very well be the finest non-cameo at PCGS, where it is tied with one other Plus-graded coin. CAC endorsement is an important feather in Liberty's tiara, providing an additional level of approval. Razor sharp devices are set against strongly mirrored fields, with an overall reddish-gold patina that imparts exceptional eye appeal. Population: 4 in 67 (2 in 67+), 0 finer. CAC: 4 in 67, 0 finer (9/19). NGC ID# 2783, PCGS# 3891

## 1896 Liberty Nickel, PR67 Top-Tier Proof, Sharp and Attractive

3613 1896 PR67 PCGS. With a mintage that slipped below the 2,000-piece threshold, just 1,862 proofs were struck in 1896. This Superb Gem example is tied for the finest certified at either service, with a dusting of faint, almond-gold toning and an exceptionally sharp strike. The coin is mark-free save for a microscopic nick above the V. No proofs of any format exceed the PR67 numeric level at either service, although PCGS has seen two PR67+ pieces (9/19). NGC ID# 2786. PCGS# 3894

## 1902 Liberty Nickel, PR67+ Scarce CAC-Approved Proof

- 3614 1902 PR67+ PCGS. CAC. A conditionally rare top-grade proof 1902 Liberty nickel with CAC endorsement. The fields are deeply mirrored around satiny devices, yielding delicate green and rose hues when tilted beneath a light. Eye appeal is pleasing. The corn ear to the left of the wreath bow is slightly soft as usual. Population: 27 in 67 (7 in 67+), 0 finer; 10 in 67 Cameo, 0 finer. CAC: 15 in 67, 0 finer (10/19). NGC ID# 278C, PCGS# 3900
- 3615 1906 PR67 PCGS. CAC. Proofs are surprisingly scarce for this 20th century issue, but usually deeply mirrored and attractive. This Superb Gem proof fits that description, with a needle-sharp strike and an unusual amount of white-on-black contrast when viewed at an angle. CAC endorsement is an important adjunct. Population: 20 in 67 (4 in 67+), 0 finer. CAC: 10 in 67, 0 finer (10/19). NGC ID# 278G, PCGS# 3904

## 1908 Liberty Nickel, PR68 Among the Finest Certified

- 3616 1908 PR68 NGC. This remarkably high-end proof is among the finest 1908 coins reported. It is fully struck and reflective, yielding delicate golden, lilac, and iridescent toning. A hint of cameo contrast is apparent on each side. The 1908 proof is rare this fine, with only a handful of pieces known. Census: 5 in 68 (1 in 68★), 0 finer (10/19). NGC ID# 278J, PCGS# 3906
- 3617 1910 PR67 Cameo PCGS. A nominal mintage of 2,405 proof Liberty nickels was accomplished in 1910, and few examples can match the quality of this extraordinary Superb Gem. This coin displays razor-sharp definition on all design elements, which contrast boldly with the pristine fields. Like many proofs of this date, the fields show a combination of frosty luster and reflective mirrors. Population: 30 in 67 Cameo (7 in 67+ Cameo), 5 finer (10/19). NGC ID# 278L, PCGS# 83908

#### **BUFFALO NICKELS**

#### 1913-S Buffalo Nickel, MS67+ Single-Year Type One Design

- 3618 1913-S Type One MS67+ NGC. The Type One design, with the bison standing on a mound, was short-lived and was produced for only part of the first year before being changed to the design with the bison standing on a prairie. This Superb Gem has highly lustrous golden-gray surfaces with traces of blue and violet toning. Census: 23 in 67 (6 in 67+, 1 in 67★), 2 finer (10/19). NGC ID# 22PY, PCGS# 3917
- 3619 1913-D Type Two MS66+ NGC. Beautiful matte luster and intricate sharpness on this Type Two 1913-D Buffalo nickel gives it the appearance of a proof, compounded by the fact that there is no die erosion in the fields, and the rims are mostly squared. Preventing the conclusion of this piece as a branch mint proof are a few hair-thin die cracks at the central obverse and just a hint of strike weakness on the bison's shoulder. Both sides have uniform olive-gold toning and are devoid of abrasions. Census: 17 in 66 (3 in 66+), 10 finer (10/19). NGC ID# 254M, PCGS# 3922

## 1913-S Type Two Nickel, MS66 Elegant Patina, High-Gloss Luster

- 3620 1913-S Type Two MS66 PCGS. With the lowest-mintage of the first-year Buffalo nickel issues whether Type One or Type Two the 1913-S Type Two nickel was challenging from day one. Barely more than 1.2 million pieces were struck. This brilliant, well-preserved Premium Gem displays strong central detail with softness around the borders. Flecks of golden color gather at the margins, while flashy mint luster confirms the glossy Type Two finish. Population: 56 in 66 (6 in 66+), 8 finer (9/19). NGC ID# 22R3, PCGS# 3923
- 3621 1915 MS67 NGC. Sharply struck with nearly flawless, mark-free surfaces, this Superb Gem is seldom exceeded among the top-graded 1915 pieces. The issue was generally well-produced by the Philadelphia Mint, struck with properly spaced dies that seldom show excess wear. This example glows with lustrous blue, sea-green, and gold colors throughout both sides for outstanding eye appeal. Census: 10 in 67 (1 in 67+), 1 finer (10/19). NGC ID# 22R7, PCGS# 3927
- 3622 1915-S MS65+ NGC. Luminous satin luster yields warm golden toning over each side of this high-end Gem 1915-S nickel, with no distracting abrasions evident. The 1915-S is often seen weakly struck, and this piece also has some incompleteness on the bison's shoulder and the hair above the Indian's braid, although the design elements in the margins are well-defined. Census: 59 in 65 (2 in 65+), 28 finer (10/19). NGC ID# 22R9, PCGS# 3929

#### 1915-S Buffalo Nickel, MS65+ Elusive Issue in High Grade

- 3623 1915-S MS65+ PCGS. CAC. From a mintage of 1.5 million pieces, the 1915-S Buffalo nickel is an elusive issue in MS65 condition. This impressive Plus-graded Gem exhibits well-detailed design elements, with some localized softness on the hair above the braid, but sharp definition on the bison's head. The well-preserved, lustrous surfaces are lightly toned and appealing. PCGS has graded 44 numerically finer examples (10/19). NGC ID# 22R9, PCGS# 3979
- 3624 1917-D MS65 PCGS. Gem examples of the 1917-D exist in sufficient quantity, although few pieces are as well-struck as this sharp MS65 coin. Nearly full details accompany the Indian's hair strands, with rim-to-rim sharpness of the devices throughout both sides. Soft, golden highlights embellish the lustrous, nickel-gray color for strong eye appeal. NGC ID# 22RE, PCGS# 3935
- 3625 1917-D MS65 PCGS. This impressive Gem is sharply detailed in most areas, with just the slightest touch of softness on the bison's shoulder. The well-preserved, textured surfaces are lustrous and appealing, under shades of ice-blue and greenish-gold toning. PCGS has graded 32 numerically finer examples, plus eight pieces in MS65+ (10/19). NGC ID# 22RE, PCGS# 3935

## 1917-D Buffalo Nickel, MS66 Exceptionally Strong Strike

- 3626 1917-D MS66 PCGS. Mint State examples of the 1917-D can be challenging. The ones that do exist are often hampered by weak strikes, usually the result of die erosion rather than a lack of striking pressure. At first glance this piece appears to be struck from non-eroded dies. Closer inspection reveals rim crumbling along the reverse border from 12 to 4 o'clock. The obverse strike is complete, while the reverse is just a bit shy of full. Satiny mint luster glows beneath light rose and lilac toning on each side. A superlative coin in all respects. From the #5 Current and All-Time Finest Buffalo Nickel PCGS Registry Set with Major Varieties. Population: 31 in 66 (3 in 66+), 1 finer (10/19).

  Ex: FUN Signature (Heritage, 1/2008), lot 2737. NGC ID# 22RE, PCGS# 3935
- 3627 1919-S MS64 PCGS. Ice-blue and peach-gold toning covers the lustrous and smooth surfaces of this near-Gem 1919-S. Luster is satiny rather than frosted, with a reasonably sharp strike for the issue. The 1919-S seldom exceeds the Gem Uncirculated level, making this near-Gem a prescient alternative. Just 44 pieces are finer at PCGS, including six in 64+ (10/19). NGC ID# 22RN, PCGS# 3943

#### 1920-D Nickel, Toned MS65 Well-Struck, Rarely Offered Finer

3628 1920-D MS65 PCGS. Iridescent colors blossom beneath light, especially along the borders and beneath the bison's backbone, belly, and hooves. Elsewhere, golden-tan shades amplify the roughhewn features of the Indian's face and hair. The strike is sharp for a 1920-D, lacking definition only at the bison's forehead. A toned Gem, scarce and expensive any finer. NGC ID# 22RR, PCGS# 3045

#### 1920-D Buffalo Nickel, Luminous MS65 Few Pieces Are Known Finer

3629 1920-D MS65 PCGS. Unlike its Philadelphia counterpart, the 1920-D Buffalo nickel is elusive in Gem condition, and it is rare finer than MS65. The present coin displays luminous, softly frosted surfaces that are devoid of discernible abrasions. Delicate olivegold toning graces each side. Typical of the 1920-D, this coin has some strike softness on the bison's head and shoulder, although the horn is defined. PCGS lists six finer representatives (10/19). NGC ID# 22RR, PCGS# 3945

## 1920-D Nickel, MS65 Satiny With Sunset-Gold Toning

3630 1920-D MS65 PCGS. Lilac and sunset-gold toning embrace this attractive branch mint Buffalo nickel. The reverse appears immaculate, and the obverse shows only a few minute ticks. This Gem example is well-struck aside from the momentary weakness at the bison's hair along the left margin. MS65 is the maximum attainable grade level for the 1920-D, since numerically finer coins are significantly rare. NGC ID# 22RR, PCGS# 3945

## 1921 Nickel, MS67 Strongly Struck, Nicely Toned

3631 1921 MS67 PCGS. Although the surfaces reveal die fatigue, this 1921 nickel shows a sharp strike from properly spaced dies. The Superb Gem fields and devices are finely grained as a result, and a bold die crack extends from the rim above E in LIBERTY to the forehead. Mint luster glows softly around well-defined motifs. The bison's shoulder and head display sharp details, and the Indian's hair strands stand out boldly above the fully struck braid knot. Golden toning enhances the attractive, nickel-gray surfaces. Population: 40 in 67 (3 in 67+), 0 finer (10/19). NGC ID# 22RT, PCGS# 3947

## 1921 Nickel, Brilliant MS67 None Numerically Finer

3632 1921 MS67 PCGS. CAC. Here is an opportunity, seldom offered, to obtain one of the finest 1921 nickels certified at either of the two leading grading services — an important consideration for Registry enthusiasts and advanced collectors. Each side is brilliant and boldly defined with light clashing. The Indian's braid and bison's head and shoulder and particularly strong. Terrific eye appeal. A coin worthy of a premium bid. Population: 42 in 67 (3 in 67+), 0 finer. CAC: 5 in 67, 0 finer (10/19). NGC ID# 22RT, PCGS# 3947

1921-S Nickel, MS64 FS-401, Two Feathers Variety

3633 1921-S Two Feathers, FS-401, MS64 PCGS. Ex: Teich Family Collection. Only the two primary feathers remain on this near-Gem 1921-S, with the innermost feather entirely missing from die lapping. The designer's initial remains below the date. This is a "true" Two Feathers example, with splendid reddish-gold and lilac toning illuminated by strong mint luster. A sharp strike exists on both sides, with the bison's head bold and plentiful eye appeal. PCGS lists just two finer examples of the 1921-S FS-401 Two Feathers variety (11/19).

Ex: ANA Signature (Heritage, 8/2019), lot 3228. NGC ID# 22RU, PCGS# 38452 Base PCGS# 3948

## 1923 Nickel, Sharply Struck MS67 Attractive, Few Are Finer

3634 1923 MS67 PCGS. Golden luster emerges as the coin is rotated in light, while the sharp strike becomes readily apparent under close view. Die wear exists primarily on the reverse, but with little detriment to the overall bold strike. Abrasions and marks are nearly absent among the bold devices. The 1923 is generally well-produced, but few are as sharp and attractive as this Superb Gem. PCGS reports a single finer example certified MS67+. Population: 29 in 67 (1 in 67+), 0 finer (10/19). NGC ID# 22RV, PCGS# 3949

# 1923-S Buffalo Nickel, Sharp MS65 Vibrant Mint Luster, Beautifully Toned

3635 1923-S MS65 PCGS. With more than 6.1 million pieces struck, the 1923-S is readily available up to low Uncirculated grades, but is scarce in Gem condition and rare any finer. This is a vibrantly lustrous Gem, with golden hues that accentuate nearly markfree, finely grained surfaces. Die wear is not a problem on this attractive nickel, while a sharp strike weakens only slightly at the hair immediately above the braid knot. Eye appeal is terrific. Population: 67 in 65 (10 in 65+), 3 finer (10/19). NGC ID# 22RW, PCGS# 3950

# 1926-D Nickel, Appealing MS65 Original Blue and Gold Accents

3636 1926-D MS65 PCGS. This Gem 1926-D displays sharply defined design elements throughout, with vibrant mint luster and highlights of ice-blue and champagne-gold toning. The 1926-D is rare in grades above MS65, making this pleasing Gem a good balance of quality and value. Marks are limited to a few well-hidden ticks and flecks, none of which are detrimental to either the grade or eye appeal. NGC ID# 22S6, PCGS# 3958

- 3637 1928 MS67 NGC. Available in lower grades, the 1928 Buffalo nickel is something of a rarity in MS67, and no numerically finer pieces are known. This example displays shimmering, frosty luster with no toning. A touch of central strike weakness and the faintest evidence of die erosion in the peripheral fields are common characteristics of the issue. Census: 9 in 67, 0 finer (10/19). NGC ID# 22SB, PCGS# 3963
- 3638 1935 MS67+ PCGS. CAC. Although moderately available in MS67, the 1935 Buffalo nickel is rare in this grade with a Plus designation and a CAC green label. Only four finer coins are reported at PCGS (10/19). This piece displays delicate lilac, rosegold, and ice-blue luster with near-flawless surfaces. Moderate strike weakness affects the centers and there are light metal flowlines in the fields from die wear. CAC: 56 in 67, 0 finer (10/19). NGC ID# 22SN, PCGS# 3974
- 3639 1935-S MS67 PCGS. Housed in a Generation 4.0 blue label PCGS holder with barcode on the back (in use 1998-2002), this Superb Gem nickel is sharply struck for the issue and lustrous with attractive ivory-gold hues throughout both sides. The 1935-S is something of a late-series strike rarity, often with a weak reverse strike. Here, the bison is sharply defined and die erosion is minimal. Neither PCGS nor NGC has certified a numerically finer example, with PCGS reporting five pieces graded MS67+ (11/19). NGC ID# 22SR, PCGS# 3976
- 3640 1936 MS67+ PCGS. Each side offers satiny mint luster over lovely nickel-gray surfaces that show pale accents of powder-blue. Strike definition is complete, and the only identifying mark is a tick on the bison's horn. PCGS reports merely two finer submissions (11/19). NGC ID# 22SS, PCGS# 3977

## 1936 Buffalo Nickel, MS67+ Only Two Finer Coins at PCGS

3641 1936 MS67+ PCGS. CAC. From a substantial, late-series mintage of 119 million pieces, the 1936 Buffalo nickel can be located in all grades up to the MS67 level with little trouble, but finer coins are prime condition rarities. This Plus-graded Superb Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, with a few subtle hints of ice-blue and sea-green toning. PCGS has graded two numerically finer examples (10/19). NGC ID# 22SS, PCGS# 3977

## 1937 Buffalo Nickel, MS68 None Numerically Finer at Either Service

3642 1937 MS68 NGC. As befits the high mintage of 79.4 million pieces, this is one of the most available dates in the Buffalo nickel series, but few examples can match the quality and eye appeal of the present coin. This specimen displays delicate iridescent iceblue, gold-beige, and lilac patina over pristine surfaces that exhibit dazzling luster. Boldly detailed with immense visual appeal. Census: 16 in 68 (2 in 68+, 2 in 68★), 0 finer (10/19).

Ex: Central States Signature (Heritage, 4/2006), lot 1127; FUN Signature (Heritage, 1/2007); FUN Signature (Heritage, 1/2015), lot 3660. NGC ID# 22SX, PCGS# 3980

# 1937 Buffalo Nickel, MS68 Sharply Detailed and Attractively Toned

3643 1937 MS68 NGC. This magnificent MS68 Buffalo nickel exhibits sharply detailed design elements, with fine definition on the usual trouble areas, like the hair above the braid. The impeccably preserved surfaces are lightly toned in shades of ice-blue and limegreen toning. Vibrant mint luster shines through the patina and eye appeal is terrific. Census: 16 in 68 (2 in 68+, 2 in 68★), 0 finer (10/19). NGC ID# 22SX, PCGS# 3980

#### PROOF BUFFALO NICKELS

3644 1916 PR65 PCGS. Sharply struck with a thin veneer of gold and ice-blue toning, this attractive Gem proof is more satiny than mattelike throughout its mark-free Gem surfaces. Soft mint luster glows with hints of iridescent colors. Just 600 proofs were struck before proof coinage was abandoned for some 20 years, not to be resumed until 1936. NGC ID# 278V, PCGS# 3993

## 1936 Nickel, PR67+ Type One, Satin Finish

3645 1936 Type One — Satin Finish PR67+ PCGS. CAC. The Satin Finish employed through the first part of 1936 proved unpopular with contemporary collectors, but these Type One proofs are sought-after today, especially in such high grades. Pale golden toning is unquestionably original, producing visual appeal to match the technical quality of this high-end Superb Gem. NGC ID# 278X, PCGS# 3994

## 1936 Type Two Nickel, PR67+ Brilliant Finish, Lovely Pastel Patina

3646 1936 Type Two — Brilliant Finish PR67+ PCGS. A spectacular array of pastel hues dominates this magnificent 1936 Type Two proof nickel. They include pink, violet, blue, green, yellow, and orange. Near-flawless surfaces are flashy and eye-catching. Sure to represent a highlight in any fine set. PCGS reports 14 higher submissions (11/19). NGC ID# 278Y, PCGS# 3995

# 1936 Type Two Nickel, PR68 Exceptional Brilliant Finish Example

3647 1936 Type Two — Brilliant Finish PR68 NGC. Proof production resumed in 1936 with the output of Satin and then Brilliant Finish proofs. This Type Two example ranks among the top-graded coins at NGC, and there are just two numerically finer submissions at PCGS. Bright, nearly perfectly preserved surfaces display James Earle Fraser's design is complete detail. From a mintage of 4,420 pieces. Census: 23 in 68 (1 in 68+), 0 finer (10/19). NGC ID# 278Y, PCGS# 3995

3648 1937 PR67+ PCGS. A sensational Superb Gem proof Buffalo nickel for the connoisseur, this piece features a bold strike, fully mirrored fields, and gorgeous intermingled iridescence. PCGS has only certified 49 finer examples (10/19). NGC ID# 278Z, PCGS# 3996 3649 1937 PR67 NGC. CAC. Chromelike mirrored fields surround brilliant, fully struck devices to create outstanding eye appeal and technical quality. Close examination with a loupe reveals no faults, and CAC endorsement is an important confirmation of the quality at this high proof level, and seemingly a candidate for upgrade. NGC ID# 278Z, PCGS# 3996

# 1937 Buffalo Nickel, PR68 Kenneth Bressett Signature Holder

1937 PR68 NGC. The holder is a tribute to A Guide Book of United States Coins and includes the signature of long-time editor Kenneth Bressett. This Superb Gem is fully brilliant with light nickel-gray surfaces and extraordinary eye appeal. It is tied for the finest that NGC has graded. Census: 61 in 68 (1 in 68+, 5 in 68★), 0 finer (10/19). NGC ID# 278Z, PCGS# 3996

## PROOF JEFFERSON NICKEL

# 1940 Nickel, Sharp PR68 Reverse of 1940, Subtle Contrast

3651 1940 PR68 NGC. Reverse of 1940, showing straight steps on Monticello. This proof issue is a tremendous rarity with cameo contrast, and such coins are well-recognized for their importance. However, this date is equally rare in the non-Cameo grade of PR68. NGC has seen only 10 coins this fine, with a lone PR69 piece finer (11/19). The present example is brilliant and fully struck, yielding a subtle cameo effect on each side that just misses qualification for a designation. The mirrors are flawless, and eye appeal is spectacular. Census: 10 in 68 (2 in 68★), 1 finer (10/19). NGC ID# 279Z, PCGS# 4177

#### **EARLY HALF DIMES**

#### 1794 Flowing Hair Half Dime, VF35 First-Year Issue, V-4, LM-4

3652 1794 V-4, LM-4, R.4, VF35 NGC. The leaf tip under the left side of U in UNITED and the single berry under the I identify the popular LM-4 variety. This Choice VF example exhibits the scarce die state with a heavy die crack across the reverse from 12 to 3 o'clock. Another crack travels from the rim through D and the left wing to the eagle's breast. The design elements show some wear but most interior detail remains intact. Dentilation is weak in areas on both sides. Census (for the variety): 3 in 35, 5 finer (10/19). NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

#### 1795 Half Dime, V-8, LM-7, XF45 R.6 Variety

3653 1795 V-8, LM-7, R.6, XF45 NGC. The obverse die was only used to strike this rare variety, since a bisecting die crack formed early from the left side of the T in LIBERTY, down through Liberty's hair and to the rim through the lowest curl. Most, if not all specimens show this crack. If an early, unbroken die state exists, it is extremely elusive. Some examples, including the present one, show adjustment marks, although here they are light and noticeable only with a loupe. The reverse die remained unbroken through its first two marriages to create the V-7, LM-6 and this variety, then the common V-5, LM-8 where the reverse die finally cracked and was replaced. Remarkably, every single 1795 half dime obverse die is known with severe die cracks, and most of the reverses too: the dies were worked until they fell apart with die cracks or cuds. This example shows pleasing russet and aqua toning on the obverse, with deep silver-gray reverse toning. PCGS# 38591 Base PCGS# 4251

## SEATED HALF DIMES

- 3654 1845 MS66 PCGS. CAC. Sharply struck with virtually no marks, this Premium Gem half dime displays golden-gray surfaces with blue overtones and soft mint luster shining through. Half dime specialists will have a challenging time finding a better example. The coin is housed in a previous generation PCGS green label holder. CAC endorsement adds confirmation of the high quality. Population: 18 in 66 (3 in 66+), 6 finer. CAC: 10 in 66, 5 finer (10/19). NGC ID# 2337, PCGS# 4335
- 3655 1846 Fine 15 PCGS. CAC. All major design elements remain intact and LIBERTY remains completely legible on this impressive Fine 15 example, from a mintage of 27,000 pieces. The lightly abraded surfaces are blanketed in shades of steel-blue and lavendergray toning. Population: 12 in 15, 59 finer. CAC: 3 in 15, 17 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 2338, POGS# 4336

- 3656 1847 MS66 NGC. Mint luster coruscates throughout both sides of this lightly toned, silver-gray Premium Gem 1847. The mintage of more than 1.2 million pieces yields numerous lower-grade coins, but precious few Gem or finer survivors. This sharply struck representative shows only a few widely scattered, tiny marks with strong eye appeal. Census: 16 in 66 (1 in 66+, 1 in 66★), 3 finer (10/19). NGC ID# 2339, PCGS# 4337
- 3657 1848 Medium Date MS65 PCGS. The date is up against the bottom of the rock base, but it does not overlap it as it does on Large Date coins. The 1848 half dime as a whole is rare in Gem condition and nearly uncollectible finer. This piece displays a sharp strike and satiny mint luster. Pleasing rose-gold, sea-green, blue, and violet toning covers each side. Eye appeal is outstanding. Population (Medium Date): 3 in 65 (1 in 65+), 1 finer (10/19). NGC ID# 233A, PCGS# 4338

## 1850 Seated Half Dime, MS67 Tied for the Finest at NGC

3658 1850 MS67 NGC. The 1850 half dime, despite a mintage of nearly 1 million coins, is elusive in top grades. This Superb Gem presents a bold strike. Lovely gold and iridescent toning resides on frosty and fully lustrous silver surfaces. A single PCGS example has earned a higher numerical grade. Census: 8 in 67, 0 finer (10/19). NGC ID# 233F, PCGS# 4345

3659 1853-O No Arrows XF45 PCGS. Only light wear is evident on this Choice XF representative of the popular No Arrows design. Shades of violet-gray and pale gold toning blanket the lightly abraded surfaces, with traces of mint luster underneath. Population: 5 in 45, 13 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 233N, PCGS# 4352

# 1856 Half Dime, MS67 Seated Liberty Type Coin Few Pieces Known This Fine

3660 1856 MS67 PCGS. A plentiful date through MS64, the 1856 Seated Liberty half dime is conditionally rare in MS65 and MS66, and just a handful of pieces are graded at the Superb Gem level. This is one of those high-end coins. Luster is frosty and luminous with dusky golden and olive toning. The devices are well-struck, producing strong visual appeal. Population: 2 in 67, 1 finer (10/19). NGC ID# 233P. PCGS# 4363

- 3661 1859 MS66+ NGC. The 1859 represents the final coinage of the Seated Liberty half dime prior to the design change that replaced the obverse border stars with UNITED STATES OF AMERICA. This reverse die employs a slimmer wreath than is seen on later issues, and the obverse die shows the hollowed stars attributed to Anthony Paquet. In MS66+, this piece is a rare type coin. Original blue, amber, green-gold, and violet toning surrounds the margins, leaving the interiors with a light golden hue. Eye appeal is outstanding. Census: 30 in 66 (3 in 66+), 17 finer (10/19). NGC ID# 233W, PCGS# 4371
- 3662 1865-S MS62 PCGS. This impressive MS62 specimen displays well-detailed design elements, with just a touch of softness on the ribbon knot. The surfaces are lightly abraded, with highlights of lavender and steel-gray toning, punctuated by specks of amber. Population: 6 in 62, 14 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 234H, PCGS# 4387

#### PROOF SEATED HALF DIMES

3663 1859 PR65 NGC. Flynn-RPD-001. Design revisions by Anthony C. Paquet include hollow-centered stars, revisions to Liberty's pole hand and head, and multiple levels on the rock. The letters of LIBERTY in the shield are enlarged. This Gem proof shows flecks of russet-gray toning on the obverse that coalesce into deep-gray patina on the reverse. A few light abrasions are noted in the right obverse field. The date is noticeably repunched at the base of 1 and less noticeably at the base of 59. Census: 47 in 65 (1 in 65+), 22 finer (10/19). NGC ID# 235P, PCGS# 4438

## 1865 Half Dime, PR65+ Deep Cameo Rarely Offered So Starkly Contrasted

3664 1865 PR65+ Deep Cameo PCGS. Most proof 1865 half dimes do not have measurable cameo contrast, and only four pieces have earned Deep Cameo status at PCGS. This high-end Gem example is brilliant and sharp. The depth of mirroring in the fields is spectacular, complementing the frosted-white devices. Neither side exhibits bothersome abrasions. Population: 1 in 65 (1 in 65+) Deep Cameo, 2 finer (10/19). NGC ID# 2362, PCGS# 94448

#### EARLY DIME

#### 1796 JR-1 Dime, XF Details Reflective Reverse Fields

3665 1796 JR-1, R.3 — Edge Damaged — PCGS Genuine. XF Details. Ex: House of Davis McKinney. The distinctive rim cud below star 1 aids in identification of the JR-1 die pairing. This example shows little wear and actually has semiprooflike reflectivity in the reverse fields. The usual strike softness is noted on Liberty's neck and the eagle's breast, although it is minor. The edge reeding is smoothed below the date and possibly elsewhere if hidden by the holder tabs.

#### **BUST DIMES**

#### 1814 JR-2 Dime, MS64+ Large Date Variant

3666 1814 Large Date, JR-2, R.3, MS64+ NGC. A lengthy diagonal die line is evident from the left (facing) point of the shield into the field, identifying the popular JR-2 variety. This attractive example displays well-detailed design elements, with just a touch of softness on the stars on the right. The lightly marked surfaces are blanketed in original shades of lavender-gray toning. NGC ID# 236W, PCGS# 38774 Base PCGS# 4488

3667 1814 Large Date, JR-3, R.2, AU58 PCGS. CAC. Although a brush of wear appears on this coin, and the surfaces are deeply toned in blue-green, gold, and olive-gray hues, elements of natural luster remain in the protected portions of the fields. Some strike weakness affects the stars, but the central devices are well-defined. The reverse die is shattered in this state.

From The Spring Creek Collection, Part I. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

3668 1823/2 Small E's, JR-1, R.3, AU58 PCGS. The E's in UNITED STATES OF AMERICA are discernibly smaller than some of the adjacent letters, as are the S's, R's, A's and I's. The overdate is clear at the base of 3. Silver-gray toning yields to deep iridescent colors at the margins for an attractive, "old silver" appearance. A pair of hair-thin abrasions on Liberty's chin are the sole marks of note. Population: 11 in 58 (1 in 58+), 26 finer (10/19). NGC ID# 2372, PCGS# 38802 Base PCGS# 4498

### 1827 Capped Bust Dime, MS64 Richly Toned JR-3 Example

3669 1827 Pointed Top 1, JR-3, R.1, MS64 PCGS. Impressive peachred toning dominates, although gunmetal-blue and gold are also present. Slightly soft on the eagle's claws and the forehead curls, although all stars are sharply impressed. Population (all varieties): 71 in 64 (6 in 64+), 17 finer (10/19).

Ex: Alison Park Collection (American Numismatic Rarities, 8/2004), lot 296; Los Angeles U.S. Coin Auction (Heritage, 8/2009), lot 444; FUN Signature (Heritage, 1/2015), lot 3074. NGC ID# 2375, PCGS# 38813 Base PCGS# 4504

## 1827 Capped Bust Dime, MS64+ Pointed Top 1, JR-6

3670 1827 Pointed Top 1, JR-6, R.2, MS64+ PCGS. Obverse star 6 is high and the outside point is close to a dentil and the letters ED in UNITED are close at the base, identifying the popular JR-6 variety. This Plus-graded Choice example offers well-detailed design elements, with just a touch of softness on some star centers and the eagle's talons. Some clash marks are evident on the obverse. The well-preserved surfaces are lustrous and attractively toned in shades of cerulean-blue and sea-green toning. Population (for the variety): 1 in 64 (1 in 64+), 0 finer (10/19). NGC ID# 2375, PCGS# 38816 Base PCGS# 4504

#### **SEATED DIMES**

- 3671 1840 Drapery AU55 PCGS. CAC. This is a challenging issue in higher grades. The present Choice AU example has pleasing gray-gold and pale blue toning over nearly full mint luster with scattered, grade-consistent marks on each side. Population: 12 in 55, 10 finer. CAC: 6 in 55, 4 finer (10/19).
  - From The Spring Creek Collection, Part I. NGC ID# 2383, PCGS# 4578
- 3672 1871-CC Scratch PCGS Genuine. VG Details. A mere 20,100 pieces were struck for this introductory Carson City dime issue. Five letters in LIBERTY are clear, and the piece is attractive except for a lengthy thin mark from the U in UNITED to Liberty's raised hand that holds the pole. From The Spring Creek Collection, Part I.
- 3673 1873 Arrows, Doubled Die Obverse, VG8 PCGS. This is an extremely important variety in the Seated Liberty dime series with a sharply doubled obverse, especially at the shield. LIBERTY is complete on the obverse that grades Fine, while the reverse is typically flat, grading just Good. Pleasing grayish gold surfaces and rare in all grades. Population: 2 in 8, 8 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 23BG, PCGS# 94665 Base PCGS# 4665

- 3674 1876-CC MS66 PCGS. The 1876-CC Seated Liberty dime claims a substantial mintage of more than 8.2 million pieces, but few survivors can match the quality and eye appeal of this well-detailed Premium Gem. The well-preserved surfaces are lustrous and attractive, under shades of lavender and golden-tan toning. Population: 22 in 66, 4 finer (10/19). NGC ID# 23AJ, PCGS#
- 3675 1879 MS66 Prooflike NGC. F-104a, R.4. The date is repunched at the top and base of 1, and within the lower loop of 8. Just 14,000 1879 dimes were struck for circulation not surprisingly, several Prooflike examples are confirmed. This Premium Gem is one of them, with attractive steel-blue and autumn-gold shades that surround pale-gold centers. Only a few small marks are seen under magnification. Census: 5 in 66 (2 in 66+) Prooflike, 8 finer (10/19). PCGS# 84687
- 3676 1885-S VF30 PCGS. A key issue from a mintage of 43,690 coins, the 1885-S is elusive in all grades. This Choice VF example has natural pewter-gray toning with lighter gray devices. A few minor marks on each side are expected at this grade level. Population: 6 in 30, 51 finer (10/19).
  - From The Spring Creek Collection, Part I. NGC ID# 23B2, PCGS# 4695
- 3677 1887 MS67 PCGS. CAC. A lovely Superb Gem, this 1887 dime has light gold toning at the centers that deepens to rose, blue, and green near the borders. Both sides have satiny silver luster. Population: 8 in 67 (1 in 67+), 0 finer. CAC: 8 in 67, 0 finer (10/19). NGC ID# 23B5, PCGS# 4698

#### PROOF SEATED DIMES

1869 Dime, PR66+ Cameo F-105, Long Flag on 1 Just One Finer at PCGS

- 3678 1869 F-105, R.3, PR66+ Cameo PCGS. CAC. A spectacular Premium Gem proof Seated Liberty dime, with the Cameo designation, one of only five coins so graded by PCGS (three in PR66+), with one finer regardless of variety (10/19). The present coin exhibits fully detailed design elements that contrast boldly with the deeply mirrored fields. Only 600 proofs were minted—some with a Short Flag on 1, and others with a Long Flag. This is a Long Flag proof, Fortin-105 variety, with both the PCGS Plus designation and CAC endorsement. NGC ID# 23CT, PCGS# 539023 Base PCGS# 4762
- 3679 1877 Type Two Reverse, F-101, R.4, PR66 PCGS. CAC. The 1877 is plentiful as a business strike, due a mintage of more than 7,000,000 pieces. But only 510 proofs were produced, and survivors are scarce. This high grade specimen is originally toned forest-green and cream-gray. The strike is good, though shy of complete on the upper left portion of the wreath. Encapsulated in an old green label holder. Population: 12 in 66, 0 finer. CAC: 10 in 66, 0 finer (9/19). NGC ID# 23D2, PCGS# 539040 Base PCGS# 4774
- 3680 1886 F-103, R.3, PR67 PCGS. Rich blue and lavender toning accompanies areas of silver brilliance on the obverse of this lovely Superb Gem proof, with full toning on the reverse. Although not designated, this piece has strong obverse contrast. The reverse contrast is less pronounced, a consequence of the comprehensive patina. Population: 12 in 67, 0 finer (9/19). NGC ID# 23DB, PCGS# 539057 Base PCGS# 4783

3681 1889 F-101, R.4, PR67 PCGS. CAC. Two minor variants exist of the 1889 dime. This one shows a downward sloping date with a nearly closed 9 (at least more so than F-102). Only 711 proofs were struck and this is clearly one of the finest examples available, as well as one of the finest known. The fields are bright and mirrored with significant frosted contrast evident on each side. The obverse is lightly and evenly toned, while the reverse is mostly brilliant with a crescent of peripheral gold and blue toning present. Exceptional quality and value. Population: 11 in 67 (3 in 67+), 0 finer. CAC: 4 in 67, 0 finer (9/19). PCGS# 539064 Base PCGS# 4786

3682 1890 F-102, R.4, PR66 PCGS. At least four die pairs were required to strike just 599 proofs. This is a lightly toned, well-mirrored Premium Gem example, with gold and blue hues that deepen at the upper margins. Both sides are sharply struck and free of any mentionable marks or hairlines. Bold frost on the devices earns the Cameo designation. Population: 11 in 66 Cameo, 0 finer; 2 in 66 Deep Cameo, 1 finer (10/19). PCGS# 539067 Base PCGS# 4787

## 1891 Dime, PR66+ Deep Cameo Rare So Starkly Contrasted

3683 1891 PR66+ Deep Cameo PCGS. CAC. F-130, R.3. The final proof issue in the Seated dime series is extremely rare in Deep Cameo. This Premium Gem is among only six pieces at PCGS that have received that designation. The strike is bold, and the design elements are thoroughly frosted. Neither side exhibits noticeable toning, and the field-device contrast benefits considerably. Population: 3 in 66 (2 in 66+) Deep Cameo, 2 finer. CAC: 3 in 66, 2 finer (10/19). NGC ID# 23DG, PCGS# 94788

#### **BARBER DIMES**

3684 1895-O XF40 PCGS. CAC. Light-to-moderate wear shows on the design elements of this attractive XF specimen, but all letters in LIBERTY remain legible, on close inspection. The pleasing lavender-gray surfaces are lightly abraded. Population: 29 in 40, 98 finer. CAC: 3 in 40, 19 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# C4KL, PCGS# 4807

## 1897-O Barber Dime, MS66 Elusive in High Grade

3685 1897-O MS66 PCGS. A conditionally rare Gem example of this New Orleans issue, showing a sharp strike and satiny mint luster. Wisps of olive and russet toning complement golden hues on each side, earning this piece high marks for eye appeal. Only a handful of higher-grade pieces are listed at PCGS. Population: 11 in 66 (1 in 66+), 5 finer (10/19). NGC ID# 23E4, PCGS# 4813

3686 1900 MS66+ PCGS. CAC. While bluntly struck on the hair curls over Liberty's forehead, this piece is pristine and fully lustrous with frosty silver surfaces under attractive gold and blue toning. Population: 23 in 66 (8 in 66+), 6 finer. CAC: 16 in 66, 8 finer (10/19). NGC ID# 23EC, PCGS# 4821

#### PROOF BARBER DIMES

## 1895 Barber Dime, PR68 Low Associated Circulation Strike Mintage

3687 1895 PR68 NGC. This is a famous year for proof coinage due to the importance of the 1895 proof silver dollar that is known as the "King of the Morgan Dollars," a term that may have been coined by B. Max Mehl. Although all the silver proofs of 1895 had the same mintage, the smaller denominations had the additional production of circulation strikes. This Superb Gem proof is incredible with vibrant sky-blue and magenta toning over fully mirrored fields and lustrous devices. Census: 14 in PR68 (4 in Cameo, 1 in Ultra Cameo), none finer (10/19). NGC ID# 23G8, PCGS# 4879

# 1898 Barber Dime, PR68 Cameo Stark White-on-Black Contrast

3688 1898 PR68 Cameo NGC. A fully struck, virtually flawless proof, with brilliant surfaces that yield stark cameo contrast. The 1898 proof Barber dime was distributed in silver proof sets, with a mintage 735 pieces. Examples are often seen in low grades around auction venues, but rare is a coin in PR68 encountered. This Cameo is visually and technically incredible. Census: 8 in 68 Cameo (1 in 68★), 0 finer; 5 in 68 (1 in 68★) Ultra Cameo, 0 finer (10/19). NGC ID# 26KV, PCGS# 84882

### 1911 Barber Dime, PR68 Among the Finest at PCGS

3689 1911 PR68 PCGS. Only 543 proof Barber dimes were struck at the Philadelphia Mint in 1911 and few survivors can match the quality and eye appeal of this magnificent PR68 specimen. The design elements are sharply detailed throughout and the virtually pristine surfaces include deeply reflective fields, under shades of emerald-green and lavender toning. Population: 5 in 68, 0 finer (10/19). NGC ID# 23GS, PCGS# 4895

## **MERCURY DIMES**

3690 1916 MS67+ Full Bands PCGS. CAC. A stunning Superb Gem representing the first year of the Mercury dime coinage, this piece has frosty mint luster shining through delicate gold and iridescent toning. Sharply struck as usual for this debut issue. NGC ID# 23GX, PCGS# 4905

## 1921 Dime, MS64+ Full Bands High-End Semikey

3691 1921 MS64+ Full Bands PCGS. CAC. This semikey Mercury dime derives from a low mintage of 1.2 million coins. A pale veneer of antique golden toning gently graces each side, allowing soft mint luster to shine through. Strike definition is razor-sharp, and considerable evidence of die polish exists in the fields. A high-end example. NGC ID# 23HE, PCGS# 4935

## 1921-D Mercury Dime, MS66 Sought-After CAC Endorsement

3692 1921-D MS66 PCGS. CAC. A scarce Premium Gem, CAC-endorsed example of this semikey Denver issue, showing vibrant luster beneath gold and russet-olive toning. The strike is weak in the centers, preventing a Full Bands designation, as well as around portions of the peripheral lettering. Eye appeal is nonetheless pleasing. Population: 14 in 66 (1 in 66+), 1 finer. CAC: 7 in 66, 1 finer (11/19). NGC ID# 23HF, PCGS# 4936

#### 1921-D Dime, MS64 Full Bands A Key to the Series

3693 1921-D MS64 Full Bands NGC. This well-known key date takes second place in the series after the illustrious 1916-D. Here is a Choice Uncirculated example with the added benefit of Full Bands definition. Brilliant surfaces are satiny and well-defined. A graze on Liberty's jaw is all that precludes an even higher grade. From a mintage that barely exceeds 1 million coins. NGC ID# 23HF, PCGS# 4937

3694 1923 MS67+ Full Bands PCGS. The Philadelphia mintage topped 50 million dimes in 1923, a stunning increase over the low 1921 production. Not surprisingly, the 1923 is readily available in all grades up to the Superb Gem level, where the list of contenders thins out to the single digits. This Plus-graded Superb Gem has Full Bands — perfectly formed and rounded, fully split, and undisturbed by marks. Orange-gold and reddish-tan toning graces the margins and drifts toward the silver centers. Population: 10 in 67+ Full Bands, 8 finer (9/19). NGC ID# 23HG, PCGS# 4939

### 1923-S Mercury Dime, MS65 Full Bands Elusive as a Date, Rare With Full Bands

3695 1923-S MS65 Full Bands PCGS. Splashes of light gold and gray toning enhance the lustrous surfaces of this frosted Gem Mint State 1923-S dime. The strike is bold as the Full Bands designation indicates — rarely seen on a 1923-S. PCGS has only certified 10 finer Full Bands examples, including a single MS65+ coin. Population: 47 in 65 (1 in 65+) Full Bands, 9 finer (10/19). NGC ID# 23HH, PCGS# 4941

3696 1924-S MS66 NGC. From a mintage of just over 7.1 million pieces, the 1924-S is normally seen in circulated and low Mint State grades. Near-Gem and Gem coins are scarce, while Premium Gem examples are among the most challenging condition rarities of the Mercury dime series. This is a sharp Premium Gem example, tied for finest at NGC. Bits of gray toning and colorful iridescence visit the obverse and reverse margins respectively. There is just a single numerically finer example, at PCGS. NGC Census: 7 in 66, 0 finer (10/19). NGC ID# 23HL, PCGS# 4946

3697 1926-D MS65 Full Bands PCGS. A band of deep iridescence along the obverse and reverse margins adds rich color to the otherwise brilliant and frosted surfaces of this 1926-D dime. A sharp central strike earns the Full Bands designation, important because the issue was struck from widely spaced dies. Relatively few examples are finer. Population: 89 in 65 (2 in 65+) Full Bands, 40 finer (10/19). NGC ID# 23HS, PCGS# 4957

## 1928-S Dime, MS66 Full Bands Registry-Grade Example

3698 1928-S MS66 Full Bands PCGS. Full Bands definition on the 1928-S Mercury dime is rare at the MS66 grade level and finer. This coin displays bold sharpness and vibrant, frosty mint luster. There is a pinpoint graze on Liberty's cheek that prevents Superb Gem classification, but the coin is otherwise virtually pristine. Eye appeal is outstanding, with traces of light champagne and lilac toning gracing silver-white surfaces. Population: 49 in 66 (4 in 66+) Full Bands, 12 finer (10/19). NGC ID# 23HZ, PCGS# 4971

## 1935 Mercury Dime, MS68 Full Bands Tied for the Finest Certified

3699 1935 MS68 Full Bands PCGS. The combined PCGS and NGC population data reveals that just 25 submissions have earned the MS68 Full Bands grade assessment, including 19 at PCGS and six at NGC, and none are finer (10/19). This Superb Gem has a bold strike and virtually perfect surfaces with a hint of gold toning over its brilliant silver luster. NGC ID# 23JC, PCGS# 4993

# 1941 Dime, MS68 Full Bands Ultimate Type Coin

3700 1941 MS68 Full Bands PCGS. With a mintage of more than 175 million pieces (a dime for every man, woman and child in the U.S. in 1941, with some 40 million dimes leftover), it is no surprise that the 1941 is readily available in any and all grades up to MS67. MS68 coins with Full Bands are rare, and eagerly sought by Registry Set enthusiasts and Mercury dime specialists alike. This is a mostly brilliant example — one of the few MS68 pieces certified — with a blush of amber-orange obverse toning a razor-sharp strike and impeccable surfaces. Gleaming mint luster illuminates the satinlike obverse and frosted reverse. Population: 17 in 68 (3 in 68+) Full Bands, 0 finer (10/19). NGC ID# 23JX, PCGS# 5029

3701 1942-D MS68 Full Bands PCGS. Not only is this piece tied for the finest certified, it also exhibits eye appeal that is second to none. The obverse has delicate blue and emerald toning at the center, with intense gold, rose, and blue nearer the border. The reverse is mostly brilliant and untoned, with splashes of rich gold at the peripheries. Population: 40 in 68 Full Bands, 0 finer (10/19). NGC ID# 23K5, PCGS# 5039

### 1944-D Dime, Glorious MS68+ Full Bands Tied Finest Certified at Either Service The PCGS CoinFacts Plate Coin

3702 1944-D MS68+ Full Bands PCGS. Splashes of intense iridescence punctuate satin-smooth, brilliant surfaces of this exquisite Superb Gem dime. Deep shades of aqua, blue, magenta, and purple burst forth under direct light amid radiant mint luster and a needle-sharp strike. Immaculate fields and devices reside beneath the intermittent toning, making this top-graded 1944-D perhaps the most memorable of all. None are finer at either PCGS or NGC. PCGS Population: 5 in 68+ Full Bands, 0 finer (10/19). NGC ID# 23KC, PCGS# 5053

3703 1945-S MS69 NGC. Absolutely splendid crimson, olive-green, antique-gold, and russet colors decorate the nearly pristine surfaces of this marvelous, virtually flawless 1945-S Mercury dime. The quality and eye appeal are every bit of what is expected for this superlative grade. NGC has certified three 1945-S dimes in MS69, none of which have Full Bands. PCGS has not graded any examples at this level of preservation. A spectacular coin, and a Registry collector's dream coin.

Ex: FUN Signature (Heritage, 1/2004), lot 5793; FUN Signature (Heritage, 1/2005), lot 6293. NGC ID# 23KG, PCGS# 5060

#### PROOF MERCURY DIME

3704 1939 PR67 Cameo NGC. Glassy, deep-mirrored fields contrast with smoothly frosted devices for sharp Cameo contrast, while a sharp strike imparts a dished appearance to the obverse fields, with Liberty perched in extra dimension. Both sides display brilliant-silver flash. NGC reports just one numerically finer example, and three pieces in PR67★ Cameo (11/19). NGC ID# 27DK, PCGS# 85074

#### TWENTY CENT PIECES

3705 1876 AU58 PCGS. CAC. BF-1, R.4. Very slight die doubling is evident on the upper reverse, especially at TAT in STATES on the reverse. The crossbar of that A is sharply doubled. This near-Mint example has lovely gold and iridescent toning over brilliant silver luster.

From The Spring Creek Collection, Part I. NGC ID# 23R8, PCGS# 5299

## 1876 Twenty Cent Piece, MS65 Low-Mintage Issue, 14,750 Pieces Struck

3706 1876 MS64 PCGS. CAC. BF-2, R.2. A brilliant and frosted near-Gem example, with narrow doubling within the reverse legends and a short die crack between the wing point and S in CENTS. By far, BF-2 is the most available die pair among 1876 twenty cent pieces. This is a sharply struck coin, lustrous throughout both sides, with only a few light field abrasions on the Choice About Uncirculated surfaces. CAC endorsement adds to the appeal. Population (all varieties combined): 92 in 64 (12 in 64+), 53 finer. CAC: 21 in 64, 20 finer (10/19). NGC ID# 23R8, PCGS# 5299

#### PROOF TWENTY CENT PIECES

1876 Twenty Cent Piece, PR64

3707 1876 PR64 PCGS. BF-1, R.4. The design elements of this impressive Choice proof are well-detailed, with just a touch of softness on the stars on the right. The well-preserved surfaces include deeply reflective fields, under mottled shades of battleshipgray and pale gold toning. From a mintage of 1,150 pieces. Population: 87 in 64, 44 finer (11/19). NGC ID# 27H3, PCGS# 5304

3708 1878 — Altered Surfaces — PCGS Genuine. Unc Proof Details. BF-1, R.3 The second of two proof-only issues at the end of the short-lived twenty cent series, this 1878 example is polished and/or lacquered to a chromelike sheen, with some hairlines on the mirrored fields. Tinges of bluish-gray toning remain in the fields, contrasting bodly with the bright-sliver devices. Just 600 pieces

#### 1878 Twenty Cent Piece, PR64 Final Proof-Only Issue

3709 1878 PR64 PCGS. BF-1, R.3. The short-lived twenty cent denomination came to an end in 1878, with a final proof-only mintage of 600 pieces. This impressive Choice specimen offers sharply detailed design elements and reflective fields, under vivid shades of greenish-gold, lavender-gray, and violet toning. The well-preserved surfaces add to the attractive overall presentation. PCGS has graded 41 numerically finer examples (10/19). NGC ID# 27H5, PCGS# 5306

# **EARLY QUARTER**

3710 1806 B-2, R.2, VF25 PCGS. Tompkins Die State 1/2, struck from an early die state. both the obverse and reverse of this toned Browning-2 example are sharp for the assigned grade. Light-tan toning on the high points contrasts with deep, walnut-brown patina that dominates the fields. The reverse is especially sharp for a midgrade B-2 quarter, and both sides are remarkably unabraded. NGC ID# 23RD, PCGS# 38928 Base PCGS# 5314

# **BUST QUARTERS**

3711 1818 B-4, R.2, AU55 PCGS. Tompkins Die State 5/4, terminal. Two prominent radial cracks on the obverse extend from the rim at 11:30 and 4:30, and the reverse is cracked through the D in UNITED. This piece shows little wear but has glossy surfaces with light gray-gold patina. A few minor contact marks appear beneath a loupe. NGC ID# 23RH, PCGS# 38945 Base PCGS# 5327

# 1820 B-3 Quarter, AU58 Medium 0, Old-Time Toning

3712 1820 Medium 0, B-3, R.3, AU58 PCGS. Tompkins Die State 2/1. Identified as a Large 0 quarter on the PCGS holder, but it is the Browning-3 Medium 0 variety. The B-3 die marriage becomes scarce in Uncirculated condition, making this near-Mint example a good alternative. Original, golden-gray toning spreads evenly over both sides. with russet-gray accents around the raised elements. Mint luster glows in intermittently beneath the rich patina. Marks are light and wispy on either side, with a toned-over streak between star 10 and Liberty's curls. NGC ID# 23RL, PCGS# 38962 Base PCGS# 515284

## 1822 B-2 Quarter, AG3 25 Over 50C, Scarce Variety Problem-Free and CAC Endorsed

- 3713 1822 25 Over 50C, B-2, R.5, AG3 PCGS. CAC. Ideal quality for the heavily worn AG3 grade, and awarded CAC endorsement as a result. This scarce 1822 Browning-2 quarter clearly shows the denomination blunder 25 over 50C, with the reverse several points sharper than the smoothly worn obverse. Pleasing warm-gray, old-silver toning covers both sides, deepening where the motifs are outlined. The date is about 75% visible, weakening at the base of the final 2. This is a popular *Guide Book* variety, with a surviving population of 50 to 60 pieces in all grades combined. NGC ID# 23RN, PCGS# 38970 Base PCGS# 5333
- 3714 1824/2 B-1, R.3, VF25 PCGS. Tompkins Die State 1/1. A combination of moderate wear and stone-gray toning plus blue overtones obscures the overdate feature, although just the single variety is known for 1824-dated quarters. The *Guide Book* is quick to point out that the 168,000-piece mintage includes both 1824 and 1825-dated quarters, most of which carry the 1825 date. The Steve Tompkins early quarter reference pegs the 1824 mintage at just 16,000 pieces based on Mint delivery warrants. This richly toned example retains solid VF definition on both sides, with pleasing, problem-free surfaces and plentiful eye appeal. Population: 9 in 25, 72 finer (10/19). NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

# 1824/2 Quarter, B-1, XF40 In-Demand Semikey Date

- 3715 1824/2 B-1, R.3, XF40 PCGS. Tompkins Die State 1/1. Moderate wear on the high points appears as light, silver-gray areas against a backdrop of brownish-gray patina that blankets each side of this conditionally scarce 1824/2 quarter. The thick, deep toning masks a few small marks and light hairlines, but the design elements are sharply struck and well-defined for the assigned grade. An estimated mintage of 16,000 pieces comprised the entire production of 1824 quarters all struck from the same overdated die pair. Relatively few pieces are finer. Population (for the variety): 1 in 40, 6 finer (10/19). NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335
- 3716 1824/2 B-1, R.3 Graffiti PCGS Genuine. XF Details. Only one variety is known for the 1824 quarter dollar, showing the faint remnants of an overdate feature. This XF-level coin displays smooth lilac-gray surfaces with a hint of champagne color on the worn high points. A couple of crisscrossing hairline scratches on the obverse prevent a numeric grade from PCGS. From The Spring Creek Collection, Part I.

### 1825/4/(2) Quarter, MS62 B-2, Perfect Die State

- 3717 1825/4/(2) B-2, R.2, MS62 PCGS. Tompkins Die State 1/1, perfect dies. This Mint State example displays satiny, lustrous fields, with a generally bold strike that shows weakness only on the eagle's talons and obverse stars 5 and 6. There are light handling marks, but neither side has singular abrasions that distract from the overall eye appeal. The interiors are brilliant, while the borders yield deep russet toning. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336
- 3718 1825/4/(2) B-3, R.3, AU53 PCGS. Tompkins Die State 1/1. Nearly full satin luster shines through the splendid magenta, blue, and gold toning of this attractive example. A glass is required to view the minuscule handling marks. The 1825/4/(2) B-3 quarter is an always-popular *Guide Book* variety, with the curious and controversial overdate feature maddeningly obscure. NGC ID# 23RS, PCGS# 38973 Base PCGS# 5336

## SEATED QUARTERS

- 3719 1847-O XF45 PCGS. CAC. Briggs 2-C. The mintmark is positioned high and slightly right of center, identifying the rare Briggs 2-C variety. This Choice XF specimen exhibits some light wear on the well-detailed design elements and the lightly abraded surfaces show traces of original mint luster, under shades of steelblue and lavender-gray toning. Population: 9 in 45, 24 finer. CAC: 2 in 45, 6 finer (10/19).
  - From The Spring Creek Collection, Part I. NGC ID# 23SY, PCGS# 5411
- 3720 1849-O Fine 12 PCGS. Briggs 1-A. Larry Briggs estimates the mintage of the 1849-O Seated Liberty quarter at a meager 16,000 pieces. This Fine 12 example shows all letters in LIBERTY still legible, but L is weak. The lavender-gray surfaces exhibit a few minor planchet voids on both sides, but a scratch near star 4 is the only abrasion worth mentioning. Population: 10 in 12, 47 finer (10/19).
  - From The Spring Creek Collection, Part I. NGC ID# 23T3, PCGS# 5414

## 1852 Quarter, MS64 Widely Melted Issue

3721 1852 MS64 NGC. Briggs 2-B. The mintage of 177,060 pieces is virtually meaningless when one is trying to calculate the scarcity of the 1852 quarter. Silver coins were worth more than their face value until the Mint Act of 1853 lowered their intrinsic value. Until that time silver coins were subject to widespread melting. This is where population data becomes helpful as it tells the number of coins that have actually been submitted and graded (minus an uncertain number of resubmissions). In this case, NGC has only certified nine pieces in MS64 with seven finer (10/19). The surfaces of this piece are evenly toned steel-gray with just a hint of underlying blue. Sharply struck throughout. The only identifying mark is an oblong spheroid-shaped grease stain (as struck) in the left obverse field. NGC ID# 23T8, PCGS# 5419

3722 1852-O VF30 PCGS. CAC. Briggs 1-A. Lightly worn, this midgrade 1852-O quarter has pleasing eye appeal for the grade. Original olive, gold, russet, and amber toning is deepest in the fields, ceding to light olive-gold on the worn points of the devices. One old, shallow mark in the reverse field near the eagle's beak is the only notable abrasion. Population: 12 in 30, 26 finer. CAC: 4 in 30, 4 finer (11/19).

From The Spring Creek Collection, Part I. NGC ID# 23T9, PCGS# 5420

# 1853/53 No Arrows Quarter, VF30 FS-301, Important 'Old Standard' Issue

3723 1853/53 No Arrows, Briggs 1-A, FS-301, VF30 PCGS. Some deep build-up around the date numerals hides recutting at 5 and 3, but all 1853 No Arrows quarters show the 53/53 overdate. Scarce in all grades, this midgrade example is original and pleasing, with golden-gray toning and dappled blue accents. Smooth wear on the devices complements glimpses of reflectivity in the minimally abraded fields. Population: 6 in 30, 49 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

3724 1856-S XF45 PCGS. Briggs 1-B. A better date in all grades, the 1856-S Seated Liberty quarter is especially challenging to locate in Mint State, where it is rare. This collectible Choice XF coin is boldly detailed with pleasing olive-gray patina. The surfaces are smooth and pleasing. Population: 10 in 45, 22 finer (11/19). From The Spring Creek Collection, Part I. NGC ID# 23TD, PCGS# 5440

- 3725 1858 MS65 PCGS. Peach-gold and pale-blue toning drifts across lustrous, beautifully preserved surfaces of this attractive Gem quarter. More than 7.3 million pieces were struck, yet remarkably few examples survive in high Uncirculated grades. The strike is sharp on Liberty's head and the surrounding stars, with a pair of tiny, light marks on the cheek. Faint die clashing is visible on the reverse shield. Population: 45 in 65 (4 in 65+), 15 finer (10/19). NGC ID# 23TH, PCGS# 5445
- 3726 1858-S VF25 PCGS. CAC. Briggs 2-B. The upper serif of the mintmark touches the stem, identifying the Briggs 2-B variety. An impressive VF25 example of this popular branch mint quarter, with strong LIBERTY and even wear on the design elements. The mouse-gray surfaces show only minor abrasions. Population: 6 in 25, 55 finer. CAC: 1 in 25, 9 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 23TK, PCGS# 5447

#### 1859-S Quarter Dollar, XF45 Few Known This Fine

3727 1859-S XF45 NGC. Briggs 1-A. A mintage of 80,000 pieces was insufficient to ensure the widespread survival of the 1859-S quarter dollar. The issue is scarce in all grades and unknown in Mint State. This Choice XF coin is conditionally rare. The strike is sharp and wear is minimal. Both sides feature uniform olive-gray patina and are devoid of bothersome abrasions. Census: 3 in 45, 3 finer (10/19). NGC ID# 23TN, PCGS# 5450

3728 1861 MS65 PCGS. Type Two Reverse with a convex eagle's eye. There is no evidence of date repunching or doubling on this splendid Gem quarter that features a bold strike and frosty silver mint luster. Population: 42 in 65, 22 finer (10/19). NGC ID# 23TT, PCGS# 5454

3729 1866 Motto VF25 PCGS. CAC. Briggs 1-A. A pleasing VF25 example from the first year with the motto IN GOD WE TRUST, this coin shows even wear on the design elements, with all letters in LIBERTY still bold. The pleasing lavender-gray surfaces are lightly abraded. Population: 7 in 25, 45 finer. CAC: 2 in 25, 18 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 23UB, PCGS# 5468

### 1870-CC Quarter Dollar, AG3 Rare First-Year Issue, CAC Endorsed

3730 1870-CC AG3 PCGS. CAC. Briggs 1-A. The inaugural quarter dollar coinage of Carson City amounted to only 8,340 coins. These circulated extensively, and most of the pieces that survive are well-worn. The present coin, graded AG3 by PCGS, is a prime example. Both sides have smooth slate-gray and deep gunmetal hues, with portions of the rims worn away. The date and mintmark are nonetheless clear, as are the BER in LIBERTY. Under a loupe one can see hairlines scratches and small abrasions that are typical of the AG3 grade. The CAC endorsement is appropriate for this coin, one of only four pieces for the grade with that coveted green label. Population: 9 in 3, 54 finer. CAC: 4 in 3, 11 finer (10/19). From The Spring Creek Collection, Part I. NGC ID# 3KV9, PCGS# 5477

## 1871-CC Quarter, VF Details Rare Key Issue

- 3731 1871-CC Damage PCGS Genuine. VF Details. Briggs 1-A, Flynn-RPD-001. Both 1s in the date show repunching, with the second 1 triple-punched above the flag. The 10,890-piece mintage was released into circulation in its entirety, and few examples survived the rigors of the Old West's Silver State. The 1871-CC is rare across the board, regardless of grade. This example is pockmarked with small digs and a speckling of deep-gray spots, with a V-shaped reverse rim nick at 12 o'clock plus other light rim damage. Silver-gray surfaces show areas of charcoal-gray toning. VF sharpness survives, with LIBERTY strong and decent feather definition at the eagle's wings. Fewer than 100 examples of the 1871-CC exist, and this one has considerable sharpness despite its impairments.
- 3732 1871-8 VF25 PCGS. CAC. Briggs 1-A. An impressive VF25 example of this popular S-mint quarter, from a mintage of 30,900 pieces. This lightly abraded piece retains much interior detail on the design elements, with LIBERTY bold. The pale lavender-gray surfaces are pleasing and lightly abraded. Population: 5 in 25, 32 finer (10/19)

From The Spring Creek Collection, Part I. NGC ID# 23UP, PCGS# 5480

## 1872-CC Seated Liberty Quarter, VG10 Challenging Carson City Issue

3733 1872-CC VG10 PCGS. Briggs 1-A. Almost all of LIBERTY is clear on this piece, with only the L and Y incomplete. Wear is even across each side and the rims are full. The mintmark is clear. Both sides have uniform lilac-gray coloration. The 1872-CC quarter dollar comes from a limited mintage of 22,850 pieces, and most survivors are well-worn from circulation in the Nevada territory. This example is ideal for most collecting pursuits.

From The Spring Creek Collection, Part 1. NGC ID# 23US,

From The Spring Creek Collection, Part 1. NGC 1D# 23US, PCGS# 5482

3734 1873 Closed 3 VF25 PCGS. CAC. Briggs 2-B. The 1873 Seated Liberty quarter with a Closed 3 in the date and No Arrows is much more elusive than its With Arrows counterpart. This impressive VF25 example displays evenly worn devices, with all letters in LIBERTY still strong. The lavender-gray surfaces are lightly abraded and the overall presentation is most attractive. Population: 6 in 25, 36 finer. CAC: 2 in 25, 7 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 23UU, PCGS# 5484

## 1873-CC Arrows Quarter, Good 6 Pleasing Collector Coin

3735 1873-CC Arrows Good 6 PCGS. CAC. Briggs 1-A. A mintage of 12,462 pieces ensures the scarcity of the 1873-CC quarter dollar. The Carson City Mint at this time struck subsidiary silver denominations only to the extent necessary for local commerce. The coins circulated extensively as a result, with no significant number put aside for future numismatic generations. Thus, the 1873-CC is rare today in all grades. This CAC-approved example is in an ideal collector grade, with the BER in LIBERTY visible and most of the rims defined. Each side displays olive-gray patina. From The Spring Creek Collection, Part I. NGC ID# BZMH, PCGS# 5492

# 1874 Arrows Quarter, MS65+ Softly Frosted With Subtle Hints of Gold

- 3736 1874 Arrows MS65+ NGC. Briggs 4-C. Arrows left and right of the date signify a minute weight increase implemented in 1873. This issue is a popular one to represent the short-lived, two-year type. The stars, talons, and fletchings are fully struck, and even Liberty's head shows bold detail. Brilliant, softly frosted surfaces lack obvious imperfections and display subtle hints of golden color. Census: 6 in 65 (1 in 65+), 8 finer (10/19). NGC ID# 23VX, PCGS# 5494
- 3737 1874-S Arrows MS64 PCGS. CAC. Briggs 2-A. Briggs describes a West coast bank hoard dispersed in 1949 as the origin of 80 to 100 frosty Uncirculated 1874-S With Arrows quarters. This utterly brilliant example may very well derive from that source. The stars are bold, and so are the eagle's feathers, talons, and fletchings. Shallow grazes and tiny ticks are minimal for the grade. NGC ID# 23VY, PCGS# 5495
- 3738 1875 MS66 NGC. Type One Reverse. Silver luster shines beneath attractive shades of grayish-blue and and peach-gold toning that deepen at the borders of this Premium Gem. While the 1875 issue is readily available in lesser grades, it becomes scarce at the MS66 level and rare any finer. This pleasingly toned example offers a sharp strike over finely grained surfaces, with no marks or abrasions of individual note. Census: 11 in 66 (1 in 66+, 2 in 66★), 9 finer (10/19). NGC ID# 23UX, PCGS# 5498
- 3739 1875 MS66 PCGS. CAC. Briggs Unlisted. Type Two reverse, narrow serifs on As. The Specie Resumption Act resulted in a massive increase of silver subsidiary coinage production beginning in 1875. More than 4.2 million quarters were minted that year. This exquisitely preserved Premium Gem shows a slightly light strike over the centers, but the date, stars, and arrowheads are strong. Attractive violet-gray and blue-green patina dominates the smooth, lustrous surfaces that display iridescent highlights. Population: 25 in 66 (3 in 66+), 5 finer. CAC: 11 in 66, 4 finer (10/19). NGC ID# 23UX, PCGS# 5498

# 1877 Quarter Dollar, MS66+ Frosty CAC Type Coin

3740 1877 MS66+ PCGS. CAC. This is a plentiful date overall, coming from a mintage of nearly 11 million coins, although high-grade examples are scarce. The present coin, Plus graded and carrying CAC approval, is in the distinct minority of survivors. Both sides are well-struck, and the brilliant, frosty surfaces are devoid of bothersome abrasions. Population: 67 in 66 (10 in 66+), 56 finer. CAC: 19 in 66, 27 finer (10/19). NGC ID# 23V5, PCGS# 5504

- 3741 1877 MS64 Prooflike NGC. Nearly 11 million 1877 quarters were struck by the Philadelphia Mint, and while the issue is easily available in Mint State, it is scarce in the higher grade levels. With designated Prooflike surfaces, the 1877 is rare, and unknown in Gem or finer condition. This sparkling, brilliant near-Gem is housed in a new Ken Bressett autographed holder. The strike is needle-sharp, with just a few tiny marks that deter an even finer grade. Frosted motifs provide substantial contrast against flashy, mirrored fields. Census: 2 in 64 Prooflike, 0 finer (10/19). PCGS#85504
- 3742 1877-CC MS65 NGC. Almost 4.2 million quarters were struck at the Carson City Mint in 1877. This is a brilliant Gem survivor, struck by rusted and clashed dies yet sharply defined in most areas. Weakness of strike is noted at QUAR and the adjacent olive leaves, with the upper berry disconnected from its stem. Numerous light die cracks encircle the reverse legend. Frosted cartwheel luster radiates from the center of each side. Census: 38 in 65 (1 in 65+), 21 finer (10/19). NGC ID# 23V6, PCGS# 5505

## 1877-S Quarter, MS66+ Bright Mint Luster, Rich Toning

- 3743 1877-S MS66+ PCGS. CAC. Attractive shades of champagne-gold and violet toning blanket the impeccably preserved surfaces of this Plus-graded Premium Gem, with well-detailed design elements and vibrant mint luster underneath. Population: 23 in 66 (13 in 66+), 2 finer. CAC: 8 in 66, 2 finer (9/19).

  Ex: FUN Signature (Heritage, 1/2017), lot 3949. NGC ID# 23V7, PCGS# 5506
- 3744 1878-S XF45 PCGS. CAC. Briggs 1-A. Gold-gray, olive, and dusky silver-blue hues mingle on this luminous Choice XF coin, one of 140,000 quarters struck at San Francisco in 1878. Well-preserved for this heavily circulated issue. Population: 5 in 45, 31 finer. CAC: 2 in 45, 6 finer (10/19).

  From The Spring Creek Collection, Part I. NGC ID# 23VA, PCGS# 5510
- 3745 1879 MS66 PCGS. A bewildering issue, often weakly struck despite the minuscule mintage of 13,600 pieces. This brilliant Premium Gem displays strong reflectivity throughout both sides, with a brief crescent of reddish-gold toning along the upper-left border. The obverse is softly struck on the stars and Liberty's head, with pair of tiny ticks on the cheek. The reverse is sharply struck and well-frosted, surrounded by mirrorlike fields. Population: 42 in 66 (3 in 66+), 29 finer (9/19). NGC ID# 23VB, PCGS# 5511

### 1881 Seated Quarter, MS67 Conditionally Rare

3746 1881 MS67 PCGS. Briggs 1-A. Quarter production at the Philadelphia Mint suffered from 1879 through 1890, as substantial quantities of silver and excessive labor went into producing millions of silver dollars under the mandates of the Bland-Allison Act. In 1881, quarter production reached only 12,000 pieces, a number that prompted a degree of hoarding among collectors and dealers, with the result that Mint State survivors can be located today with only mild searching. At the MS67 grade level, however, this date becomes rare. Finer pieces are nearly nonexistent.

On the present coin, vibrant mint luster illuminates vivid green-gold and fiery apricot peripheral toning, while the centers display hues of ocean-blue and lavender-gray. Liberty's head and the surrounding stars are incompletely defined, though the strike is otherwise well-executed. A distinct lack of noticeable surface flaws gives this piece ample visual appeal.

Ex: Purchased from Jason Carter (5/2013); Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98388. NGC ID# 23VD, PCGS# 5513

3747 1886 AU58 PCGS. Briggs 1-A. The 1886 Seated Liberty quarter claims a tiny mintage of 5,000 pieces. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces show highlights of lavendergray and sea-green toning. Population: 2 in 58, 80 finer (10/19). From The Spring Creek Collection, Part I. NGC ID# 23VJ, PCGS# 5518

# 1887 Quarter, Attractive MS66 Exceptionally Clean, Low Mintage

- 3748 1887 MS66 PCGS. Briggs 1-A. An influx of quarters (and other subsidiary silver denominations) returned from abroad starting in the winter of 1877, reducing the need for the production of additional coins through most of the 1880s. Just 10,000 circulation strikes were manufactured in 1887. This Premium Gem displays delicate multicolor toning around the rims and frosty, untoned centers. Exceptionally clean. Population: 26 in 66 (1 in 66+), 16 finer (11/19). NGC ID# 23VK, PCGS# 5519
- 3749 1888 MS66+ PCGS. Briggs 1-A. Blue and peach-gold toning evenly covers the lustrous and frost-smooth surfaces of both sides, with a sharp strike on all but the top four stars two left and two right of Liberty's head which show minor weakness. Just 10,001 pieces were struck, making the 1888 rare in an absolute sense, and conditionally scarce-to-rare in MS66 or finer grades. This Plusgraded Premium Gem is nearly mark-free with strong eye appeal. Population: 4 in 66+, 12 finer (10/19). NGC ID# 23VL, PCGS#

## 1891 Seated Quarter, MS66+ Scarce in This Grade, Rare Finer

3750 1891 MS66+ PCGS. The final Seated Liberty quarter dollar is moderately plentiful through MS65, but it becomes scarce in MS66. Finer pieces are rare. This Plus-graded Premium Gem displays vibrant, frosty mint luster with accents of orange-gold, amber, and blue toning. Strike weakness affect select obverse stars, but the central devices are boldly struck. Population: 38 in 66 (7 in 66+), 5 finer (10/19). NGC ID# 23VR, PCGS# 5524

# PROOF SEATED QUARTERS

3751 1868 PR65 PCGS. Briggs 2-B, Flynn-RPD-001. The flag of 1 is repunched north, while a triangular die lump sits below B in LIBERTY on this proof die pair. Variegated cobalt-blue, reddishbrown, and pale-gold toning engulfs both sides, but do not hamper the glassy-mirrored fields, which retain their original flash. Frosted devices are razor-sharp, but offer only moderate contrast. Just 600 proofs were struck. Population: 9 in 65, 11 finer (10/19). NGC ID# 23WZ, PCGS# 5567

## 1876 Seated Quarter, PR66 Cameo Rarely Seen Finer

- 3752 1876 PR66 Cameo NGC. Briggs 8-H Proof Dies. The dies for this Premium Gem proof are distinctive, with a wormlike die scratch that crawls over the reverse shield border, and prominent die rust throughout Liberty's lap and drapery. A rounded anomaly below 8 in the date sits on top of the dentils resembling a misplaced digit, but close examination suggests it is a curved lint mark. The brilliant, mirrored surfaces surround frost-white devices, and bold white-on-black contrast exists between the glassy fields and sharply struck motifs. A small patch of die rust in the field near the drapery is the sole mark of note. Census: 5 in 66 Cameo (1 in 66★), 8 finer (10/19). NGC ID# 23X8, PCGS# 85577
- 3753 1885 PR66 NGC. Briggs 3-B. A couple of the stars around Liberty's head are not fully defined, but the strike is otherwise sharp. Deep reflectivity in the fields highlights vivid shades of sea-green, royal-blue, and violet toning. Due to the scarcity of high-grade business strikes, this proof issue is frequently chosen for date representation. Census: 23 in 66, 13 finer (10/19). NGC ID# 23XH, PCGS# 5586

## BARBER QUARTERS

3754 1892 MS67 PCGS. Type One Reverse. This lovely Superb Gem quarter radiates pearlescent silver luster from exceptionally well-preserved surfaces. Whispers of cobalt-blue and lavender concentrate at the obverse borders, while the same colors run over the entire reverse, joined by traces of light gold. A solid strike emboldens the design features of this popular, first-year issue. Population: 40 in 67 (7 in 67+), 5 finer (10/19).

Ex: FUN Signature (Heritage, 7/2007), lot 752. NGC ID# 23XT, PCGS# 5601

## 1899-O Barber Quarter, MS66 Popular O-Mint Issue

3755 1899-O MS66 PCGS. Incredibly well-preserved, showcasing original satin luster and old-time amber-gold, sea-green, and russet toning that is significantly deeper around the margins. The obverse is sharp, while the reverse is weak on the eagle's talons and tailfeathers, as usual. Population: 11 in 66 (4 in 66+), 2 finer (10/19). NGC ID# 23YH, PCGS# 5623

3756 1901-S AG3 NGC. CAC. The 1901-S Barber quarter is a low-mintage key to the series. This well-worn specimen retains all major design elements complete in outline, but the reverse rim is worn flat. The date, mintmark and legends remain legible, but LIBERTY has been effaced. NGC ID# 23YR, PCGS# 5630

#### 1909-O Barber Quarter, AU53 Final New Orleans Issue

3757 1909-O AU53 PCGS. A modest mintage of 712,000 Barber quarters was accomplished at the New Orleans Mint in 1909, the final year of coinage operations at the famous Southern facility. This attractive AU53 example shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster. Population: 6 in 53, 65 finer (11/19). NGC ID# 23ZJ, PCGS# 5655

## PROOF BARBER QUARTERS

## 1892 Quarter Dollar, PR66 Deep Cameo Attractive Border Toning

3758 1892 PR66 Deep Cameo PCGS. Type Two Reverse. A halo of tawny-gold toning surrounds the brilliant centers of this deeply mirrored, high-contrast Premium Gem proof. The motifs are razorsharp on both sides. Most of the 1,245-piece proof mintage is of the Type Two Reverse variety. The large mintage coincided with the introduction of the Barber design, and the issue also was intended to benefit from the opening of the World's Columbian Exposition. Population: 9 in 66 (1 in 66+) Deep Cameo, 17 finer (9/19). NGC ID# 2427, PCGS# 95678

3759 1894 PR66 Cameo NGC. Despite a circulation-strike mintage of more than 3.4 million pieces and a reasonable production of 972 proofs, fewer than 100 Premium Gem or finer proofs survive. Of those with Cameo contrast, the survivorship diminishes to about half that number. This is a richly contrasted example, toned throughout in reddish-gold and silver-lilac shades. The proof strike is sharp on both sides. Census: 12 in 66 Cameo (1 in 66+), 21 finer (10/19). NGC ID# 2429, PCGS# 85680

3760 1896 PR66 Cameo PCGS. CAC. Bands of golden-brown toning along with blushes of pale blue and lavender provide color to each side. Areas of brilliance remain, and Cameo contrast between the flashy fields and moderately frosted devices is undiminished. CAC endorsement confirms the high quality. Population: 18 in 66 Cameo, 19 finer. CAC: 9 in 66, 16 finer (11/19). NGC ID# 59]B, PCGS# 85682

3761 1897 PR66 Cameo PCGS. This Premium Gem proof with stark black-and-white Cameo contrast is a worthy representative of the final years of the late 19th century at the Mint, when it was churning out some of the highest-quality proofs of its entire history. Both sides are brilliant and free of contact, from a mintage of 731 proofs. Population: 21 in 66 (2 in 66+) Cameo, 17 finer (11/19). NGC ID# 242C, PCGS# 85683

## 1897 Barber Quarter, PR66 Deep Cameo Frosted Devices, Silver-Mirrored Fields

3762 1897 PR66 Deep Cameo PCGS. Brilliant with a hint of gold on the frosted portrait, this Premium Gem Deep Cameo proof glitters throughout both sides, while fully struck devices sit in bold contrast to the smooth and reflective, glassy fields. Proofs were generally well-produced in 1897 (and even moreso in 1898), although Deep Cameo examples are decidedly scarce. Population: 5 in 66 Deep Cameo, 9 finer (9/19). NGC ID# 242C, PCGS# 95683

- 3763 1898 PR67 NGC. A meager mintage of 735 proof Barber quarters was accomplished in 1898, making the issue quite elusive at the PR67 grade level. This delightful Superb Gem exhibits sharply detailed, frosty design elements and impeccably preserved surfaces, with deeply reflective fields. Shades of powder-blue, lavender, and pale green toning visit both sides. Census: 20 in 67, 19 finer (10/19). NGC ID# 242D, PCGS# 5684
- 3764 1900 PR67 NGC. From a mintage of 912 pieces, the 1900 proof Barber quarter is quite scarce in Superb Gem condition. The present coin is a sharp example, with deep mirrors and a bold strike. The reflective surfaces are enhanced by areas of green and lavender toning, with occasional blushes of deep russet. Census: 19 in 67 (3 in 67★), 8 finer (10/19).

Ex: PNG Invitational Signature (Heritage, 2-3/2015), lot 3647, which realized \$2,820. NGC ID# 43VN, PCGS# 5686

## 1901 Quarter, PR67 Cameo Brilliant, High-End Registry Coin

- 3765 1901 PR67 Cameo NGC. This coin is an extraordinary opportunity, not only for the Superb technical quality but also for its cameo effect. Only a small portion of the 912 proof quarters struck in 1901 have this degree of contrast. The surfaces are brilliant save for wispy champagne toning at the borders. Deeply mirrored fields attractively frame the design. NGC has not designated a single coin Ultra Cameo in any grade. Census: 16 in 67 Cameo (4 in 67★), 5 finer (10/19).
  - Ex: Long Beach Signature (Heritage, 9/2007), lot 1293; FUN Signature (Heritage, 1/2011), lot 3496. NGC ID# 242G, PCGS# 85687
- 3766 1902 PR66+ PCGS. CAC. Lavender, gold, and steel-blue toning merge seamlessly on the obverse, with the deeper shades confined to the fields and margins, while golden highlights illuminate the portrait. The reverse is more dramatically colored, with rich cerulean blue encircling a vibrant, reddish gold center. Mirrored fields flash all around, while the sharply struck motifs sacrifice contrast in favor of the exceptional toning. Plus-graded and CAC endorsed. Population: 5 in 66+, 11 finer. CAC: 9 in 66, 12 finer (9/19). NGC ID# 242H, PCGS# 5688

## STANDING LIBERTY QUARTERS

## 1918/7-S Quarter Dollar, Fine 15 Clear Date Numerals

3767 1918/7-S FS-101 Fine 15 PCGS. A collectible midgrade example of this important *Guide Book* variety, showing a worn but clear overdate feature. Mottled olive-brown surfaces hide some ancient, parallel pinscratches in the upper obverse field that existed before the coin became worn from circulation, as they vanish when they cross the worn relief elements. An otherwise pleasing example. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

## 1918/7-S Standing Liberty Quarter, VF35 Sought-After Series Key

3768 1918/7-S FS-101 VF35 PCGS. An attractive mid-grade example of this sought-after hubbing error, which ranks as one of the keys to the Standing Liberty series. Light-to-moderate wear shows on the design elements, but the garment line across the right leg still shows at the side. The lightly abraded lavender-gray surfaces show a splotch of amber toning at 6 o'clock on the obverse. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

## 1919 Standing Liberty Quarter, MS67+ Rare So Fine, CAC Approved

3769 1919 MS67+ PCGS. CAC. The 1919 Standing Liberty quarter is rare in MS67, even without Full Head detail. This piece displays luminous surfaces and original russet and peach-gold toning. Eye appeal is excellent. Typical of the 1919, this coin shows bold shield definition, although Liberty's temple and the first 1 in the date are weak, as is characteristic. Population: 36 in 67 (4 in 67+), 3 finer. CAC: 10 in 67, 3 finer (10/19). NGC ID# 243B, PCGS# 5728

3770 1919 MS66 Full Head PCGS. CAC. The 1919 Standing Liberty quarter often comes with sharp shield rivets, and this Premium Gem is no exception. However, Full Head coins are elusive in the finer levels of Mint State. This CAC coin displays sharp detail and a clear date. Frosty original luster yields golden-olive and russet toning. Neither side has bothersome abrasions. CAC: 30 in 66, 17 finer (10/19). NGC ID# 243B, PCGS# 5729

## 1919-D Quarter, MS62 Full Head Boldly Rendered and Attractive

3771 1919-D MS62 Full Head NGC. Like the 1919-S, the 1919-D quarter is scarce in all conditions and particularly scarce with the Full Head designation. This example displays a distinctive satin brilliance that enhances its crisp strike. Mint luster coruscates over the smooth and attractive surfaces. A strong die crack bisects the first S in STATES, making it resemble a dollar sign, and a pinpoint planchet void below the eagle's neck is the sole mark — likely of Mint origin. Census: 6 in 62 Full Head, 25 finer (9/19). NGC ID# 243C, PCGS# 5731

### 1919-D Quarter Dollar, MS62 Full Head Well-Struck Throughout

3772 1919-D MS62 Full Head PCGS. The 1919-D is among the more challenging dates in the series to acquire with both Full Head detail and sharp date numerals. This MS62 coin possesses both, and the shield rivets are also above-average. Luster is satiny, and each side displays rose-gold and lavender toning with minimal abrasions for the grade. NGC ID# 243C, PCGS# 5731

# 1923-S Standing Liberty Quarter, MS63 Lustrous, CAC Approved Example

3773 1923-S MS63 NGC. CAC. This impressive Select Standing Liberty quarter exhibits well-detailed design elements that fall just short of Full Head definition and show just a touch of softness on the shield rivets. The mostly brilliant surfaces shows few delicate hints of sea-green toning and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 243K, PCGS# 5744

### 1923-S Quarter, MS64 Old Green Label Holder

3774 1923-S MS64 PCGS. About half of the head details are visible on this elusive issue, and that is typical of Mint State 1923-S quarters. Only about 15% of PCGS submissions have earned the Full Head distinction. This piece, housed in a green-label PCGS holder, exhibits brilliant luster that is unimpeded by the light gold toning. NGC ID# 243K, PCGS# 5744

### 1923-S Quarter Dollar, MS65+ Original Luster and Toning

3775 1923-S MS65+ PCGS. An impressively well-struck example of this better San Francisco date. The date numerals are well-rounded, Liberty's toes are sharp, and the shield rivets show above-average definition. The sprigs at Liberty's temple are sharp, and only slightly weakness in the vicinity of the ear prevents a Full Head designation. This piece has light champagne toning overall, with daubs of olive and russet in the margins. Eye appeal is outstanding for the Gem grade level, likely contributing to the Plus designation. NGC ID# 243K, PCGS# 5744

### 1924-S Quarter, MS65 Full Head Sharp Date Numerals

3776 1924-S MS65 Full Head PCGS. A better date in Full Head, the 1924-S is especially elusive in Gem condition. Full Head coins in this grade are highly sought-after among series specialists, especially in light of the rarity of finer coins. This piece is remarkably well-struck, not only on Liberty's head, but at the date as well. The shield rivets are only slightly soft. Satiny luster yields a hint of light champagne toning, and neither side has bothersome abrasions. Population: 43 in 65 (5 in 65+) Full Head, 17 finer (10/19). NGC ID# 243N, PCGS# 5751

3777 1930 MS67 Full Head NGC. A beautifully preserved, boldly struck Superb Gem, this final-year type coin displays sharp definition throughout Liberty's head and gown lines, as well as the eagle's feathers and the stars. The shield rivets and lines are not fully defined, though the sharpness is greater than is usually seen. Radiant, frosty luster illuminates a blanket of aquamarine, lemongold, amber, and olive toning on the obverse, while the reverse shows splashes of the same plus pale lavender-blue and deeper forest-green color. An immensely appealing representative. Census: 34 in 67 (1 in 67+ Full Head, 1 in 67★), 0 finer (10/19). Ex: Houston Signature (Heritage, 12/2014), lot 4034. NGC ID# 2445, PCGS# 5779

3778 1930-S MS67+ PCGS. CAC. Rich amber and green-gold toning accents frosty mint luster on the obverse, while the reverse displays finely stippled russet toning over a faint golden hue. This high-end Superb Gem is well-struck with nearly full head detail. The preservation is practically perfect, and the visual appeal is exceptional. Population: 30 in 67 (3 in 67+), 0 finer. CAC: 19 in 67, 0 finer (9/19).

Ex: New York Signature (Heritage, 2/2014), lot 3717; Central States Signature (Heritage, 4/2014), lot 3502; Long Beach Signature (Heritage, 2/2017), lot 3543. NGC ID# 2446, PCGS# 5780

## **WASHINGTON QUARTERS**

## 1932-D Quarter, MS65 Important Series Key

- 3779 1932-D MS65 PCGS. The Washington quarters struck in 1932 at the three operating mints were intended to be a commemorative issue marking the bicentennial of the first president's birth. The design became the standard for all quarter dollars and remained unchanged (excepting the national bicentennial issue) until the start of the state quarter program in 1999. This Denver Mint first-year Washington quarter is a lovely Gem with frosty mint luster and rich gold toning at the borders. Population: 92 in 65 (5 in 65+), 2 finer (10/19). NGC ID# 2448, PCGS# 5791
- 3780 1932-S MS65 PCGS. Frosty mint luster attests to the originality of this Gem 1932-S Washington quarter. Detail is impressively sharp, with Washington's hair having the appearance of being struck from an early die state. Both sides have delicate champagne toning, with deeper olive and russet accents in the margins. PCGS has seen only four numerically higher-grade examples of this key date (11/19). NGC ID# 2449, PCGS# 5792

# 1932-S Quarter, Toned MS65+ A Contender for Registry Sets

3781 1932-S MS65+ PCGS. The Plus designation sets this piece apart from most of its peers, and it falls just shy of the elite MS66 grade level, where PCGS has certified only four coins. Well-struck devices and satiny luster yield areas of near-brilliant pearl-white luster, as well as areas of golden and amber toning. Eye appeal is pleasing. Population: 18 in 65+, 4 finer (11/19). NGC ID# 2449, PCGS# 5792

### 1935 Washington Quarter, MS68 High Condition Census Rarity

3782 1935 MS68 NGC. This glittering Registry coin is seemingly almost flawless, without a single mentionable abrasions visible beneath the colorful toning that paints each side in vivid olivegreen, gold, amber, russet, and violet hues. The coin is well-struck and unsurpassed in technical quality. NGC lists only two coins in this lofty grade and PCGS one, with none finer at either service (10/19). NGC ID# 244D, PCGS# 5797

## 1939-S Quarter, Registry-Worthy MS67+ Among the Finest Certified

- 3783 1939-S MS67+ PCGS. CAC. This coin has the distinction of being one of the finest certified 1939-S quarters, and a prime candidate for a top Registry Set. Satiny, mark-free surfaces are essentially untoned with the faintest trace of dusky gold, a hallmark of originality. Population: 78 in 67 (10 in 67+), 0 finer. CAC: 41 in 67, 0 finer (11/19). NGC ID# 244T, PCGS# 5810
- 3784 1954 MS67+ PCGS. CAC. The Plus designation makes a significant difference in the availability of this otherwise common date from the 1950s. At the MS67 level, 76 pieces have been certified but only 13 coins have received a Plus. The surfaces display thick mint luster and are attractively toned. The irregular obverse color may be end-of-the-roll toning, while the reverse is more standard with most of that side brilliant and a long arc of peripheral color present. NGC ID# 2467, PCGS# 5855

# PROOF WASHINGTON QUARTERS

- 3785 1936 PR66+ PCGS. A Plus-graded Premium Gem proof from the first year of the Mint's modern proof offerings, this coin exhibits sharply detailed design elements and hazily reflective fields, with highlights of lavender and sea-green toning. PCGS has graded 18 numerically finer examples (10/19). NGC ID# 27HN, PCGS# 5975
- 3786 1938 PR67+ PCGS. CAC. Most Superb Gem 1938 quarters are toned to one extent or another, but this brilliant and sharply struck example shows only a flicker of iridescence and a wisp of transient opaque patina at the margins. Nearly flawless surfaces earn both the PCGS Plus designation and CAC endorsement. Population: 39 in 67+, 6 finer. CAC: 53 in 67, 4 finer (10/19). NGC ID# 27HR, PCGS# 5977

3787 1950 PR68+ PCGS. The 1950 proof, available in lower grades, is distinctly rare in PR68 at PCGS. Just 28 coins are so graded (including eight Cameos), but just one — the present non-Cameo coin — is Plus graded. With none finer, this PR68+ proof can be considered the finest 1950 proof in a PCGS holder (11/19). Each side is sharp, starkly brilliant, and beautifully mirrored, with luminous frost-white devices. It is seemingly impossible to locate a measurable flaw. Population: 20 in 68 (1 in 68+), 0 finer (11/19). NGC ID# 27HW, PCGS# 5982

#### EARLY HALF DOLLARS

- 3788 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, Fine 15 PCGS. Tompkins Die State 4/2. This coin represents the O-113 dies, a 9x9 berry variety with respect to the reverse. Close study of the die state, though, reveals the O-113a diagnostics, most notably the die flaws around stars 12 and 13. This coin is evenly worn with vivid blue-teal, amber, gold, and cottonwood-green toning in concentric circles on each side. The coin is smooth and free of distractions. From The Spring Creek Collection, Part I. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252
- 3789 1803 Large 3, Small Reverse Stars, 12 Arrows, O-101, T-1, R.3, VF35 PCGS. CAC. Tompkins Die State 1/2. Goldenbrown and stone-gray toning encompasses this unmarked and attractive Draped Bust half. All letters in E PLURIBUS UNUM are sharp, and the strike is even except near the junction of the right (facing) wing with the shield.

From The Spring Creek Collection, Part I. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

#### 1803 Large 3 Half Dollar, AU50 O-102a, Small Reverse Stars

3790 1803 Large 3, Small Reverse Stars, O-102a, T-2, High R.3, AU50 PCGS. Tompkins Die State 3/3, corresponding to the O-102a variety with heavy die cracks on the reverse through STATES, AMERICA, the shield, and the eagle's tailfeathers. The obverse is lightly clashed. Wear is light on this coin, leaving substantial luster in the fields and sharpness on the devices. Peachgold toning is dominant on each side, although daubs of blue and lilac appear around the borders. A near-Condition Census example of the O-102a variety, listed 6th on Stephen Herrman's census. Ex: Lindesmith & LaRiviere Collections (Bowers and Merena, 11/1999), lot 2038; Queller Family Collection (Stack's, 10/2002), lot 29; The Westmoreland County Collection of Early Bust Halves, 1794-1807 / FUN Signature (Heritage, 1/2008), lot 1349; ANA Signature (Heritage, 8/2019), lot 3433. NGC ID# 24EF, PCGS# 39272 Base PCGS# 6066

## 1803 Large 3 Half, Scarce AU50 O-103, Large Reverse Stars

- 3791 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, AU50 PCGS. Tompkins Die State 1/1. Readily identifiable by the reverse, which has a protruding arrowhead directly over the right upright of the N in UNITED and large field stars. Strong die clashing shows on the obverse and reverse, especially at the ear, where shield lines run across the area. This gold-kissed, silver-gray piece is well struck with light rub on the uppermost design elements. Faintly abraded overall, yet attractive. Considerable mint luster remains throughout both sides. Population (all Large 3 varieties): 17 in 50, 36 finer (10/19). Ex: Dallas Signature (Heritage, 10/2008), lot 830; Summer FUN Signature (Heritage, 7/2016), lot 3492. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066
- 3792 1805 O-113a, T-1, High R.4, XF45 PCGS. CAC. Tompkins Die State 1/2. This coin sits just under the Condition Census for the O-113a variety, although few would argue if it was included among the top six pieces known. The O-113, O-113a, and O-113b varieties (Tompkins-1) are an interesting study in die states, with the early O-113 perhaps nonexistent, and the latest die stage with a full cud above AME in AMERICA extremely rare (just two or three pieces known). This is a notably sharp coin, with a light die crack above MERI. Liberty's hair strands are fully defined, and both sides are free of die clashing. Rich, autumn-brown patina deepens to brownishgray over partially reflective, lightly abraded surfaces. CAC endorsement provides an important confirmation of quality.

From The Spring Creek Collection, Part I. NGC ID# 24EG, PCGS# 39288 Base PCGS# 6069

## 1806/5 Half Dollar, AU50 O-103, Large Stars, Round Top 6

3793 1806/5 O-103, T-8, R.2, AU50 PCGS. Tompkins Die State 2/1. The overdate is clearly visible on both the 0 and 6, with remnants of a previous 0 and 5. This is a somewhat early die state — struck from clashed dies, prior to formation of significant die cracks — with substantial mint luster remaining across the lightly toned golden-gray surfaces on both the obverse and the reverse. F in OF is missing its bottom right serif. The surfaces are only lightly abraded, and sharp detail remains on Liberty's hair, drapery, and the scroll. The obverse dentils are weak, with the star points drawn to the edge. Still, eye appeal is outstanding for the assigned grade. Housed in a previous generation blue label holder with barcode on the back. Population (all varieties): 11 in 50, 24 finer (10/19). NGC ID# 24EK, PCGS# 39299 Base PCGS# 6077

- 3794 1806 Knob 6, Small Stars, O-106, T-4, R.4, XF45 PCGS. Tompkins Die State 1/1. Although rare in full Mint State, the O-106 (T-4) Knob 6 variety is much more available in XF to AU conditions. This Choice XF coin displays dappled grayish-blue toning with touches of iridescent colors and traces of mint luster at the borders. As often seen for the variety, the field stars are weakly struck through the right-hand clouds and below OF. Liberty's drapery is weakly struck in the opposing obverse area. We note widely spaced adjustment marks through STATES. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075
- 3795 1806 Pointed 6, Stem, O-115a, T-17, R.2, XF45 PCGS. Tompkins Die State 4/3. Nice mint luster remains on both sides of this Choice XF Draped Bust half. Natural blue and golden-gray toning is evenly dispersed throughout both sides, with deeper shades at the borders. Reddish-gold accents enliven the attractive patina for strong, original eye appeal. The O-115a variety features perimeter obverse die cracks that run through the lower points of star 1 and a late developing reverse crack from the left (facing) wing tip across the top of STATES. NGC ID# 24EJ, PCGS# 39318 Base PCGS# 6071
- 3796 1806 Pointed 6, Stem, O-116, T-20, R.3 Damage PCGS Genuine. AU Details. Tompkins Die State 3/5. Some tiny indents appear in the lower-left obverse field and proceed randomly across Liberty's hair, cheek, and chin to justify the PCGS net grade. The marks are small and shallow, similar in size to other marks that might appear from normal circulation, but more frequent and of unknown origin. Light abrasions and wear are consistent with About Uncirculated definition. Mint luster is plentiful among the original golden-tan toning that deepens at the margins. The O-116 variety (Tompkins-20) is known for its die cracks and die clashing that encircle the outer edges of both sides in its latest die stage, such as this pleasing coin displays.
- 3797 1806 Pointed 6, Stem, O-121, T-29, R.4, AU50 PCGS. Tompkins Die State 1/1. Numerous peripheral die cracks are diagnostic of the obverse on this variety, with softness on the upper curls also being characteristic. The reverse, struck from fresher dies, is considerably sharper. The surfaces reveal steel-gray overall with pinkish-orange accents when held at a slight angle. One of the finest O-121 examples offered publicly over the last decade. Ex: Baltimore Signature (Heritage, 7/2003), lot 7351; Houston Signature (Heritage, 11/2012), lot 3623; ANA Signature (Heritage, 8/2017), lot 4869. NGC ID# 24EJ, PCGS# 39327 Base PCGS# 6071

## 1807 Draped Bust Half, AU55 O-109a, Dramatic Die State

3798 1807 Draped Bust, O-109a, T-2, R.3, AU55 NGC. Tompkins Die State 4/2. Predominately pearl-gray surfaces cover both sides of this Overton-109a example, although freckles of deep-gray and forest-green reside in the peripheral recesses. The coin is impressively devoid of abrasions, struck from an intermediate-to-late die state with a reverse die crack through STA. A heavy diagonal crack across the portrait ranges from the hair ribbon to the drapery — undescribed in the Overton fifth edition, but documented in the more recent Tompkins' reference. The lower left obverse field is buckled, which contributes to weakness of strike on the neck curls and, on the reverse, in the vicinity of the eagle's beak and central field stars. The remainder of the design is bold. This coin is a Tompkins plate coin, where it illustrates obverse Die State-4 for the T-2 variety. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

#### **BUST HALF DOLLARS**

- 3799 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF45 PCGS. CAC. Thoroughly original toning covers both sides of this O-112 half. Always popular for its 50 over 20 denomination, the O-112 is differentiated from O-111 by full lower serifs on 1 in the date. All examples are a bit weak at the centers (especially at the eagle's neck and head), while peripheral elements are sharper. Warmgray surfaces emit traces of silver luster on this Choice XF example. Marks are few and far between, while smooth wear determines the assigned grade. CAC endorsement recognizes the quality surfaces. From The Spring Creek Collection, Part 1. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086
- 3800 1807 Capped Bust, Small Stars, O-113, R.2, XF40 PCGS. The stars are distant from the milling, making the stars seem even smaller than their already reduced size. The O-113 Small Stars variety is about of equal scarcity to the various Large Stars 1807 Capped Bust issues, but it is in greater demand as the sole representative of the Small Stars type. This is a smoothly worn XF example, with silver-gray surfaces that deepen around the stars and other raised elements. There are no distracting marks or abrasions. Population: 18 in 40, 60 finer (10/19). NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

## 1810 O-105 Half Dollar, MS62 Rarely Offered CAC Coin

3801 1810 O-105, R.2, MS62 PCGS. CAC. The first line of the sixth vertical shield stripe extends heavily into the horizontal lines at a diagonal angle, identifying this moderately plentiful 1810 Bust half dollar. It is rare to find a coin in MS62 with CAC endorsement, placing this piece apart from most of its peers. The left-hand border stars are incompletely struck, but the central devices show good definition. Pearl-gray luster reveals shades of green-gold and lilac-blue when tilted beneath a light. Appealing for the grade. CAC (all varieties included): 6 in 62, 16 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 24ET, PCGS# 39411 Base PCGS# 6095

3802 1811 Small 8, O-110, R.1, AU55 PCGS. CAC. The Small 8 date is widely spaced and slants left. On the reverse, AM of AMERICA are joined a the base. Rich shades of cobalt blue and reddish-gold occupy the margins, then mellow to greenish-blue and pale-orange at the centers. The reverse displays gold highlights among shades of blue and gray. This is a Choice About Uncirculated O-110 example, with substantial mint luster and few abrasions or marks. CAC endorsed.

From The Spring Creek Collection, Part I. NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

### 1811 Half Dollar, MS62 O-110, Small 8 Variety

3803 1811 Small 8, O-110, R.1, MS62 PCGS. The date numerals slant heavily to the left on this variety. O-110 is plentiful, and examples are often seen in type collectors' cabinets. This piece is well-struck throughout the interiors, with some expected weakness on the left-hand border stars. Both sides have pearl-gray coloration with lavender accents. Preservation appears finer than the MS62 level at first glance, although a loupe reveals faint hairlines that prevent a finer designation. NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

3804 1813 O-103, R.2, AU58+ PCGS. CAC. Blended goldenbrown and apple-green toning envelops this partly lustrous and impressively unabraded example. Struck a few degrees off center toward 7:30, from double-clashed dies.

From The Spring Creek Collection, Part I. NGC ID# 24EZ, PCGS# 39461 Base PCGS# 6103

#### 1814 Capped Bust Half Dollar, MS63 Late Die State O-102a

3805 1814 O-102a, R.3, MS63 NGC. This remarkable Select specimen exhibits the weak dentilation, with the stars drawn to the edge, that identifies the late die state O-102a. The design elements were strongly impressed on the obverse, but die bulging on the reverse resulted in incomplete detail on the left (facing) side of the eagle. Dramatic clash marks are evident on both sides, but the lustrous surfaces show few signs of contact. NGC ID# 24F3, PCGS# 39476 Base PCGS# 6105

### 1814 O-103 Half Dollar, MS63+ Sought-After CAC Endorsement

3806 1814 O-103, R.1, MS63+ PCGS. CAC. Two sets of prominent clash marks are spread throughout the obverse and reverse fields. On the reverse, a heavy die line connecting the eagle's left (facing) wing to the banner of E PLURIBUS UNUM attributes the Overton-103 die pair. This CAC-approved coin displays exceptional luster and remarkably clean surfaces for the grade, hence the Plus designation from PCGS. Olive-gold toning graces each side. Strike weakness affects the right-hand obverse stars and the reverse arrowheads, but the remainder of the design is well-defined. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

## 1814 Capped Bust Half Dollar, MS63 Clash Marks and Die Lines in the Fields

3807 1814 O-107, R.2, MS63 PCGS. Two die lines are evident in the obverse field, near the ribbon end, and there is a die chip in the angle of the N in UNITED, identifying the O-107 variety. This impressive Select specimen exhibits sharply detailed design elements, with many die striations and clash marks on both sides. The lightly marked, lustrous surfaces are visited by shades of bluishgray, magenta, and golden-tan toning. Population (for the variety): 2 in 63, 1 finer (11/19). NGC ID# 24F3, PCGS# 39484 Base PCGS# 6105

# 1815/2 O-101 Half Dollar, Fine 15 Important Guide Book Variety

3808 1815/2 O-101, R.2, Fine 15 PCGS. Only one die pair was used for half dollar coinage in 1815, showing the 5 in the date punched over an existing 2. This overdate variety is highly sought-after among Bust half dollar and *Guide Book* variety collectors. The present example shows even wear and mottled olive-gray and lilac patina. A small rim bump below the 8 in the date is the only mentionable flaw. From The Spring Creek Collection, Part I. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

### 1817/3 Capped Bust Half, AU58 Late Die State O-101a

3809 1817/3 O-101a, R.2, AU58 NGC. This "naked eye" overdate is extremely popular with Bust half dollar collectors and the issue is seldom encountered in Mint State grades. This example shows the arcing die crack on the reverse through ME to the top of 50 and the rim that characterizes the late die state O-101a variety. Only light wear is evident on the well-detailed design elements and both sides show dramatic clash marks. The lustrous, brilliant surfaces are lightly abraded. NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

3810 1817 O-113a, R.4, AU55 PCGS. CAC. A highly original and sharp example of the scarce late die state O-113a, with two long, diagnostic obverse die cracks — one from star 7 across the cap, and another from the outer tip of star 12 through star 13, across Liberty's curls, to the top of 18 in the date and beyond. The reverse die crack at UNITED STA is yet to form. Silver luster resides beneath iridescent colors at the borders, ceding to pale-blue and gray toning at the centers. A sharp strike exists despite the late die state. NGC ID# 24F6, PCGS# 39508 Base PCGS# 6109

## 1818 O-104a Half Dollar, MS63 Cracked Obverse Die State

3811 1818 O-104a, R.3, MS63 NGC. A network of die cracks on the obverse identifies the middle die state of this collectible Overton variety. A rare later state is known with an additional crack through the right-hand stars, but O-101a does not exhibit that crack. This piece is brilliant and lustrous, showing bold design definition. Only light handling marks are observed. NGC ID# 24F9, PCOS# 39518 Base PCGS# 6113

3812 1819/8 Large 9, O-106, R.4, AU55+ PCGS. CAC. The remnants of an undertype 8 are visible beneath the final digit in the date, with the closure at the ball of the 9 resembling the letter L. This Plusgraded Choice AU specimen is lightly worn and lightly abraded, with pleasing lavender-gray toning and traces of original mint luster. From The Spring Creek Collection, Part I. NGC ID# 24FC, PCGS# 39562 Base PCGS# 6119

3813 1820/19 Square Base 2, O-101a, R.3, AU50 PCGS. CAC. The late die state O-101a shows an incomplete loop of an underdigit 9 beneath 0 in the date. This richly toned 1820/19 overdate retains glimpses of mint luster beneath an overall blanket of golden-gray patina. Sharply defined devices remain despite 10 points of wear, while marks and abrasions are scarcely seen the smooth, attractive surfaces. CAC endorsement is well-deserved.

From The Spring Creek Collection, Part I. NGC ID# 24FE, PCGS# 39573 Base PCGS# 6125

3814 1820 Curl Base 2, Small Date, O-103, R.1, AU58 NGC. The early die state of O-103, without the arcing die crack above the date that typifies a later die stage. The D in UNITED is noticeably lower than E, paired with a Curl Base 2 in the date to confirm the variety. Bronze-like golden-tan toning spreads evenly across both sides, while pale-violet overtones add visual interest. The motifs are sharply defined. NGC ID# 24FD, PCGS# 39563 Base PCGS# 6121

#### 1820 Curl Base 2 Half Dollar, MS62+ O-103, Small Date

3815 1820 Curl Base 2, Small Date, O-103, R.1, MS62+ NGC. Warm golden toning spans the interiors of this Plus-graded MS62 example, ceding to deeper lavender and blue hues around the borders. There is some strike softness on the lower portion of the reverse and on the corresponding upper part of Liberty's cap on the obverse, but the border stars are moderately well-defined. Surprisingly few signs of surface contact are apparent, considering the grade. NGC ID# 24FD, PCGS# 39563 Base PCGS# 6121

## 1823 O-111 Half, MS64+ Elusive Early Die State

3816 1823 O-111, R.3, MS64+ PCGS. CAC. The very scarce early die state for the variety without the die crack through the first four stars. This example is choice with bright underlying mint luster. Dappled green-gold and silver-gray patina drapes much of each side, and blue and peach accents also appear. For non-Guide Book varieties, PCGS has graded just 11 finer examples (5/19). Ex: Long Beach Signature (Heritage, 5/2009), lot 741. PCGS# 39616 Base PCGS# 6131

## 1825 O-110 Half Dollar, MS64 Gunmetal Border Toning

3817 1825 O-110, R.2, MS64 PCGS. The curl of the 2 in the date points toward star 10, and the second T in STATES is over the space between IB. Gunmetal patina clings mainly to the peripheral areas, while the centers remain largely brilliant. That is also where detail is strongest, with evidence of die fatigue around the borders. Clean and bright. NGC ID# 24FL, PCGS# 39657 Base PCGS# 6147

### 1827 O-104 Half Dollar, MS64 Square Base 2

- 3818 1827 Square Base 2, O-104, R.1, MS64 PCGS. CAC. A die line northwest of the lower right leaf pair is the pick-up point for Overton-104. This is a sea-green, chestnut-gold, and cream-gray near-Gem that boasts vibrant luster and uncommonly smooth surfaces. The strike is bold except on the uppermost stars. A Condition Census example of this collectible Bust marriage. NGC ID# 24FN, PCGS# 39696 Base PCGS# 6144
- 3819 1827 Square Base 2, O-121, R.3, MS63 PCGS. The A in STATES is recut at its right base, and the second A in AMERICA nearly touches the arrowhead below. This attractively toned example displays iridescent colors at the borders, gradually merging with the lustrous, silver centers. The stars and central portrait are sharp. The cap is a bit flat at the very top, as are the eagle's claw and arrow fletchings on the opposing side. As a variety, the O-121 seems scarcer than its R.3 rating in Mint State, with an MS63 example ranked third in Stephen Herrman's Autumn, 2019 census for the variety, and third in the Parsley Condition Census as well (10/19). NGC ID# 24FN, PCGS# 39719 Base PCGS# 6144
- 3820 1831 O-101, R.2, MS64 PCGS. The spacing of the date and the horizontal and vertical lines extending beyond the borders of the shield are useful in identifying this available die pair. Much luster covers both sides, which are richly toned in grayish-bronze shades with pinkish-gold accents joined by ice-blue overtones, a no-question near-Gem coin, beautiful and high-end for the grade. This O-101 is tied within the Condition Census for the variety behind two full Gem coins.

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3697. NGC ID# 24FV, PCGS# 39837 Base PCGS# 6159

# 1831 Capped Bust Half Dollar, MS64+ Recut 5, O-103

3821 1831 O-103, R.1, MS64+ PCGS. The upright of the 5 in the denomination is recut, identifying the popular O-103 variety. This Plus-graded Choice specimen exhibits well-detailed design elements, with a faint die crack through the bottom of the date. The well-preserved surfaces are toned in shades of lavender-gray and steel-blue, with traces of satiny mint luster underneath. NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

#### 1831 O-119 Half Dollar, MS64

3822 1831 O-119, R.3, MS64 PCGS. This is an exceptional grade for this scarce variety. Since they began attribution services several years ago, PCGS has examined 27 examples of the O-119, including a single MS64 that is currently the finest PCGS-certified example (10/19). Of course, this piece was not attributed so it could be a second finest-certified example. A late die state, this example has wispy gold toning over brilliant and lustrous silver surfaces. NGC ID# 24FV, PCGS# 39856 Base PCGS# 6159

# 1832 O-101 Half Dollar, MS64 High-Grade Large Letters Example

3823 1832 Large Letters, O-101, R.2, MS64 PCGS. This 1832 O-101 Large Letters half dollar is in an early die state without the crack through the olive leaves and UNI. Pale golden color adorns the outer regions, leaving the interiors lustrous and brilliant. The centers are where definition is somewhat stronger. Challenging and scarce in high grades. Population: 8 in 64, 1 finer (11/19). NGC ID# 24FW, PCGS# 39885 Base PCGS# 6161

## 1832 Small Letters Half, MS64 O-103, Recut 5 in 50C

3824 1832 Small Letters, O-103, R.1, MS64 NGC. CAC. Shades of peach-gold and blue cover the smooth obverse, while dovegray, amber-gold, and blue toning appear on the reverse of this attractive O-103 half. The surfaces are brightly lustrous and satiny, with plentiful eye appeal for the near-Gem grade. The variety is known for its recut 5 in the denomination, with a diagnostic die lump in the drapery fold above the 18 in the date. Housed in a prior-generation NGC holder (pre-barcode) with the early NGC full-width hologram.

Ex: Allstate Coin Co. (8/1992); ANA Signature (Heritage, 8/2016), lot 4682; Dallas Signature (Heritage, 3/2018), lot 3614. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

3825 1832 Small Letters, O-111, R.1, MS64 NGC. A diagonal die line beneath TY of LIBERTY and a pair of dots in the horizontal shield lines confirm the O-111 Small Letters variety. A sharp strike weakens slightly on a few star centers, while the central strike is razor-sharp. Lustrous pearl-gray surfaces show two or three faint hair-thin lines, but no marks of any size. This coin is tied at the top of the Condition Census for the variety along with several other MS64 examples (10/19). NGC ID# 9KXV, PCGS# 39869 Base PCGS# 6160

## 1834 O-107 Half Dollar, MS65 Capped Bust Type Coin

3826 1834 Large Date, Small Letters, O-107, R.1, MS65 NGC. The 1834 Bust half dollar is plentiful, ideal for type representation. This MS65 piece displays satiny luster with blue-gray and light golden toning overall. The obverse border stars exhibit typical strike weakness, as does the inner portion of the eagle's left (facing) wing. No significant abrasions are seen. Census (all varieties): 59 in 65 (2 in 65+), 19 finer (10/19). NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165

#### 1834 Small Date Half Dollar, MS64 O-109, Small Letters

3827 1834 Small Date, Small Letters, O-109, R.1, MS64 NGC. O-109 shows repunching on star 10, an aid in attribution. This near-Gem Capped Bust type coin displays sharp border stars and central devices with rich satin luster. Original blue-green, rose, gold, and mint hues adorn each side, masking any trivial contact marks that limit the grade. Eye appeal is outstanding. NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

#### 1835 O-102 Half Dollar, MS64

3828 1835 O-102, R.3, MS64 PCGS. The obverse has a curved line that bridges the uppermost curl and headband, while the 5 in the denomination is recut. An original Choice example that exhibits sea-green peripheral toning around silver-gray centers. The strike is slightly soft, with little visible detail on the centers of the stars and some weakness noted on the motto and left (facing) wing. Still, the overall eye appeal is strong, with elegant satiny luster on both sides of the coin. Population for all 1835 varieties: 38 in 64 (4 in 64+), 4 finer (10/19).

Ex: ANA Signature (Heritage, 8/2007), lot 824. NGC ID# 24FZ, PCGS# 39928 Base PCGS# 6168

#### REEDED EDGE HALF DOLLARS

# 1836 Reeded Edge Half Dollar, VF35 GR-1, First Steam Press Issue

3829 1836 Reeded Edge, GR-1, R.2, VF35 PCGS. This first-year steam press issue with a reported mintage of 1,200 coins never experiences a lull in demand. Example are always popular with collectors. Choice VF surfaces are steel-gray with deeper hues around the margins. A slightly uneven strike and blending from circulation explain alternating areas of crisp detail and softness. A few hairlines and pinscratches appear on each side. NGC ID# 2U28. PCGS# 531046 Base PCGS# 6175

# 1839 Large Letters Half Dollar, MS64 GR-7, Lustrous Toned Surfaces

3830 1839 Large Letters, GR-7, R.1, MS64 PCGS. Dappled blue and russet toning vie for territory on this lustrous, pearlescent-silver Reeded Edge half. An up-and-down strike is typical for the GR-7 Large Letters variety, with weakness at the bust drapery, ST of STATES, and HALF DOL., while the hair curls are sharp and the upper portions of the eagle are fully defined. Gem examples of any 1839 Bust half are rare in Gem condition, adding to the appeal of this smoothly frosted, near-Gem example. Population (all Large Letters varieties): 54 in 64, 6 finer (10/19). NGC ID# 24G6, PCGS# 531104 Base PCGS# 6179

#### SEATED HALF DOLLARS

3831 1846-O Tall Date, WB-106, Die Pair 25, R.6, XF40 PCGS. CAC. Heavy die cracks join the bases of HALF and D to the border. A natural and attractive example with light to medium gray toning. Scattered marks on the reverse are inconsequential. From The Spring Creek Collection, Part I. PCGS# 801131 Base PCGS# 6256

## 1848-O Seated Half, MS63 WB-101 Early Die State, Nice Luster

3832 1848-O WB-101, Die Pair 26, R.4, MS63 PCGS. CAC. A discovery coin of sorts, struck from an early state of the dies. Most of the devices are sharp, with exception of a few star centers on the obverse and slight weakness at the eagle's left (facing) talon. The obverse matches the Wiley-Bugert Die Pair 26, although in an earlier state than pictured in the reference, with full foot support and no die cracks. The reverse die is a match for Reverse "L," which in our opinion is an earlier die state of the reverse from Die Pair 26 (Reverse "O"). A lustrous and attractive Select Uncirculated coin, quite scarce in this condition. The fields and devices are satiny and smooth, with light lilac and peach-gold patina. Remarkably free of any significant marks and CAC endorsed. Population (all varieties): 10 in 63, 10 finer (10/19). PCGS# 801178 Base PCGS# 6261

## 1851 WB-101 Half Dollar, AU58+ CAC Endorsement, Better Date

3833 1851 WB-101, Die Pair 6, R.4, AU58+ PCGS. CAC. The 1851 Seated Liberty half dollar is a semikey date in the series. Coinage barely topped 200,000 coins, and the majority of these were lost to attrition or melting prior to the weight reduction of the half dollar in 1853. Uncirculated coins are rare and costly to acquire. This near-Mint example is Plus graded and CAC endorsed — as close to Mint State as possible. The devices are sharp, and the lustrous fields yield original olive, gold, russet, and amber toning. Eye appeal is pleasing. Population: 12 in 58 (1 in 58+), 33 finer. CAC: 1 in 58, 7 finer (10/19).

From The Spring Creek Collection, Part I. PCGS# 801791 Base PCGS# 6266

## 1853 Half Dollar, MS63 Arrows and Rays

- 3834 1853 Arrows and Rays MS63 PCGS. An important singleyear type coin, the 1853 Arrows and Rays half dollar has demand from type, date, and variety collectors. Mint State examples are always sought by collectors. This Select Mint State piece has satin luster beneath silver-gray and peripheral gold toning. A bold strike ensures strong bidder participation. NGC ID# CZY8, PCGS# 6275 Base PCGS# 6275
- 3835 1858-S Large S, WB-101, Die Pair 14, R.3, MS61 NGC. Although the mintage of 1858-S half dollars swelled to 476,000 coins throughout the year, few have survived in Mint State grades as these coins were needed for commerce. Bill Bugert identifies 14 die pairs that all range from R.3 to R.5 on the rarity scale. This attractive Mint State example has brilliant, untoned surfaces with slight field reflectivity on each side. Census for all varieties: 4 in 61, 12 finer (10/19). PCGS# 800774 Base PCGS# 6295
- 3836 1859-S Large S, WB-101, Die Pair 2, R.3, AU58 PCGS. CAC. Every one of the eight die pairs carries an R.3 or R.4 rarity rating. Obverse and reverse die cracks confirm the die pair of this late die state piece. A lovely near-Mint example with frosty silver luster. Pale gold toning appears on the obverse with olive-gold on the reverse. Population for all die pairs: 20 in 58, 44 finer. CAC: 1 in 58, 11 finer (10/19).

From The Spring Creek Collection, Part I. PCGS# 800775 Base PCGS# 6298

#### 1861-O Half Dollar, XF40 C.S.A. Obverse Die

1861-O C.S.A. Obverse XF40 PCGS. FS-401, WB-102, Die Pair 11, R.3. A die crack from the border to Liberty's nose identifies this piece that was struck from the same obverse die that was used for the extremely rare Confederate States half dollars. These pieces from that obverse die are highly popular with collectors today. Light silver-gray surfaces exhibit pale gold toning with attractive blue peripheries. Population: 13 in 40, 29 finer (11/19). NGC ID# 24J8, PCGS# 39968 Base PCGS# 6303

### 1862 Half Dollar, MS64+ Brilliant and Softly Frosted

- 3838 1862 WB-101 MS64+ PCGS. CAC. Half dollar output fell to barely more than a quarter-million coins in 1862, down considerably from the year before. Brilliant surfaces radiate soft mint frost and show remarkably few abrasions for the grade. Well-struck with minimal softness on Liberty's head and the eagle's left (facing) talon. Population: 17 in 64 (5 in 64+), 16 finer. CAC: 6 in 64, 6 finer (10/19). PCGS# 572151 Base PCGS# 6307
- 3839 1866 Motto, WB-101, MS63 PCGS. WB-101 is the designation for a Normal Date 1866 Motto half dollar, without repunching or misplaced digits. The present Select example is ideal for date and type collectors. Although the fields are deeply prooflike, there is considerable strike weakness on the devices affecting Liberty's breasts and lap on the obverse, and on the reverse, much of the central eagle and shield. Light golden toning cedes to steel-blue around the borders, and abrasions are minimal. Population: 13 in 63, 25 finer (11/19). PCGS# 572171 Base PCGS# 6319
- 3840 1871-CC WB-101, Die Pair 2, R.4, VF25 PCGS. Soft pinkishgray coloration bathes both sides of this Carson City half. Despite moderate wear, the design elements retain relatively sharp detail, and the surfaces are remarkably clean. Wiley and Bugert (1993) assign an R.5 rating for the normal date variety of this issue. This is an excellent opportunity for the Seated Liberty half dollar specialist From The Spring Creek Collection, Part I. NGC ID# 646C, PCGS# 572197 Base PCGS# 6331

## 1873 No Arrows, Open 3 Half Dollar Sole CAC Coin for the Grade, Good 4

3841 1873 No Arrows, Open 3, WB-101, Good 4 PCGS. CAC. The No Arrows, Open 3 half dollar of 1873 is a series key date. The recorded mintage was 214,200 pieces, but few have survived in any grade. No proofs of this variety were struck, making business strikes essential for Seated half dollar variety collectors. This piece is well-worn but has complete rims. The fields have deep gunmetal-gray patina, contrasting with lighter slate-gray relief elements that produce a "circulation cameo" effect. The CAC endorsement is unique at the Good 4 grade level for this issue. Population: 3 in 4, 37 finer. CAC: 1 in 4, 8 finer (10/19).

From The Spring Creek Collection, Part I. PCGS# 572206 Base PCGS# 6337

## 1873 Arrows Half, MS64 Toned and Sharply Defined

- 3842 1873 Arrows MS64 PCGS. CAC. Both sides of this near-Gem Seated half dollar exhibit subdued gold toning with splashes of ebony over its silver-gray surfaces. The design elements are boldly defined and the eye appeal is excellent.

  Ex: Summer FUN Signature (Heritage, 7/2012), lot 3729. NGC ID# 24L7, PCGS# 6343 Base PCGS# 6343
- 3843 1873-CC Arrows, Open 3, Small CC, WB-102, Die Pair 4, R.4, VF30 PCGS. CAC. A great many circulated 1873-CC Arrows half dollars were accumulated from the mid 1980s to the late 1990s by Pete Blake as part of the Berlinghof Hoard. Bill Bugert estimates nearly half of the existing pieces were included in the hoard well over 300 pieces. All are well-dispersed now, but it would be no surprise if this coin was one of better examples. Attractive olivegray surfaces show few marks of any kind. Well-defined devices accompany smooth, problem-free surfaces. CAC endorsement adds to the appeal.

From The Spring Creek Collection, Part I. PCGS# 800676 Base PCGS# 6344

3844 1874 Large Arrows, WB-102, MS64 NGC. Always popular as a representative of the two-year Arrows (with Motto) type, this Choice Uncirculated 1874 example is the Large Arrows variant. Reddish-brown toning deepens to umber-gray at the borders, and selectively surrounds the nearby raised motifs. Soft mint luster is resolute beneath the toning, and glows throughout both sides of this well-struck half. Scarce any finer. Census: 53 in 64 (1 in 64+, 1 in 64★), 14 finer (10/19). NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

# 1875 Seated Liberty Half Dollar, MS65+ Rarely Seen Finer

3845 1875 WB-101 MS65+ PCGS. Despite a mintage of 6 million pieces, the 1875 Seated Liberty half dollar is a rare issue in MS65 condition, and finer coins are extremely rare. This Plus-graded Gem exhibits sharply detailed design elements and dramatic clash marks on both sides. The well-preserved surfaces are lustrous and lightly toned in shades of lavender-gray, with specks of amber. Population: 18 in 65 (2 in 65+), 5 finer (11/19). PCGS# 572226 Base PCGS# 6349

#### 1877-CC Half Dollar, MS63 CAC Endorsement

3846 1877-CC Type Two Reverse, Medium CC, WB-103, Die Pair 13, R.2, MS63 PCGS. CAC. A collectible Carson City issue, boasting a mintage in excess of 1.4 million coins. Nonetheless, Uncirculated examples grading finer than MS63 are scarce, and few Mint State CAC coins are typically available to collectors. This piece displays well-struck devices and brilliant, softly frosted luster. There are no singular abrasions, only a few light handling marks that limit the grade.

From The Spring Creek Collection, Part I. PCGS# 800749 Base PCGS# 6356

## 1877-S WB-104 Seated Half, MS65 Fully Struck, CAC Endorsed

3847 1877-S Closed Bud, Very Small S, WB-104, Die Pair 29, R.3 MS65 PCGS. CAC. Housed in an old, Generation 4.0 blue label PCGS holder with barcode on the back (in use from 1998-2002), this Gem 1877-S features attractive reddish-gold and cerulean-blue toning throughout both sides. An even, sharp strike defines the motifs, with all obverse stars fully struck and well-struck hair strands on Liberty's head. The eagle is fully feathered throughout the head, neck, wings, and legs. Noticeable field reflectivity flashes beneath the toning when rotated in light. Population: 17 in 65, 32 finer. CAC: 8 in 65, 17 finer (9/19). NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

### 1884 Half Dollar, MS65 Rich Peripheral Patina, Semiprooflike

3848 1884 Repunched Date, WB-102, MS65 NGC. Smooth, minimally marked fields are semiprooflike throughout both sides of this Gem 1884 half. Just 4,000 business strikes were issued. Minor repunching on the base of 4 identifies the WB-102 variety, while iridescent toning at the margins reveals multiple colors when viewed under a loupe. The surfaces are otherwise nearly untoned and sharply struck, with strong natural eye appeal. NGC Census (all varieties): 24 in 65 (1 in 65+, 1 in 65★), 21 finer (10/19). NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

#### 1884 Half Dollar, Sharp MS65 Low Mintage of 4,400 Coins

3849 1884 Repunched Date, WB-102, MS65 PCGS. CAC. The 4 is narrowly repunched at the base. Partially prooflike fields surround frosted devices of this lightly toned strike 1884 half. Blue and amber-orange shades gather at the rims, while pale-gold toning covers the Gem central surfaces. Mint luster illuminates a razor-sharp, full strike. Just 4,400 pieces were struck for circulation, and many were preserved by dealers and speculators who were alerted of the low mintage. Housed in a circa 1998-2002 blue label holder with barcode on the back. CAC endorsement confirms the highend surfaces and strong eye appeal. Population: 17 in 65, 32 finer (9/19). NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

#### PROOF SEATED HALF DOLLARS

3850 1862 PR63 PCGS. CAC. The cream-gray fields are outlined by orange-gold, rose-red, and electric-blue toning. This PR63 half dollar has impressive eye appeal, as affirmed by CAC. A popular date with a proof mintage of 550 pieces. NGC ID# 27TN, PCGS# 6416

# 1862 Half Dollar, PR65 Dusky Gold and Lavender Toning

3851 1862 PR65 PCGS. The popularity of the 1862 Seated half dollar in proof format puts pressure on survivors across all grades levels, especially Gems. Dusky gold and lavender border toning dissipates toward the centers. Minimal contact occurs in the right obverse field. From a mintage of 550 proofs. Population: 18 in 65 (1 in 65+), 3 finer (10/19). NGC ID# 27TN, PCGS# 6416

3852 1865 PR64 PCGS. A pleasing near-Gem proof with deeply mirrored fields and sharp devices. Blue, violet, and gold make appearances around the outer peripheries, while the interiors display a delicate russet hue. Population: 57 in 64 (2 in 64+), 24 finer (10/19). NGC ID# 27TS, PCGS# 6419

3853 1871 PR65 PCGS. The mintage was 960 proofs — about normal for the years preceding the Panic of 1873. For some reason, highgrade 1871 proofs are scarcer than those from the surrounding years. This Gem example is sharply struck with iridescent toning that is well-balanced obverse-to-reverse. Reddish-tan, sky-blue, and lemon-gold shades predominate on the obverse, while the reverse offers primarily reddish-tan and blue shades. Flashy mirrors surround frosted devices, contrast limited by the attractive toning. Population: 16 in 65 (1 in 65+), 5 finer (10/19). NGC ID# 27U6, PCGS# 6429

3854 1873 Arrows PR63 NGC. A slight increase in the weight of dimes, quarters, and half dollars necessitated the addition of arrows on either side of the date — just one of the changes instituted upon enactment of the Coinage Act of 1873. Small Arrows and an Open 3 were included on the 1873 With Arrows half dollar proofs. Only 500 pieces were struck. This is lightly toned Select proof example, with a few light obverse hairlines and gleaming silver fields around sharply struck, lightly frosted devices. Census: 33 in 63, 66 finer (10/19). NGC ID# 27UU, PCG# 6434

# 1875 Half Dollar, PR66 Sharply Struck and Lightly Toned

3855 1875 PR66 PCGS. Both sides of this Premium Gem exhibit delicate cameo contrast with deeply mirrored fields and satin devices. The design motifs are bold. The surfaces exhibit wispy champagne toning with light gold and vibrant blue toning at the borders. Population: 13 in 66, 3 finer (10/19).

Ex: PNG-Dallas Signature (Heritage, 2-3/2015), lot 3123. NGC ID# 27U9, PCGS# 6436

## 1878 Half Dollar, PR66 Multicolor Toning, Flashy Mirrors

3856 1878 PR66 PCGS. Type Two Reverse. Nearly all proofs feature a Closed Bud, as here. Blended shades of blue, gold, magenta, and violet gently color most of the peripheral areas, while the right obverse field and central reverse are minimally toned. Flashy fields reside beneath the slightly dusky overlay. From a mintage of 800 proofs. Population: 7 in 66, 2 finer (10/19). NGC ID# 27UD, PCGS# 6439

# 1880 Seated Half, PR66 Ex: Floyd T. Starr Proof Set CAC Approved, Original Toning

3857 1880 PR66 PCGS. CAC. Ex: Starr. Popularity of the Trade dollar proofs had a ripple effect on the other silver issues, with 1,355 proofs struck in 1880. This Premium Gem half dollar proof is razor-sharp with original proof set toning, tracing its previous appearance to Stack's January 1993 auction of the Floyd T. Starr proof sets. There, the catalog notes: "In our opinion, the silver coins from the Dime to Silver Dollar are form an original set even though they vary a little in coloration." Blue toning is most intense along the left rim, ceding to pink and mauve shades left-to-right. A prominent die lump on the left (facing) wing confirms one of two proof die pairs for the issue. Housed in an old green label holder (Generation 3.0 1990-1993) with CAC endorsement. Population: 25 in 66 (2 in 66+), 7 finer. CAC: 14 in 66, 2 finer (9/19). NGC ID# 27UF, PCGS# 6441

3858 1888 PR66+ NGC. The circulation strike 12,000-coin mintage is marginally higher than other half dollar issues from this decade, but it is minuscule in the larger context of the Seated Liberty half dollar series. The proof mintage (832 pieces) is normal, yet pressured by demand given the scarcity of high-grade circulation strikes. Blended mauve, lilac, and powder-blue patina covers this proof with splashes of deeper toning mostly on the obverse. Preservation is impeccable. Census: 12 in 66 (1 in 66+), 6 finer (10/19). NGC ID# 27UP, PCGS# 6449

#### BARBER HALF DOLLARS

1892 Barber Half Dollar, MS65 Scarce CAC Example

3859 1892 MS65 PCGS. CAC. The well-preserved surfaces of this delightful first-year Gem are blanketed in vivid shades of lavendergray, golden, and ocean-blue toning, with sharply detailed design elements and vibrant mint luster underneath. The first-year issue is plentiful overall, but coins grading finer than MS65 are elusive. Pieces in this and finer grades with CAC recognition are scarce. CAC: 35 in 65, 44 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

### 1893 Barber Half, High-Luster MS65+ Silver-White, Condition Rarity

3860 1893 MS65+ PCGS. CAC. As the only Plus-graded representative of the MS65 grade at PCGS, this brilliant and supremely lustrous Barber half commands attention not only for its high-end grade, but for its stunning silver-white surfaces as well. The strike is sharp and the eye appeal is unsurpassed for a pre-1900 Barber half. CAC endorsement simply adds to the accolades. Population: 21 in 65 (1 in 65+), 14 finer. CAC: 9 in 65, 10 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24LK, PCGS# 6465

## 1894 Barber Half Dollar, MS66 Attractive Multicolor Border Toning

3861 1894 MS66 PCGS. The silver-gray centers are surrounded by deep reddish-russet and cobalt-blue toning at the rims. Fully struck and a splendid coin with a look of unquestioned originality. Even though 1.14 million pieces were struck of the 1894-P, it is a most uncommon "common" date in higher Mint State grades. Population: 12 in 66 (2 in 66+), 3 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24LN, PCGS# 6468

3862 1895-S MS64 NGC. An attractive Choice representative of this popular issue, with sharply detailed design elements throughout and a network of peripheral die cracks on the obverse. The well-preserved brilliant surfaces radiate vibrant mint luster. Census: 35 in 64 (3 in 64+, 1 in 64★), 17 finer (10/19). NGC ID# 24LU, PCGS# 6473

## 1895-S Half Dollar, MS65 Razor-Sharp Detail

3863 1895-S MS65 PCGS. This may well have been one of the first half dollars off the press at the San Francisco Mint in 1895. The strike is fully defined on the stars, curls, talons, fletchings, and shield corner — the areas that usually appear incomplete. Variegated toning is a shade lighter on the obverse compared to the reverse, while frosty luster shines from underneath the patina on each side. The cheek and fields are surprisingly clean even for this high grade. A major rarity so fine. Population: 11 in 65 (1 in 65+), 6 finer (10/19). Ex: Central States Signature (Heritage, 4/2017), lot 3343.

From The Lithuania Collection, Part II. NGC ID# 24LU, PCGS# 6473

3864 1896 MS65 PCGS. While the 1896 is readily available in lower Mint State grades from a mintage just shy of 1 million pieces, the issue is scarce in Gem or finer grades with an estimated 30 to 40 pieces thought to exist. This sharp and attractive, frosted Gem displays ice-blue and pale-gray patina that gathers at the margins, and diffuses toward the silver centers. A sharp strike perseveres along the right (facing) shield junction, shield border, and eagle's leg/talon. Population: 17 in 65, 5 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 39RH, PCGS# 6474

3865 1896-O XF40 PCGS. CAC. Pleasing shades of lavender-gray toning blanket the lightly abraded surfaces of this low-mintage Barber half dollar, with XF sharpness on the design elements and a streak of amber patina at P of PLURIBUS. Population: 32 in 40, 78 finer. CAC: 7 in 40, 18 finer (10/19).

From The Spring Creek Collection, Part I. NGC ID# 24LW, PCGS# 6475

## 1896-S Half Dollar, MS65 A Rarity This Fine

3866 1896-S MS65 PCGS. The 1896-S Barber half is scarce in all Mint State grades, with the majority of the survivorship in this condition grading MS63 or MS64. Gems are rare. This piece displays satiny luster and near-brilliant interiors, with light russet-gold around the borders. The eagle's right (facing) shoulder is a trifle soft, but the weakness is not obtrusive. The talons and fletchings are sharp. Few finer 1896-S halves are known. Population: 11 in 65 (3 in 65+), 6 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24LX, PCGS# 6476

3867 1897-O XF40 PCGS. CAC. The decade-low mintage of 632,000 pieces makes the 1897-O a semikey issue in any grade, yet midgrade through About Uncirculated examples are particularly challenging to find. This is an exceptional XF40 coin, CAC-endorsed, with pleasing old-silver toning and all letters of LIBERTY sharp. The crisp strike carries over to the reverse, where balanced wear mitigates any weakness at the shield junction and eagle's leg. Putting together an entire set of Barber halves at this grade with original surfaces and strong eye appeal is a formidable mission, attempted by many but successfully completed by few. Population: 15 in 40, 83 finer. CAC: 3 in 40, 14 finer (9/19). NGC ID# 24LZ, PCGS# 6478

## 1899-O Barber Half, MS65 Bright Prooflike Fields

3868 1899-O MS65 PCGS. David Lawrence, in his *The Complete Guide* to Barber Halves, writes that this date "Sometimes comes P/L." There is no denying that this is the case for the present example. Moreover, a cameolike effect results when the coin is rotated under a light source. The design features are nicely brought up, except for minor softness in the upper-right corner of the shield and the adjacent feathers. The essentially untoned centers gently transition into delicate orange-rust and aqua-green patina along the peripheries. Nicely preserved surfaces characterize each side, though a couple of minuscule ticks on the shield and some wispy slide marks on Liberty's cheek are noted for accuracy. Population: 10 in 65, 9 finer (10/19).

Ex: Central States Signature (Heritage, 4/2006), lot 2052; Dallas Signature (Heritage, 11/2018), lot 3719.

From The Lithuania Collection, Part II. NGC ID# 24M7, PCGS# 6484

3869 1900-S MS63 PCGS. Despite a mintage of more than 2.5 million coins, the 1900-S is rarely found finer than this example, with only 38 finer PCGS certified examples. A bold strike shows full obverse and reverse details on this Select Mint State piece. Remarkable toning ranges from light champagne to deep steel, with gold, green, and violet accents. Population: 20 in 63, 38 finer (10/19). NGC ID# 57PC, PCGS# 6488

# 1902 Half Dollar, Richly Toned MS65+ Unquestionable Rarity at This Level

3870 1902 MS65+ PCGS. Strike definition is as strong as can be expected, with razor-sharp detail on the stars, curls, fletchings, and talons. Subdued frost emerges from beneath a layer of multicolor patina. Shades include blue, green, violet, gold, and olive. Barber half dollar output at the Philadelphia Mint nearly reached 5 million coins in 1902. Nevertheless, Gems are unquestionable condition rarities. Population: 27 in 65 (1 in 65+), 7 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24MF, PCGS# 6492

## 1903 Barber Half Dollar, MS65 Rare in This and Finer Grades

3871 1903 MS65 PCGS. Attractive shades of golden-brown, ceruleanblue, and lavender toning visit the well-preserved surfaces of this impressive Gem. The design elements are sharply detailed and satiny mint luster shines through the patina. Eye appeal is outstanding. Population: 13 in 65 (1 in 65+), 7 finer (10/19). Ex: Summer FUN Signature (Heritage, 7/2016), lot 3884.

From The Lithuania Collection, Part II. NGC ID# 24MJ, PCGS# 6495

## 1903-S Half Dollar, MS65 Toned Condition Rarity

3872 1903-S MS65 PCGS. Areas of brilliance combine with splashes of gold, crimson, and cobalt-blue patina that occurs mainly around the borders. The obverse stars are well brought-up, while the usual softness appears on the headband, right (facing) talon and shield corner. Overall preservation is excellent with just a couple of small ticks on the cheek. Population: 11 in 65, 8 finer (10/19). Ex: Dallas Signature (Heritage, 4/2017), lot 15548.

From The Lithuania Collection, Part II. NGC ID# 24ML, PCGS# 6497

# 1904 Half Dollar, MS65 Surprisingly Rare in Gem Condition

3873 1904 MS65 PCGS. The 1904 is a sleeper Philadelphia date in high Mint State conditions, and it is possible for a full year to pass without a single MS65 example crossing the block in one of our auctions. This sharp Gem example displays partially prooflike fields that shimmer with iridescent colors including pale champagnegold, lavender, and rose hues. A full strike encompasses the eagle's right shield/wing junction as well as the leg, talons, and arrows. Population: 18 in 65 (2 in 65+), 7 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 5EPG, PCGS# 6498

### 1905 Barber Half Dollar, MS66 Little-Saved in High Grades

3874 1905 MS66 PCGS. Ex: Shireman. A mintage of 662,000 coins is the fifth-lowest total in the Barber half dollar series. In addition to its low mintage, the 1905 was little-saved in high grades because of the overwhelming popularity of proofs among contemporary collectors. Each side of this piece offers golden patina over clean, strongly impressed surfaces with vigorous underlying mint luster. Population: 9 in 66 (2 in 66+), 4 finer (10/19).

Ex: Harry Laibstain (3/1/2003); FUN Signature (Heritage, 1/2016), lot 4127

From The Lithuania Collection, Part II. NGC ID# 28PX, PCGS# 6501

#### 1905-O Half Dollar, MS65 Better New Orleans Issue

3875 1905-O MS65 PCGS. CAC. Most issues in the Barber half series are conditionally rare in MS65, even otherwise common dates. The 1905-O is no exception. With a mintage of only 505,000 pieces, it is also a better date in the absolute sense. This CAC-endorsed Gem is well-preserved with light golden toning. The eagle's right (facing) wing junction shows some of the expected softness. Population: 15 in 65 (4 in 65+), 11 finer. CAC: 4 in 65, 11 finer (10/19). Ex: Long Beach Signature (Heritage, 2/2016), lot 4002.

From The Lithuania Collection, Part II. NGC ID# 24MS, PCGS# 6502

3876 1906-D MS65 PCGS. CAC. Ex: Price/Duckor/Friend. This bold Gem has satiny luster that shines through delicate gold and heather toning, with deeper blue-green and gold at the borders. Duckor and Friend traded 1906-D half dollars in September 2002; this is the coin that was offered as part of Dale Friend's #2 All-Time Finest PCGS Registry Set. Population: 16 in 65, 11 finer. Population: 18 in 65, 10 finer. CAC: 5 in 65, 8 finer (10/19).

Ex: Dr. Thaine B. Price Collection (David Akers, 5/1998), lot 167; Dr. Steven Duckor Collection; FUN Signature (Heritage, 1/2009), lot 2946; ANA Signature (Heritage, 8/2010), lot 5043; Central States Signature (Heritage, 4/2017), lot 3354; Dallas Signature (Heritage, 1/2018), lot 3729.

From The Lithuania Collection, Part II. NGC ID# 24MV, PCGS# 6505

3877 1907 MS64 PCGS. Gold CAC. The present lot is the only 1907 commercial half dollar to earn a gold CAC seal. It is also the only MS64 Barber half dollar with a gold CAC seal, and the only Philadelphia business issue between 1900 and 1908 with a gold CAC seal. Medium wheat-gold toning visits satiny and unmarked surfaces. The strike shows only a hint of softness on the right shield corner and the fletchings. Certified in a first generation "rattler" holder. NGC ID# 24MY, PCGS# 6508

#### 1907-O Half Dollar, Frosty MS65+ Late Reverse Die State

3878 1907-O MS65+ PCGS. CAC. A conditionally rare Gem example of this otherwise plentiful New Orleans issue, showing lovely original luster and a frosty cartwheel effect. Light golden interiors cede to vivid orange-gold, olive, russet, and aquamarine border toning, and few abrasions are visible under a loupe. Struck with an excessively eroded reverse die, with heavy metal flowlines in the margins on that side and die buckling on the eagle's right (facing) wing. Clash marks are also apparent. Population: 15 in 65 (3 in 65+), 10 finer. CAC: 5 in 65, 12 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24N2, PCGS# 6510

3879 1908 MS65 PCGS. Ex: Friend. All four operating mints produced half dollars in 1908, although the smallest coinage was accomplished at Philadelphia (just more than 1.3 million coins). Gem examples of this issue are rarely offered. This MS65 coin is well-struck on the obverse but slightly weak on the reverse eagle's right (facing) shoulder and talons. Dusky lilac and golden toning graces each side, and no distracting abrasions are seen. Population: 14 in 65 (1 in 65+), 12 finer (10/19).

Ex: Larry Shepherd; FUN Signature (Heritage, 1/2009), lot 2949; FUN Signature (Heritage, 1/2016), lot 4136; Dallas Signature (Heritage, 11/2018), lot 3733.

From The Lithuania Collection, Part II. NGC ID# 24N4, PCGS# 6512

3880 1908-O MS65 PCGS. CAC. Ex: Friend. The high mintage of more than 5.3 million pieces leads some collectors to believe that Gem examples are easily obtained. In fact, there is no Barber half dollar issue that is easily obtained in Gem or finer grades. Dale Friend chose this lovely Gem to represent the '08-O in his collection because of its remarkable aesthetic appeal. Both sides have frosty luster with champagne toning and a frame of gold, blue, and lilac. Slight weakness is evident as usual near the right shield tip. CAC: 9 in 65, 24 finer (10/19).

Ex: Larry Whitlow; Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars (Heritage, 1/2009), lot 2952.

From The Lithuania Collection, Part II. NGC ID# 24N6, PCGS# 6514

#### 1910 Half Dollar, MS65+ Excellent Surfaces

3881 1910 MS65+ PCGS. CAC. Among Philadelphia Mint Barber half dollars, the 1913, 1914, and 1915 issues are known for their low mintages and rarity. However, the 1910 is another elusive issue in all Mint State grades, from a mintage of less than half a million coins. The 418,000-coin production is the fifth lowest of the entire series. This impressive MS65+ piece has satiny luster with reflective fields and attractive iridescence over silver-gray surfaces. Population: 24 in 65 (3 in 65+), 8 finer. CAC: 13 in 65, 3 finer (10/19).

Ex: New York Signature (Heritage, 12/2011), lot 3663; Central States Signature (Heritage, 4/2016), lot 3592.

From The Lithuania Collection, Part II. NGC ID# 24NB, PCGS# 6519

## 1911-S/S Half Dollar, MS65 Repunched Mintmark

3882 1911-S/S FS-501 MS65 PCGS. An intriguing repunched mintmark variety. This piece is boldly struck overall, with a touch of softness noted on the hair detail just above Liberty's temple and forehead, and on the eagle's right (facing) talons. The surfaces are satiny and lightly toned, with a subtle golden-gray cast across their carefully preserved faces. Population: 1 in 65, 1 finer (10/19). From The Lithuania Collection, Part II. PCGS# 150843 Base PCGS# 6523

3883 1912 MS65 PCGS. Ex: Friend. This 1912 Barber half is a sparkling Gem coin with a prominent pedigree. It displays radiant and frosty silver luster, with highly appealing gold and faintly iridescent toning on both sides. Although moderately available as a date, the 1912 is conditionally rare in Gem or finer grades. Population: 20 in 65, 5 finer (10/19).

Ex: Dennis Nagy; The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars / FUN Signature (Heritage, 1/2009), lot 2960; FUN Signature (Heritage, 1/2016), lot 4149.

From The Lithuania Collection, Part II. NGC ID# 24NG, PCGS# 6524

### 1912-S Half Dollar, MS65 Seldom Seen This Fine

3884 1912-S MS65 PCGS. CAC. Plentiful in lower grades, the 1912-S Barber half dollar becomes a condition rarity at the Gem level, and finer pieces are exceedingly elusive. This golden-toned CAC coin displays a sharp strike with a few trivial grazes on Liberty's cheek that limit the grade. The eagle's right (facing) wing junction is slightly weak, but the talons and fletchings are bold. Population: 25 in 65, 9 finer. CAC: 11 in 65, 8 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24NJ, PCGS# 6526

## 1913 Barber Half Dollar, MS65 Key Philadelphia Issue

3885 1913 MS65 PCGS. Like the 1910, 1914, and 1915 half dollars, the 1913 is a key-date in the Barber series, from a low mintage of only 188,000 coins. Although a single point below the Hugon coin, this piece that was once part of the Dale Friend Collection is equal to the Price coin and finer than the Pryor coin. Eliasberg had a proof.

This Gem is brilliant and lustrous with frosty silver surfaces and only a trace of pale gold toning on each side. It features a bold strike with weakness right of the shield and at the arrow feathers, usual locations of weakness on nearly every Barber half dollar. Population: 20 in 65 (2 in 65+), 9 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24NK, PCGS# 6527

### 1913-D Barber Half Dollar, MS65 Overlooked in High Grades

3886 1913-D MS65 PCGS. CAC. The average certified grade for this lower-mintage Denver issue is marginally better than AU50. Nevertheless, examples are readily obtainable through the MS64 grade level. The certified total drops precipitously in Gem condition, where the 1913-D becomes a notable condition rarity. From a mintage of 534,000 coins, this issue is generally overlooked in high grades, though specialists will recognize its importance. This Gem Barber half is awash in radiant cartwheel luster with a thin coating of golden-gray over brilliant surfaces. The strike shows minor softness on several stars, Liberty's forecurl, and the eagle's right wing and talon. However, the overall impression is bold, and so is the eye appeal. Population: 19 in 65 (3 in 65+), 7 finer. CAC: 8 in 65, 5 finer (10/19).

Ex: Baltimore Auction (Bowers and Merena, 11/2007), lot 2328; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98762. From The Lithuania Collection, Part II. NGC ID# 24NL,

PCGS# 6528

3887 1914 AU55 PCGS. CAC. This late-series issue claims a small mintage of 124,300 pieces. The design elements show just a trace of wear on the high points and the lightly abraded surfaces are blanketed in shades of lavender-gray toning.

From The Spring Creek Collection, Part I. NGC ID# 24NN, PCGS# 6530

# 1914-S Half Dollar, MS65 Attractive CAC-Endorsed Example

3888 1914-S MS65 PCGS. CAC. While the 1914 Philadelphia issue is one of the undeniable series key issues, the 1914-S Barber half is almost equally challenging in high Uncirculated grades, although it seldom receives the attention it deserves. The same can be said for virtually all Barber halves from the teens, regardless of Mint. Wisps of pale, reddish-gold toning add originality to the lustrous, silvergray surfaces with traces of blue patina at the borders. A sharp strike includes strong definition at the shield junction, leg, and talons. This is a frosted, CAC-endorsed Gem. Population: 26 in 65 (2 in 65+), 8 finer. CAC: 9 in 65, 11 finer (10/19).

From The Lithuania Collection, Part II. NGC ID# 24NP, PCGS# 6531

## 1915 Half Dollar, MS65 Conditionally Rare Low-Mintage Date

1915 MS65 PCGS. CAC. The Barber series closes with three low-mintage Philadelphia issues: the 1913, 1914, and 1915. This key date claims a mintage of just 138,000 pieces (second-lowest in the series), and according to *The Complete Guide to Barber Halves* it is "the toughest of the three in most better grades, including MS." This Gem is a high-end condition rarity worthy of consideration. It displays luminous luster issuing from well-preserved surfaces veiled in lavender-gray, olive, and golden-tan patina. The strike is a touch light, but this remains an inarguably original and appealing late-series conditional rarity. Housed in an old green label holder with a "green bean" sticker from CAC. Ex: Purchased from David Lawrence Rare Coins (12/2009); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98763. From The Lithuania Collection, Part II. NGC ID# 24NR, PCGS# 6532

#### PROOF BARBER HALF DOLLARS

## 1893 Barber Half, PR65+ Cameo Second Year of Type

3890 1893 PR65+ Cameo NGC. The frosted motifs of this Gem proof Cameo are suspended over the deep, watery fields. The essentially untoned surfaces are sharply struck, though the upper-right corner of the shield exhibits minor weakness. A few minuscule marks do not distract. Census: 16 in 65 Cameo (2 in 65+), 37 finer (10/19). Ex: Long Beach Signature (Heritage, 2/2009), lot 1400. NGC ID# 6UKV, PCGS# 86540

# 1894 Half Dollar, PR66+ Variegated Colors, Repunched Date

3891 1894 PR66+ PCGS. CAC. Rotation beneath a light exhibits splendid navy-blue, jade-green, peach-gold, and slate-gray toning. The strike is bold except on the right shield corner, and the surfaces are immaculate aside from a slender mark on the shield. Breen describes this repunched date variety as "extra outlines within triangle of 4." Despite a proof mintage of just 972 pieces, at least two obverse dies were used, and each displays a slightly different date position. CAC endorsed. Population: 31 in 66 (2 in 66+), 10 finer. CAC: 12 in 66, 6 finer (10/19).

Ex: ANA Signature (Heritage, 8/2015), lot 5125. NGC ID# 24NW, PCGS# 6541

## 1902 Barber Half Dollar, PR67 Unsurpassable Multicolor Toning

- 3892 1902 PR67 PCGS. Everything about this Superb Gem Barber half suggests original proof set toning. Incredible, glassy mirrors underlay vibrant, shimmering colors that gradate from lemongold to aquamarine to ruby-red and orange. The obverse portrait emerges from the toning with cameolike frosted brilliance, tinged at the edges with pale-mauve hues. The reverse is richly toned over unblemished, glassy fields in cerulean-blue ceding to lavender. The lively mirrors resonate with jewel-like perfection. Population: 13 in 67 (3 in 67+), 0 finer (9/19). NGC ID# 24P6, PCGS# 6549
- 3893 1911 PR65 Cameo NGC. This lovely Barber half dollar an unquestionable Gem Cameo proof displays excellent field-to-device contrast that shines through delicate gold toning. Boldly struck motifs and deeply mirrored fields are pristine and flashy, with no distracting contact marks or hairlines on either side. Census: 10 in 65 Cameo (1 in 65★), 18 finer (10/19). NGC ID# 6UPG, PCGS# 86558
- 3894 1912 PR66 NGC. This Premium Gem proof is gold-toned overall, with varied hues from pale-champagne to light russet-gold. The devices display considerable frost, such that the surfaces have nearly a Cameo appearance on the reverse, though the obverse falls short. The coin is carefully preserved and visually excellent. A trace of the usual strike weakness is noted on the eagle's right (facing) wing junction. Census: 15 in 66 (1 in 66+), 15 finer; 5 in 66 (1 in 66+) Cameo, 4 finer (11/19). NGC ID# 24PG, PCGS# 6559
- 3895 1914 PR66 PCGS. The low circulation strike mintage was accompanied by a series-low mintage of just 380 proofs, many of which were hoarded by speculators. The largest such hoard over 100 proofs saw the accumulation cleaned, further reducing availability of pristine, high-grade specimens. This Premium Gem is essentially brilliant with liquidlike mirrors and razor-sharp devices. Faint, translucent pale-gold toning assures originality of the spectacular surfaces. Population: 24 in 66 (2 in 66+), 16 finer (11/19). NGC ID# 24PJ, PCGS# 6561

#### WALKING LIBERTY HALF DOLLARS

- 3896 1916 MS65 PCGS. The introductory year Philadelphia issue has one of the lowest mintages of the series. Examples were set aside due to the novelty of the design, but Gems are desirable. The present lustrous example exhibits light tan-gold peripheral patina. The strike is above average, and only incidental contact emerges beneath a loupe. An important addition to an advanced specialized holding. NGC ID# 24PL, PCGS# 6566
- 3897 1916 MS65 PCGS. This first year Walker claims a relatively low mintage of 608,000 pieces. Lustrous surfaces display russet patina gravitating to the borders, somewhat more extensive and deeper on the obverse. The design features are well-struck, including Liberty's head and branch hand. Both sides are well-preserved. Finer-grade examples are considerably more difficult to locate. Ex: Houston Money Show (Heritage, 12/2015), lot 3734. NGC ID# 24PL, PCGS# 6566

## 1917-S Half Dollar, MS62 Obverse Mintmark

3898 1917-S Obverse Mintmark MS62 PCGS. The branch Mint Walking Liberty half dollars of 1916 and early 1917 had the mintmark located on the obverse below the IN GOD WE TRUST motto. Part way through the latter year, the D and S mintmarks were relocated to the more traditional reverse placement. This pleasing Mint State example has frosty silver luster and delicate gold toning that hides the minimal marks. NGC ID# 26G7, PCGS# 6572

#### 1917-S Half Dollar, MS63 Obverse Mintmark

- 3899 1917-S Obverse Mintmark MS63 PCGS. A 952,000-piece mintage was struck with an obverse mintmark before the balance of the San Francisco mintage changed over to a new reverse mintmark position. This is a satiny silver-gray Select Uncirculated example of the popular obverse mintmark, with a few flecks of deep-gray toning that gather in protected areas. A sharp strike weakens slightly at the central obverse, although all other elements are bold. Only light marks and faint abrasions exist on the pleasing, softly lustrous surfaces. NGC ID# 26G7, PCGS# 6572
- 3900 1918 MS64 PCGS. Luminous surfaces show a few light marks on this near-Gem 1918 half dollar, with a silvery-gray hue overall that yields olive and russet toning on the high points and near the borders. The strike is sharp and eye appeal is pleasing. The eagle shows nearly full feather definition. NGC ID# 24PX, PCGS#

- 3901 1918 MS64 PCGS. A Choice Mint State example of this early Walking Liberty issue showing frosty and brilliant silver luster with rich peripheral toning primarily on the obverse. Otherwise, both sides are untoned. Trivial grade-consistent marks are inconsequential. NGC ID# 24PX, PCGS# 6574
- 3902 1920 MS65 PCGS. Frosty original mint luster glistens across Adolph Weinman's Liberty and eagle, revealing impressive strike sharpness and remarkably few abrasions. A delicate golden tint warms each side. The 1920 Walking Liberty half dollar is scarce in Gem condition and decidedly rare finer. This piece will appeal to the advanced collector and Registry Set enthusiasts. NGC ID# 24R3, PCGS# 6580
- 3903 1920 MS65 PCGS. In AU and Mint State, the 1920 is scarcer than its mintage suggests. Gems with vibrant luster and well preserved surfaces are especially challenging to find. This pleasing example shows hints of autumn-brown toning near the right-side peripheries. The strike is above average, and the eye appeal is exemplary. NGC ID# 24R3, PCGS# 6580
- 3904 1923-S Wheel Mark PCGS Genuine. Unc Details. This is a lightly toned example of the sole Walking Liberty issue dated 1923, with a speckling of golden-tan patina. As usual, the San Francisco Mint strike is weak on the eagle's trailing leg, although overall the strike is above-average for a 1923-S. PCGS has assigned the unusual "Wheel Mark" details designation, referring to a brief anomaly in the upper-right obverse field, nearly invisible in normal observation.

#### 1927-S Walking Liberty Half Dollar, MS64 Scarce Issue in Finer Grades

3905 1927-S MS64 PCGS. From a mintage of 2.3 million pieces, the 1927-S Walking Liberty half dollar is a challenging issue in grades above the MS64 level. This impressive Choice example exhibits well-detailed design elements, with just a touch of softness on the wreath hand and eagle's leg. The well-preserved surfaces are lustrous and lightly toned, with outstanding eye appeal. NGC ID# 24RA, PCGS# 6587

# 1927-S Half Dollar, MS64 Lustrous and Lightly Toned

3906 1927-S MS64 PCGS. The resumption of silver dollar coinage, followed by the Great Depression, led to reduced mintages of half dollars between 1921 and 1933. The 1927-S was the largest mintage issue during that span, yet nice Mint State examples are elusive. This lustrous near-Gem displays lightly variegated lilac toning. Marks are mostly relegated to the lower half of the eagle. The reverse is clashed near the feathertips of the back wing, as made. NGC ID# 24RA, PCGS# 6587

- 3907 1929-S MS65 PCGS. Moderately plentiful in MS65, the 1929-S Walking Liberty half dollar is scarce in finer grades. This Gem displays a bold strike, although trivial softness persists on Liberty's branch hand. Delicate champagne toning graces each side, and there are no distracting abrasions. NGC ID# 24RD, PCGS# 6590
- 3908 1935 MS67 PCGS. The eye willingly navigates an intense speckling of reddish-tan toning to fully appreciate the surface quality of this Superb Gem 1935 half. Bright mint luster glows beneath the distinctive and pleasing patina, illuminating well-struck devices and revealing mark-free fields and devices. Just ten pieces are certified finer at PCGS (including those with the Plus designation.) Population: 66 in 67 (8 in 67+), 2 finer (9/19). NGC ID# 24RJ, PCGS# 6595
- 3909 1936 MS67+ PCGS. CAC. This smoothly frosted, brilliant, and high-end Superb Gem ranks among the finest survivors from a mintage of more than 12.6 million 1936 half dollars. CAC endorsement adds an extra vote for its quality and eye appeal. The 1936 is seldom more than 60% sharp, but this well-struck piece has bold head and branch hand detail. The eagle's trailing leg shows nearly full feathers. Population: 28 in 67+, 3 finer. CAC: 110 in 67, 1 finer (10/19). NGC ID# BYGX, PCGS# 6598 Base PCGS# 6598
- 3910 1937 MS67+ PCGS. CAC. The 1937 Walking Liberty half dollar is virtually unobtainable in grades above MS67. This delightful high-end Superb Gem displays sharply detailed design elements and vibrant mint luster throughout. CAC endorsed. PCGS has graded just seven numerically finer examples. Population: 24 in 67+, 7 finer. CAC: 95 in 67, 4 finer (10/19). NGC ID# 256A, PCGS# 6601
- 3911 1937 MS67+ PCGS. CAC. Splashes of gold toning appear on the brilliant silver surfaces of this Plus-designated Superb Gem that features a sharp strike and possesses excellent eye appeal. PCGS has only certified 24 of these as MS67+ and just seven finer (10/19). NGC ID# 256A, PCGS# 6601
- 3912 1937 MS67+ PCGS. CAC. The PCGS Plus designation and CAC endorsement add a powerful one-two punch to elevate the status of this lustrous and well-preserved Superb Gem. Liberty's gown lines are impressively crisp, while strong definition of the cap folds and noticeable thumb separation at the branch hand confirm a sharp strike. An ephemeral skin of golden-gray toning mellows the underlying brilliant-silver surfaces. Population: 24 in 67+, 7 finer. CAC: 96 in 67, 4 finer (10/19). NGC ID# 256A, PCGS# 6601

# 1937-S Walker, MS67 Bright, Swirling Mint Luster

3913 1937-S MS67 PCGS. Essentially brilliant and coruscated throughout both sides, this lustrous Superb Gem displays smooth, vibrant surfaces and a sharper-than-average strike for a 1937-S half. The eagle's trailing leg shows most of its feathers, and the gown lines are bold. A loupe reveals just a handful of tiny ticks on Liberty's high points, while the fields are mark-free. Exceptional eye appeal makes this Registry Set caliber coin a show stopper. Population: 49 in 67 (5 in 67+), 0 finer (10/19). NGC ID# 24RT, PCGS# 6603

#### 1938-D Half Dollar, MS67 Lowest Mintage After 1921

3914 1938-D MS67 PCGS. The Denver Mint produced a minimal 491,600 half dollars in 1938, and that is the only sub-million coin Walking Liberty production from 1923 to the end of the design in 1947. Many examples were saved at the time of issue, as coin collecting greatly expanded in the late 1930s following the depression. This Superb Gem is the finest numerically that PCGS has graded. Both sides are frosty and highly lustrous with lovely peripheral iridescence on brilliant silver surfaces. Population: 58 in 67 (4 in 67+), 0 finer (10/19). NGC ID# 24RV, PCGS# 6605

3915 1939 MS68 NGC. An available date overall, the 1939 Walking Liberty half dollar is conditionally rare in MS68, the finest numerical grade achieved at either leading certification service. Accordingly, this piece is an attractive, must-have Registry coin. Satiny luster yields golden toning, sharp design elements glisten amid cartwheel luster, and a lack of abrasions confirms the incredible technical quality. Census: 22 in 68 (1 in 68★), 0 finer (10/19). NGC ID# 24RW, PCGS# 6606

### 1939-S Walking Liberty Half, MS67+ Registry Set Contender, Few Finer

3916 1939-S MS67+ NGC. This high-end Superb Gem displays original, iridescent toning that evenly covers both sides. Bright silver luster shines through, revealing pale-lavender, mint-green, and mauve colors. The strike is sharp, weakening only slightly at the highest points of the branch hand. Die state specialists will notice an interesting, long internal die crack that runs from the eagle's wing above the neck to the rear talons. Marks are essentially nonexistent throughout this attractive, Plus-graded MS67. Just three pieces are numerically finer at NGC and PCGS combined. Census: 5 in 67+, 1 in 67★, 2 finer (10/19). NGC ID# 24RY, PCGS# 6608

## 1939-S Walking Liberty Half, MS67+ Registry-Grade Condition Rarity, CAC

3917 1939-S MS67+ PCGS. CAC. Although the branch hand shows the usual weakness, this pristine Superb Gem displays a sharp strike on other design elements. The lustrous, richly frosted surfaces are brilliant save for a wisp of honey patina and a glimpse of russet on the obverse rim near 3 o'clock. Both the PCGS Plus designation and CAC endorsement combine to make this Registry Set contender an outstanding candidate for the silver type collector, too. NGC ID# 24RY, PCGS# 6608

#### 1941-S Half Dollar, MS66+ Few Coins Known Finer

3918 1941-S MS66+ PCGS. CAC. This is a sparkling, satin-smooth Premium Gem example, with brilliant, snow-white surfaces and both the PCGS Plus designation and CAC endorsement. Vibrant mint luster coruscates throughout both sides. The 1941-S was not one of the San Francisco Mint's better efforts, and is often weakly struck through the centers. While this example shows slight incompleteness in those areas, it is sharper than many, with nearly mark-free fields and dazzling eye appeal. PCGS reports just nine fine examples (9/19). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

3919 1942 MS67+ PCGS. This Plus-graded Superb Gem exhibits sharply detailed design elements, with clear separation between Liberty's thumb and fingers on the wreath hand. The impeccably preserved, lustrous surfaces are visited by shades of magenta and emerald-green toning. PCGS has certified several Plus-graded pieces (52 examples), yet just seven numerically finer coins (11/19). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

3920 1942 MS67+ PCGS. The mostly brilliant centers of this Plusgraded Superb Gem are surrounded by shades of sea-green and lavender toning at the peripheries. The design elements are well-detailed and the surfaces are impeccably preserved. PCGS has graded seven numerically finer examples (10/19). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

3921 1942-S MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits well-detailed design elements, with a touch of the usual softness on the eagle's leg and wreath hand. The essentially flawless brilliant surfaces radiate vibrant mint luster from both sides. PCGS has graded nine numerically finer examples (11/19). NGC ID# 24S8, PCGS# 6617

### 1942-S Walking Liberty Half, MS67 Tied for Finest at NGC

3922 1942-S MS67 NGC. Despite a mintage of 12.7 million pieces, the 1942-S Walking Liberty half dollar is rare at the MS67 grade level, and neither of the leading grading services have graded any coins in higher numeric grades. This well-detailed Superb Gem exhibits just a touch of softness on the wreath hand and the virtually flawless brilliant surfaces radiate vibrant mint luster. Housed in an NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 13 in 67, 0 finer (10/19). NGC ID# 24S8, PCGS# 6617

3923 1943-S MS67 NGC. Beautifully preserved, frosty mint luster is devoid of abrasions on this Superb Gem 1943-S Walker. The expected strike weakness affects Liberty's branch hand and the eagle's trailing leg, but Liberty's head is sharp. This issue is plentiful in lower grades, but in MS67 it is rare, and no numerically finer pieces are known. Census: 31 in 67 (2 in 67+, 1 in 67★), 0 finer (10/19). NGC ID# 24SB, PCGS# 6620

# 1945-S Half Dollar, MS67 Shimmering Luster, Beautiful Toning

3924 1945-S MS67 PCGS. Scarce at the Superb Gem level and unavailable even one full grade finer, the 1945-S is a moderate condition rarity of the late series. This attractively toned example is well-struck at Liberty's head but a trifle weak at the branch hand and outer gown lines. Liberty's forward leg is unmarked. Shades of blue, slate-gray, and ivory-gold add eye appeal to the lustrous surfaces. Population: 58 in 67 (2 in 67+), 0 finer (10/19). NGC ID# 24SH, PCGS# 6626

3925 1946-D MS67+ NGC. Translucent hues of champagne-gold toning shares the spotlight with vibrant silver luster, while the strike is far above average for a 1946-D. A few tiny ticks on Liberty's torso do not escape a loupe, but they are unseen by the unaided eye. Visual appeal is exceptional. Census: 11 in 67+, 1 in 67★, 0 finer (10/19). NGC ID# 24SK, PCGS# 6628

3926 1946-S MS67 PCGS. Areas of frost-white silver luster provide a dramatic counterpoint to sweeping bands of bluish-gray and auburn-gold toning. While the strike on any 1946-S stops short of full, this Superb Gem is sharper than most. The eye appeal is simply outstanding. MS67 represents the highest numeric grade seen at either service. It is exceeded by just five Plus-graded coins at PCGS (10/19). NGC ID# 24SL, PCGS# 6629

3927 1946-S MS67 PCGS. The 1946-S was another mediocre effort by the San Francisco Mint, and few sharp coins exist from the 3.7 million-piece mintage. This Superb Gem is above average in both strike and eye appeal, with a freckling of natural russet toning over pearlescent, lightly iridescent fields and devices. Strong mint luster illuminates the minimally marked surfaces. Just five MS67+ pieces are certified finer at PCGS (10/19). NGC ID# 24SL, PCGS# 6629

3928 1946-S MS67 PCGS. An amazing Superb Gem with prominent die polishing in the right obverse field. This piece is brilliant and untoned with frosty silver luster and above average design definition. Tied for the finest that PCGS has graded (10/19). NGC ID# 24SL, PCGS# 6629

## 1947 Half Dollar, MS67+ Series-End Type Coin

3929 1947 MS67+ NGC. This Plus-graded Superb Gem is among the finest pieces certified for this issue, showing light golden toning overall. Slight strike weakness is seen on Liberty's branch hand, but the devices show good definition otherwise. The 1947 Walker marks the end of the series for this type. Examples in this condition are scarce. Census: 75 in 67 (2 in 67+, 3 in 67★, 2 in 67+★), 0 finer (10/19). NGC ID# 24SM, PCGS# 6630

#### PROOF WALKING LIBERTY HALF DOLLARS

3930 1937 PR67 PCGS. This Superb Gem Walking Liberty half dollar exhibits full untoned brilliance with deeply mirrored fields framing the lightly lustrous devices, approaching Cameo status. PCGS has only certified 16 numerically finer examples (10/19). NGC ID# 5ESS, PCGS# 6637

3931 1938 PR67+ PCGS. CAC. It was the third year of issue for modern proofs, and only 8,152 proof halves were produced. This is a remarkably well-preserved piece. Each side shows an off-center window of near-brilliance, but most of each side is enveloped by rich iridescence toning. The depth of mirroring adds special vibrancy to this Plus-graded Superb Gem. CAC endorsement is no surprise and well-deserved. Population: 19 in 67+, 21 finer. CAC: 125 in 67, 6 finer (10/19). NGC ID# 27V6, PCGS# 6638

## 1942 Half Dollar, PR68 Just One Numerically Finer at PCGS

3932 1942 PR68 PCGS. As the final proof in the Walking Liberty series, the 1942 was struck in large numbers and many Superb Gem proofs exist. All but a handful of the proofs at PCGS lack designated cameo contrast, and the few pieces that are deemed Cameo are in lesser grades. This is a gleaming, high-gloss brilliant proof with stunning silver surfaces and a sharp proof strike. A loupe reveals a few lines and specks of milk-white patina, but they are invisible in-hand and the surfaces are immaculate. Population: 80 in 68 (5 in 68+), 1 finer (9/19). NGC ID# 282G, PCGS# 6642

#### FRANKLIN HALF DOLLARS

1949-S Franklin Half, MS67 Full Bell Lines Low-Mintage, Series Key

- 3933 1949-S MS67 Full Bell Lines NGC. Long regarded as the key to the Franklin series, a couple of other issues have now surpassed the 1949-S in both scarcity in high grade and with Full Bell Lines. Still, only a couple of dozen (or fewer) pieces are known today in MS67 and with complete bell lines. This attractively toned piece undoubtedly originated in a Mint Set, judging by its speckled bluegray interiors and surrounding rose-golden marginal toning. Census: 11 in 67 (1 in 67+ Full Bell Lines, 2 in 67+★), 0 finer (10/19). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655
- 3934 1954-S MS66+ Full Bell Lines PCGS. CAC. A magnificent, faintly toned almond-gold representative. The lustrous fields are unabraded, and only insignificant grazes on the bell deny an even finer third-party assessment. Nicely struck and essentially unimprovable. As of (10/19), PCGS has graded a scant 28 pieces at the MS66+ Full Bell Lines level, and only seven coins finer. CAC endorsement is an important addition to the PCGS Plus designation. CAC: 38 in 66, 1 finer (10/19). NGC ID# 24TB, PCGS# 86669
- 3935 1956 MS67 Full Bell Lines PCGS. CAC. This coin features lustrous, beautifully toned surfaces, particularly the obverse. The colors include intermingled shades of red, orange, pink, fuchsia, yellow, sea-green, blue, and violet. Population: 55 in 67 (3 in 67+) Full Bell Lines, 0 finer. CAC: 50 in 67, 0 finer (9/19). Ex: San Francisco Signature (Heritage, 3/2014), lot 10434. NGC ID# 6L33, PCGS# 86671

### 1957-D Half Dollar, MS67 Full Bell Lines None Graded Finer, Wild Multicolor Toning

3936 1957-D MS67 Full Bell Lines PCGS. CAC. Neon-green, lemongold, and burgundy-red toning covers the obverse and surrounds the dusky, silvery center on the reverse. The resulting eye appeal is fantastic, explaining the CAC approval sticker. Nearly 20 million 1957-D half dollars were minted, but none surpass the quality of this piece. Population: 26 in 67 Full Bell Lines, 0 finer. CAC: 5 in 67, 0 finer (11/19). NGC ID# 24TF, PCGS# 86673

#### PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half, PR67 Deeply Mirrored Fields

- 3937 1950 PR67 PCGS. CAC. Notorious for its generally substandard strike, the 1950 Franklin half is exceedingly scarce in Superb Gem condition. This well-struck, CAC-approved representative offers fully brilliant surfaces with deeply mirrored fields and moderate contrast. The Registry Set enthusiast should bid accordingly. PCGS has graded only one numerically finer example (10/19). Ex: Long Beach Signature (Heritage, 9/2014), lot 4277. NGC ID# 27VA, PCGS# 6691
- 3938 1950 PR66 Cameo PCGS. The Mint resumed half dollar proofs after an eight-year lapse, with the 1942 Walking Liberty issue its most recent proof production. The 1950 Franklin half proofs in general are a sorry lot, struck from worn dies and often hairlined. This splendid Premium Gem Cameo is an exception sharply struck and essentially brilliant. The cameo effect stands out when viewed at an advantageous angle. Population: 75 in 66 (5 in 66+) Cameo, 25 finer (11/19). NGC ID# 6L9N, PCGS# 86691
- 3939 1951 PR67 PCGS. CAC. A Plus-graded Superb Gem proof, from a mintage of 57,500 pieces, this coin exhibits sharply detailed design elements and well-preserved brilliant surfaces with deeply mirrored fields. PCGS has graded seven numerically finer examples, as well as a dozen pieces certified PR67+. CAC: 96 in 67, 11 finer (10/19). NGC ID# 27VB, PCGS# 6692

#### 1951 Franklin Half Dollar, PR67 Splendid Cameo Example

3940 1951 PR67 Cameo PCGS. A thin band of reddish-gold toning surrounds the obverse of this otherwise brilliant-white, well-contrasted Superb Gem proof. Deep, watery-smooth mirrors ripple with reflectivity and provide extra contrast with the sharply struck, frosted motifs. Splendid eye appeal sets this proof apart from the other Superb Gems at PCGS. Just one Plus-graded example is finer. Population: 30 in 67 (1 in 67+) Cameo, 0 finer (9/19). NGC ID# 27VB, PCGS# 86692

#### 1951 Franklin Half, PR67 Cameo Mint-Fresh Example

3941 1951 PR67 Cameo PCGS. This Registry-grade proof Cameo exhibits intense eye appeal as a result of stark white-on-black contrast and seemingly perfect surfaces. The strike is razor-sharp and the surfaces are devoid of perceptible toning. Non-Cameo proofs are occasionally seen in this lofty grade, but Cameos are rare and Deep Cameos are even more elusive. Population: 30 in 67 (1 in 67+) Cameo, 0 finer (10/19).

Ex: ANA Signature (Heritage, 8/2015), lot 5275. NGC ID# 27VB, PCGS# 86692

# 1951 Franklin Half Dollar, PR67 Extraordinary Cameo Specimen

3942 1951 PR67 Cameo NGC. CAC. The 1951 proof Franklin half dollar is not too difficult to locate in PR67 condition, but Cameo examples are rare. This delightful Superb Gem proof offers sharply detailed design elements with a rich coat of mint frost that contrasts boldly with the deeply mirrored fields. The impeccably preserved surfaces show highlights of pale jade toning at the peripheries. Census: 39 in 67 Cameo (1 in 67★), 6 finer. CAC: 16 in 67, 2 finer (10/19). NGC ID# 27VB, PCGS# 86692

#### 1951 Franklin Half Dollar, PR67 Rare Cameo Example

3943 1951 PR67 Cameo PCGS. CAC. The design elements of this delightful Superb Gem exhibit needle-sharp definition throughout, and the deeply mirrored fields contrast boldly with the frosty devices to create an intense cameo effect. A few hints of pale gold toning enhance the well-preserved surfaces. Population: 30 in 67 (1 in 67+) Cameo, 0 finer. CAC: 16 in 67, 2 finer (10/19). NGC ID# 27VB, PCGS# 86692

1952 PR67 Cameo NGC. CAC. Only early strikes are thought to comprise the few Superb Gem 1952 brilliant proofs with confirmed Cameo contrast. This is clearly such a coin, where the reverse is as boldly contrasted as the obverse. Razor-sharp and entirely untoned, this spectacular example displays deep, rippled mirrors and frostwhite motifs. CAC endorsement confirms the high quality and superb eye appeal. NGC ID# 27VC, PCGS# 86693

3945 1952 PR67 Cameo PCGS. CAC. Cameo proof 1952 Franklin halves are scarce in this grade, and no Deep Cameos are certified as fine at PCGS (11/19). This piece is CAC endorsed, showing satiny, sharply struck devices and glimmering field reflectivity. Both sides are essentially brilliant. Population: 91 in 67 (9 in 67+) Cameo, 5 finer. CAC: 69 in 67, 10 finer (11/19). NGC ID# 27VC, PCGS# 86693

3946 1952 PR67 Cameo NGC. CAC. Although non-Cameo proofs are plentiful in Superb Gem condition, Cameo proof 1952 Franklin halves are seldom offered this fine. The present coin displays a delicate tint of gold across otherwise starkly contrast, brilliant surfaces. The strike is sharp, and the CAC green label is well-deserved. NGC lists 15 finer Cameo proofs. CAC: 69 in 67, 10 finer (10/19). NGC ID# 27VC, PCGS# 86693

3947 1952 PR67 Cameo PCGS. CAC. A wonderful Superb Gem Cameo proof with untoned silver surfaces and excellent field-to-device contrast. An important opportunity for the advanced Registry collector. Population: 91 in 67 (9 in 67+) Cameo, 5 finer. CAC: 69 in 67, 10 finer (10/19).

Ex: New York Signature (Heritage, 10/2015), lot 4683. NGC ID# 27VC, PCGS# 86693

### 1953 Half Dollar, PR68 Cameo Challenging Registry Acquisition

3948 1953 PR68 Cameo NGC. Non-Cameo proof 1953 Franklin half dollars are occasionally seen as fine as PR68, but Cameo coins are scarce in this grade, and Ultra Cameos are major rarities. This Cameo is among the finest certified with that designation (10/19). Sharp, frosty devices complement reflective fields, and each side is virtually pristine. Eye appeal is generous on this untoned Registry coin. Census: 57 in 68 Cameo (4 in 68+, 2 in 68★), 0 finer; 2 in 68 Ultra Cameo, 0 finer (10/19). NGC ID# 6L9P, PCGS# 86694

#### 1953 Half Dollar, PR68 Cameo High-End Registry Candidate

3949 1953 PR68 Cameo PCGS. CAC. A spectacular Registry contender, showing brilliant, starkly contrasted surfaces and liquidlike field mirroring. Fully struck and CAC endorsed. The 1953 proof Franklin is scarce this fine as a Cameo, and only a single Deep Cameo is numerically equal at PCGS. Population: 32 in 68 Cameo, 0 finer; 1 in 68 Deep Cameo, 0 finer. CAC: 40 in 68, 0 finer (11/19). NGC ID# 6L9P, PCGS# 86694

# 1955 Half Dollar, PR68 Ultra Cameo Exceptional Preservation

- 3950 1955 PR68 Ultra Cameo NGC. Free of toning or haze, this brilliant Ultra Cameo proof may have benefited from the Mint's flat-pack design, which was introduced in 1955. Viewed at an angle, snow-white central devices gain an extra dimension against jet-black fields. The surfaces approach perfection on this spectacular, sharply struck PR68 Ultra Cameo example. Census: 43 in 68 Ultra Cameo (2 in 68+, 2 in 68★), 7 finer (9/19). NGC ID# 27VF, PCGS# 96696
- 3951 1956 Type One PR68 Cameo NGC. The Type One Reverse of the 1956 proof Franklin shows low relief, blended wing feathers on the eagle, whereas Type Two coins have a sharp, high relief eagle. This high-end Cameo is brilliant and starkly contrasted, showing virtually flawless surfaces. NGC ID# 24TV, PCGS# 86686
- 3952 1958 PR69 Cameo NGC. Among the finest Cameos certified and rare as such, this 1958 proof Franklin half dollar displays a sharp strike and fully mirrored fields. The devices are satiny with untoned, untouched luster. A superb Registry contender. Census: 26 in 69 Cameo (2 in 69★), 0 finer; 4 in 69 Ultra Cameo, 0 finer (10/19). NGC ID# 8SU4, PCGS# 86699

## 1962 Half Dollar, PR69 Ultra Cameo Unsurpassed Quality

3953 1962 PR69 Ultra Cameo NGC. Visually impressive and technically near-perfect, this PR69 Ultra Cameo represents the epitome of quality for a proof Franklin half, regardless of date. More than three million proof sets were produced, which to date have yielded 67 proofs of comparable excellence, any duplications notwithstanding. Entirely untoned and superbly contrasted, this Registry Set contender is seldom equaled and never exceeded. Census: 38 in 69 Ultra Cameo, 0 finer (9/19). NGC ID# 27VK, PCGS# 96703

# 1963 Franklin Half, PR69 Ultra Cameo Exceptional, Among the Finest Certified

3954 1963 PR69 Ultra Cameo NGC. This spectacular PR69 Ultra Cameo is essentially flawless, with brilliant, spot-free surfaces and a resoundingly sharp proof strike. Gleaming silver mirrors surround richly frosted devices, with no hairlines or other distractions. Overt white-on-black contrast graces both sides. Aside from a solitary PR69★ coin, this example is tied for finest at both services combined — an unimprovable Superb Gem. NGC Census: 21 in 69 Ultra Cameo (1 in 69★), 0 finer (10/19). NGC ID# 27VL, PCGS# 96704

## KENNEDY HALF DOLLARS

- 3955 1964 MS67+ NGC. Although more than 273 million 1964 Kennedy halves were struck, many were melted during the run-up of silver prices circa 1980. This high-end Superb Gem is housed in a special Kennedy Half 50th Anniversary NGC holder, with brilliant, satin-smooth fields and virtually mark-free surfaces. Tied for finest at either NGC or PCGS. NGC Census: 3 in 67+, 9 in 67★, 0 finer (10/19). NGC ID# 27WH, PCGS# 6706
- 3956 1964-D MS67+ PCGS. Exceptional "color coins" occupy most the highest ranks of Mint State 1964-D Kennedy halves, and such coins are extremely rare in Superb Gem or finer grades. This vibrantly colored MS67+ offers an intense freckling of ruby-red, emerald-green, orange, and tan toning throughout both sides. A sharp strike manages to rise above the omnipresent toning. Population: 9 in 67+, 1 finer (10/19). NGC ID# 24U3, PCGS#

# **End of Session Two**

# **SESSION THREE**

#### EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 12 B-1, BB-21, Two Leaves

- 3957 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Fine 12 NGC. "Bowers Die State II" with clash marks near the nose and trailing neck curls of Liberty. The obverse is also lapped, most apparent on the delicate curl near star 3. A problem-free Flowing Hair type coin ideal with cream-white centers and steel-gray borders. The surfaces are minimally marked, though we note as an identifier a tick on the reverse rim at 12:30. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853
- 3958 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 Altered Surfaces PCGS Genuine. Fine Details. Bowers Die State I. This is an evenly worn Flowing Hair dollar, although PCGS notes altered surfaces that prevent a numeric grade. We note a possible small repair at 2 o'clock on the reverse. Mainly deep, olive-gray toning overall accompanies lighter golden undertones.

### 1795 Flowing Hair Dollar, Fine 12 Three Leaves Reverse, B-5, BB-27

- 3959 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 PCGS. The diagonal bar in the left obverse field near the upper hair curl provides immediate identification of this die marriage that ranks among the most plentiful of 1795 Flowing Hair dollars, providing an exceptional choice for date and type collectors. A lovely example with light gray surfaces, this dollar has peripheral iridescent toning. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852
- 3960 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 Graffiti PCGS Genuine. VF Details. Bowers Die State II. The surfaces retain nice old-silver patina, but a few faint linear scratches on the portrait possibly graffiti with an A and H visible account for the net grading. There are three planchet flaws visible on the coin: one on the neck, another on the eagle's beak, and a third above the second S in STATES at the rim. Despite the mint-related flaws and central marks, considerable eye appeal remains.

  Ex: Houston Money Show Signature (Heritage, 12/2015), lot 4454.
- 3961 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 Filed Rims PCGS Genuine. Fine Details. This Off-Center Draped Bust dollar has acquired pleasing bluish-gray patina over the course of its 220+ year history, and now shows smooth wear over lightly marked, finely porous surfaces. The design elements are well-defined for the Fine Details grade. Some minor rim filing exists below the date, perhaps to minimize a minor rim irregularity in that area. Considerable eye appeal remains.

# 1795 Draped Bust Dollar, VF Details B-14, BB-51, Off-Center Portrait

3962 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Cleaned — PCGS Genuine. VF Details. Bowers Die State I, the usual die stage. The Off-Center portrait is an important Guide Book variety, created when the obverse master hub was made with the bust of Liberty entered too far left. This example shows even wear and rich, brownish-gray patina that lightens a bit over the relief elements. Some faint hairlines exist beneath the toning, visible in the right obverse field. The slightly subdued reverse features pewter-gray toning with deeper shades around the wreath elements. Despite the cleaning, this is an attractive Draped Bust type coin sure to find a home in a midgrade early dollar collection.

# 1795 Draped Bust Dollar, VF30 B-14, BB-51, Off-Center Portrait

3963 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 PCGS. Bowers Die State I. Struck from perfect dies. At one time, adjustment marks criss crossed the obverse from edge to edge. Most of the file marks were eliminated by strike, and those that remain are diminished by 30 points of wear. A lens reveals remnants along the margins and within Liberty's hair. Otherwise, this sharp VF30 example shows few marks or abrasions for the assigned grade. Rich gunmetal-gray toning lightens to silver-gray on the motifs. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

## 1796 B-4, BB-61 Dollar, VF Details Small Date, Large Letters

3964 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Scratch — PCGS Genuine. VF Details. Bowers Die State I, the usual early die state for the variety. This original light to medium gray dollar has a minor old scratch in the right obverse field that is toned and blended with its surroundings. Otherwise, both sides have exceptional surfaces for the grade.

3965 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Repaired — PCGS Genuine. XF Details. Bowers Die State II. The surfaces appear whizzed overall, especially evident at Liberty's cheek and the right obverse field, and weakening the bottom curl near the date. Adjustment marks run diagonally from edge-to-edge across the eagle's breast, although most other abrasions and marks have been smoothed over. Slightly mottled dove-gray toning covers both sides, yet XF sharpness remains throughout the raised devices.

3966 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Rim Damage — PCGS Genuine. VF Details. The three die varieties known for 1797-dated silver dollars are recorded individually in the Guide Book. This lightly toned example has rim damage in the form of gentle filing that is visible from 10 to 12 o'clock on the obverse.

### 1798 B-13, BB-108 Dollar, Choice XF Large Eagle, Pointed 9, 10 Arrows

3967 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, XF45 PCGS. Bowers Die State II. A crack extends from the rim down to the right side of L(IBERTY). This is one of two Pointed 9, 10 Arrows varieties for the date. BB-108 is distinguished from the scarcer BB-107 by star 7 closer to the L in LIBERTY. Each side of this Choice XF Draped Bust dollar is brilliant with faint splashes of golden-tan and lavender patina. Sharply struck devices display as-made file marks across the portrait and near the upper-right obverse border.

Ex: Long Beach Signature (Heritage, 9/2016), lot 5557. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

# 1798 Heraldic Eagle Dollar, Pleasing XF45 Pointed 9, Close Date, B-27, BB-113

3968 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, XF45 PCGS. Bowers Die State III. This variety represents the first of seven uses of the obverse die, and the reverse die's fourth and final use. Sharply struck silver-gray surfaces show a few tiny areas of deep-gray patina. A faint hint of golden toning exists on both sides. The surfaces are lightly marked for the Choice XF grade, with minor obverse abrasions seen under magnification. Traces of mint luster remain in sheltered areas. There are no adjustment marks visible on either side. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

3969 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF20 PCGS. Multiple Mint anomalies make the overdated BB-141 variety one of the most interesting of all Draped Bust early dollars. The obverse stars are poorly spaced and crowded together, although there is plenty of room to space them properly. The field stars erroneously number 15 instead of 13, which the die cutter attempted to fix by enlarging clouds 1 and 8. The extra stars peek out, one from the bottom of each cloud. This is an attractive VF20 example, with smooth wear and minimally marked surfaces. Natural golden-gray toning provides bold eye appeal. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

3970 1799 7x6 Stars, B-17, BB-164, R.2, VF25 NGC. Bowers Die State III. Deep cream-gray toning blankets this evenly circulated and surprisingly unabraded Heraldic Eagle type coin. Strike-throughs (as coined) affect obverse stars 10 and 11, and parallel roller marks (as made) cross obverse star 13. All letters in E PLURIBUS UNUM are at least partially present. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

# 1799 7x6 Stars Dollar, Richly Toned AU50 B-8b, BB-165, Advanced Die Stage

3971 1799 7x6 Stars, B-8b, BB-165, R.3, AU50 NGC. Bowers Die State III. Like many Bust dollars, BB-165 examples are generally attainable up to the XF level, and then there is a sharp reduction in availability. This appealing About Uncirculated representative is notable for its smooth, problem-free surfaces and its rich, original coloration. Gunmetal-blue and brownish-gray shades combine with chestnut-gold undertones. Mint luster shines through the rich patina — especially at the margins. The strike is crisp except at the central field stars above the eagle's head, a BB-165 striking characteristic that is often seen in its later die stages. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

#### 1800 B-19, BB-192 Dollar, XF Details Famous AMERICAI Reverse

3972 1800 AMERICAI, B-19, BB-192, R.2 — Obverse Scratched — NGC Details. XF. Bowers Die State IV. A heavy die line follows the final A of AMERICA on the reverse die, suggesting the unusual AMERICAI spelling. There is no conclusive source of this unusual die line. Some have suggested a widely repunched final A, but the curves in the die line are different than the curves in the A punch. Richly patinated surfaces of this popular early dollar variety combine blue accents at the margins with reddish-tan and silvergray shades toward the interiors. A faint Y-shaped pinscratch in the right obverse field prompts the NGC Details designation. Solid XF definition remains throughout both sides, which show brief glimmers of luster.

3973 1800 AMERICAI, B-19, BB-192, R.2 — Cleaned — NGC Details. AU. Bowers Die State III, clashed and lightly cracked. Excellent detail and uniform slate-gray patina characterize this Draped Bust type coin. It is well-centered and sharp throughout. NGC notes "Cleaned" — any resultant hairlines are hidden beneath the toning. NGC ID# 24X9, PCGS# 40082 Base PCGS# 40082

# 1800 B-13, BB-193 Dollar, XF40 Gunmetal and Antique-Gold Patina

3974 1800 B-13, BB-193, R.3, XF40 NGC. Bowers Die State I. Struck from perfect dies without cracking or clashing, which Bowers calls "Three or more times scarcer than Die State III." This minimally circulated Draped Bust dollar is strongly detailed overall with few areas of softness. Both sides are attractively toned in gunmetal-blue and antique-gold patina. An excellent example of the type. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

## 1801 Dollar, B-1, BB-211, VF35 Bulging Die, Late Die State

- 3975 1801 B-1, BB-211, R.3, VF35 PCGS. Bowers Die State IV. A bulge exists below AMER, but the reverse die has not yet failed. The 1801 date is scarce overall in the context of the Heraldic Eagle series, although the BB-211 is moderately available especially in circulated grades. This Choice VF coin has a few light marks and solid VF definition. Silver-gray toning deepens at the obverse margins, while the reverse displays somewhat deeper shades of gray. An ideal collector-grade coin, perfect for type and variety collectors. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893
- 3976 1802/1 Narrow Date, B-4, BB-232, R.3, Fine 15 PCGS. Bowers Die State II. The date numerals are close together, with the flag of 1 touching the bottom curl. The surfaces are a bright silver-gray color, except for a semicircle of bluish-gray patina at the obverse margin between 12 and 8 o'clock. On BB-232, an underdigit 1 remains boldly defined beneath the primary 2. The motifs are sharp for the designated Choice Fine grade level. NGC ID# 24XC, PCGS# 40092 Base PCGS# 6898
- 3977 1802 Narrow Date, B-6, BB-241, R.1, VF30 NGC. Bowers Die State III, the usual late die state with obverse die lapping. Considerable steel-blue toning accompanies the light golden surfaces of this example that has a minor reverse rim nick at 12 o'clock. This is the plentiful Narrow Date variety that is an excellent type set candidate. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

#### SEATED DOLLARS

3978 1842 AU58 PCGS. CAC. OC-3, R.2. A plentiful variety among 1842 Seated Liberty dollars and an ideal choice for type collectors. This near-Mint dollar has pleasing pewter-gray surfaces with pale gold toning near the borders. CAC: 10 in 58, 19 finer (10/19). From The Spring Creek Collection, Part I. NGC ID# 24YC, PCGS# 6928

# 1847 Seated Dollar, MS63 Strongly Detailed No Motto Representative

3979 1847 MS63 PCGS. OC-1, R.1. The first vertical shield line on the reverse extends up into the seventh horizontal line, and a thin crack runs through the denomination. The 1847 Seated dollar is a plentiful No Motto issue, one of the few that remains readily collectible in Mint State, making it perfect to represent the type. Antique golden-gray toning adorns the smooth, satiny surfaces of this well-struck Select example. Strong detail appears on the stars, Liberty's head and sandal, and on the eagle's feathers, talons, fletchings and olive leaves. Population: 27 in 63 (3 in 63+), 16 finer (11/19). NGC ID# 24YJ, PCGS# 6934

#### 1855 Seated Liberty Dollar, XF40 Better Date, Low Mintage

3980 1855 XF40 PCGS. OC-1, High R.3. Philadelphia was the only mint to strike silver dollars in 1855, producing only 26,000 coins. This issue is elusive in all grades compared to most dates in the series, and high-end circulated coins are in high demand. This XF representative displays medium lilac-gray patina with daubs of olive-gold and russet around the borders. Wear is light and even. From The Spring Creek Collection, Part I. NGC ID# 24YU, PCGS# 6943

#### 1865 OC-2 Dollar, AU55 Reverse of 1864

3981 1865 AU55 NGC. OC-2, R.2. The reverse die is left over from the 1864 coinage, and remained in use with three different 1865-dated obverse dies. This Choice AU example has light gray surfaces with reflective fields that show traces of mint luster. Census: 11 in 55, 30 finer (10/19). NGC ID# 24Z8, PCGS# 6955

#### 1869 OC-2 Seated Dollar, MS62 Doubled Reverse Die

3982 1869 MS62 NGC. OC-2, R.2. A Top-30 Variety in the Seated Liberty dollar series, although the misplaced 6 in the denticles is not visible on this late die state example. Five different 1869 varieties are included in the Top-30 listing at SeatedDollarVarieties. com. This nicely defined Mint State dollar has full silver luster with peripheral blue and gold toning. Census: 13 in 62, 23 finer (10/19). NGC ID# 24ZC, PCGS# 6962

#### PROOF SEATED DOLLARS

1866 Seated Liberty Dollar, PR64 First Year With Motto

3983 1866 Motto PR64 PCGS. OC-P2, R.3. Osburn-Cushing Die State a/a. Only 725 proof Seated Liberty dollars were struck in 1866, the first year with the motto IN GOD WE TRUST. Probably less than half that number are extant today. This well-preserved Choice proof exhibits sharply detailed design elements and deeply reflective fields, under iridescent shades of cerulean-blue, sea-green, and lavender-gray toning. Population: 68 in 64 (1 in 64+), 10 finer (10/19). NGC ID# 5GDV, PCGS# 7014

# 1867 Silver Dollar, PR62 Cameo Glassy Mirrors, Lightly Toned

3984 1867 PR62 Cameo NGC. OC-P1, R.3. Osburn-Cushing Die State a/a. Needle-sharp frosted devices contrast boldly against glassy-mirrored fields of this boldly struck and visually impressive cameo proof. A translucent golden sheen deepens slightly at the borders, perhaps the legacy of time spent in an old B. Max Mehl envelope that accompanies the coin. Now certified PR62 Cameo NGC, the coin appears finer — beautiful, wide and square rims surround vibrant, flashy mirrors. Viewed under a strong light, some delicate field lines are the only grade-limiting factor. Eye appeal is excellent. Census: 3 in 62 Cameo, 48 finer (10/19). NGC ID# 252N, PCGS# 87015

3985 1870 — Questionable Color — PCGS Genuine. Proof, Unc Details. OC-P1, Low R.3. One obverse die and three reverse dies were used for the proof Seated dollar coinage in 1870. The obverse die was also used for circulation strikes after the proofs were produced. Pale gold appears at the centers with peripheral steel-blue and iridescent patina on each side.

#### 1870 OC-P2 Dollar, PR64 Cameo

3986 1870 PR64 Cameo PCGS. OC-P2, R.4. A scare proof variety, this beautiful silver dollar has frosty and fully lustrous devices over deeply mirrored fields, creating exceptional field-to-device contrast. Three proof varieties are identified; OC-P1 is plentiful while the other two varieties are scarce. Population: 20 in 64 (1 in 64+) Cameo, 16 finer (11/19). NGC ID# 252S, PCGS# 87018

3987 1873 — Questionable Color — PCGS Genuine. Unc Details. This final-year-of-issue Seated dollar displays pinpoint strike definition and deeply reflective fields. The color is a bit off, but not unattractive. Remarkably clean surfaces overall.

#### TRADE DOLLARS

## 1874 Trade Dollar, MS64 A Better Date in High Grade

3988 1874 MS64 PCGS. The 1874 Trade dollar is more elusive than some of the San Francisco issues in this series, although examples as fine as MS64 can usually be acquired with patience. In higher grades this date becomes a formidable condition rarity. The present coin displays Choice, satiny surfaces and generally strong detail, although a touch of weakness is noted on the eagle's right (facing) talons. Both sides are brilliant, with pleasing visual appeal. Population: 35 in 64 (1 in 64+), 8 finer (10/19). NGC ID# 252Z, PCGS# 7034

3989 1874-8 MS63 PCGS. Large S, period after FINE. A scarce Select Mint State example of this San Francisco type coin, showing satiny pearl-gray luster with olive-golden toning accents. Liberty's head shows trivial softness, but the strike is otherwise pleasing throughout. Population: 66 in 63 (1 in 63+), 38 finer (10/19). NGC ID# 2533, PCGS# 7036

#### 1874-S Trade Dollar, MS64 Only Two Finer at PCGS and CAC

3990 1874-S MS64 PCGS. CAC. Aside from minor marks near and through the large S mintmark, the surfaces of this Choice Mint State Trade dollar and pristine. Both sides have attractive medium gold toning and unimpeded silver mint luster. A splendid example of this conditionally elusive issue. Population: 36 in 64 (4 in 64+), 2 finer. CAC: 9 in 64, 2 finer (10/19). NGC ID# 2533, PCGS# 7036

# 1875-S/CC Dollar, MS62 FS-501, Early Die State

3991 1875-S/CC FS-501 MS62 NGC. Large S, Type One Reverse. An early die state without the cracks that later develop through ICA. This is a bright example with the clear remains of an underlying CC mintmark right of the S. The design is razor sharp, the only exceptions being a few of Liberty's curls and star 13. Census: 8 in 62, 4 finer (10/19). NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

3992 1876 Type One Obverse, Type One Reverse, MS64 PCGS. No period after FINE. A frosted near-Gem example, with lustrous and sharply struck surfaces. Bits of grayish-brown toning visit the high points, while bright mint luster flashes throughout both sides. Sharp and minimally marked for the assigned grade, housed in an early generation blue-label holder with barcode on the back. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

# 1878-CC Trade Dollar, XF45 Final Carson City Trade Dollar

3993 1878-CC XF45 PCGS. No circulation-strike Trade dollars were produced at Philadelphia in 1878, although the Carson City Mint struck 97,000 coins before switching over to the new Morgan type of the standard weight. The 1878-CC Trade dollar is sought-after in all grades. This Choice XF example displays light wear and problemfree surfaces. Deep olive-gray and golden toning covers each side. From The Spring Creek Collection, Part I. NGC ID# 253M, PCGS# 7047

### 1878-S Trade Dollar, MS65 Dappled Olive-Gold Toning

3994 1878-S MS65 PCGS. This mass-produced San Francisco issue is one of the more collectible Trade dollars in high grades, perfect for type representation. Dappled olive-gold patina adorns dusky silver surfaces that glisten with frosty mint luster. Both sides are as strongly detailed as one could hope to find, including the olive leaves, Liberty's head, and the eagle's feathers and talons. Population: 25 in 65 (3 in 65+), 23 finer (11/19). NGC ID# 253G, PCGS# 7048

#### PROOF TRADE DOLLARS

#### 1877 Trade Dollar, PR63

3995 1877 PR63 PCGS. Following the transitional years of 1875 and 1876, the Type Two obverse and reverse design hubs were used exclusively in 1877 and later years. This Select proof has light contrast between the mirrored fields and lustrous devices, all beneath splendid gold and iridescent toning. Although proofs were routinely saved, the 510 coin proof production was the lowest of the collectible series from 1873 to 1883. NGC ID# 27YN, PCGS# 7057

3996 1879 PR58 PCGS. CAC. The 1879 Trade dollar claims a proofonly mintage of 1,541 pieces. This PR58 specimen exhibits just a trace of wear on the strongly impressed design elements and the lightly abraded reflective fields shine through shades of lavendergray and sea-green toning.

From The Spring Creek Collection, Part I. NGC ID# 27YR, PCGS# 7059

3997 1879 PR62 NGC. The first year of proof-only Trade dollar production resulted in a substantial 1,541 pieces. This PR62 representative showcases dusky gold and violet patina over reflective fields and predictably sharp devices. A few thin marks define the grade. NGC ID# 27YR, PCGS# 7059

3998 1879 PR62 PCGS. The mintage of proof Trade dollars jumped substantially in 1879, fueled by speculators and dealers looking to make a quick profit from the otherwise defunct series. A robust 1,541 proofs were struck. This example is housed in a previous generation green label holder, with blue and reddish-brown toning that deepens around the raised elements. The well-balanced toning is consistent across both sides, with smooth and reflective mirrors surrounding sharply struck devices. NGC ID# 27YR, PCGS# 7059

3999 1879 PR63 PCGS. A proof-only issue, the 1879 Trade dollar had a mintage of 1,541 coins that were produced and sold simultaneously with the proof Morgan dollars. This piece has fully mirrored fields beneath rich gray-brown toning with blue overtones. A splendid Select proof. NGC ID# 27YR, PCGS# 7059

#### 1879 Trade Dollar, PR63+ Cameo Colorful Patina Over Reflective Fields

4000 1879 PR63+ Cameo PCGS. Cameo-contrasted Trade dollar proofs are seldom seen with such vibrant toning. They are usually brilliant to enhance the white-on-black effect. Field-device contrast is undiminished on this Select proof, though colorful blue, violet, and gold toning colors most of the obverse and much of the upper-left reverse. The fields are reflective, and eye appeal is wonderful. NGC ID# 27YR, PCGS# 87059

4001 1880 PR53 PCGS. CAC. From a proof-only mintage of 1,987 pieces, this lightly worn, lightly abraded PR53 Trade dollar exhibits high-intensity lavender-gray toning over both sides. The design elements were sharply struck and some traces of reflectivity shine through the patina.

From The Spring Creek Collection, Part I. NGC ID# 27YS, PCGS# 7060

4002 1880 PR61 PCGS. CAC. Struck in large numbers to satisfy dealers and speculators, the proof-only 1880 Trade dollars survive in large numbers even today. This PR61 example is housed in a first generation PCGS "rattler" holder and displays CAC endorsement. Pale-red and brownish-gray patina lessen the effect of minor field hairlines, while the fields retain their glassy reflectivity. CAC: 2 in 61, 79 finer (10/19). NGC ID# 27YS, PCGS# 7060

## 1880 Trade Dollar, PR63 Cameo Popular Proof-Only Issue

4003 1880 PR63 Cameo PCGS. Pronounced cameo contrast exists on this moderately toned, minimally abraded proof Trade dollar. Lilac, gold, red, and cobalt-blue colors deepen toward the peripheries. Several wispy hairlines that are seen in the fields also help to account for the PR63 grade.

Ex: Central States Signature (Heritage, 5/2004), lot 8113; Dallas National Money Show Signature (Heritage, 10/2012), lot 4685. NGC ID# 27YS, PCGS# 87060

4004 1881 PR62 PCGS. The proof-only mintage of 960 pieces represents a substantial reduction from the sky-high proof mintages of 1879 and 1880, when Trade dollar speculation was hyped by enterprising dealers. Smoky golden-gray toning reveals subtle iridescent colors when viewed from an advantageous angle. Well-mirrored and sharply struck, the coin displays a swath of deep-blue and russet toning at the lower-right reverse for added eye appeal. A few faint hairlines exist beneath the pleasing patina. NGC ID# 27YT, PCGS# 7061

4005 1882 PR61 PCGS. CAC. CAC endorsed and housed in a first generation "rattler" holder, this PR61 1882 Trade dollar exceeds its numeric grade both in technical quality and eye appeal. Some light, swirling hairlines are seen among areas of gray and gold toning that congregate near the raised elements. Substantial mirroring remains throughout the fields. NGC ID# 27YU, PCGS# 7062

4006 1883 PR40 PCGS. CAC. The 1883 Trade dollar was the final collectible issue of the series, with a proof-only mintage of 979 pieces. This lightly worn, lightly abraded PR40 specimen displays even lavender-gray toning over both sides.

From The Spring Creek Collection, Part I. NGC ID# 5DP8, PCGS# 7063

#### MORGAN DOLLARS

1878 8 Tailfeathers Dollar, MS66 None Numerically Finer at NGC

4007 1878 8TF MS66 NGC. This impressive Premium Gem, exhibiting a prooflike obverse and frosty reverse, is tied for the finest numerically at NGC. Both sides are highly appealing with untoned silver luster, save for the faintest gold toning along the obverse border. Census: 32 in 66 (1 in 66+, 6 in 66★), 0 finer (10/19). NGC ID# 2TY3, PCGS# 7072

# 1878 7/8TF Silver Dollar, AU55 Tripled Blossoms, VAM-44A Key Morgan Variety

4008 1878 7/8TF Triple Blossoms, VAM-44A, AU55 PCGS. A Top 100 Variety. Some have proclaimed this variety The King of the VAMs. The obverse shows blatant tripling of the cotton bolls and leaves, as well as doubling on LIBERTY, most visible at BER. On the reverse, the 7/8 Tailfeathers feature is "weak" (we count four tailfeather tips showing), but the VAM-44A characteristics are sharply evident throughout this Choice About Uncirculated dollar. Die clashing is prominent on both sides, with a clearly clashed "n" on the obverse and "M" clashed above d in God. A pair of radial obverse die cracks include one near star 7 and another near the dot between PLURIBUS and UNUM to confirm the late die state. Semiprooflike fields show only minor abrasions, with a few orangish-brown alloy spots on the reverse. Faint pale-gray toning dapples the otherwise brilliant-silver surfaces. NGC ID# 2TY3, PCGS# 133829 Base PCGS# 7074

4009 1878 Reverse of 1879, 168 Reeds, VAM-224, MS65★ NGC. Hit List 40 Variety. A broken inside point on star 10 and obverse die scratches confirm the obverse, while double horizontal die polish lines between the eagle's legs verify the reverse, although the edge reed count (just 168 reeds) is the real attraction of the VAM-224. This Gem example features a colorfully toned obverse, which earns the NGC Star designation, paired with a lightly toned reverse. The frosted surfaces are highly lustrous and attractive. PCGS# 412580 Base PCGS# 7076

### 1878-CC Silver Dollar, MS66 First Carson City Morgan

- 4010 1878-CC MS66 PCGS. The famous Carson City Mint struck more than 2.2 million Morgan dollars in 1878, the first year of the design. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster throughout. Overall eye appeal is outstanding. PCGS has graded six numerically finer examples (10/19). NGC ID# 253M, PCGS# 7080
- 4011 1878-S MS66+ PCGS. CAC. A wide crescent of rainbow toning graces the lower obverse and upper reverse of this Plus-graded Premium Gem 1878-S Morgan. CAC endorsement adds to the resume of this impressively toned coin. Long years of undisturbed storage contribute to the high quality the surfaces show only two instances of coin-to-coin contact, while Liberty's cheek is nearly flawless yet all is secondary to the colorful toning. NGC ID# 253R, PCGS# 7082
- 4012 1878-S MS66+ PCGS. CAC. This Plus-graded Premium Gem is sharply struck with smooth, partially reflective fields and vibrant cartwheel luster. Liberty's cheek is clear of any abrasions or marks, and the hair over the ear is fully brought up. Bits of reddish-tan toning at the obverse margin transition to translucent golden shades at the center, while the reverse is vividly toned in blue at the borders, with violet and golden-tan across the central devices. The eagle is razor-sharp. NGC ID# 253R, PCGS# 7082

# 1879-CC Silver Dollar, MS62 Hint of Field Reflectivity

4013 1879-CC MS62 NGC. A frosty, well-struck example of this better Carson City issue. The 1879-CC is famous for the Capped Die variety of this year, designated VAM-3. This piece is the Normal Mintmark variant, which some would argue is seen at auction less frequently. For the MS62 grade, this piece is surprisingly well-preserved. Liberty's cheek shows no abrasions of objection, and only faint hairlines beneath a loupe appear to prevent a finer grade from NGC. NGC ID# 253U, PCGS# 7086

- 4014 1879-O MS65 PCGS. A minimum of marks exist on this smooth, satiny 1879-O dollar one of the relatively few Gems that survive from the Southern Mint's grand reopening for coinage operations in 1879. Hampered by yellow fever and a shortage of silver bullion, the branch mint managed a silver dollar mintage of 2,887,000 pieces. Gem examples are elusive, and finer survivors are rare. This MS65 is sharply struck with nearly mark-free fields. NGC ID# 253X, PCGS# 7090
- 4015 1879-O MS65 PCGS. A hint of peripheral gold toning hugs the obverse border of this otherwise brilliant and untoned Gem silver dollar. The strike is excellent and this dollar boasts a high degree of eye appeal. PCGS has seen just 37 numerically finer examples (10/19). NGC ID# 253X, PCGS# 7090
- 4016 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. A Top 100 Variety. The second 8 is punched over an underlying 7, with that digit punched high. This is an all-brilliant Premium Gem with thick mint frost characteristic of the Carson City facility. Rare any finer. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102
- 4017 1880-CC 8 Over High 7, VAM-5, MS64 Deep Mirror Prooflike PCGS. A Top 100 Variety. This impressive Carson City Morgan dollar is fully brilliant with deeply mirrored fields that frame the lustrous devices. A hint of gold toning is evident along the left side of the reverse. Population for VAM-5: 1 in 64 Deep Mirror Prooflike, 2 finer (11/19). NGC ID# 35BG, PCGS# 41134 Base PCGS# 97103

#### 1880-CC Dollar, MS66+ Delicate Gold Patina

4018 1880-CC Reverse of 1879, 8/7 Dash, VAM-3, MS66+ PCGS. Only a trace of golden toning adorns this lustrous high-grade silver dollar. Uncommonly free from contact, and a desirable addition to a Carson City collection. The hair above the ear shows minor inexactness. VAM-3 is among the several 1880-CC die varieties with a "dash" below the second 8 in the date, formerly believed to be the remnant base of an underdigit 7.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars / ANA Signature (Heritage, 8/2015), lot 5476. NGC ID# 35ER, PCGS# 41128 Base PCGS# 7100

# 1880-O Dollar, MS64 Deep Mirror Prooflike Just One Coin Finer at PCGS and NGC

4019 1880-O MS64 Deep Mirror Prooflike PCGS. Deep Mirror Prooflike examples of the 1880-O Morgan dollar are scarce, and no Normal Date coins are certified in Gem condition. This near-Gem is brilliant, sharp, and modestly contrasted with impressively clean surfaces for the grade. Housed in an old green label holder. Population: 40 in 64 (1 in 64+) Deep Mirror Prooflike, 0 finer (10/19). NGC ID# 2543, PCGS# 97115

## 1880-S Morgan Dollar, MS68 Extraordinary Quality

4020 1880-S MS68 PCGS. The 1880-S Morgan dollar claims a substantial mintage of 8.9 million pieces, making it an available issue in high grade and a favorite choice of type collectors. This magnificent MS68 example exhibits razor-sharp definition on all design elements and the virtually flawless surfaces show highlights of sea-green and lavender toning, with vibrant mint luster on both sides. PCGS has graded five numerically finer examples (10/19). NGC ID# 2544, PCGS# 7118

# 1880-S Morgan Dollar, MS68 Outstanding Branch Mint Type Coin

4021 1880-S MS68 NGC. The 1880-S Morgan dollar claims a well-produced mintage of 8.9 million pieces, making the issue readily available in high grade and a popular choice with type collectors. This spectacular MS68 specimen exhibits razor-sharp definition on all design elements and virtually flawless surfaces that radiate vibrant mint luster from both sides. A few hints of emerald-green toning add to the terrific eye appeal. NGC has graded five numerically finer examples (10/19). NGC ID# 2544, PCGS# 7118

# 1880-S Dollar, MS67 Deep Prooflike Incredible Depth of Mirroring on Each Side

4022 1880-S MS67 Deep Prooflike NGC. Large S. Flashy and gorgeous with thickly frosted devices and deeply reflective mirrors. The obverse is minimally toned; in fact, almost entirely brilliant, though the upper-left reverse shows an area of amber color. Fully detailed throughout. PCGS has only certified 29 pieces finer (11/19). NGC ID# 2544, PCGS# 97119

4023 1880/9-S VAM-11, Medium S, Hot 50, MS67+ PCGS. CAC. A Hot 50 Variety. This impressive Superb Gem exhibits die fill in the upper right side of the 0, and displays the diagnostic J-shaped die scratch on Liberty's neck that is seen on all examples of VAM-11. This example has highly brilliant mint luster with satiny, untoned silver surfaces that display a trace of peripheral gold toning at the borders. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

#### 1881 Dollar, MS66 Vibrant Rainbow Toning

4024 1881 MS66 PCGS. Vibrant rainbow toning allows soft mint luster to shine through on this beautifully preserved Philadelphia Morgan dollar. Nearly fully struck, including over Liberty's ear and the eagle's breast. There are a couple of tiny marks on the cheek, but none of any singular importance. NGC ID# 2546, PCGS# 7124

4025 1881 MS66+ PCGS. CAC. Only 41 Premium Gems carry the Plus designation at PCGS, and just 40 MS66 pieces at PCGS and NGC combined are CAC endorsed (7/19). This example claims both attributes. The surfaces are sharp and beautifully preserved with vibrant bands of cartwheel luster. Symmetrical two-sided toning is golden-orange in the centers with blue and gold rings around the borders. CAC: 40 in 66, 1 finer (10/19). NGC ID# 2546, PCGS# 7124

#### 1881-CC Dollar, MS67 Rare Any Finer

4026 1881-CC MS67 PCGS. The GSA release of the 1970s included 122,709 Uncirculated 1881-CC Morgan dollars. However, there are few coins that match the quality of this Superb Gem and only a handful that surpass it. Pale rim toning cedes to brilliant, thickly frosted, and pinpoint-sharp interiors. A lovely Carson City representative with only five finer pieces at PCGS (11/19). NGC ID# 2549, PCGS# 7126

4027 1881-CC MS65 Deep Mirror Prooflike PCGS. This brilliant and untoned dollar remains in an early generation 1.2 holder that was in use from February 1986 to September 1989. A splendid Gem with deeply mirrored fields that frame the lustrous devices, creating outstanding contrast. NGC ID# 2547, PCGS# 97127

#### 1881-S Dollar, Lightly Toned MS68 Ideal San Francisco Type Coin

4028 1881-S MS68 NGC. CAC. Good luck finding fault with this virtually pristine 1881-S Morgan dollar. The remarkably high grade and CAC endorsement reflect the coin's superior preservation, strike, and eye appeal. Frosty surfaces display thin blushes of violet, gold, and blue toning mainly around the borders. There is a single numerically finer example at NGC (11/19). NGC ID# 2549, PCGS# 7130

# 1882-O Morgan Dollar, MS66 Prooflike Registry Set Contender

4029 1882-O MS66 Prooflike PCGS. The 1882-O Morgan dollar is seldom encountered in MS66 condition and Premium Gems with Prooflike surfaces are virtually unobtainable. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces include deeply reflective fields, with streaks of pale lavender-gray toning. Population: 3 in 66 Prooflike, 0 finer (10/19). NGC ID# 254C, PCGS# 7137

## 1882-S Dollar, MS68 Lovely Toning

4030 1882-S MS68 NGC. The obverse shows pale lemon-gold, orange, and violet patina. The reverse of this essentially pristine S-mint dollar is virtually brilliant with golden rim toning. The 1882-S is one of the few issues that remains relatively collectible in this ultimate grade. However, none are graded numerically finer at NGC or PCGS (11/19). NGC ID# 254F, PCGS# 7140

#### 1883-S Morgan Silver Dollar, MS64 First of the Scarce S-Mint Dollars

4031 1883-S MS64 PCGS. In the heady days of happy Silverites (while under the auspices of the Bland-Allison Act), a mintage of 6,250,000 silver dollars was extremely low for the San Francisco Mint. The fact that no bags of 1883-S silver dollars were released by the Treasury in the 1960s, and the Redfield hoard held only a few hundred pieces, is even more important to collectors. This brilliant near-Gem displays reflective fields and frosted devices. Minimally abraded surfaces and a sharp strike support the Choice Uncirculated grade. PCGS has seen a mere 59 pieces in 64+ and 26 examples in numerically finer grades (10/19). NGC ID# 254K, PCGS# 7148

# 1884-CC Silver Dollar, MS67 Vividly Toned Obverse, Frosty Luster

4032 1884-CC MS67 PCGS. Beautiful, original multicolor toning across the obverse produces incredible visual appeal on this 1884-CC dollar, helping it earn Superb Gem classification at PCGS. The devices are well-struck, and luster is frosty and vibrant. The reverse of the coin is largely brilliant. Under a loupe the keen eye can see a few minor marks on the obverse, but the preservation is nonetheless pleasing. PCGS lists three numerically finer 1884-CC dollars, all non-Prooflike coins (10/19). NGC ID# 8BBF, PCGS# 7157

# 1884-CC Morgan Dollar, MS67+ Exceptional Type Coin

4033 1884-CC MS67+ NGC. The 1884-CC Morgan dollar claims a mintage of just 1.1 million pieces, but the majority of the production was held in government storage until the GSA sales of the 1970s. Today, the issue is readily available in high grade, making it extremely popular with branch mint type collectors. This Plus-graded Superb Gem exhibits sharply detailed design elements and virtually flawless brilliant surfaces that show a mix of satiny mint luster and prooflike reflectivity. NGC has graded one numerically finer example (10/19). NGC ID# 8BBF, PCGS# 7152

- 4034 1884-O MS66 Deep Mirror Prooflike PCGS. This amazing Premium Gem with deeply mirrored fields and extraordinary field-to-device contrast is very similar in overall appearance to the branch-Mint proofs struck in New Orleans that year. This piece is brilliant and untoned with exceptional eye appeal. Population: 69 in 66 (5 in 66+) Deep Mirror Prooflike, 2 finer (10/19). NGC ID# 256X, PCGS# 97155
- 4035 1884-S AU58+ NGC. This Plus-graded near Mint Morgan dollar exhibits sharply detailed design elements, with just the slightest trace of wear on the high points of the devices. The lightly abraded, lightly toned surfaces retain almost all of their original mint luster. NGC ID# 254P, PCGS# 7156

# 1885 Morgan Dollar, MS66+ Deep Mirror Prooflike Example, CAC

- 4036 1885 MS66+ Deep Mirror Prooflike NGC. CAC. Brilliant, dazzling mirrors and uncommonly mark-free surfaces confirm the immense quality of this crown-sized silver type coin. Sharply struck except for the leaf left of the wreath knot. Census: 56 in 66 (2 in 66+, 2 in 66★, 1 in 66+★ Deep Mirror Prooflike). CAC: 33 in 66, 0 finer (10/19).
  - Ex: Sacramento Signature (Heritage, 3/2011), lot 3952. NGC ID# 45WM, PCGS# 97159
- 4037 1885-CC MS66+ PCGS. CAC. The 1885-CC remains popular with collectors primarily because of its low mintage of only 228,000 pieces. The subplot to the 1885-CC, however, is almost all of the mintage was set aside and just a few examples escaped into circulation. This is a bright, highly lustrous example with untoned surfaces and a full strike. NGC ID# 254S, PCGS# 7160
- 4038 1885-CC MS64+ Deep Mirror Prooflike PCGS. CAC. A Plusgraded Choice Morgan dollar from the famous Carson City Mint, this coin exhibits well-detailed design elements, with a touch of the usual softness on the hair above the ear. The well-preserved brilliant surfaces show intense prooflike reflectivity in the fields. NGC ID# 254S, PCGS# 97161
- 4039 1885-CC MS65 Deep Mirror Prooflike PCGS. A sharply detailed Gem representative of this popular branch mint issue, with well-preserved surfaces and deeply reflective prooflike fields. Housed in a green label holder. PCGS has graded 56 numerically finer examples (11/19). NGC ID# 254S, PCGS# 97161
- 4040 1885-CC VAM-3 MS66 PCGS. Well-known as the lowest mintage Carson City Morgan dollar, the 1885-CC is always popular among collectors. High-grade examples are especially in demand. This lustrous and essentially brilliant Premium Gem has a good strike and attractive surfaces PCGS# 42595 Base PCGS# 7160

### 1885-S Morgan Dollar, Frosty MS66 Delicate Border Toning Nearly Uncollectible in Finer Grades

4041 1885-S MS66 PCGS. The 1885-S is a better date in Premium Gem condition, seldom offered this fine at auction. Most coins in this grade are non-Prooflike, and higher-grade coins are prohibitively rare. This example is frosty and vibrantly lustrous, brilliant across the interiors with lavender and blue border toning. Only a few faint grazes on Liberty's jaw prevent Superb Gem classification. Population: 94 in 66 (5 in 66+), 2 finer; 1 in 66 Prooflike, 0 finer (10/19). NGC ID# 254U, PCGS# 7164

#### 1885-S Dollar, Frosty MS66 Impressive Registry Coin

- 4042 1885-S MS66 PCGS. CAC. Unlike the 1884-S Morgan dollar issue that precedes it, the 1885-S is collectible through MS65. It becomes scarce in Premium Gem condition, though, and only two coins are graded numerically higher both at PCGS (11/19). This impressive, entirely brilliant example is thickly frosted and well-struck at the centers. Fully deserving of the CAC endorsement. NGC ID# 254U, PCGS# 7164
- 4043 1886-O MS63 NGC. A pleasing Select example of this popular branch mint issue, with a sharp strike for a New Orleans issue and lightly marked surfaces that radiate vibrant mint luster from both sides. Vivid shades of magenta, sea-green, and amber toning add to the outstanding eye appeal. NGC ID# 254W, PCGS# 7168

# 1886-S Morgan, Semiprooflike MS66 Challenging Acquisition This Fine

4044 1886-S MS66 NGC. Premium Gem examples of the 1886-S Morgan dollar are scarce, and these coins represent the finest pieces typically available to collectors. Only a handful of highergrade coins are reported. This piece is brilliant and well-struck. Neither side exhibits bothersome abrasions, and the fields almost fully prooflike. Census: 15 in 66, 2 finer; 1 in 66 Prooflike, 0 finer (10/19). NGC ID# 254X, PCGS# 7170

## 1888-O Dollar, MS65 Deep Mirror Prooflike Old Green Holder, CAC Approval

4045 1888-O MS65 Deep Mirror Prooflike PCGS. CAC. This Gem enjoys outstanding visual appeal for a New Orleans dollar. Each side is untoned and brightly frosted with overt field-device contrast. A nearly full strike softens just a touch over Liberty's ear. A tick on the upper cheek and another grazes under the eagle's right (facing) wing are the only two of note. Encapsulated in an old green label holder. Population: 68 in 65 (2 in 65+) Deep Mirror Prooflike, 6 finer. CAC: 12 in 65, 3 finer (11/19). NGC ID# 462J, PCGS# 97185

# 1889-CC Silver Dollar, XF45 Collector-Grade Key Date Coin

4046 1889-CC XF45 NGC. Traces of bygone reflectivity and mint luster survive in faint fashion throughout the golden-tan surfaces of this Choice XF dollar. Moderate wear defines the assigned grade, although marks are far less frequent than expected and substantial eye appeal remains. Just 350,000 pieces were struck, of which few survive, making the 1889-CC by far the most desired of all Carson City Morgan issues. NGC ID# 2559, PCGS# 7190

# 1889-S Silver Dollar, MS66 Registry-Grade Example

4047 1889-S MS66 PCGS. The vast majority of the Premium Gem 1889-S dollar population is composed of non-Prooflike coins, and PCGS has seen only a single Superb Gem finer, also a non-Prooflike piece (10/19). This example is boldly struck and shows only the faintest surface grazes on Liberty's cheek. The fields are semiprooflike, complementing untoned brilliance across the interiors. Tinges of lavender toning accent the borders. NGC ID# 255B, PCGS# 7194

# 1890-CC Dollar, MS65 Swirling Cartwheel Mint Frost

4048 1890-CC MS65 PCGS. Grading more than 10 full points higher than the average certified representative, this Gem 1890-CC dollar remains entirely brilliant with swirling cartwheel mint frost. Both sides offer a nearly full impression and a dearth of obvious abrasions. Only 20 submissions have been graded numerically finer at PCGS (11/19). NGC ID# 255D, PCGS# 7198

#### 1890-S Morgan Dollar, MS66+ Elusive CAC Registry Coin

1890-S MS66+ PCGS. CAC. The availability of this San Francisco issue plummets above MS65, and it is a major condition rarity finer than MS66. A minority of the coins in this condition are CAC endorsed. Offered here is a sharp, radiantly lustrous Plusgraded Premium Gem, showing brilliant surfaces and exceptional preservation. PCGS has only record eight Superb Gems finer, all non-Prooflike coins (10/19). NGC ID# 255F, PCGS# 7202

4050 1891 MS65 PCGS. The 1891 Morgan dollar is mainly available in MS64 and lower grades. Gems are scarce, and PCGS has certified just three finer pieces, all non-Prooflike coins (10/19). This example is frosty and well-struck, showcasing a luminous cartwheel effect. The obverse has deep olive-green, blue, and yellow-gold toning, while the reverse is brilliant with a golden peripheral halo. NGC ID# 255G. PCGS# 7204

4051 1891 MS65 PCGS. A scarce date in top grades, this brilliant Gem is untoned, exhibiting frosty silver luster, an above average strike, and inconsequential, grade-consistent marks. PCGS has certified only three finer examples (11/19). NGC ID# 255G, PCGS# 7704

4052 1891-S MS64 Deep Mirror Prooflike PCGS. This attractive Choice Morgan dollar exhibits sharply detailed design elements and lightly marked brilliant surfaces with stark prooflike reflectivity in the fields. Population: 36 in 64 (1 in 64+) Deep Mirror Prooflike, 6 finer (11/19). NGC ID# 3VXL, PCGS# 97211

4053 1892 MS65 PCGS. A fully lustrous Gem with delicate gold toning on the obverse. The reverse is brilliant and untoned. This is an important Morgan dollar with only 10 numerically finer examples reaching the PCGS grading room (10/19) NGC ID# 255L, PCGS# 7212

4054 1892 MS65 PCGS. For the first time in the Morgan series, the 1892 Philadelphia mintage was smaller than any of the branch mint silver dollar mintages. This is a brilliant Gem example — sharply struck for the issue, with a few superficial scuffs and marks in the obverse fields, but a clean cheek on Liberty. Frosted mint luster provides strong eye appeal. Rare just one full grade level finer — PCGS reports only 10 pieces in MS66 or finer (10/19). NGC ID# 255L, PCGS# 7212

#### 1892 Dollar, MS65 Prooflike A Rarity This Fine With Prooflike Fields

- 4055 1892 MS65 Prooflike PCGS. Both sides of this Gem 1892 dollar are prooflike, although they retain abundant cartwheel luster, which enlivens the brilliant, largely unabraded surfaces. There is a touch of softness on the eagle's breast and the hair above Liberty's ear, but the remainder of the strike is bold. Prooflike 1892 Morgans are rare in this grade, and none are graded higher. Population: 5 in 65 Prooflike, 0 finer; 6 in 65 Deep Mirror Prooflike, 0 finer (11/19). NGC ID# 255L, PCGS# 7213
- 4056 1892-CC MS64 PCGS. While several bags of 1892-CC dollars survived until the mid-1970s in LaVere Redfield's vast accumulation, the 1892-CC was not included in the GSA sales. Choice Uncirculated or finer coins remain in strong demand today. This example is housed in a previous generation green label holder. Sharply struck, frosted devices contrast with minimally abraded, semireflective fields. Liberty's cheek is smooth and attractive, while the overall lack of marks suggests an even finer grade. NGC ID# 255M, PCGS# 7214
- 4057 1892-S AU55 NGC. The 1892-S is one of the prime rarities in the Morgan series, but at the Choice AU level it is affordable for many collectors. Slight high-point friction leaves most of the mint luster intact in the fields. Each side displays light gray-lilac toning. Sharply struck. NGC ID# 255P, PCGS# 7218
- 4058 1893 MS64 NGC. The 1893 is a better date, particularly among Philadelphia coins. Although occasionally seen in grades through MS64, this issue is scarce at the Gem level. The present near-Gem displays frosty, vibrant mint luster with no visible toning. A well-struck coin with unobtrusive marks on Liberty's cheek that determine the grade. NGC ID# 255R, PCGS# 7220
- 4059 1893 MS64+ PCGS. The low mintage of just 389,792 pieces is an attraction, sometimes overlooked among the other rare 1893 silver dollar issues (the 1893-S and 1893-O). This P-mint example is original and well-produced, with a ring of light, orange-gold toning around lustrous and frosted fields and devices. A few light marks are overshadowed by the sharp strike and plentiful eye appeal. NGC ID# 255R, PCGS# 7220

### 1893 Silver Dollar, MS64 Vivid, Two-Sided Toning

- 4060 1893 MS64 PCGS. CAC. Strong mint luster resides beneath the dynamically toned surfaces of this low-mintage Morgan dollar. Just 389,000 pieces were struck in the wake of new legislation repealing parts of the Sherman Silver Purchase Act. This example displays indigo-blue and reddish-gold shades on the obverse, with vivid electric-blue and orange-gold hues on the reverse. A few obverse scrapes are disguised in the toning and minor central weakness account for the near-Gem grade.
  - Ex: Houston Signature (Heritage, 12/2014), lot 4327. NGC ID# 255R, PCGS# 7220
- 4061 1893-O AU58 PCGS. An important opportunity for the advanced Morgan dollar collector to add this date to a Mint State collection of these coins. This piece is brilliant and untoned with nearly full luster. NGC ID# 255T, PCGS# 7224
- 4062 1893-O AU58 PCGS. By mintage, the 1893-O is the scarcest New Orleans issue in the Morgan dollar series. It trails the 1895-O in terms of Mint State rarity, although overall the two issues are about equally scarce in circulated condition. This near-Mint example is brilliant and sharply struck. Only light field abrasions suggest time spent in circulation. A short reeding mark on the neck truncation is minor. This coin exceeds many technically Mint State examples in luster and eye appeal. NGC ID# 255T, PCGS# 7224

## 1893-O Silver Dollar, MS62 Attractive Mint State Collector Coin

4063 1893-O MS62 NGC. A better date in the Morgan dollar series, the 1893-O is moderately elusive in attractive Mint State condition. Only 300,000 pieces were struck, which is among the lowest production totals in the Morgan dollar set. The present coin grades only MS62, but for the grade it is quite attractive. Vibrant, frosty luster reveals only trivial grazes on Liberty's cheek and leaves the fields pleasantly clean. Both sides are brilliant, and the usual strike weakness in the centers is minimal. NGC ID# 255T, PCGS# 7224

#### 1893-S Dollar, Fine 12 Problem-Free Series Key

4064 1893-S Fine 12 PCGS. Housed in a previous generation green label holder, this pleasing collector-grade 1893-S entirely problem-free and ideal for the assigned grade. Smoothly worn surfaces lessen the effect of any abrasions, and the rich-gray patina deepens around the raised elements for classic old-silver eye appeal. There are no significant marks and the rims remain sharp and strong. NGC ID# 255U, PCGS# 7226

# 1893-S Silver Dollar, VF20 The Key Circulation Strike Morgan

4065 1893-S VF20 PCGS. The 1893-S is the undisputed king of the circulation strike Morgan silver dollars, having a reported mintage of only 100,000 coins, although some numismatic students believe the actual mintage was a smaller quantity. This piece has natural medium gray surfaces with dark steel-gray peripheral toning. NGC ID# 255U, PCGS# 7226

# 1893-S Dollar, VF25 Attractive and Problem-Free

4066 1893-S VF25 PCGS. Housed in an early generation PCGS blue label holder with barcode on the back, this problem-free midgrade 1893-S retains well-defined motifs and only moderate wear for the assigned grade. Pleasing silver-gray toning deepens around the raised elements for added eye appeal. Only light marks exist under scrutiny with a loupe. A sharp collector-grade example — the undisputed king of Morgan dollars. NGC ID# 255U, PCGS# 7226

#### 1894 Morgan, Satiny MS63 Well-Preserved for the Grade

4067 1894 MS63 NGC. An exceptionally clean 1894 dollar for the grade, showing satiny, untoned mint luster with only the faintest of grazes on Liberty's cheek. The hair above Liberty's ear is slightly soft, as usual for the 1894, although other central design elements are well-defined. The Philadelphia Mint coined only 110,000 Morgan dollars for circulation in 1894. Only the series key, the 1893-S, has a lower mintage. NGC ID# 255V, PCGS# 7228

### 1894-O Morgan Dollar, MS63 Brilliant, Untoned Luster

4068 1894-O MS63 PCGS. Generally well-struck, except for the slight weakness above Liberty's ear and on the eagle's breast feathers. This conditionally scarce example displays untoned stone-white surfaces that are intensely lustrous. The reverse is nearly blemish-free, while the obverse shows a number of trivial marks on Liberty's cheek, as well as in the left obverse field. NGC ID# 255W, PCGS# 7230

# 1894-O Morgan Dollar, MS63 Lustrous, Lightly Marked Surfaces

4069 1894-O MS63 NGC. The 1894-O Morgan dollar claims a mintage of 1.7 million pieces, a small production in the context of the broader series, but larger than the combined output of the Philadelphia and San Francisco Mints that year. However, the 1894-O is more elusive than the mintage suggests, especially in high grade. This attractive Select specimen exhibits a typical strike for the issue, with a touch of softness on the hair above the ear and the eagle's breast. The lightly marked surfaces are lustrous and appealing, with a few hints of lavender toning. NGC ID# 255W, PCGS# 7230

- 4070 1894-S MS64 PCGS. This frosty near-Gem Morgan dollar features blushes of reddish-gold patina around the rims, transitioning to brilliant centers. Roller marks are present over Liberty's cheek and ear. The eagle's breast is slightly better defined, and the peripheral elements are strong. The scarcity of Gem-or-better 1894-S dollars places pressure on attractive MS64 coins like this. NGC ID# 255X, PCGS# 7232
- 4071 1894-S MS64 PCGS. CAC. This silver-white Choice Uncirculated 1894-S shows only a few minor abrasions despite thickly frosted obverse fields and devices. The reverse is a touch less frosted, with areas of prooflike reflectivity around the motifs. While more available than the 1894 and 1894-O, this San Francisco issue joins other key and semikey mid-1890s silver dollars in scarcity and popularity. CAC endorsement confirms the near-Gem quality. NGC ID# 255X, PCGS# 7232

#### 1894-S Silver Dollar, MS65 Reflective Fields

4072 1894-S MS65 PCGS. This splendid Gem has reflective toning with splashes of gold and blue toning near the obverse border. The reverse is fully brilliant and untoned, and both sides have vibrant luster. The 1894-S is the most obtainable issue of the year for those collectors who seek a single example of each date in the Morgan silver dollar series. The one-a-year collection is a popular choice for budget-minded collectors. PCGS has only certified 19 numerically finer examples of this issue (10/19). NGC ID# 255X, PCGS# 7232

### 1895-O Morgan Dollar, AU58 Richly Toned, Semikey Issue

4073 1895-O AU58 NGC. VAM-3A "Bearded Eagle." A WOW! Variety, per VAMWorld.com. A cluster of die lumps beneath the eagle's lower beak earns the Bearded Eagle nickname for this popular variety. Struck with a rusted reverse die, the VAM-3A also shows doubling on the 5 in the date, visible above the flag. With a mintage of just 450,000, the 1895-O is a semikey Morgan date regardless of its die variety, and ranks among the top dozen scarcities in the series in near-Mint condition. This example shows plentiful mint luster beneath blue and lilac-gray toning. A few light ticks on the cheek are the only marks of note. NGC ID# 255Y, PCGS# 7236

# 1895-O Morgan Dollar, AU58 Low-Mintage Branch Mint Issue

4074 1895-O AU58 NGC. The 1895-O Morgan dollar is one of several semikey dates from this period that are available in circulated grades, but become conditionally scarce in Mint State. This near-Mint example exhibits satiny luster in the fields, with just a touch of friction over the relief elements. The details are weakly struck on the eagle's breast and the hair above Liberty's ear, as usual. Both sides show a light overlay of champagne-gold toning. NGC ID# 255Y, PCGS# 7236

#### 1895-O Morgan Dollar, AU58 Elusive Key Branch Mint Issue

4075 1895-O AU58 PCGS. The 1895-O is the third-rarest Morgan dollar in Uncirculated condition, trailing only the 1892-S and 1893-S in that regard. While this 1895-O is not Uncirculated it is nearly so, with a sharp strike and semireflective fields. There are no overt signs of wear. Dappled translucent, reddish-gold toning adds a measure of eye appeal, while mint luster persists throughout both sides. NGC ID# 255Y, PCGS# 7236

# 1895-O Morgan Dollar, AU58+ Lustrous, Lightly Abraded Example

4076 1895-O AU58+ NGC. From a small branch mint production of 450,000 pieces, the 1895-O Morgan dollar is a popular semi-key in the series. This Plus-graded near-Mint example exhibits strongly impressed design elements with just a trace of wear on the high points. The lightly abraded surfaces retain most of their original mint luster, with a few hints of sea-green toning. NGC ID# 255Y, PCGS# 7236

## 1895-S Dollar, Semiprooflike MS63 Eye-Catching Collector Coin

4077 1895-S MS63 PCGS. Semiprooflike fields are a hallmark of this Select 1895-S Morgan dollar, complementing frosted luster on the devices. Traces of light golden toning appear on each side although they are faint. The usual strike softness is seen above Liberty's ear and a few tiny marks on the cheek determine the grade. This is a better date in the Morgan dollar series. The San Francisco Mint struck only 400,000 silver dollars in 1895, few of which survived circulation and the Pittman Act melts in high grade. NGC ID# 255Z, PCGS# 7238

### 1896-O Silver Dollar, MS63 Original Border Toning

4078 1896-O MS63 NGC. The 1896-O Morgan dollar is a better date in Uncirculated condition, as if its mintage of 4.9 million coins were almost entirely wiped out by circulation or the silver dollar melts that followed the Pittman Act of 1918. This Select example is lustrous and has only minimal marks. Deep rose, russet, and sea-green toning graces the right-hand obverse margin, while the majority of the coin is mainly brilliant. The usual strike softness affects the hair above Liberty's ear. NGC lists only 14 finer non-Prooflike coins (11/19). NGC ID# 27ZU, PCGS# 7242

# 1896-S Silver Dollar, MS64 Toned Obverse, Brilliant Reverse

4079 1896-S MS64 PCGS. The obverse of this Choice Mint State silver dollar is completely toned in golden-russet with pale blue and violet highlights. The reverse is brilliant and untoned. Both sides exhibit full luster on their satiny surfaces. Population: 550 in 64 (54 in 64+), 84 finer (11/19). NGC ID# 2564, PCGS# 7244

#### 1896-S Morgan, Brilliant MS64+ Elusive in High Grade

4080 1896-S MS64+ PCGS. This better San Francisco coin displays brilliant, softly frosted surfaces. A couple of faint grazes in the left obverse field appear to be all that prevent a full Gem grade from PCGS. Typical of the issue, this coin exhibits some strike softness on the eagle's breast and the hair above Liberty's ear. Finer 1896-S dollars are scarce. NGC ID# 2564, PCGS# 7244

### 1896-S Morgan Dollar, MS64+ Scarce Any Finer

4081 1896-S MS64+ PCGS. CAC. VAM-2, Repunched 6. No large quantity of 1896-S dollars emerged from the Treasury vaults, and aside from a few hundred coins rescued from the Redfield hoard, no trace of the greater part of the 5 million-piece mintage remains. Melting under the terms of the Pittman Act is suspected. Gem or finer coins are notably scarce (and expensive). This high-end near-Gem example is well-struck and well-preserved, with mottled blue and peach-gold toning on the obverse and a trace of reddish-gold border toning on the reverse. The 6 in the date is repunched — the primary marker for VAM-2 — and the mintmark shows minor doubling. NGC ID# 2564, PCGS# 7244

# 1897-O Dollar, MS63+ Conditionally Elusive O-Mint Issue

4082 1897-O MS63+ PCGS. Although the 1897-O claims a mintage of 4 million coins, seldom are examples offered in MS63+ condition, and anything finer is notably scarce. This untoned, satiny representative is well-defined at the centers. A set of reeding marks across the neck and jaw is the only mentionable imperfection. NGC ID# 2565, PCGS# 7248

- 4083 1898 MS67 PCGS. This Superb Gem 1898 Morgan dollar is among the highest numerically graded examples at PCGS (10/19), a standing that makes it popular as a type coin but also a contender for some Registry Sets. Luster is satiny and brilliant aside form a tinge of copper-orange toning along the upper right obverse border. Strike sharpness is pleasing. NGC ID# 2568, PCGS# 7257
- 4084 1898 MS67 PCGS. This frosty Superb Gem ranks among the finest surviving 1898 Morgan silver dollars. PCGS has never graded a numerically finer example, nor has NGC. The 130 PCGS certified examples include just 18 that have earned the Plus designation. Four others are graded MS67 PL or DMPL (10/19). This undesignated example has delicate peripheral gold toning on otherwise brilliant silver surfaces. NGC ID# 2568, PCGS# 7252
- 4085 1899 MS66 NGC. The 1899 is an important Philadelphia Mint issue from a mintage of only 330,846 coins. This Premium Gem has a high degree of brilliance with satin surfaces that exhibit light field reflectivity. There is no toning evident on either side. Census: 79 in 66 (3 in 66+, 1 in 66★), 6 finer (10/19). NGC ID# 256C, PCGS# 7258
- 4086 1899 MS66 PCGS. A conditionally elusive issue in the Morgan dollar series, the Premium Gem 1899 dollar is encountered with some frequency, but finer grade pieces are rare. PCGS has only examined 27 submissions that have earned a higher numerical grade (10/19). This lovely dollar is highly lustrous with brilliant, untoned silver surfaces. NGC ID# 256C, PCGS# 7258

### 1899 Dollar, MS66+ Brilliant and Highly Lustrous

- 4087 1899 MS66+ PCGS. CAC. The 1899 has long been a collector favorite because of its low mintage; however, it is likely an unrecorded number of dollars with this date were struck into 1900 and lumped into deliveries for that year. This is a delightful Premium Gem dollar that displays sharply detailed design elements and impeccably preserved, lustrous surfaces. PCGS has only graded 27 numerically finer examples (9/19). NGC ID# 256C, PCGS# 7258
- 4088 1899 MS66 Prooflike PCGS. With a mintage of just 330,000 pieces, the 1899 issue seems irresistible at the Premium Gem level, even without designated Prooflike surfaces. The mirrored surfaces of this MS66 Prooflike coin display fleeting ice-blue and pale-gold hues. The obverse shows one or two minor abrasions, while a few tiny marks are seen beneath the eagle's wings and above its head. Highly reflective fields surround sharply struck, frosted devices for bold contrast. Population: 13 in 66 (1 in 66+) Prooflike, 0 finer (10/19). NGC ID# 256B, PCGS# 7259

#### 1899-O Morgan Dollar, Colorful Superb Gem

4089 1899-O MS67 NGC. The obverse is richly toned in melded shades of blue, green, violet, rose, and orange. A crescent of similar colors covers the entire right side of the reverse. This Superb Gem New Orleans dollar offers pinpoint strike definition. There are no numerically finer representatives listed on the NGC Census (11/19). NGC ID# 256C, PCGS# 7260

#### 1899-O Dollar, MS67 None Finer at NGC or CAC

- **4090 1899-O MS67 PCGS. CAC.** This is a minimally toned and captivating Superb Gem, well-defined with satiny luster,. Even in the 11 years since we last offered this 1899-O dollar, NGC has failed to certify a single numerically finer example. CAC: 82 in 67, 0 finer (10/19).
  - Ex: Houston Signature (Heritage, 12/2008), lot 3220. NGC ID# 256C, PCGS# 7260
- 4091 1899-S MS66 PCGS. Ex: California. The 1899-S Morgan dollar is scarce in MS66 and genuinely rare any finer. This Premium Gem is semiprooflike and beautifully preserved with boldly struck design elements. PCGS reports 12 Superb Gems finer, although we have only ever handled five such coins in a quarter-century of auction record keeping. It is unlikely that the average collector will have a chance to acquire a finer coin than this Premium Gem. NGC ID# 256D, PCGS# 7262
- 4092 1900-O MS67 NGC. This pristine Superb Gem offers booming luster and beautiful blue-green, golden-brown, and ruby-red peripheral patina. The strike is full, and a finer example can hardly be imagined. Census: 82 in 67 (4 in 67+, 1 in 67★, 1 in 67+★), 0 finer (10/19). NGC ID# 256F, PCGS# 7266
- 4093 1900-O MS67 NGC. Ken Bressett label. A scarce Premium Gem example of this New Orleans issue, showing satiny, untoned luster and exceptional preservation. The hair above Liberty's ear is well-defined, although there is considerable weakness on the eagle's breast. No numerically finer pieces are listed at NGC. Census: 82 in 67 (4 in 67+, 1 in 67+★), 0 finer (10/19). NGC ID# 256F, PCGS# 7266
- 4094 1900-O/CC VAM-8, Top 100, MS65 PCGS. A Top 100 Variety. A delightful Gem representative, with sharply detailed design elements and well-preserved, brilliant surfaces that radiate vibrant mint luster and outstanding eye appeal. The undertype CC is centered and shifted slightly left below the primary mintmark. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268
- 4095 1900-S MS65+ PCGS. CAC. The 1900-S is mainly known for its exceptional mint luster, and that is certainly evident on this piece. Each side is brilliant and displays dazzling mint frost. Strike details are strong throughout. NGC ID# 256H, PCGS# 7270

#### 1901 Morgan Dollar, MS62 Better Date in High Grade

4096 1901 MS62 PCGS. Despite a robust mintage of 6.9 million pieces, the 1901 Morgan dollar is seldom encountered in high grade. It seems likely that some coins were released into circulation near the time of issue and most of the coins held in government storage were melted in 1918. This attractive MS62 example exhibits a better-than-average strike, with lustrous, lightly toned surfaces that show the expected number of minor contact marks for the grade. NGC ID# 2561, PCGS# 7272

# 1901 Morgan Dollar, MS62 Underrated Issue in High Grade

- 4097 1901 MS62 NGC. The 1901 Morgan dollar is much more elusive than its mintage of more than 6.9 million pieces would suggest, especially in high grade. Most coins not released into circulation were probably melted in 1918, under the provisions of the Pittman Act. This impressive MS62 example is sharply detailed and lustrous, with lightly marked surfaces that show a few hints of lavender toning. NGC ID# 256J, PCGS# 7272
- 4098 1901-O MS66+ PCGS. CAC. The PCGS Plus designation and its accompanying CAC endorsement places this high-end Premium Gem in an upper tier among certified examples. The high-mintage 1901-O was generally struck from worn dies, yet the present coin displays sharply defined motifs surrounded by minimally abraded, reflective fields. Attractive multicolor toning provides strong eye appeal. Population: 60 in 66+, 10 finer. CAC: 167 in 66, 2 finer (10/19). NGC ID# 256K, PCGS# 7274
- 4099 1901-S MS65 PCGS. The 1901-S approaches the 1879-CC issue in terms of scarcity, but it seldom receives the attention it deserves. Nearly 2.3 million pieces were struck, most of which circulated in the West. This is a well-preserved Gem, with frosted and lustrous, silver-gray surfaces that are visually more silver than gray. Marks are decidedly few on either side, while eye appeal is plentiful from every angle of view. NGC ID# 256L, PCGS# 7276

### 1902 Morgan Dollar, MS67 Registry Grade Example

- 4100 1902 MS67 PCGS. The new C4 reverse hub was used to produce dies for the Morgan dollar in 1902, after the third Philadelphia Mint opened late in 1901. Unfortunately, the dies lacked definition in areas like the eagle's breast, causing the coins to appear softly struck, and most examples seen have lackluster surfaces. Even this delightful Superb Gem shows some softness on the high points of the design, but the impeccably preserved surfaces radiate unusually vibrant mint luster throughout. Population: 57 in 67 (3 in 67+), 0 finer (10/19). NGC ID# 256M, PCGS# 7278
- 4101 1903 MS67 PCGS. A sliver of almond-gold toning exists beneath the date and creeps up the obverse borders, yet this Superb Gem 1903 dollar is otherwise brilliant and frosted. A clear cheek on Liberty and the lack of any meaningful field abrasions earn this well-preserved MS67 its high grade. PCGS reports no numerically finer certifications, with 14 MS67+ coins tied at the top of its listing (10/19). NGC ID# 256R, PCGS# 7284

## 1904 Morgan Dollar, MS66 Challenging Issue in High Grade

4102 1904 MS66 PCGS. The Philadelphia Mint struck more than 2.7 million Morgan dollars before the bullion acquired under the terms of the Sherman Silver Purchase Act in earlier years ran out. Few examples were saved by contemporary collectors and the Pittman Act took a heavy toll on the coins held in government storage, making the 1904 a challenging issue in high grade today. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, under iridescent shades of lavender and pale jade toning. Population: 50 in 66 (4 in 66+), 1 finer (10/19). NGC ID# 256U, PCGS# 7290

#### 1904-O Silver Dollar, MS67+ Attractive Iridescent Toning Among the Finest Certified

4103 1904-O MS67+ NGC. Iridescent colors of moderate intensity gather to form the two-sided, colorful patina of this high-end Superb Gem 1904-O. Most examples of the 1904-O gathered dust for the better part of nearly 70 years before their release to the public. While now considered easily available as a date, the issue is anything but common in high-end MS67 condition. This coin is sharply struck and attractive, free of any significant marks. No examples grade numerically finer at either service. Census: 3 in 67+, 6 in 67★, 1 in 67+★, 0 finer (10/19). NGC ID# 256V, PCGS#

### 1904-S Dollar, MS61 Semiprooflike Fields

4104 1904-S MS61 NGC. A satiny, brilliant Mint State example of this better San Francisco issue. The fields are semiprooflike, complementing a lack of singular abrasions. Light handling marks on Liberty's cheek are all that deny an even finer grade. A well-struck piece, save for trivial softness on the hair above Liberty's ear. NGC ID# 256W, PCGS# 7294

4105 1921-D MS66+ PCGS. CAC. Dappled toning in shades of ice-blue, green, violet, and gold thinly covers lustrous, well-preserved surfaces, although strike definition is incomplete. Surprisingly elusive in better condition. PCGS reports 12 finer 1921-D Morgan dollar representatives (11/19). NGC ID# 256Y, PCGS# 7298

#### 1921-S Morgan Dollar, MS66 None Finer at PCGS

4106 1921-S MS66 PCGS. Golden-orange, crimson, and forest-green patina richly blankets the obverse, appearing somewhat lighter on the reverse. Radiant mint luster is uninhibited by the attractive toning, shining through on each side. A tiny reeding mark on the eagle's left (facing) leg is the only notable fleck. Typically defined at the centers. None numerically finer at PCGS (11/19). NGC ID# 256Z, PCGS# 7300

#### PROOF MORGAN DOLLARS

### 1880 Morgan Dollar, PR64 Rare CAC-Approved Example

4107 1880 PR64 PCGS. CAC. A delicate overlay of light golden toning graces each side of this near-Gem 1880 proof Morgan, complementing the softly frosted devices and sharp strike. Both sides have subtle field-device contrast despite the lack of a Cameo designation from PCGS. The eye appeal no doubt aids in this coin's merit for CAC endorsement, which is rarely found on 1880 proofs in this grade. CAC: 9 in 64, 20 finer (10/19). NGC ID# 27Z4, PCGS# 7315

#### 1887 Dollar, PR65 Deep Original Toning

4108 1887 PR65 PCGS. The 1887 is one of the more challenging proof Morgan dollar issues to locate in high grades, partly due to a diminished mintage of only 710 pieces (down from a peak of 1,100 coins in 1882). The typical example is well-struck, and this coin is a prime example in that regard. A lack of marks or obtrusive hairlines in the mirrored fields also contributes to the overall appeal, while golden-gray toning deepens toward the margins on each side, yielding tinges of blue around the peripheries. Population: 30 in 65, 19 finer (10/19).

Ex: Houston Money Show Signature (Heritage, 12/2015), lot 3282. NGC ID# 27ZG, PCGS# 7322

# 1902 Morgan Dollar, PR64 Brilliant Finish, CAC Endorsed

4109 1902 PR64 PCGS. CAC. This near-Gem proof dollar is completely brilliant, allowing for a full appreciation of the watery, reflective fields. The Mint revised the finish it used for proof coinage in 1902. Motifs lack the thick mint frost associated with proof strikes up to 1901. Eye appeal is excellent for humismatically significant issue, which displays CAC approval. Population: 90 in 64 (1 in 64+), 62 finer. CAC: 15 in 64, 24 finer (9/19). NGC ID# 2822, PCGS# 7337

#### PEACE DOLLARS

4110 1922-D MS66+ NGC. With only a few exceptions, Peace dollars that grade finer than MS65 are all conditionally elusive or rare. This Premium Gem is fully lustrous beneath gold and pastel iridescence. NGC has certified 12 of these as MS66+, three others as MS66 ★, and 17 finer (11/19). NGC ID# 257D, PCGS# 7358

#### 1923 Peace Dollar, Pristine MS67

4111 1923 MS67 PCGS. Ex: MBJ. Strong cartwheel luster is the calling card of this nicely preserved 1923 Peace dollar, a Superb Gem with a bold strike on satiny surfaces and minimal abrasions on either side. A light cast of gold adds eye appeal to both sides. Despite the enormous mintage of more than 30 million coins, only a few dozen meet the strict PCGS requirements for an MS67 grade. Population: 80 in 67, 0 finer (10/19).

Ex: ANA Signature (Heritage, 8/2015), lot 5855. NGC ID# AMPA, PCGS# 7360

- 4112 1923-S MS65 PCGS. The sharply struck surfaces are smoothly frosted and free of all but the tiniest of marks and abrasions. Brilliant surfaces lack any hint of toning, with bright silver luster shining through. While Gem 1923-S examples occasionally are seen, finer representatives of this San Francisco issue are great rarities. PCGS reports just three numerically finer pieces, plus nine MS65+ coins (11/19). NGC ID# 257H, PCGS# 7362
- 4113 1924-S MS64+ PCGS. CAC. Mainly brilliant surfaces display blushes of chestnut-gold color that deepens around the upper obverse rim and is more prominent over the central reverse. Underlying mint frost is vibrant. Clean for the grade with typical central softness. The 1924-S becomes conditionally scarce at the Gem grade level. NGC ID# 257K, PCGS# 7364
- 4114 1924-S MS64+ PCGS. CAC. A subtle speckling of golden-gray patina drifts across the sharply struck, brilliant-silver surfaces of this high-end near-Gem Peace dollar. The 1924-S ranks among the top five issues in the series at every Uncirculated grade level from MS63 to MS67. This Choice example is Plus-graded by PCGS with CAC endorsement. Only a few tiny marks are seen on each side under scrutiny with a lens. NGC ID# 257K, PCGS# 7364

#### 1926-D Dollar, MS66 Strong and Satiny

4115 1926-D MS66 PCGS. CAC. This is a brilliant, CAC-approved Premium Gem that ranks well-above the typical MS62 example. Satiny surfaces showcase remarkable definition on the obverse portrait, and the reverse is about as strong as can be expected. There are a few tiny, well-hidden abrasions on the eagle's feathers. Only eight pieces are graded numerically finer at PCGS. NGC ID# 257P, PCGS# 7368

# 1927 Peace Dollar, MS65+ Sharp Strike, High-End Surfaces

4116 1927 MS65+ PCGS. Gem condition is the highest collectible grade level for the 1927 Peace dollar. The issue joins an elite group of conditionally rare dates in MS66. This MS65+ offering bridges the gap between the two, offering exceptional quality at a reasonable price. Brilliant surfaces are frosty and smooth with little evidence of chatter. The coin is boldly struck, especially at the centers. PCGS lists just 19 higher-graded submissions (10/19). NGC ID# 2578, PCGS# 7370

#### 1927-S Peace Dollar, MS65 Rare Any Finer

4117 1927-S MS65 NGC. A mintage of 866,000 pieces cements the 1927-S as a better date in high grade. Only the 1927 and 1928 Philadelphia issues have lower production totals. In MS65, the 1927-S is scarce, and it is essentially uncollectible finer, with only three such coins reported by NGC and PCGS combined. This Gem displays a bold strike and satiny mint luster. The interiors are brilliant, surrounded by a dusting of lavender, blue, gold, and russet-green toning. Census: 79 in 65 (2 in 65+), 1 finer (10/19). NGC ID# 26]6, PCGS# 7372

4118 1928 MS65 PCGS. The traditional key date in the Peace dollar series, Gem examples are always in demand. The 360,649 coin mintage is the lowest in the Peace dollar series, and less than half the production of the second lowest mintage issue. This satin Gem has bright silver luster with wispy golden toning. PCGS has only certified 21 finer examples (11/19). NGC ID# 257V, PCGS# 7373

4119 1928 MS65 PCGS. From a series-low mintage of 360,649 pieces, the 1928 Peace dollar becomes scarce at the MS65 level, and finer examples are rare. This delightful Gem exhibits well-detailed design elements and vibrant mint luster on both sides. Eye appeal is outstanding. PCGS has graded 21 numerically finer examples, plus 28 pieces in 65+ (10/19). NGC ID# 257V, PCGS# 7373

#### 1928-S Dollar, MS64+ Vivid, Multicolor Toning

4120 1928-S MS64+ PCGS. CAC. The 1928-S Peace dollar is a scarce issue in grades above the MS64 level. Like most examples seen, this Plus-graded Choice specimen exhibits well-detailed design elements with a touch of softness on the centers. The well-preserved, lustrous surfaces are blanketed in vivid shades of sea-green, lavender-gray, and lilac toning. PCGS has graded 69 numerically finer examples (9/19). NGC ID# 257W, PCGS# 7374

# 1934 Peace Dollar, MS66 Conditionally Elusive Issue

- 4121 1934 MS66 PCGS. CAC. The 1934 Peace dollar is easily obtained in grades through MS64, scarce in MS65, rare in MS66, and nearly impossible in finer grades. This Premium Gem is sharply defined with brilliant and untoned silver luster and frosty mint surfaces. PCGS has certified only six finer examples (10/19). NGC ID# 257Y, PCGS# 7375
- 4122 1934-D MS66 PCGS. This is a brilliant-white, frosted 1934-D, sharply struck on both sides as evidenced by its bold central details. Only a few tiny ticks exist mostly confined to the reverse of this vibrantly lustrous and minimally marked Premium Gem. PCGS reports just two numerically finer pieces, plus 12 examples in MS66+ (10/19). NGC ID# 257Y, PCGS# 7376

# 1934-S Peace Dollar, MS64 Series Key in High Grade

**4123 1934-S MS64 PCGS.** The 1934-S is the key to the Peace dollar series in Mint State. Speckles of light gray patina run over the lustrous surfaces of this attractive near-Gem example. The design elements are generally well-impressed, save for the usual softness in the centers. A scattering of grade-consistent marks do not detract from the overall appeal. NGC ID# 257Z, PCGS# 7377

## 1935-S Peace Dollar, MS66 CAC Endorsed, Rare Any Finer

4124 1935-S MS66 PCGS. CAC. The 1935-S Peace dollar marks the end of the series, and this example ranks as one of the finest that is obtainable. Numerically finer Superb Gem examples are prohibitively rare. This coin displays amazing surfaces with frosted and highly brilliant luster, showing a mere suggestion of russet toning in isolated areas along the rim of both sides. CAC endorsement recognizes the sharp strike and exceptionally smooth, attractive surfaces. NGC ID# 2583, PCGS# 7379

#### **EISENHOWER DOLLARS**

# 1976 Ike Dollar, MS66 CAC-Approved Type One Registry Coin

4125 1976 Type One MS66 PCGS. CAC. The Type One reverse hub of the Bicentennial Eisenhower dollar shows thicker lettering around the border than the Type Two. Type One coins are scarcer than Type Two coins, and most grade no finer than MS65. In MS66, this issue is rarely seen certified. The present coin is one of five for the grade with CAC recognition, which will elevate it to consideration for Registry collectors. Well-struck devices amid satiny, unabraded surfaces produce ample eye appeal along with deep multihued toning. Population: 38 in 66 (1 in 66+), 0 finer. CAC: 5 in 66, 0 finer (10/19). NGC ID# B76K, PCGS# 7418

#### **GOLD DOLLARS**

### 1849 Open Wreath Gold Dollar, MS65 Popular First Year of Issue

- 4126 1849 Open Wreath MS65 NGC. D-2. Normal Date, Small Head, With L. Outstanding luster and generally bold strike details are noted on each side of this conditionally scarce Gem gold dollar. Only the peripheral stars on the obverse are somewhat weakly struck. Flashy and attractive, with rich lime-gold toning and few marks. Census: 43 in 65 (2 in 65+), 10 finer (10/19). NGC ID# 25BA. PCGS# 7502
- 4127 1849 Open Wreath, With L, D-2, Normal Star Placement, MS64 PCGS. CAC. Repunched Date. Housed in a previous generation green label PCGS holder, this CAC-endorsed near-Gem displays partially prooflike fields and orange accents on the olive-gold surfaces. Several stars show repunching especially star 12 and the date is boldly repunched with a die crack that angles from the ball of 9 through the second L in DOLLAR. A sharp strike accompanies nearly mark-free surfaces with strong eye appeal. NGC ID# 25B9, PCGS# 521674 Base PCGS# 7502

# 1849-D Gold Dollar, MS61 Rich, Original Patina

4128 1849-D MS61 NGC. Variety 1-B. The 1849-D is the only Dahlonega gold dollar issue that is relatively available in Mint State. This is an attractive, coppery-gold example, sharply struck and semireflective in the fields. Several die cracks exist on the reverse, and the mintmark is centered beneath the bow to confirm the die pair (one of two varieties known for the 21,588-piece mintage). Census: 49 in 61, 57 finer (9/19). NGC ID# 25BD, PCGS# 7507

### 1849-O Variety 1 Gold Dollar, MS63 Open Wreath

- 4129 1849-O Open Wreath MS63 PCGS. Variety 1. The ME in AMERICA and the R in DOLLAR are repunched on this frequently encountered variety. A pleasing Select Mint State example, this lovely gold dollar has brilliant lemon-yellow surfaces with satin luster. Scattered marks are consistent with the grade. Population: 42 in 63, 33 finer (10/19). NGC ID# 25BE, PCGS# 7508
- 4130 1850-C Improperly Cleaned NGC Details. AU. Variety
  1. Rare by low mintage and also by demand, the 1850-C is conditionally rare as well. Few truly Uncirculated pieces exist despite the published populations at the grading services. This example was once cleaned, with light hairlines and finely granular surfaces. The date and lower wreath are weakly impressed, although the balance of the strike is bold for the issue with About Uncirculated sharpness. Pleasing olive-gold color covers both sides, slightly subdued, with subtle reddish overtones.

# 1851 Gold Dollar, MS66+ Radiant Type Coin

- 4131 1851 MS66+ PCGS. With more than 3.3 million pieces struck, the 1851 ranks among the top choices to represent this first gold dollar type. Here is a scintillating Plus-designated Premium Gem with radiant mint frost and rich reddish-gold color. We note central strike softness above Liberty's ear, LL in DOLLAR, and 85 in the date. A small die chip occurs on Liberty's chin. There are 12 finer submissions at PCGS (11/19). NGC ID# 25BK, PCGS# 7513
- 4132 1851-C Stained NGC Details. Unc. Variety 1. The strike is sharp as can be, a characteristic of the 1851-C gold dollars despite Charlotte Mint's reputation for weakly strikes regardless of date or denomination. This lustrous example displays vibrant orange color, mixed with brassy-gold devices. A prominent halo of violet and blue toning surrounds star 4 opposite Liberty's mark, a stain of unknown origin. Faint hairlines and wispy abrasions occupy the fields. Still, the coin is attractive and technically Uncirculated, with traces of prooflikeness and good eye appeal despite the rather unusual coloration.

### 1851-C Gold Dollar, MS61 Uncirculated Charlotte Type Coin

4133 1851-C MS61 NGC. Variety 3. The date is high and positioned slightly left to identify the variety, although a diagnostic die crack from the edge to the second S in STATES has not yet formed. Light, yellow-gold surfaces display a greenish tinge, and die clashing exists throughout the reverse. Liberty's hair strands are razor-sharp. Marks are limited to a few light obverse abrasions — one on Liberty's nose — and a short, comma-shaped scrape above I in UNITED. Bright mint luster gleams from both sides. Census: 62 in 61, 63 finer (9/19). NGC ID# 25BL, PCGS# 7514

# 1851-D Gold Dollar, AU55 Popular D-Mint Type Coin

4134 1851-D AU55 NGC. Variety 3-E. The small mintage of only 9,882 pieces always attracts attention, making the 1851-D in demand among Dahlonega series collectors and type specialists alike. Still, the 1851-D is the second-most available gold dollar of the D-mint series, although the 1849-D is far and away the most frequently available Dahlonega issue. This is a Choice About Uncirculated 1851-D, with attractive greenish-gold surfaces and minor die clashing visible on both sides. Light marks are gradeconsistent, with a pair of short nicks below Liberty's eye. A bold strike adds to the substantial eye appeal. NGC ID# 25BM, PCGS# 7515

## 1851-D Gold Dollar, MS61 Mint State Dahlonega Type Coin

4135 1851-D MS61 NGC. Variety 3-E. Given the rarity of most Dahlonega gold dollars in Uncirculated condition, the 1851-D defies its small mintage (just 9,882 pieces struck). Perhaps as many as 60 Mint State pieces survive, according to the Bowers' *Guide Book of Gold Dollars*. Doug Winter suggests just 15 to 20 "truly" Uncirculated pieces exist. This MS61 example displays attractive reddish and lilac highlights throughout the vibrant, orange-gold surfaces. The strike is bold, lacking obverse sharpness only at the highest points of Liberty's hair. The reverse strike is characteristically weak at LLA of DOLLARS. A short abrasion runs from the right wreath tip to 1. Census: 20 in 61, 33 finer (9/19). NGC ID# 25BM, PCGS# 7515

- 4136 1852-C Improperly Cleaned NGC Details. Unc. Variety
  2. Semireflective fields and lightly frosted devices show evidence of a light cleaning, although any hairlines are minimal and the greenish-gold surfaces are only slightly subdued. Considerable mint luster remains. The dies clashed early on during mintage of 9,434 pieces, although signs of die clashing are few on this coin. The 1852-C is elusive in all grades especially in Mint State making this sharp example with Uncirculated details an important candidate for an advanced Charlotte Mint set.
- 4137 1852-D AU55 NGC. Variety 4-F. This challenging Dahlonega issue is rare regardless of grade from a mintage of just 6,360 pieces. Doug Winter suggests only 125 to 175 pieces survive, making it the third-rarest Type One D-mint issue (behind the 1850-D and 1854-D), while Q. David Bowers estimates the total survivors may number as many as 200 pieces. Numerous small abrasions pepper both sides of this Choice About Uncirculated example, with characteristic weakness at the bridge of Liberty's nose. Luster remains throughout the pleasing, greenish-gold surfaces. Census: 20 in 55, 65 finer (10/19). NGC ID# 25BS, PCGS# 7519

## 1853-D Gold Dollar, AU58 Lower-Mintage Issue

4138 1853-D AU58 NGC. Variety 5-G. Considerable bright luster fills the peripheries of this attractive apricot-gold Dahlonega example. The curls near the ear display minor wear, but the remainder of the design is crisp. Faint marks are noticeable only on the left obverse field. From a low mintage, as always for the facility and denomination combination.

Ex: FUN Signature (Heritage, 1/2013), lot 6773. NGC ID# 25BW, PCGS# 7523

4139 1853-O MS64 PCGS. Variety 1. The high date reverse is easily identifies as it has bold diagonal die lines between the tops of IT in UNITED and the border. A wonderful Choice Mint State example with fully brilliant and lustrous yellow-gold surfaces, this piece will earn the Registry collector important points for quality and completeness. Population: 42 in 64 (2 in 64+), 12 finer (11/19). NGC ID# 25BX, PCGS# 7524

# 1854-D Gold Dollar, AU50 Probably Fewer Than 125 Pieces Survive

4140 1854-D AU50 NGC. Variety 6-H. Liberty's curls, the denomination, and lower wreath show slight softness — normal for the issue. However, the stars remain impressively sharp. Semireflective yellow-gold surfaces exhibit a touch of friction and minor marks, including a pinscratch on the neck. Merely 2,935 1854-D gold dollars were struck, of which probably no more than 125 or so survive. NGC ID# 25BZ, PCGS# 7526

4141 1854-D — Improperly Cleaned — NGC Details. Variety 6-H. One of the classic rarities in the gold dollar series, the 1854-D has a low mintage of just 2,935 pieces. Somewhere between 100 to 125 pieces survive, according to Doug Winter's estimate. This example shows a light cleaning with some resultant hairlines, with moderate wear visible on Liberty's hair around the face. We note obverse rim irregularity at 12 o'clock at the dentils, with a similar depression at 6 o'clock on the reverse. The surfaces are otherwise smooth and minimally marked, with softly lustrous olive-gold color.

#### 1854 Gold Dollar, MS63 Popular Type Two Design

- 4142 1854 Type Two MS63 PCGS. The important 1854 Type Two gold dollar represents the first year of issue for this short-lived design, one that is always highly sought by collectors. This is a lustrous, marigold representative with bold headdress and wreath detail. Lightly clashed. NGC ID# 25C3, PCGS# 7531
- 4143 1855 Type Two MS62 PCGS. The Type Two gold dollar was introduced in 1854, but the high relief of the portrait led to problems with clashed dies and soft central strikes. The portrait was modified in 1856, creating a two-year type if the tiny 1856-S production is excluded. Uncirculated Type Two gold dollars are scarce, particularly with the smooth and lustrous apricot-gold surfaces of the present coin. The borders display a few specks of aqua residue. Encapsulated in a first generation "rattler" holder. NGC ID# 25C4, PCGS# 7532

#### 1855 Type Two Gold Dollar, MS63+ Attractive and Well-Struck

- 4144 1855 Type Two MS63+ PCGS. The honey-gold luster is especially smooth and satiny on this Plus-graded coin. No major abrasions distract from the eye appeal only a few hairlines on each side prevent a finer grade. This Type Two gold dollar is better-struck than many examples. Eye appeal is outstanding. NGC ID# 25C4, PCGS# 7532
- 4145 1855-C Improperly Cleaned NGC Details. XF. Variety 2. The Type Two design was a brief, ill-fated experiment, although it is now the key to a gold dollar type set. The sole Charlotte Type Two contribution was the 1855-C a low-mintage, weakly struck effort. This example is characteristically soft on the upper portrait and legend, while the reverse is much sharper with DOLLAR bold and the often invisible 8 clearly defined. Signs of a light cleaning matter little given the obvious weakness of the obverse strike. Paleyellow color displays a greenish tinge on both sides.

# 1855-O Gold Dollar, Still-Lustrous AU58 Sole O-Mint of the Type Two Design

- 4146 1855-O AU58 NGC. Variety 1. The 1855-O is the only O-mint gold dollar with the Type Two design. The issue had a generous mintage of 55,000 pieces, but there are only 500 to 700 examples believed extant today in all grades. Half of the survivors are VF or XF. Significant mint luster remains on the deep reddish-orange surfaces. There are two irregularly shaped planchet voids in the area of the neck of Liberty. NGC ID# 25C7, PCGS# 7535
- 4147 1856-S/S FS-501 AU55 NGC. The first mintmark punch was high and right in the space below the ribbon knot, distinctly out of position. The second punch was in the proper centered position. This variety has been known for many years, unlike most San Francisco gold coins that have hardly been studied for varieties. This Choice AU example has lustrous yellow-gold surfaces that host light clash marks and die cracks. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

# 1856-S/S Gold Dollar, AU58 Single-Year California Type, FS-501

4148 1856-S/S FS-501 AU58 NGC. The mintmark was initially punched northeast, creating this dramatic *Cherrypickers*' variety. The 1856-S gold dollar is the only San Francisco Mint issue for the popular Type Two design, which ran for just three years. This is a nearly Uncirculated example with central softness on the curls owing more to an incomplete impression than wear. Orange-gold surfaces are warm and appealing, with trivial hairlines scattered across each side. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

### 1856 Gold Dollar, MS66 Slanted 5, Frosty Luster

4149 1856 Slanted 5 MS66 PCGS. Softly frosted greenish-gold luster adorns this Premium Gem 1856 gold dollar. Neither side shows distracting abrasions. The strike has localized areas of weakness, along the lower obverse and upper reverse dentils as well as on the 85 of the date. Eye appeal is pleasing for the grade. The Slanted 5 variety is rarely offered this fine. Population: 14 in 66 (2 in 66+), 5 finer (11/19). NGC ID# 25CB, PCGS# 7540

- 4150 1857-C XF40 PCGS. Variety 1. A mere 13,280 coins were struck of the inaugural Type Three Charlotte Mint issue. Traces of mint luster remain at the margins of this almond-gold piece, with moderate high-point wear and an absence of consequential marks. The 1857-C is notorious for poor strikes and impaired planchets, although this attractive XF example is only affected in a minor way by those characteristics. Strong eye appeal survives. NGC ID# 25CE, PCGS# 7545
- 4151 1857-C AU50 NGC. Variety 1. The only die pair known to us. This pleasing gold dollar has peripheral rose toning on its greengold surfaces with scattered marks as expected for the grade. The Charlotte Mint produced a minimal quantity of 13, 280 gold dollars throughout the year. NGC ID# 25CE, PCGS# 7545

#### 1857-S Gold Dollar, MS61 Rare in Uncirculated Grades

4152 1857-S MS61 NGC. The 2011 Bowers' Guide Book of Gold Dollars echoes David Akers comment that "I would be surprised if more than 15 to 20 Uncirculated examples are known." Even in About Uncirculated conditions, the 1857-S is rare. This lustrous and semireflective yellow-gold coin is ranked solidly within the cherished Mint State category, housed in an MS61 holder. Marks are limited to a few delicate hairlines on each side, while the devices are sharply struck and the high points are free of wear. The bow loops are fully formed, and the bowknot shows above-average definition. Census: 10 in 61, 6 finer (11/19). NGC ID# 25CG, PCGS# 7547

#### 1858-S Gold Dollar, MS61 Mint State Series Rarity

- 4153 1858-S MS61 NGC. The 10,000-piece mintage yields precious few Mint State examples, making the 1858-S one of the key branch mint issues and an important rarity of the gold dollar series. True to form, most of the mintage circulated to attrition in West Coast commerce, and virtually no collectors existed who were interested in mintmarks. This MS61 example displays partially prooflike surfaces the obverse is mostly prooflike with frosted devices and only a few wispy field abrasions. Soft mint luster illuminates greenish-yellow surfaces and sharply struck motifs. Census: 8 in 61, 4 finer (10/19). NGC ID# 25CK, PCGS# 7550
- 4154 1859-C Improperly Cleaned NGC Details. AU. Variety 1. The low mintage of 5,236 pieces guarantees an interested audience of branch mint gold specialists, with both the 1857-C and and 1859-C about equally challenging in AU or finer grades as the scarcest Charlotte gold dollars. This is a lightly hairlined 1859-C, with surfaces that are a bit glossy from the cleaning. The obverse strike is above-average, while the reverse is less sharp as often seen. Medium-gold color is consistent throughout both sides.

4155 1859-S AU58 NGC. Given the rarity of 1859-S gold dollars in full Mint State, the appearance of any near-Mint example is of immediate interest to gold dollar specialists. This briefly circulated, straw-gold representative is sharply defined with generous mint luster remaining across minimally abraded surfaces. Just a touch of high-point wear exists. Census: 41 in 58, 15 finer (10/19). NGC ID# 25CP, PCGS# 7554

#### 1860 Gold Dollar, Glittering Gem One Finer Example at NGC

- 4156 1860 MS65 NGC. The number of gold dollars coined in previous years vastly outpaced demand, resulting in a large accumulation in the vaults of the New York Treasury office. According to the 1860 Annual Mint Director's Report, "the system of banking adopted in most states tends to exclude small gold coins from circulation." Only 36,668 gold dollars were struck in 1860. Examples are collectible through MS64, but comparable Gems are much rarer. This strongly detailed example enjoys glittering luster over peachgold surfaces. Minor marks occur in the fields. Census: 6 in 65, 1 finer (10/19). NGC ID# 25CR, PCGS# 7555
- 4157 1861 MS65 PCGS. This attractive Gem gold dollar exhibits well-detailed design elements, with just a touch of softness on the ribbon knot. The well-preserved orange-gold surfaces show some parallel die striations in the fields, with satiny mint luster on both sides. Population: 52 in 65, 11 finer (11/19). NGC ID# 25CU, PCGS# 7558

### 1873 Open 3 Gold Dollar, MS66 Lustrous and Pleasing, Few Finer

- 4158 1873 Open 3 MS66 NGC. The thickly frosted portrait of Liberty contrasts boldly with semireflective fields, while the letters of LIBERTY are mostly readable despite the heavy mint frost. No die clashing exists on either side of this Premium Gem example, with a sharp strike throughout the lustrous and attractive surfaces. Marks are limited to a few tiny ticks and delicate lines. Census: 9 in 66, 1 finer (10/19). NGC ID# 25DB, PCGS# 7573
- 4159 1877 MS62 Deep Prooflike NGC. One of three Deep Prooflike examples certified by NGC, this coin is struck from dies matching the 1877 JD-2 proofs, described in John Dannreuther's recent United States Proof Coins, Volume IV: Gold (Part One). Because those dies were used for circulation strikes as well as proofs, the NGC Deep Prooflike designation must be respected. Dannreuther notes: "Sometimes, we must use nuances learned from years of experience to separate striking formats." Light field chatter and wispy abrasions in the mirrored fields account for the numeric grade, while the frosted devices are sharply struck on both sides. Rich-gold color gleams from the well-contrasted surfaces. Census: 1 in 62 Deep Prooflike, 2 finer (10/19). PCGS# 87578 Base PCGS# 7578

4160 1880 MS65 PCGS. A delightful Gem, from a tiny mintage of just 1,600 pieces. This sharply detailed specimen displays partially prooflike, greenish-gold surfaces with exceptional eye appeal. Mint luster coruscates throughout both sides. Few marks are seen on the vibrant fields and devices, with a minor, tiny graze on Liberty's cheek. Housed in an early generation blue label PCGS holder with barcode on the back. NGC ID# 25DJ, PCGS# 7581

#### 1880 Gold Dollar, MS67+ Popular Low-Mintage Issue

4161 1880 MS67+ NGC. Only 1,600 gold dollars were struck at the Philadelphia Mint in 1880, but a number of high-quality examples were saved by contemporary collectors, including this Plus-graded Superb Gem. This coin exhibits sharply detailed design elements throughout and the virtually flawless surfaces show a mix of satiny mint luster and prooflike reflectivity in the fields. Census: 65 in 67 (3 in 67+, 6 in 67★, 1 in 67+★), 25 finer (10/19). NGC ID# 25DJ, PCGS# 7581

#### 1880 Gold Dollar, MS67+ Low-Mintage Issue

4162 1880 MS67+ PCGS. CAC. The 1880 gold dollar had a mintage of only 1,600 coins, and a large percentage of those pieces have been certified, likely including the "hundreds" of pieces that Virgil Brand reportedly owned. This is an excellent candidate for a type collection. This Superb Gem has brilliant orange luster with satiny, slightly reflective surfaces. A lovely example. NGC ID# 25DJ, PCGS# 7581

## 1883 Gold Dollar, MS67+ Lovely Type Coin

4163 1883 MS67+ PCGS. This incredibly well-preserved 1883 is somewhat reflective in the fields but also satiny. The devices have good luster. Rich peach-yellow and golden hues adorn each side. A sharp late-series gold dollar such as this is a popular type coin. Although the 1883 is more plentiful than its 10,800-coin mintage would suggest, it is rarely seen finer than the current piece. NGC ID# 25DM, PCGS# 7584

#### 1888 Gold Dollar, MS67+ Near-Flawless Golden Surfaces

- 4164 1888 MS67+ PCGS. CAC. A lowly production of 15,501 coins contributes to the popularity of this late-date gold dollar issue. Gleaming mint luster radiates across near-flawless golden surfaces. Boldly struck, with a shallow as-made planchet flake off the top right portion of the final 8 in the date. Population: 59 in 67 (6 in 67+), 7 finer. CAC: 28 in 67, 4 finer (10/19). NGC ID# 25DT, PCGS# 7589
- 4165 1889 MS67 NGC. Razor-sharp, straw-gold surfaces radiate strong mint luster, while the shimmering fields and frosted devices are essentially free of any marks or abrasions. Popular as the Liberty Head design's final year for the long-running gold dollar series, this 1889 Superb Gem is a splendid representative of the type. Exceptional preservation and plentiful eye appeal exceed all but a few finer-certified survivors. As always on circulation strikes, the lower wreath and bow are doubled south. The PCGS population shows just 10 coins in numerically finer grades, plus 25 pieces graded MS67+ PCGS (10/19). NGC ID# 25DU, PCGS# 7590

# 1889 Gold Dollar, MS67+ Rarely Available in Finer Condition

4166 1889 MS67+ PCGS. CAC. The 1889 gold dollar is a popular type coin, the final year of the type and a plentiful date in high grades. This Plus-graded Superb Gem has few superiors. Each side is well-struck and softly frosted with peach-gold luster. CAC recognizes the outstanding quality with a green sticker, placing this piece in a minority of the 1889 gold dollar survivorship that is so recognized. NGC ID# 25DU, PCGS# 7590

# **CLASSIC QUARTER EAGLES**

#### 1834 Classic Head Quarter Eagle, MS62 No Motto, Breen-6140

4167 1834 MS62 PCGS. Breen-6140, Variety 4, R.3. Large Head. Wide repunching on star 2, the two pronounced curls above LI, and the missing right diagonal on the M in AMERICA aid in attributing the Variety 4 die marriage. Mint luster emerges from the protected areas of this bright yellow-gold quarter eagle. Well-struck and impressively preserved for the type. NGC ID# 25FS, PCGS# 7692

#### 1834 Classic Quarter Eagle, MS62 Small Head, Variety 1

4168 1834 MS62 PCGS. CAC. Small Head, Breen-6138, Variety 1, R.1. While the Classic quarter eagle and half eagles from 1834 are considered "common" these pieces are definitely not easily found in solid Uncirculated grades. This is a bright, sparkling example with the often-seen semiprooflike fields on each side. The strike details are strong throughout, and it is only the presence of a number of small abrasions that are scattered across each side that prevents an even higher grade. Population: 66 in 62, 88 finer. CAC: 17 in 62, 28 finer (10/19). NGC ID# 25FS, PCGS# 7692

## 1836 Two and a Half, MS62+ Script 8, Attractive Surfaces

4169 1836 Script 8 MS62+ NGC. Breen-6143, Variety 11, R.2. Head of 1835. An attractive semiprooflike caramel-gold example. Smooth save for a few ticks on the rims near 9 o'clock. The centers are incompletely impressed, characteristic of Variety 11. A late die state with interesting cracks on both sides. The Script 8 and Bold 8 varieties are both available by the standards of the six-year type. NGC ID# 25FU, PCGS# 7694

- 4170 1836 Block 8 AU58 NGC. Breen-6144, Variety 15, R.2. Second Head of 1837. Although about four times rarer than its Script 8 counterpart, the 1836 Block 8 remains available in most grades. This near-Mint example displays lightly abraded, prooflike fields and bright, greenish-gold color. A sharp strike from lapped dies shows only a trace of wear, while the reverse is rotated 45° clockwise. NGC ID# 25FU, PCGS# 97694
- 4171 1836 Block 8 AU58 PCGS. CAC. Breen-6144, Variety 15, R.2. A caramel-gold borderline Uncirculated Classic type coin. The centers show minor strike weakness, but peripheral elements are sharp, and luster dominates the margins and motifs. Marks are consistent with the near-Mint grade. The Block 8 variant is about four times as scarce as the Script 8. This example earns CAC endorsement. Population: 34 in 58, 60 finer. CAC: 6 in 58, 22 finer (10/19). NGC ID# 25FU, PCGS# 97694
- 4172 1838 AU58 PCGS. Breen-6146, Variety 19, R.2. An apricot-gold example of this lower mintage Classic issue. Well struck with substantial luster and an attractive obverse. The reverse field displays a few closely spaced hairlines. Population: 20 in 58, 41 finer (10/19).

Ex: Long Beach Signature (Heritage, 9/2011), lot 4205. NGC ID# 25FY, PCGS# 7696

#### 1839-O Quarter Eagle, AU55 High Date, Wide Fraction

4173 1839-O AU55 PCGS. Variety-27, R.3. This variety that combines the High Date obverse and the Wide Fraction reverse is slightly more plentiful than the Low Date, Close Fraction variety, and represents about two-thirds of all 1839-O Classic Head quarter eagles. A trace of wear and scattered marks are noted on this piece that retains nearly full mint luster. Population: 28 in 55, 61 finer (10/19). NGC ID# 25G7, PCGS# 7701

# 1839-O Two and a Half, Unc Details Low Date, Close Fraction Variant

4174 1839-O — Improperly Cleaned — NGC Details. Unc. Variety 28, R.4 Further identified and differentiated from the other variety by the low date and close fraction. Of the 17,781 pieces produced, it is estimated that today 450 to 550 examples survive in all grades. However, most of those survivors are VF or XF. Slight hairlining can be detected when examined, but traces of mint luster are also evident surrounding the devices. Well struck.

# LIBERTY QUARTER EAGLES

4175 1842 — Cleaned — NGC Details. AU. A bright yellow-gold example that shows field chatter and faint hairlines from an old cleaning. The coin is nonetheless well-detailed and has pleasing visual merits to the unaided eye. Only 2,823 quarter eagles were struck for circulation at Philadelphia in 1842. Survivors are scarce in all grades.

### 1842-O Quarter Eagle, Choice AU Strong Definition

4176 1842-O AU55 PCGS. Variety 1, the only one known to have been used in the striking of 19,800 1842-O quarter eagles. Broad rims, full star radials, and crisp feathers and talons are impressive for a New Orleans product of this vintage. Rich yellow-gold surfaces retain partial mint luster and display faint, scattered marks. Population: 11 in 55, 23 finer (11/19). NGC ID# 25GK, PCGS# 7776

# 1843-C Quarter Eagle, AU55 Large Date, Plain 4 Variety

- 4177 1843-C Large Date, Plain 4, AU55 NGC. Variety 1. While much more available than the 1843-C Small Date, Crosslet 4 type, this Large Date variant with a Plain 4 remains scarce in About Uncirculated or finer grades. All four digits in the date are repunched, and the mintmark is broadly repunched west. Sharply struck throughout the obverse, the coin shows weakness at the eagle's central and lower elements. A splash of orange-gold patina at the lower-left reverse accents the otherwise greenish-gold surfaces. Abrasions are minimal on either side. Census: 31 in 55, 39 finer (10/19). NGC ID# 7HLG, PCGS# 7728
- 4178 1843-O/O Small Date, Crosslet 4 MS61 NGC. Variety 8. The O mintmark is sharply doubled below on this important variety. The Crosslet 4 in the date identifies the Small Date logotype, while a Plain 4 identifies the Large Date. This Mint State example has lemon-yellow mint luster with reflective fields that show minor marks to limit the grade. Stars 6 through 10 at the upper obverse are weak. NGC ID# 25GR, PCGS# 7731
- 4179 1844-D XF40 PCGS. Variety 5-I. Attractive olive-gold surfaces show orange accents around the raised elements, while light abrasions dot the fields and devices throughout both sides. As often seen on the 1844 Dahlonega issue, a weak central strike blurs Liberty's hair below the coronet, and the eagle shows a flat strike on the head, neck, and lower extremities. Housed in an old blue label PCGS holder with barcode on the back. NGC ID# 25GV, PCGS# 7736

# 1846-O Two and a Half, AU58+ Significant Traces of Luster Remain

- 4180 1846-O AU58+ NGC. Variety 1. The mintage for the 1846-O quarter eagle was a substantial 62,000 pieces, and it is reliably estimated (by Doug) that 175 to 225 examples may still be extant in all grades. Few, however, are as close to mint condition as this piece, and only a couple of dozen are actually Uncirculated. This bright yellow-gold example retains noticeable traces of mint luster surrounding the devices on each side. The strike is a bit soft in the centers, as is seen on about half of the known pieces. The only mentionable mark is a shallow scratch below the second S in STATES on the upper reverse. NGC ID# 25H4, PCGS# 7743
- 4181 1847-O AU58 NGC. Variety 7. The mintmark is high and left of its normal placement over the top of the fraction bar. This variety is apparently quite rare, and this piece is only the second one we have handled. The lightly abraded lemon-yellow surfaces are reflective and attractive. Census for all varieties: 43 in 58, 36 finer (10/19). NGC ID# 25H8, PCGS# 7747
- 4182 1850-D Cleaned NGC Details. AU. Variety 13-N. All Dahlonega quarter eagles from the 1850s are scarce and highly sought by branch mint gold specialists. Although the eagle on this example is softly struck, the coin shows only minor effects from a past cleaning and the balance of the devices display solid AU sharpness. Pleasing greenish-gold color remains throughout both sides, with a few light abrasions.

#### 1850-O Two and a Half Dollar, MS61 Southern Condition Rarity

- 4183 1850-O MS61 NGC. Variety 1. The mintmark is right of the fraction bar. A generous mintage of 84,000 coins belies the scarcity of the 1850-O quarter eagle. Only 250 to 350 coins are believed extant, including 10 to 15 pieces in Mint State, per Winter. Softness is confined to a couple of lower stars and the eagle's left (facing) leg on this otherwise strong MS61 representative. Pleasing yellow-gold surfaces are softly lustrous with fine hairlines. Census: 8 in 61, 4 finer (10/19). NGC ID# 25HK, PCGS# 7758
- 4184 1851 MS64 PCGS. California gold inundated the Philadelphia Mint in 1851, with more than 1.3 million quarter eagles just one of the high-mintage denominations for the year. This frosted near-Gem has a sharp strike and displays attractive butter-gold color. Mint luster coruscates on both sides. A surprisingly scarce issue in MS64 and finer grades. Population: 51 in 64 (3 in 64+), 6 finer (10/19). NGC ID# 25HL, PCGS# 7759

4185 1852 MS64+ PCGS. CAC. This Plus-graded Choice example exhibits sharply detailed design elements in most areas, but some softness shows at the juncture of the shield border and the eagle's feathers. The well-preserved orange-gold surfaces radiate vibrant mint luster throughout. Population: 63 in 64 (10 in 64+), 17 finer. CAC: 23 in 64, 8 finer (10/19). NGC ID# 25HR, PCGS# 7763

## 1854-O Two and a Half, MS62 Seldom Encountered in Mint Condition

- 4186 1854-O MS62 NGC. Variety 2. The 1854-O is a frequently encountered O-mint quarter eagle, but of the 750 to 1,250 pieces believed known almost all are VF-AU. Uncirculated examples are scarce, and MS62 coins are notably elusive. The bright satiny surfaces on this piece are generally unmarked by the abrasions one would expect from a coin in this grade. Striking softness is noted on the central details on each side, as usually seen. Census: 13 in 62, 3 finer (10/19). NGC ID# 25]2, PCGS# 7772
- 4187 1857-O AU58 PCGS. Variety 1. Some luster remains in the bright yellow-gold fields. The eagle's left (facing) leg shows the only mentionable strike weakness. Scattered marks appear in the fields. The 1857-O quarter eagle is seldom seen finer. Population: 33 in 58, 26 finer (9/19).
  - Ex: New York Signature (Heritage, 10-11/2016), lot 4372. NGC ID# 25JE, PCGS# 7784

#### 1862 Quarter Eagle, Strong AU58

4188 1862 AU58 PCGS. Full stars and the boldly defined portrait and eagle show barely a touch of friction. Partial mint luster glows from minimally abraded, medium yellow-gold surfaces. Fewer than 100,000 1862 quarter eagles were struck. Nevertheless, this is one of the only collectible issues from this important period in American history. NGC ID# 25|Z, PCGS# 7796

### 1878 Quarter Eagle, MS66 Frosty Peach-Gold Type Coin

- 4189 1878 MS66 PCGS. The Mint struck 286,240 quarter eagles in 1878, making this one of the most collectible dates in the series. Examples only become scarce in Gem condition and rare at this high level. Strongly defined peach-gold surfaces emit glowing mint frost from each side. No marks to mention. Population: 12 in 66 (2 in 66+), 3 finer (11/19). NGC ID# 25KY, PCGS# 7828
- 4190 1888 MS64 PCGS. CAC. This lustrous quarter eagle, one of 16,001 examples minted in 1888, features attractive yellow-gold surfaces and bold definition on the stars, wing feathers, and olive leaves. Generally smooth fields are lightly clashed. CAC: 25 in 64, 8 finer (11/19). NGC ID# 25LC, PCGS# 7840
- 4191 1893 MS66 PCGS. In absolute terms, the mintage of 1893 Liberty quarter eagles is tiny, at just 30,000 pieces, but that production total is not unduly small in the context of the series. The issue becomes elusive at the MS66 grade level, and finer coins are very rare. This delightful Premium Gem is sharply detailed throughout and the well-preserved orange-gold surfaces radiate vibrant mint luster. Population: 34 in 66 (4 in 66+), 4 finer (11/19). NGC ID# 25LH, PCGS# 7845
- 4192 1897 MS66 NGC. The butter-gold surfaces show a shimmering mint frost and fully struck design features. There are a few tiny marks on each side visible with a glass, but none are apparent to the unaided eye. Census: 48 in 66 (1 in 66+, 1 in 66★), 18 finer (10/19). NGC ID# 25LM, PCGS# 7849
- 4193 1902 MS67 NGC. This beautiful Superb Gem offers apricottinted centers and lime-green margins. The coin is well-preserved, pinpoint-sharp, thoroughly lustrous, and highly appealing a magnificent candidate for any superior gold type set or high-grade gold accumulation. Census: 68 in 67 (1 in 67+, 4 in 67★), 6 finer (10/19).

  Ex: Dallas Signature (Heritage, 4/2007), lot 1617. NGC ID# 25LT,

PCGS# 7854

ID# 2688, PCGS# 7855

**4194 1902 MS67 NGC.** A delightful Superb Gem representative of this popular type issue, with sharply detailed design elements throughout and virtually flawless peach-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. Census: 68 in 67

(1 in 67+, 4 in 67 $\star$ ), 6 finer (10/19). NGC ID# 25LT, PCGS#

- 4195 1903 MS67 PCGS. This spectacular Superb Gem quarter eagle exhibits sharply detailed design elements throughout and the impeccably preserved apricot-gold surfaces are lustrous and appealing. Population: 94 in 67 (11 in 67+), 1 finer (11/19). NGC
- 4196 1906 MS67 PCGS. CAC. A scarce Superb Gem example of this otherwise plentiful 20th century date, conditionally rare in this grade with CAC endorsement. No strike softness is apparent, and the rich honey-gold surfaces yield frosty, unabraded mint luster. Population: 92 in 67 (9 in 67+), 2 finer. CAC: 35 in 67, 1 finer (10/19). NGC ID# 7JW8, PCGS# 7858

#### PROOF LIBERTY QUARTER EAGLES

1893 Quarter Eagle, PR61 Cameo Fantastic Color and Contrast

4197 1893 PR61 Cameo NGC. CAC. JD-1, R.5. The proof mintage was about average for early 1890s proof gold, with 106 pieces struck and perhaps 50 to 60 pieces known in all grades. Cameo examples are scarce among the survivors, and those with CAC endorsement are clearly in the minority. A few delicate hairlines and tiny marks pull the grade down a notch or two on this well-mirrored and contrasted proof. Fully struck, while intense rich-gold color adds eye appeal. Census: 2 in 61 Cameo, 9 finer. CAC: 2 in 61, 2 finer (11/19). NGC ID# 288G, PCGS# 87919

# 1903 Liberty Quarter Eagle, PR63+ Brightly Mirrored Surfaces

4198 1903 PR63+ PCGS. CAC. JD-1, R.4. The 1903 proof quarter eagle had a mintage of 197 pieces, and the most recent estimate of the number of survivors (done by John Dannreuther) suggests that 80 to 100 pieces may exist of the JD-1 variety, and 40 to 60 examples may survive of the JD-2 variant. This piece was struck from the JD-1, State a dies. The surfaces are bright throughout, the only variation in color being a faint copper stain between stars 2 and 3. Close examination with a loupe shows a few stray hairlines, but these do not appear to have come from an intentional cleaning. As such, this moderately contrasted proof represents excellent value at this grade level. NGC ID# 288T, PCGS# 7929

# INDIAN QUARTER EAGLES

1908 Quarter Eagle, MS65+ Popular First-Year Issue

4199 1908 MS65+ PCGS. An adequate mintage of 564,800 Indian half eagles was accomplished in 1908, the first year of Bela Lyon Pratt's innovative incuse design. This Plus-graded Gem exhibits well-detailed design elements, with just a trace of softness on the eagle's shoulder. The well-preserved yellow and greenish-gold surfaces radiate vibrant mint luster and outstanding eye appeal. NGC ID# 288Y, PCGS# 7939

# 1908 Quarter Eagle, MS65+ Remarkably Clean Surfaces, Bright Color

4200 1908 MS65+ PCGS. CAC. The first-year 1908 quarter eagles and half eagles have an enduring popularity, and fortunately a good number were set aside at the time of issue. This is a bright yellow-gold example that lacks the numerous small abrasions normally seen. The strike is complete except, of course, on the upper wing, an area that is never completely detailed on circulation strike quarter eagles of this date due to incomplete engraving of the feathers. Ex: Houston Signature (Heritage, 12/2015), lot 4543. NGC ID# 288Y, PCGS# 7939

4201 1911 MS65 NGC. The 1911 was a high mintage issue, and most certified survivors are in AU55 to MS64 grades. Gems are surprisingly elusive, and the issue is very rare any finer. The present lustrous apricot-gold Gem is smooth aside from a diagonal line above the date. The lower headdress feathers are lightly brought up, but the remainder of the strike is crisp. NGC ID# 7KR6, PCGS# 7942

#### 1911-D Two and a Half, AU Details The Denver Key

4202 1911-D Strong D — Cleaning — PCGS Genuine. AU Details. Cleaned, although in truth most AU-level examples of the 1911-D quarter eagle have been dipped, wiped, or otherwise brightened at some point in their existence. This example shows hairlines, though, which prevent a numeric grade from NGC. Detail is pleasing, and the satiny surfaces yield straw-gold color.

# 1911-D Indian Quarter Eagle, AU58 Sought-After Key Issue

4203 1911-D AU58 NGC. The Denver Mint struck quarter eagles for the first time in 1911, when a minuscule production of 55,680 pieces was accomplished. The 1911-D is the most elusive issue of the series today. This impressive near-Mint specimen exhibits only a trace of wear on the design elements and the mintmark is fully delineated, but a little faint. The orange-gold surfaces are lightly abraded and retain significant amounts of mattelike mint luster. NGC ID# 7KR7, PCGS# 7943

#### 1911-D Two and a Half, AU58 Scarce CAC Coin

- 4204 1911-D AU58 PCGS. CAC. Strong D. The design elements are sharp on this near-Mint 1911-D quarter eagle, and only light wear is evident on the fields and the high points of the devices. Hints of luster remain in the recesses, and the CAC green sticker is well-earned. This issue is sought-after in all grades, but high-end AU coins with original surfaces are especially desired. NGC ID# 7KR7, PCGS# 7943
- 4205 1912 MS63 PCGS. CAC. Dynamic luster and rich peach-gold color ensure the eye appeal of this nicely struck Indian two and a half type coin. Marks are minor for the Select level, and mostly relegated to an intermittent line through the G in GOD, and contact on the field above the 19 in the date. NGC ID# 7KR8, PCGS# 7944
- 4206 1912 MS64 PCGS. CAC. The 1912 is seldom flashy, nor does it often escape numerous bagmarks and abrasions from rough handling. This near-Gem example fares better than most, with lively mint luster and only a few tiny marks visible under a loupe. The strike is sharp, as usual for the issue. CAC endorsement provides assurance that the coin is substantially above-average for its assigned grade. NGC ID# 7KR8, PCGS# 7944
- 4207 1912 MS64+ PCGS. CAC. This high-end near-Gem is as close to a Gem as could one obtain without dispensing of the vast sums required to purchase an actual MS65 example. The Plus designation and CAC approval speak to its technical and visual quality for the grade. A bold impression, frosty luster, and eyecatching sun-gold color are hallmarks. The only visible tick occurs above the I in IN. Population: 57 in 64+, 96 finer. CAC: 136 in 64, 10 finer (10/19). NGC ID# 7KR8, PCGS# 7944
- 4208 1914 MS63 PCGS. A mintage of 240,000 coins, second lowest in the series after the famed 1911-D, makes the 1914 quarter eagle a sought-after semikey. This well-defined representative has light yellow-gold surfaces that show minimal marks for the Select Uncirculated assessment; most of them are around the reverse motto and undistracting in nature. NGC ID# 7KRA, PCGS# 7946

#### 1914 Quarter Eagle, MS64 Profound Red-Gold Color

4209 1914 MS64 PCGS. An eye-catching shade of red-gold color defines this semikey quarter eagle. Faint violet accents are also noted, enhancing the appeal. The reverse is razor-sharp, while a few of the lowest headdress feathers are slightly soft. A tick below the E in LIBERTY and another in the left reverse field are the sole distinguishing imperfections, and they are microscopic. NGC ID# 7KRA, PCGS# 7946

#### 1914 Two and a Half, MS64+ Better Date in High Grade

4210 1914 MS64+ PCGS. The smooth, frosty fields of this high-end near-Gem lack even minor abrasions, although a few stray hairlines are present to keep this coin from attaining a full MS65 designation. Both sides are well-struck and luminous with rich wheat-gold coloration. The 1914 Indian quarter eagle is occasionally seen in this grade, but finer pieces are scarce. NGC ID# 7KRA, PCGS# 7946

#### 1914-D Quarter Eagle, MS64+ Strong, Eye-Catching Example

- 4211 1914-D MS64+ PCGS. CAC. Satiny mint luster over luminous wheat-gold surfaces provides this Choice Uncirculated quarter eagle with marvelous visual quality, matching its wonderful preservation. Just as impressive is the coin's needle-sharp strike, evident on the portrait and eagle's feathers. Slight die buckling occurs around the edges. Scarce in higher grades. NGC ID# 2899, PCGS# 7947
- 4212 1925-D MS65 NGC. World War I and a commercial preference for double eagles led to a nearly ten-year suspension of quarter eagle production. Finally, Denver struck the denomination in 1925, and the issue is plentiful in typical Mint State. But Gems are scarce, and examples are rarely encountered any finer. This lemon-gold representative exhibits vibrant luster and a bold mintmark. Contact is minimal, and the headdress displays only minor incompleteness of impression. Housed in a prior generation holder. NGC ID# 7KRD, PCGS# 7949
- 4213 1925-D MS65+ PCGS. The 1925-D Indian quarter eagle is relatively available in grades up to the MS65 level, but finer examples are elusive. This Plus-graded Gem offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. PCGS has graded 40 numerically finer examples (11/19). NGC ID# 7KRD, PCGS# 7949

#### THREE DOLLAR GOLD PIECES

4214 1854-O AU50 NGC. Variety 2. The reverse die is lapped, most evident on the wreath ribbon. The lemon-gold surfaces are nicely detailed and show only inconsequential marks. Although Philadelphia struck the three dollar denomination annually until its 1889 demise, and San Francisco also contributed several issues, the New Orleans and Dahlonega facilities coined threes only in the first year of the series, 1854. The 1854-D is a significant rarity, but the 1854-O is merely scarce. NGC ID# 25M5, PCGS# 7971

#### 1854-O Three Dollar, Choice AU Only 24,000 Coins Minted

- 4215 1854-O AU55 NGC. Variety 2. The reverse exhibits lapping on the bow, and a crack runs from the left stem through the mintmark and right ribbon end to the rim. A combination of friction and slight strike softness is most evident on the curls and cotton bolls, while the wreath elements, especially the lower ones, are razor-sharp. Yellow-gold surfaces are peppered with small ticks and hairlines. A first-year New Orleans representative from a low mintage of 24,000 coins. NGC ID# 25M5, PCGS# 7971
- 4216 1856-S AU55 NGC. Small S. An attractive Choice AU specimen of this popular branch mint issue, with just a touch of wear on the design elements and lightly marked orange-gold surfaces that retain traces of original mint luster. NGC ID# 25M9, PCGS# 7975
- 4217 1857-S XF40 PCGS. Light wear shows to the left and above Liberty's eye and on the curled feathers, but much interior detail remains intact on this impressive XF specimen. The orange-gold surfaces are lightly abraded and retain traces of original mint luster. NGC ID# 7K5H, PCGS# 7977
- 4218 1861 XF45 PCGS. A pleasing Choice XF three dollar gold piece issued in the early days of the Civil War. This piece has light reflectivity and shows only trivial marks on its orange-gold and pale blue surfaces. NGC ID# 7K5N, PCGS# 7982

## 1863 Three Dollar, Unc Details Only 5,000 Pieces Produced

**4219 1863** — Cleaned — NGC Details. Unc. The 1863 three dollar gold piece is an elusive issue from a mintage of 5,000 pieces. This lightly worn, lightly abraded Unc Details example shows heavy clash marks on both sides. The lustrous orange-gold surfaces display an unnatural sheen from a light cleaning.

## 1878 Three Dollar Gold, Lustrous MS63 Rich Orange-Gold Color

- 4220 1878 MS63 NGC. CAC. Although the 1878 is by far the most-available of all three dollar gold pieces, few other dates and mints can match its coruscating mint luster and great eye appeal. This Select Uncirculated example has the look of an even finer grade, with vibrant jewel-like surfaces and excellent visual quality. Only tiny ticks and minor abrasions visit the attractive, orange-gold surfaces. The strike is sharp, and the coin is supported by CAC endorsement. NGC ID# 25MZ, PCGS# 8000
- 4221 1887 AU58 NGC. The 6,000-piece mintage was struck from a solitary die pair with die doubling on RICA of AMERICA. While the mintage was comparatively large for the decade, the 1887 is scarcer than either the lower-mintage 1888 or 1889 dates. Most researchers believe large numbers of the issue were remelted at the Philadelphia Mint. This is a sharp, briefly circulated example, with much luster remaining throughout the orange-gold surfaces. Only light abrasions and nominal wear attest to its time in circulation. NGC ID# 25NA, PCGS# 8009

#### **EARLY HALF EAGLES**

1802/1 BD-7 Half Eagle, AU Details Scarce Die Variety, Late Die State

4222 1802/1 BD-7, R.5 — Reverse Spot Removed, Obverse Rim Filed — NGC Details. AU. Bass-Dannreuther Die State c/b, clashed and cracked. BD-7 is among the rarer varieties of the 1802/1 half eagle, with only 50 to 65 pieces believed extant. This AU-level example displays strong detail and lustrous yellow-gold surfaces. Faint rim filing is visible along the upper obverse, and the reverse shows a cluster of tool marks in the field between the eagle's right (facing) wing and neck. Other abrasions are light and unobtrusive.

# 1810 Large Date Half Eagle, XF Details BD-4, Large 5

4223 1810 Large Date, Large 5, BD-4, R.2 — Repaired — PCGS Genuine. XF Details. Bass-Dannreuther Die State a/a. A welldetailed example of this scarce type, showing deep olive-gold patina with copper-orange color in portions of the margins. The obverse rim is weak from 9 to 12 o'clock, although it is difficult to discern whether the weakness is from an uneven strike or the repair work that covers each side in granularity. A few stray hairlines are also evident, although the design elements — and therefore the type — remain well-represented.

#### **CLASSIC HALF EAGLES**

4224 1835 AU58 NGC. First Head, Breen-6504, McCloskey 1-A, R.2 A pleasing near-Mint representative with highly lustrous yellow-gold surfaces. The McCloskey 1-A die combination is plentiful in the context of Classic Head half eagle varieties. NGC ID# 25RV, PCGS# 8173

#### 1837 Large Date, Block 8 Classic Five, MS61 Scarce in Uncirculated

4225 1837 MS61 NGC. Breen-6512, McCloskey 2-B, R.2. Large Date, Block 8. The 1837 is a scarcer issue in the short-lived Classic half eagle series. It is also seldom found in mint condition. This example shows numerous small abrasions scattered across each side, but none are worth individual mention. The lemon-yellow frosted mint luster has taken on a slight reddish tinge that is easiest seen around the margins. Census: 24 in 61, 28 finer (10/19). NGC ID# 25RZ, PCGS# 8175

## 1838 Half Eagle, AU58 McCloskey 2-B, Small Arrows, Large 5

4226 1838 AU58 PCGS. Breen-6515, McCloskey 2-B, R.1. Small Arrows, Large 5. The D in the denomination is mostly under the stem. Yellow-gold color dominates this Classic Head half eagle, along with greenish accents and glints of luster around the raised devices. The portrait and most of the reverse are strong, with slight softness on the obverse stars. Tiny ticks and a minor hairlines are normal for this near-Mint survivor. NGC ID# 2584, PCGS# 8176

## 1838 Five Dollar, MS61 Final-Year Classic Head Issue

4227 1838 MS61 PCGS. Breen-6514, McCloskey 1-A, R.2. Large arrows and repunching on the Small 5 in 5D help confirm the variety, while D in the denomination is well left of the branch stem. While the 1838 is readily available to represent the Classic Head type, it is scarce in Mint State conditions. This apricot-gold MS61 coin is smooth and free of all but a few infrequent, tiny marks. Struck from clashed dies, the surfaces display retain hints of reflectivity and the motifs are sharply struck. Population: 11 in 61, 57 finer (10/19). NGC ID# 25S4, PCGS# 8176

#### LIBERTY HALF EAGLES

### 1844-D Half Eagle, AU53 A More Available D-Mint From This Decade

4228 1844-D AU53 NGC. Variety 11-G. The 1844-D is one of the more frequently seen D-mint from this decade, and the 1840s in general are more available than their D-mint counterparts from the 1850s. Only 80 to 108 pieces are believed still extant in AU condition. This original example is better defined in the centers than most Dahlonega fives, and the green-gold color shows minimal marks on each side. NGC ID# 25T9, PCGS# 8221

#### 1844-D Five Dollar, AU55 Excellent AU Type Coin

4229 1844-D AU55 NGC. Variety 11-G. A straw-gold representative with noticeable remnants of mint luster and an absence of mentionable marks. The centers show the moderate incompleteness of strike customary for the Dahlonega Mint. The generous mintage of 88,982 pieces means a moderate number of XF-AU examples remain. Census: 50 in 55 (1 in 55+★), 55 finer (10/19). NGC ID# 25T9, PCGS# 8221

#### 1844-O Five Dollar, MS60 Seldom Seen in Uncirculated

4230 1844-O MS60 NGC. Variety 2. The first 4 in the date is repunched on the crossbar, but the usually diagnostic die lump above the D in UNITED is missing. The mintage for this issue was large with 364,600 pieces produced. This makes the 1844-O the most available No Motto five dollar. It is readily available in VF through AU grades, but only a few dozen Uncirculated pieces managed to survive. The devices are well-struck and the fields glow with a semiprooflike finish. Numerous small abrasions are peppered over each side, which explain the grade. Census: 13 in 60, 56 finer (10/19). NGC ID# 25TA, PCGS# 8222

# 1845-D Liberty Half Eagle, AU58 Popular for Branch Mint Type

4231 1845-D AU58 NGC. Variety 13-H. Just two varieties are known for the 1845-D despite a large mintage of 90,269 half eagles. This is a sharp and attractive near-Mint example — scarce at this grade level — with partially prooflike fields and sharply defined devices. The number of abrasions is less than normally seen for the grade — as well as for many fully Mint State coins — with ample mint luster remaining. Eye appeal is terrific. Census: 69 in 58 (1 in 58+), 23 finer (9/19). NGC ID# 25TC, PCGS# 8224

## 1846-O Half Eagle, AU53 Green-Gold With Coppery Accents

4232 1846-O AU53 NGC. Variety 3. Coppery accents appear within some of the device recesses, contrasting against otherwise bright green-gold surfaces. The relief elements show uniformly bold design definition, particularly the stars, curls, wing feathers, and olive leaves. The New Orleans Mint manufactured 58,000 half eagles in 1846. Census: 15 in 53, 49 finer (11/19). NGC ID# 25TK, PCGS# 8230

## 1847-D Five, AU58 Bright, Lustrous Surfaces

4233 1847-D AU58 NGC. Variety 18-K. While the 1847-D is not a rare issue, it can definitely be challenging in grades that approach Mint State. It is estimated that 275 to 325 pieces are extant today, but at least two-thirds of the survivors are in VF-XF grades. While the brightness of this coin argues against its originality, there are several russet-colored incrustations within the recesses of the finer parts of the devices that may convince the bidder otherwise. Each side does show several shallow pinscratches, and there is a vertical scratch on the obverse at the top of Liberty's nose. Census: 24 in 58, 15 finer (10/19). NGC ID# 25TP, PCGS# 8234

# 1848-C Five Dollar, AU55 Scarce in High Grade

4234 1848-C AU55 NGC. Variety 1. Pleasing examples of the 1848-C in Choice About Uncirculated condition are few and far between. Doug Winter notes the 1848-C is scarcer than its 64,472-piece mintage suggests, and that it is a rare Charlotte half eagle in Choice About Uncirculated or finer grades. Rich, yellow-gold surfaces have a faint greenish tinge on this AU55 coin. Reflective fields surround well-struck devices for unusually sharp definition. Numerous tiny abrasions dot the surfaces, but there are no disfiguring marks. Census: 35 in 55, 23 finer (9/19). NGC ID# 25TT, PCGS# 8237

- 4235 1851 MS61 NGC. The 377,505 half eagles struck at Philadelphia in 1851 were mostly the result of the massive California gold discoveries. While some gold was converted to private coins and ingots locally, much of the precious yellow material was shipped to all of the branch mints. This example has pale yellow-gold luster with pleasing surfaces showing minimal marks. Census: 24 in 61 (1 in 61+), 34 finer (10/19). NGC ID# 25U5, PCGS# 8246
- 4236 1852-D XF45 NGC. Variety 32-V. This is the usually encountered variety for the 1852 Dahlonega Mint half eagle. Bright lemon-yellow surfaces retain considerable luster for the grade. Myriad trivial surface marks are evident in the obverse and reverse fields. NGC ID# 25UC, PCGS# 8252

#### 1852-D Five Dollar, XF45 Choice Dahlonega Type Coin

4237 1852-D XF45 PCGS. Variety 32-V. The 1852-D has the second-highest mintage of all Dahlonega half eagles, and it only becomes scarce in high grades. XF examples or even About Uncirculated coins are moderately available, such as this Choice XF with partially reflective fields and rich, original orange-gold surfaces. Light abrasions are noted on Liberty's chin and above the eagle's head, with a touch of wear on Liberty's curls. Luster remains on both sides for excellent eye appeal. NGC ID# 25UC, PCGS# 8252

# 1853-D Five Dollar, AU53 The Usual Choice for a Dahlonega Type Coin

4238 1853-D AU53 NGC. Variety 35-X. The 1853-D is the most frequently seen Dahlonega half eagle. It is most often encountered in VF and XF, but occasionally AU pieces, such as this one, can be found. When located, such coins make excellent type pieces. The surfaces on this piece are densely peppered with small abrasions, yet most of the remaining mint luster is still evident. Slight softness of strike is evident in the centers. NGC ID# 25UF, PCGS# 8255

#### 1853-D Half Eagle, AU55 Muted Reddish-Gold Surfaces

4239 1853-D AU55 NGC. Variety 34-Y. An estimated 180 to 225 pieces are estimated known today in AU of the 1853-D, thus explaining its popularity as a type coin. Only slight friction from handling can be seen over the surfaces that are otherwise muted reddish-golden. Slight softness of strike in the centers is present, as expected, and there are only a few small abrasions present. NGC ID# 25UF, PCGS# 8255

## 1854-D Half Eagle, AU58 Large D, Considerable Luster Remains

4240 1854-D Large D AU58 NGC. Variety 36-AA. The mintmark is lightly repunched south. Winter describes the generally available 1854-D Large D half eagle as "very scarce in properly graded About Uncirculated-58, especially with choice surfaces and natural coloration." The details are somewhat uneven, with crisp stars and legends but a touch of softness over the central curls and eagle's feathers. The lower-left obverse dentils are also indistinct. Orangegold surfaces maintain a surprising degree of mint luster. Probably only 15 to 25 coins are finer. NGC ID# 25UK, PCGS# 8258

## 1856 Half Eagle, MS62 Important No Motto Issue

4241 1856 MS62 PCGS. All No Motto half eagles are scarce or rare in Mint State grades, if they exist at all. Among the more plentiful issues is the 1856 that had a mintage of 197,990 coins, yet PCGS has certified less than 50 examples in all Mint State grades. Hints of green and orange appear on the frosty yellow-gold surfaces of this lustrous Mint State No Motto Liberty half eagle. Population: 18 in 62, 10 finer (10/19). NGC ID# 25UV, PCGS# 8266

## 1856-S Half Eagle, AU58 A Major Rarity in Higher Grades

4242 1856-S AU58 PCGS. CAC. Large S. The 1856-S half eagle is scarce in near-Mint condition and becomes a significant rarity in Uncirculated grades despite the unassuming mintage of 105,100 coins. This lovely well-struck representative enjoys vibrant remaining mint luster and pleasing orange-gold color. Field chatter is minor. Population: 18 in 58, 6 finer. CAC: 7 in 58, 2 finer (10/19). NGC ID# 25UZ, PCGS# 8270

# 1857-D Five Dollar, XF45 Underappreciated Dahlonega Issue

4243 1857-D XF45 PCGS. Variety 41-HH. This scarce D-mint five had a mintage of only 17,046 pieces with a mere 150 to 200 survivors estimated in all grades. The surfaces are notably clean and slight traces of mint luster remain within and around the devices. Slight reddish patina adds a mild accent of color to this otherwise yellow-gold coin. NGC ID# 25V4, PCGS# 8273

# 1859-C Five Dollar, Choice AU Challenging Charlotte Issue

- 4244 1859-C AU55 NGC. Variety I. Two obverses share a common reverse to represent the two known 1859-C varieties. The date is slightly left on this example, with small openings in the 8 compared to the second-known obverse, which has the date farther right and visibly larger openings in the 8. Pleasing straw-gold surfaces are only lightly marked for the Choice About Uncirculated grade. As always, the obverse is considerably sharper than the reverse, which is weakly struck from a rusted die. Census: 29 in 55, 47 finer (9/19). NGC ID# 25VC, PCGS# 8281
- 4245 1860 AU58 NGC. A splendid light yellow-gold half eagle, this near-Mint 1860 survives from a low mintage of 19,700 coins. A trace of wear is limited to the highest design elements, and the fields exhibit minuscule marks. Census: 26 in 58, 7 finer (10/19). NGC ID# 25VF, PCGS# 8284

#### 1873 Half Eagle, MS63+ Closed 3

4246 1873 Closed 3 MS63+ PCGS. The Closed 3 1873 half eagle has an average certified grade barely exceeding Choice AU, and coins this fine are scarce. Lustrous, minimally abraded surfaces exhibit rich yellow-gold color. The curls and neck feathers are slightly soft, but the rest of the design is crisp. Population: 14 in 63 (1 in 63+), 9 finer (11/19). NGC ID# 25WK, PCGS# 8329

## 1874-S Half Eagle, AU55 An Important Condition Rarity

4247 1874-S AU55 NGC. Unknown in full Mint State and rare in high About Uncirculated grades, the 1974-S is an unsung scarcity in the Liberty Head half eagle series. Only 16,000 pieces were struck, and apparently all of them circulated. This is a Choice About Uncirculated survivor, one of less than three dozen pieces known at this grade level or finer. Mint luster remains across both sides of this orange-gold coin, which retains its sharp strike except for the mintmark, which was weakly impressed into the working die. Census: 11 in 55, 8 finer (9/19). NGC ID# 25WR, PCGS# 8335

## 1879 Half Eagle, Clean MS64+ Great Eye Appeal

4248 1879 MS64+ PCGS. CAC. Collectors in search of a clean, original, and eye-appealing 1879 half eagle can end their quest with this fantastic high-end MS64+ example with CAC approval. Both sides offer vibrant luster over strong design elements. Coloration is a warm shade of yellow-gold. Population: 21 in 64 (8 in 64+), 6 finer. CAC: 14 in 64, 1 finer (11/19). NGC ID# 25X7, PCGS# 8348

#### 1882-CC Half Eagle, AU58 Popular Carson City Type Coin

1882-CC AU58 PCGS. CAC. Variety 1-A. A relatively available Carson City half eagle in circulated grades from a mintage of 82,817 pieces, the 1882-CC becomes scarce approaching full Mint State condition. This CAC-endorsed AU58 example retains much of its luster and sharpness, with light wear visible on the eagle's neck and high-point wing feathers. The obverse shows little circulation, with a trace of wear on Liberty's hair and bun. Few marks are of note—a tiny pinprick on Liberty's cheek, and a few minor alloy spots on the reverse, visible with a lens. Population: 81 in 58, 25 finer. CAC: 28 in 58, 4 finer (10/19). NGC ID# 25XH, PCGS# 8359

## 1891 Half Eagle, MS64 Nearly Impossible to Surpass

- 4250 1891 MS64 NGC. The 1891 is a conditionally scarce Philadelphia Mint half eagle, seldom seen in MS64 and nearly impossible to find finer. Frosty mint luster washes over light yellow-gold surfaces. Strongly struck throughout and lightly clashed. Census: 11 in 64, 3 finer (11/19). NGC ID# 25Y4, PCGS# 8377
- 4251 1893-CC AU58 PCGS. Variety 2-A. Struck during the final year of coinage operations at the venerable Nevada mint, this About Uncirculated 1893-CC is pleasing for its near-Mint grade and shows only faint evidence of actual circulation. Few abrasions exist on the rich-gold surfaces. The strike is sharp, and eye appeal alone suggests a finer grade. NGC ID# 25YB, PCGS# 8384
- 4252 1894-O MS61 NGC. Variety 1. The mintmark is centered over the V in FIVE on this variety. As a date, the 1894-O half eagle is seldom offered in Mint State, coming from a mintage 16,600 coins. This piece displays sharp details and partly reflective fields with rich honey-gold color. Light surface chatter determines the grade. Census: 75 in 61 (1 in 61★), 16 finer (10/19). NGC ID# 25YF, PCGS# 8388

#### 1894-O Half Eagle, MS62 Scarce in Mint Condition

- 4253 1894-O MS62 PCGS. Variety 2. The 1894-O had an impressively small mintage of only 16,600 pieces, yet 400 to 600 examples are believed to have survived. This is a brightly lustrous coin that has the usually seen baggy surfaces, undoubtedly from a century of being held and occasionally transported in bags in Europe. The strike details are generally well-defined, except on Liberty's hair curls. Population: 11 in 62, 2 finer (11/19). NGC ID# 25YF, PCGS# 8388
- 4254 1897 MS65 PCGS. The 1897 was among the issues shipped to foreign banks in bag quantity, to pay for imports during the gold standard era. The 1897 is common in typical Mint State grades, but due to indifferent storage, only a tiny percentage of survivors qualify as Gems. This crisply struck lemon-gold example exhibits the dynamic luster and lightly marked surfaces requisite of its lofty third-party assessment. Population: 40 in 65 (6 in 65+), 6 finer (9/19). NGC ID# 25YM, PCGS# 8394
- 4255 1899 MS65+ NGC. Faint green overtones appear on the brilliant orange-gold surfaces of this beauty. A few dark toning spots are evident on the obverse. Both sides exhibit bold design definition and frosty mint luster. NGC has certified 87 finer examples (11/19). NGC ID# 25YS, PCGS# 8398

## 1902 Half Eagle, MS65+ Conditionally Rare

4256 1902 MS65+ PCGS. From a smallish mintage of 172,400 pieces, the 1902 Liberty half eagle is an elusive issue at the MS65 grade level. This Gem exhibits sharp design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster throughout. A few insignificant contact marks are not distracting. Population: 27 in 65 (2 in 65+), 11 finer (10/19). NGC ID# 25YY, PCGS# 8405

## 1902-S Five Dollar, MS66+ Superior Type Coin

- 4257 1902-S MS66+ NGC. The 1902-S is a common date 20th century five dollar Liberty with a mintage of 939,000 pieces, which makes it a prime candidate for type purposes. This is an uncommonly well-preserved example whose overall preservation approaches perfection. The surfaces are radiantly lustrous and there are no noticeable or mentionable abrasions present. Fully struck. Census: 35 in 66 (3 in 66+, 1 in 66★), 8 finer (10/19). NGC ID# 25YZ, PCGS# 8406
- 4258 1906 MS65 PCGS. While even high-grade 1906 half eagles often trade for values of common issues, a glance at the certified population suggests that the situation is ripe for change. The 1906 is measurably scarce in Gem Uncirculated and rare in finer grades. This frosted and lustrous Gem is holdered in a previous generation blue label slab, with abundant eye appeal and virtually no distractions. The strike is razor-sharp. Population: 84 in 65 (9 in 65+), 43 finer (10/19). NGC ID# 25Z9, PCGS# 8413

#### **INDIAN HALF EAGLES**

- 4259 1908 MS64 PCGS. An attractive Choice example from the first year of the Indian design, this coin offers well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. Eye appeal is outstanding. NGC ID# 28DE, PCGS# 8510
- 4260 1911-D AU55 NGC. Although its little quarter eagle brother gets all the family attention, the 1911-D half eagle is a rarity as well, from a mintage of only 72,500 coins, the second lowest of all Indian half eagles behind the 1909-O. A trace of wear appears on the high points of this Choice AU example. NGC ID# 28DR, PCGS# 8521

## 1911-D Indian Head Five, AU58 Semikey in All Grades

4261 1911-D AU58 NGC. In the Indian quarter eagle series, the 1911-D is the only major key date. In the half eagle series, there are several important keys, but one of them is also the 1911-D. The 1911-D five boasts a mintage of only 72,500 coins and is scarce in Mint State. This attractive AU coin displays natural, satiny olivegold surfaces with honey-orange recesses. Eye appeal is outstanding for the grade, and the devices have strong detail. NGC ID# 28DR, PCGS# 8521

## 1911-D Half Eagle, Unc Details Low-Mintage Rarity

- 4262 1911-D Cleaned NGC Details. Unc. The 1911-D is a rarity among Indian half eagles with a mintage of only 72,500 coins. The Denver Mint quarter eagle and eagle of 1911 were also low mintage issues, while the double eagle has a substantial production total in 1911. This piece is lightly cleaned but retains faint pink overtones on its bright yellow surfaces.
- 4263 1914-S MS61 PCGS. An attractive Mint State representative of this popular issue, with sharply detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 28DW, PCGS# 8529

## 1914-S Five Dollar, MS62 Better Date in High Grade

4264 1914-S MS62 PCGS. The 1914-S half eagle is seldom offered in grades finer than MS62. This collectible coin has moderately abraded surfaces, although singular abrasions are in the minority. There is some strike weakness on the lower headdress feathers, but most of the design is well-defined. A challenging acquisition for Indian gold specialists. NGC ID# 28DW, PCGS# 8529

## 1914-S Five Dollar, MS62 Lustrous and Lightly Marked

4265 1914-S MS62 PCGS. CAC. Like most San Francisco issues in the five dollar Indian series, the 1914-S is a better date in Mint State. A majority of certified survivors are in circulated grades, but this caramel-gold example displays pleasing luster throughout. Contact is inconsequential for MS62 level, though the left reverse field displays a pair of small gray spots, and the strike shows blending on the lowest headdress feathers. NGC ID# 28DW, PCGS# 8529

#### 1914-S Indian Half Eagle, MS63 Scarce Issue in High Grade

- 4266 1914-S MS63 NGC. The 1914-S is the most challenging Indian five to locate in near-Gem or finer conditions, making this MS63 example a logical alternative. While the issue seldom has strong eye appeal, its scarcity leaves few alternatives. The strike is bold on this Select Uncirculated coin, with soft luster supporting deep, orangegold color. Areas of mint grime suggest prolonged bag storage, as do a pair of marks at BY of LIBERTY and another at the upper reverse legend. The mintmark is slightly misshapen but readable. Census: 19 in 63, 7 finer (10/19). NGC ID# 28DW, PCGS# 8529
- 4267 1915 MS64 PCGS. The MS64 level offers an optimal collector grade for the 1915 half eagle. Its rarity increases tenfold just one step up the grading ladder, and the price keeps pace. This near-Gem example displays lilac and orange overtones on its strawgold surfaces. Marks are limited to a few wispy abrasions on each side, while the strike is suitably sharp. NGC ID# 28DX, PCGS# 8530
- 4268 1915 MS64+ PCGS. Rare in Gem or finer grades, this Plus-graded near-Gem is a mere whisper away from a numerically finer grade. Smooth, satinlike surfaces are nearly mark-free, while the strike is sharp except at the highest headdress elements. Gleaming orange-gold luster flashes from both sides. Population: 61 in 64+, 68 finer (10/19). NGC ID# 28DX, PCGS# 8530

#### LIBERTY EAGLES

1843-O Ten Dollar, AU55 Popular No Motto Issue

- 4269 1843-O AU55 NGC. Variety 2. Four die pairs were used to strike the entire run of 175,612 tens of this issue. This Variety 2 piece shows a long, fine die crack through STATES on the upper reverse. The surfaces are original and display deeper orange-gold color with noticeable traces of mint luster surrounding the devices. A number of small to medium-sized abrasions are scattered across each side. NGC ID# 262R, PCGS# 8589
- 4270 1844 Cleaning PCGS Genuine. Fine Details. A rarity in grades across the board, all 1844 eagles are scarce and undervalued in the challenging Liberty Head series. Just 6,361 pieces were struck. This smoothly worn example was once cleaned, but of little consequence at this seldom-seen grade level. Pleasing straw-gold color remains, now slightly glossy.

4271 1850 Small Date AU55 NGC. The 1850 Liberty eagle with a Small Date is more elusive than the Large Date variety. This attractive Choice AU specimen exhibits just a trace of wear on the high points of the devices and the lustrous orange-gold surfaces show the expected number of minor abrasions and chatter in the fields. Census: 27 in 55, 26 finer (10/19). NGC ID# 2638, PCGS# 8604

#### 1851-O Ten Dollar, Bright AU58 Newly Discovered Variety

- 4272 1851-O AU58 PCGS. Variety 5. This is a newly discovered variety, one that shows a lower-positioned date like Variety 2, but the mintmark is rotated differently from the normal Variety 2 position. Apparently rare as such. The 1851-O is a popular issue with collectors as it is relatively available in AU condition with a few Uncs even known. This is a bright example with semireflective fields. The central devices are sharply struck but the peripheral stars show weakness, as often seen on this issue. Minimally abraded. NGC ID# 263B, PCGS# 8607
- 4273 1853 AU58 PCGS. CAC. Sharply struck, original surfaces are confirmed by the presence of bluish-gray toning that occupies the high points and visits the surrounding fields. Brassy-gold color retains deep-seated mint luster on both sides. CAC endorsement confirms the nearly Mint State condition of this lightly abraded AU58 coin. NGC ID# C82G, PCGS# 8610

#### 1853-O Ten Dollar, AU55 Collectible New Orleans Issue

4274 1853-O AU55 NGC. Variety 6. Some luster remains in the protected portions of the fields, but this Choice AU 1853-O has otherwise satiny surfaces with light handling marks, consistent with the AU grade range. Tinges of deep orange-gold appear around the borders, leaving the interiors with olive-gold patina. Eye appeal is pleasing. A collectible New Orleans type coin. Census: 66 in 55 (2 in 55+★), 50 finer (10/19). NGC ID# 263F, PCGS# 8612

#### 1856-O Eagle, AU53 'Unheralded' New Orleans Issue

- 4275 1856-O AU53 NGC. Variety 3. The high mintmark and die rust around LIBERTY confirm the attribution. Winter calls the 1856-O "unheralded" and "an issue which is not often seen in grades above the VF-EF range." This AU53 example is incompletely struck and lightly abraded, but the olive and orange-gold coloration should appeal to discerning collectors. Census: 19 in 53, 51 finer (10/19). NGC ID# 263R, PCGS# 8620
- 4276 1856-S AU55 NGC. Medium S mintmark as normally found. The arrow feather lightly touches the upper right serif of the mintmark. The 1856-S is scarce in higher grades and NGC has only certified 49 finer examples of this issue (11/19). The frosty light yellow-gold surfaces retain nearly full luster with excellent eye appeal. NGC ID# 263S, PCGS# 8621

## 1857-S Eagle, AU55 Rare date, From the S.S. Republic

- 4277 1857-S AU55 NGC. Ex: S.S. Republic. The recent discovery of treasure left behind when the S.S. Republic sank has rewritten the rarity ratings for many issues. Among those are a few near-Mint and Mint State 1857-S eagles that were recovered from the treasure, among the first of their kind. This Choice AU piece is fully lustrous with bright green-gold surfaces. Just 26,000 pieces were originally struck one doubts if any significant quantities remain to be found. Census: 4 in 55, 6 finer (7/19). Ex: FUN Signature (Heritage, 1/2009), lot 5539. NGC ID# 263V, PCGS# 8624
- 4278 1857-S AU55 PCGS. From a small mintage of only 26,000 pieces, this No Motto San Francisco issue is a rarity in the upper AU grades, and Mint State pieces will be unobtainable for many collectors. This Choice AU example displays bold detail and satiny honey-gold coloration. Substantial luster remains in the protected peripheral fields, while only slight friction is evident on the high points of the devices. Population: 13 in 55, 11 finer (10/19). NGC ID# 263V, PCGS# 8624

## 1858-O Liberty Eagle, AU58 Rarely Seen Finer

4279 1858-O AU58 NGC. Variety 1. O-mint ten dollar production nearly quadrupled over the previous year, from 5,500 coins in 1857 to 20,000 in 1858. With probably 300 or 400 pieces extant, the 1858-O is a moderately collectible No Motto date, usually found in AU50. This coin is decidedly finer, with vibrant mint luster and warm golden color. Remarkably bold for the facility. NGC reports seven finer submissions (10/19). NGC ID# 55GX, PCGS# 8626

## 1873 Closed 3 Ten Dollar, VF Details Major Liberty Head Rarity

4280 1873 Closed 3 — Altered Surfaces — PCGS Genuine. VF Details. In a series replete with rarities, few issues are rarer than the 1873 eagle. Just 800 pieces were struck, plus 25 proofs. This example retains a measure of eye appeal and solid VF details despite some overall smoothing. Numerous light abrasions are visible with magnification. Pleasing light, olive-gold color glows from each side. The recent Bowers' Guide Book of Gold Eagle Coins suggests just 40 to 60 pieces survive in all grades, figures that may be on the high side.

## 1878 Eagle, MS63 Scarce at This Level

4281 1878 MS63 PCGS. Frosty medium yellow-gold surfaces showcase well-detailed stars and strong definition on the eagle's feathers, talons, and fletchings. Softly lustrous with a diagonal graze on the cheek that identifies the coin. From a mintage of 73,780 eagles. Population: 11 in 63 (1 in 63+), 11 finer (10/19). NGC ID# 265J, PCGS# 8680

#### 1880-O Eagle, XF45 Scarce, Low-Mintage Issue

4282 1880-O XF45 NGC. Variety 2. In addition to the position of the mintmark, the secondary pick-up points for this variety are the doubled stars on the left side of the obverse. This low-mintage O-mint ten is estimated to have only 250 to 300 survivors in all grades. The surfaces are deep, even orange-gold and show just the faintest outline of luster around the devices. Minimally marked. NGC ID# 265U, PCGS# 8689

#### 1880-O Liberty Ten, AU50 Variety 2, Low Mintmark

4283 1880-O AU50 NGC. Variety 2. Only about 15% of surviving 1880-O eagles are from the second reverse die with the low mintmark placed almost entirely below the feather tip. The difference between the two mintmark positions is subtle. This important piece that survives from a mintage of 9,200 coins features light yellow surfaces that host trivial marks. NGC ID# 265U, PCGS# 8689

4284 1882-O AU53 PCGS. Variety 1. Some light wear shows on the high points of the well-detailed design elements of this attractive AU53 specimen, and the lustrous orange-gold surfaces show the expected number of minor abrasions for the grade. From a small mintage of 10,820 pieces. Population: 18 in 53, 65 finer (11/19). NGC ID# 55GJ, PCGS# 8697

#### 1883-CC Ten Dollar, AU53 About 300 Coins Survive

4285 1883-CC AU53 NGC. Variety 3-D. The closely spaced mintmark features the second C below the tip of the fletching. Carson City Mint officials managed a production of 12,000 eagles in 1883, of which perhaps 300 coins survive (mostly in AU grades). This reddish-gold ten maintains good detail and a trace of semiprooflikeness in the fields, which are lightly hairlined. Only Liberty's curls are overtly soft. NGC ID# 2667, PCGS# 8700

#### 1884-CC Ten Dollar, AU55 Sharp for the Grade, Lustrous

4286 1884-CC AU55 NGC. Variety 1-A. The 1884-CC Liberty eagle comes from a limited mintage of 9,925 pieces. Circulated examples are scarce in the AU range, and Mint State coins are rarely offered in any grade. This Choice AU piece displays a sharp strike and partially lustrous honey-gold surfaces. A few reed marks on the obverse accompany a brush of friction over the devices. Census: 43 in 55 (1 in 55+★), 36 finer (10/19). NGC ID# 266B, PCGS# 8704

## 1886-S Liberty Eagle, MS64+ Frosty Original Luster

4287 1886-S MS64+ PCGS. This San Francisco issue is available in lower grades, but Choice coins are scarce, and finer pieces are prohibitively rare. This Plus-graded coin displays frosty orange-gold mint luster and a bold strike. Only a few tiny ticks on the obverse prevent full Gem classification. Population: 48 in 64 (8 in 64+), 4 finer (11/19). NGC ID# 554Y, PCGS# 8709

4288 1891-CC MS60 NGC. Variety 1-A. There are at least five die varieties identified for the 1891-CC eagles, and possibly more given the 103,732-coin mintage. The 1891-CC is considered a common date among Carson City eagles and is a great choice for Nevada Mint type collectors. This piece features a sharp strike with faint pink overtones on its lustrous yellow-gold surfaces. NGC ID# 266U, PCGS# 8720

4289 1891-CC MS62 PCGS. A lustrous butter-gold Carson City ten with occasional accents of plum-mauve patina. Sharply struck and attractive for the grade, though small marks are evident when examined beneath a loupe. The 1891 and 1891-CC have similar mintages but the latter issue is more available in Uncirculated grades. NGC ID# 266U, PCGS# 8720

4290 1891-CC/CC FS-501, MS62 NGC. Variety 4-C. This attractive MS62 example displays sharply detailed design elements, with a repunched mintmark, a spike under the jaw, and a die crack through stars 1 through 5 that identifies the popular Cherrypickers variety. The yellow-gold surfaces are lustrous and lightly marked for the grade. Census: 17 in 62 (1 in 62+, 1 in 62★), 8 finer (10/19). NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

# 1891-CC/CC Eagle, MS62+FS-501, Repunched Mintmark

- 4291 1891-CC/CC FS-501 MS62+ NGC. Variety 4-C. The spike under Liberty's chin and repunching on the second C in the mintmark confirm the attribution. Mint luster is vibrant for the grade, but fine hairlines prevent a Select assessment. This strongly struck yellow-gold eagle would make a terrific addition to a specialized Carson City or Cherrypickers' Guide set. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720
- 4292 1892-O MS62 PCGS. Variety 1. The only dies known for the 28,688 Liberty eagles struck at New Orleans in 1892. This piece has brilliant straw-gold luster with scattered, grade-consistent marks. PCGS has only certified eight finer examples of this condition rarity (11/19). NGC ID# 266X, PCGS# 8723
- 4293 1892-O MS62 PCGS. Variety 1. The only known die pair. The 1892-O is an important condition rarity in the Liberty eagle series that had a mintage of just 28,688 coins. PCGS has certified 182 submissions at this grade, including five Plus-designated pieces, but only eight numerically finer examples. This splendid representative of that coinage has brilliant, satiny lemon-yellow luster and scattered, grade-consistent marks with a line of copper toning on the obverse. NGC ID# 266X, PCGS# 8723
- 4294 1892-S MS63 PCGS. This low-mintage issue, with a production of only 115,500 coins, is also a low-population issue. Scattered marks appear in the yellow-gold surfaces of this lustrous, Select Mint State example. Population: 82 in 63 (5 in 63+), 4 finer (11/19). NGC ID# 266Y, PCGS# 8724
- 4295 1893-O MS60 Prooflike PCGS. Variety 1. The only known dies. Although both sides have myriad surface marks, the fields are fully mirrored on this example that is the only PCGS certified Prooflike example of the 1893-O eagle (11/19). While a few more will certainly be certified as PCGS only recently began identifying such pieces, it is rare than any coin can be documented as the first of its kind to earn a grade. NGC ID# 2673, PCGS# 78727

# 1897-S Ten Dollar, MS63 Only Three Finer Examples at NGC

4296 1897-S MS63 NGC. The population of 1897-S ten dollar gold pieces thins out dramatically in Select Uncirculated condition. Just one other example is certified at that level at NGC, with two more in MS64 and one in MS65 (11/19). Lustrous honey-gold surfaces exhibit light, undistracting chatter. A touch of softness occurs over the high points, but design detail is generally crisp. NGC ID# 267F, PCGS# 8739

## 1899 Ten Dollar, MS65+ Scarce in This Grade, Rare Finer

4297 1899 MS65+ PCGS. CAC. This spectacular Gem exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces are lustrous and appealing. Gem 1899 tens are scarce, and fewer than three dozen finer pieces are reported, including possible resubmissions at the grading services. Population: 70 in 65 (11 in 65+), 10 finer. CAC: 17 in 65, 5 finer (10/19). Ex: Dallas Signature (Heritage, 11/2017), lot 17924. NGC ID# 267J, PCGS# 8742

## 1901-O Ten Dollar, MS63 Pleasing New Orleans Representative

4298 1901-O MS63 PCGS. Variety 1. This die marriage features the second 1 in the date centered directly over a dentil, and the O mintmark is spaced fairly evenly between the claw and fletching. Satiny mint luster and good definition contribute to the appeal of this Select New Orleans eagle. There are a few hairlines and a set of reeding marks below the beak that contribute to the grade. NGC ID# 267R, PCGS# 8748

## 1901-S Liberty Eagle, MS66+ Attractive Type Coin

4299 1901-S MS66+ NGC. The 1901-S is a popular type coin issue, moderately available in grades as high as MS66. Beyond this level the issue becomes conditionally rare, prompting increased collector demand. This example is Plus-graded, showing a bold strike and vibrant honey-gold mint luster. Neither side exhibits bothersome abrasions. NGC has seen 23 finer representatives (10/19). NGC ID# 267S, PCGS# 8749

#### **INDIAN EAGLES**

4300 1907 No Motto MS64 PCGS. CAC. An attractive Choice representative from the first year of the short-lived No Motto design, this coin offers well-detailed design elements and well-preserved orange-gold surfaces with especially vibrant mint luster. Eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

## 1907 No Motto Ten, MS65 Population Tapers Off at This Level

4301 1907 No Motto MS65 NGC. The certified population for the 1907 No Motto ten dollar really tapers off in MS65. Many of these first-year coins were saved in high grades, explaining the issue's general availability through MS64. This Gem is finely textured and lustrous, showing rich orange-gold color and a bold strike. Two ticks appear on the lower part of the neck. NGC ID# 28GF, PCGS# 8852

#### 1908-D Ten Dollar, MS63 Better No Motto Date

4302 1908-D No Motto MS63 PCGS. Sharp definition of the devices complements satiny yellow-gold mint luster on this Select 1908-D No Motto Indian eagle. Only a few stray marks and hairlines prevent a finer grade, as neither side shows heavy abrasions. This issue is occasionally available in MS63, but finer coins are scarce. From The Lithuania Collection, Part II. NGC ID# 28GH, PCGS# 8854

#### 1914-D Ten Dollar, MS64 Rich Original Color

4303 1914-D MS64 PCGS. Scattered light abrasions may preclude Gem classification, but this richly toned Choice 1914-D Indian eagle offers exceptional visual appeal for the grade. Eye-catching orange-gold, peach, and rose hues adorn each side, complementing sharply struck design elements. The 1914-D is only moderately elusive in this grade, but PCGS has seen just 52 numerically finer submissions (11/19). NGC ID# 28H3, PCGS# 8876

## 1915 Indian Eagle, MS65 Conditionally Rare in Finer Grades

4304 1915 MS65 PCGS. The 1915 Indian eagle claims a mintage of 351,000 pieces and the issue is not difficult to locate in grades up to the MS64 level, but attractive Gems, like the present coin, are scarce. This delightful piece offers well-preserved orange-gold surfaces, with vibrant mint luster and sharply detailed design elements. Population: 79 in 65 (8 in 65+), 15 finer (10/19). Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4059; Long Beach Signature (Heritage, 6/2015), lot 4320.

From The Lithuania Collection, Part II. NGC ID# 28H5, PCGS# 8878

#### 1915-S Ten Dollar, AU58 Lustrous and Sharp

4305 1915-S AU58 NGC. A better date, boasting a mintage of only 59,000 coins, the 1915-S Indian eagle is scarce in Mint State. Highend AU coins are popular with collectors, and some pieces — such as the present — are just about as lustrous as Uncirculated coins. This piece is sharply detailed with right orange-gold color. Barely a brush of friction over the high points of the devices prevents a Mint State designation. NGC ID# 28H6, PCGS# 8879

4306 1916-S MS62 PCGS. This impressive MS62 specimen exhibits well-detailed design elements, with just a touch of softness on Liberty's curls and the eagle's shoulder. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 28H7, PCGS# 8880

## 1926 Eagle, MS65+ Smooth Fields

4307 1926 MS65+ PCGS. The 1926 represents an ideal issue for type representation, claiming a mintage in excess of 1 million coins. Only in Premium Gem condition does the date become scarce. This Plus-graded Gem clearly approaches that level. The obverse fields are essentially mark free. In fact, grade limiting ticks are seemingly confined to a few flecks on Liberty's cheek. Strongly struck with beautiful orange-gold surfaces and an alloy spot below the bust. NGC ID# 28H9, PCGS# 8882

4308 1932 MS65 PCGS. A stunning example of the final collectible Indian eagle, and the only easily collectible U.S. gold coin issued in the 1930s. This lovely Gem has pristine, frosty yellow-gold luster and excellent eye appeal. A wonderful type candidate. NGC ID# 28HB, PCGS# 8884

#### LIBERTY DOUBLE EAGLES

1851 Double Eagle, AU58 Ideal Type One Representative

- 4309 1851 AU58 PCGS. Attractive khaki-gold surfaces feature fully defined radials on the stars, bold hair curls, and crisp feather detail. Minimal high-point rub is virtually invisible without the aid of a lens, and scattered abrasions are of little importance. This offering presents a prime opportunity to acquire a partly lustrous and nearly Uncirculated Type One representative from the denomination's second year of issue. NGC records only 83 examples certified higher (9/19). NGC ID# 268H, PCGS# 8904
- 4310 1851-O Cleaned NGC Details. AU. Variety 1. This lightly worn Type One double eagle exhibits AU sharpness on the design elements and the pleasing orange-gold surfaces are lightly abraded. An unnatural sheen indicates a light cleaning at some point in the past, but traces of prooflike reflectivity cling to sheltered areas around the devices.

## 1852 Liberty Double Eagle, MS61 Popular Type One Issue

4311 1852 MS61 PCGS. From a robust mintage of more than 2 million pieces, the 1852 Liberty double eagle is an available issue in circulated grades, but Mint State examples are elusive. This impressive MS61 specimen exhibits well-detailed design elements, with just a touch of softness on Liberty's hair and the tiara. The still-lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 62 in 61, 55 finer (11/19). NGC ID# 268K, PCGS# 8906

## 1855-S Double Eagle, AU58 Second Year of S-Mint Production

4312 1855-S AU58 NGC. Medium S mintmark. Although several hundred 1855-S double eagles were pulled from the deep during salvage operations for the S.S. Central America and S.S. Republic, this Type One branch mint issue remains scarce in Choice About Uncirculated and finer grades. The near-Mint fields and devices of this example display rich, orange-gold color and only minor abrasions. Bold mint luster remains on both sides of the sharply defined surfaces. NGC reports just 32 finer examples (10/19). NGC ID# 268X, PCGS# 8916

# 1857-S Double Eagle With Pinch, AU58 S.S. Central America Recovery

4313 1857-S Bold S, S.S. Central America With Pinch, Bob Evans Signature, Variety 20-B, AU58 PCGS. Substantial luster engulfs this near-Mint Central America recovery coin, yielding bright yellow-gold surfaces and bold detail. Scattered light abrasions are not out of line for the grade. Housed in a double PCGS holder with a pinch of California gold dust, also recovered from the sunken treasure ship. Includes the Ship of Gold brown presentation box and a copy of Tommy Thompson's book America's Lost Treasure. PCGS# 670715 Base PCGS# 670830

## 1858 Twenty Dollar, AU58 Scarce P-Mint From the 1850s

4314 1858 AU58 NGC. The 1858 has the second-lowest mintage for a P-mint from the 1850s. It is especially scarce in high grades. This near-Mint example is the finest most collectors will have the opportunity to buy. The surfaces are bright from slight handling in commerce, but the devices are outlined with rich reddish patina, a strong indication of an original, untampered coin. Moderately abraded. NGC ID# 2697, PCGS# 8923

#### 1861-S Double Eagle, AU53 Collectible No Motto Issue

- 4315 1861-S AU53 NGC. Medium S. Bright remaining mint luster glows around devices that show minimal high-point rub. Yellow-gold surfaces exhibit faint hairlines scattered across each side, but there are few deep abrasions. The 1861-S is a collectible No Motto double eagle issue with a mintage of 768,000 coins. NGC ID# 269K, PCGS# 8935
- 4316 1862-S AU53 PCGS. CAC. Original peach-gold and orange luster remains in the protected areas of this About Uncirculated 1862-S twenty, complementing natural olive-gold patina where surface contact is present. This coin is well-detailed and only lightly marked. Eye appeal exceeds expectations for the grade, hence the CAC green sticker. CAC: 20 in 53, 57 finer (10/19). NGC ID# 269N, PCGS# 8938

## 1862-S Twenty Dollar, AU58 Almost Complete Mint Luster Remains

4317 1862-S AU58 PCGS. Medium S. The number of 1862-S twenties was greatly increased by the recovery efforts of the shipwrecks S.S. Republic and S.S. Brother Jonathan. However, relatively few Uncirculated coins were recovered, which underscores the importance and collectibility of this AU58, which just at the threshold of mint condition. Almost complete mint luster remains on each side and the surfaces display even orange-gold color. Sharply detailed and minimally abraded. NGC ID# 269N, PCGS#

#### 1863-S Liberty Head Twenty, AU58 Lustrous No Motto S-Mint Coin

4318 1863-S AU58 PCGS. Substantial mint luster illuminates the fields and design recesses of this near-Mint 1863-S double eagle, illuminating warm peach-gold coloration. Deeper olive-gold hues appear where trivial wear is present on the high points of the devices. A few scattered abrasions are minimal for the grade. This No Motto San Francisco issue is scarce any finer than the present coin. NGC ID# 269R, PCGS# 8940

#### 1863-S Double Eagle, AU58 Seldom Offered Finer

4319 1863-S AU58 NGC. Moderate luster remains in the fields, complementing the boldly detailed design elements. Scattered abrasions accompany a brush of high-point wear on each side, although the bronze-gold surfaces remain visually pleasing for this Type One San Francisco issue. Higher-grade pieces are scarce. NGC ID# 269R, PCGS# 8940

## 1864 Twenty Dollar, AU Details Elusive in High Grade

4320 1864 — Cleaning — PCGS Genuine. AU Details. A partially lustrous example with rich honey-gold coloration and bold detail. Scattered light abrasions are not bothersome, and faint hairlines that prevent a numeric grade from PCGS are not obvious to the unaided eye. The 1864 is a better date in AU condition, seldom offered this fine compared to many other No Motto double eagles.

# 1865 Liberty Twenty, AU53 Final P-Mint Type One Issue

4321 1865 AU53 PCGS. Sharply struck with a minimum of actual wear, this 1865 double eagle only slight signs of brief circulation, with mint grime on the high points and the accompanying scattered field chatter. Much luster remains on each side over attractive, rich-gold surfaces. Most AU or finer examples come from the S.S. Republic shipwreck, although this naturally patinated twenty does not have the "look" of a seawater coin. More likely, it is a coin that saw domestic circulation or was used for European trade. NGC ID# 269U, PCGS# 8943

#### 1866 Liberty Double Eagle, AU58 First Year With Motto

- 4322 1866 Motto AU58 PCGS. The motto IN GOD WE TRUST was added to the double eagle design in 1866 and the Philadelphia Mint struck a substantial mintage of 698,745 examples of the new Type Two design. However, few examples were saved in Mint State condition, as contemporary collectors preferred to update their collections with proofs every year. This impressive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. Population: 83 in 58 (5 in 58+), 67 finer (10/19). NGC ID# 269X, PCGS# 8949
- 4323 1867 Obverse Scratched NGC Details. Unc. A few light scratches exist from star 4 into the field near Liberty's chin, joining numerous Mint-made die polish lines, plus some light hairlines within the reflective fields. Rich-gold color and a sharp strike provide much eye appeal for this partially prooflike twenty with Uncirculated sharpness.

## 1867-S Double Eagle, AU55 Challenging Issue in High Grade

- 4324 1867-S AU55 NGC. Lustrous orange-gold surfaces yield little wear, although scattered abrasions accompany it on each side. The 1867-S double eagle is decidedly scarce in Mint State, forcing many collectors to pursue high-end AU coins if they are on a budget. This piece is well-defined and displays undeniably original surfaces. NGC ID# 26A2, PCGS# 8952
- 4325 1868-S AU58 PCGS. The 1868-S double eagle is moderately plentiful in AU grades but scarce in Mint State. This piece just misses a Mint State grade due to slight high-point friction, although substantial luster remains in the fields, and the original straw-gold surfaces are uncommonly smooth for the grade. NGC ID# 26A4, PCGS# 8954
- **4326 1869-S AU58 PCGS.** This attractive Type Two double eagle exhibits just a trace of wear on the sharply detailed design elements and the lustrous canary yellow surfaces show some chatter and minor abrasions in the fields. Overall eye appeal is quite strong. NGC ID# 26A6, PCGS# 8956

#### 1870-S Liberty Head Twenty, MS60 Scarce in Uncirculated Condition

- 4327 1870-S MS60 PCGS. This Type Two San Francisco issue is scarce in Mint State, and it is difficult to locate such a coin with good eye appeal. Although graded only MS60, this piece is surprisingly appealing for that grade. Heavy abrasions on each side do not blot out the lustrous, slightly reflective fields, and the design elements are boldly detailed. Each side has bright yellow-gold color. NGC ID# 26A9. PCGS# 8959
- 4328 1872 AU58 NGC. The Type Two design with a Motto and an abbreviated DOLLARS is conditionally scarce, relative to its Type One and Type Three peers. The former were recovered in great quantity from shipwrecks, and the latter were exported in considerable number to foreign bank holdings. This butter-gold representative displays substantial luster and the expected amount of bagmarks, though we mention only a narrow mark on the obverse rim at 6 o'clock. NGC ID# 26AD, PCGS# 8963

#### 1872-S Twenty, Luminous MS61★ Attractive Luster and Color

- 4329 1872-S MS61★ NGC. While a trickle of Uncirculated 1872-S double eagles accompanies European repatriates that continue to arrive from foreign holdings, only about 200 Mint State pieces are confirmed. The vast majority of those coins grade MS60 or MS61. This MS61 example is a notch above the norm by virtue of its NGC Star. Partially prooflike fields accompany glittering, orangegold surfaces that offer excellent eye appeal. Light field chatter peppers the obverse, and visits the reverse to a much lesser extent. There are no heavy marks, and a sharp strike attends both sides. Fewer than three dozen pieces are finer at both services combined. Census: 3 in 61+, 2 in 61★, 15 finer (10/19). NGC ID# 26AF, PCGS# 8965
- 4330 1873 Open 3 MS62 PCGS. A frosty and brilliant yellow-gold example of this popular type issue that exhibits scattered, grade-consistent marks. This grade level is an ideal choice for the Type Two design. For all issues from 1866 to 1876, PCGS has certified just over 4,400 submissions in MS62, and fewer than 700 for MS63 and finer grades. Only six pieces grade MS65 of finer (10/19). NGC ID# 26AL, PCGS# 8967

## 1873 Open 3 Double Eagle, MS63 Lustrous Type Two Example

- 4331 1873 Open 3 MS63 PCGS. Available in this grade, the 1873 Open 3 double eagle is rarely offered finer. The present coin displays a bold strike and frosty orange-gold mint luster. Faint grazes on the obverse limit the grade, but none are individually bothersome, and eye appeal is quite good for the MS63 level. A popular date for type collectors. NGC ID# 26AL, PCGS# 8967
- 4332 1873-S Closed 3 MS61 NGC. A brilliant and eye-appealing Mint State double eagle, this S-Mint Type Two issue has bright lemonyellow surfaces with satiny luster and minimal grade-consistent handling marks. NGC has only certified 54 numerically finer submissions (10/19). NGC ID# 26AL, PCGS# 8969
- 4333 1874 MS61 PCGS. PCGS reports the lion's share of grading events for the 1874 Philadelphia issue, counting just 74 numerically finer examples than the present MS61 coin (10/19). Like most Type Two double eagles, the 1874 is scarce in any Uncirculated grade and rare in high Mint State conditions. This vibrant and frosted coin displays a good strike with rich-gold color. The expected obverse chatter exists, but no heavy marks distract the eye. Unbroken cartwheel luster sweeps across both sides. NGC ID# 26AN, PCGS# 8970
- 4334 1874-CC Cleaned NGC Details. XF. Variety 2-A. There is a small die chip on Liberty's temple, just left of the hair. The CC mintmark is widely spaced over the right serif of the N. This collectible Nevada mint twenty dollar gold piece is unnaturally bright with muted surfaces from cleaning, but the coin maintains XF definition. NGC ID# 26AP, PCGS# 8971
- 4335 1874-CC Altered Surfaces PCGS Genuine. XF Details. Variety 1-A. Deep, greenish-gold surfaces are lightly smoothed to minimize surface granularity and abrasions, visible under magnification. Considerable eye appeal remains throughout the well-defined fields and devices, which retain XF sharpness. The 1874-CC is readily available in a range of grades despite its Old West origins. This is an ideal Carson City representative for the budget-conscious collector.
- 4336 1874-S MS61 NGC. An impressive Mint State specimen of this popular Type Two issue, with well-detailed design elements that show a touch of the usual softness on the tiara and some star centers. The lustrous yellow and rose-gold surfaces exhibit the expected number of minor contact marks for the grade. NGC ID# 26AR, PCGS# 8972
- 4337 1874-S MS61 PCGS. This attractive Mint State piece has an average strike with minimal surface marks on either side. The surfaces have brilliant yellow luster. Prominent peripheral die cracks are evident on the reverse, offering another option when tracking die varieties. NGC ID# 26AR, PCGS# 8972

## 1875 Type Two Twenty, MS62+ Excellent Quality for the Grade, CAC

- 4338 1875 MS62+ PCGS. CAC. Oddly, double eagle production was substantial in 1875 at 285,740 pieces, when only token mintages were struck of all other gold denominations. Collectors are quick to pick up on the fact, and 1875 twenties are extra popular for that reason. The issue is scarce when finer than MS62, making this Plus-graded and CAC-endorsed example even more desirable. Frosted orange-gold surfaces show a sharp strike and only minor marks, while eye appeal is far above average. Population: 25 in 62+, 93 finer. CAC: 47 in 62, 10 finer (9/19). NGC ID# 2547, PCGS# 8973
- 4339 1875-S MS62 PCGS. The Block S mintmark is positioned over and slight right of the upper right serif of the N in TWENTY on this example. This attractive Mint State piece has brilliant yellow surfaces and frosty mint luster. PCGS has only certified 29 numerically finer submissions (10/19). NGC ID# 26AU, PCGS# 8975
- 4340 1876 MS61★ NGC. Vibrant, rich-gold color and attractive mirroring exist throughout the fields, and those qualities are suitably rewarded with the important NGC Star. Scattered light abrasions apparently preclude a Prooflike designation, although the field chatter seems comparatively minor for the MS61 grade, confined mostly to the lower-left obverse. The strike is sharp and eye appeal is especially strong for the assigned grade. NGC ID# 26AV, PCGS# 8976
- 4341 1876 MS61 NGC. CAC. Light Motto variant, as most easily seen by the two longer rays at the left side of the glory of rays above the eagle. This die was used only briefly in 1876. The surfaces are bright and lustrous, but show the normally expected abrasions seen on most 1876 twenties. Still, an upper-end example of an MS61 with no hint of friction. NGC ID# 26AV, PCGS# 8976

## 1876-CC Double Eagle, Attractive AU50 Type Two Nevada Issue

4342 1876-CC AU50 PCGS. Variety 2-C. Ex: Rainy Day Collection. The 1876-CC twenty is always in demand by Carson City and gold specialists alike, despite numerous repatriated coins that returned from Central and South America over the past few decades. This exceptionally attractive, About Uncirculated example may have never left collector hands, with briefly circulated, original brassygold color and faint orange accents over reflective, minimally marked surfaces. Eye appeal is strong. NGC ID# 26AW, PCGS# 8977

#### 1876-CC Double Eagle, AU50 Lustrous Original Surfaces

4343 1876-CC AU50 NGC. Variety 7-C. The mintmark is closely spaced on this variety and close to the eagle's tailfeathers. On the obverse, a small die lump in Liberty's hair above the R in LIBERTY confirms the attribution. The 1876-CC double eagle is popular as a type coin. This About Uncirculated piece is lustrous and well-detailed, with light wear and only minor surface abrasions. NGC ID# 26AW, PCGS# 8977

## 1876-CC Liberty Twenty, AU55 Lustrous Carson City Type Coin

- 4344 1876-CC AU55 PCGS. Variety 3-A. Date and mintmark placement are the chief diagnostics of this variety. The 1876-CC is a plentiful Carson City double eagle, ideal for collectors seeking a single high-grade coin for their cabinets. This piece is mostly lustrous with only light friction over the high points of the devices. Scattered abrasions are as expected, but none individually stand out. NGC ID# 26AW, PCGS# 8977
- 4345 1876-S MS62 NGC. Mis-placed Mintmark. A variety guide to Liberty double eagles from the San Francisco Mint is a project waiting for an author. A good start would be this 1876-S double eagle that has the S mintmark centered over the left upright of the second T in TWENTY, far right of the usual location over the right side of the N. A quick review of the 30 most recent Heritage auction appearances of 1876-S double eagles revealed at least 10 different mintmark positions, including one where the S mintmark is over the right arm of the T. Frosty and lustrous reddish-gold surfaces exhibit dark patina on the high points. NGC ID# 26AX, PCGS# 8978
- 4346 1877-CC Cleaned NGC Details. AU. Variety 2-C. The mintmark letters are roughly even in height, and the first 7 in the date is centered over a dentil. Carson City double eagle output fell to 42,565 coins in 1877. This lightly circulated reddish-gold example displays crisp definition and traces of luster around the devices. Hairlines from cleaning appear throughout. NGC ID# 26AZ, PCGS# 8983
- 4347 1878 AU55 Prooflike NGC. The 1878 Liberty double eagle claims a mintage of 543,645 pieces, but examples with prooflike surfaces are seldom encountered. This Choice AU specimen offers lightly worn design elements and the yellow-gold surfaces show myriad minor abrasions and chatter in the deeply reflective prooflike fields. Census: 1 in 55 Prooflike, 13 finer (10/19). NGC ID# 26B3, PCGS# 78985

## 1879-S Twenty Dollar, MS61 Scarce Type Three Issue in Mint State

4348 1879-S MS61 PCGS. Despite a large mintage (more than 1.2 million pieces) and numerous repatriations from foreign holdings, the 1879-S is scarce in all Mint State grades, and rare in MS63 or finer conditions. This MS61 example shows the expected number of bagmarks and a few copper alloy spots along the rims. Full mint luster radiates from both sides across the frosted, medium-gold surfaces. NGC ID# 26B9, PCGS# 8991

## 1879-S Twenty Dollar, Lustrous MS61 Green CAC Approval Sticker

4349 1879-S MS61 PCGS. CAC. Small S. Peach-gold with rose and green accents. This 1879-S double eagle showcases strong strike detail with a minimal number of bagmarks for the grade. The issue's availability declines dramatically in higher grades, and examples are seldom offered this fine with CAC approval. CAC: 16 in 61, 10 finer (10/19). NGC ID# 26B9, PCGS# 8991

## 1882-CC Double Eagle, AU55 Variety 1-B

- 4350 1882-CC AU55 PCGS. Variety 1-B. Three die pairs are identified for the 1882-CC double eagles and Variety 1-B is the most plentiful of those marriages. About 70% of 1882-CC double eagles appearing in our Permanent Auction Archives are from this die pair. This Choice AU twenty has clear surfaces and nearly full light yellow-gold luster. NGC ID# 26BF, PCGS# 8997
- 4351 1882-S MS61 PCGS. An attractive Mint State example of this popular Type Three issue, with well-detailed design elements that show just a trace of softness on the tiara and lustrous orange-gold surfaces that are lightly marked for the grade. NGC ID# 26BG, PCGS# 8998

- 4352 1882-S MS62 PCGS. The lustrous peach-gold surfaces of this attractive MS62 specimen exhibit only minor signs of contact and the design elements are well-detailed, with just a trace of softness on Liberty's curls. PCGS has graded 58 numerically finer examples (10/19). NGC ID# 26BG, PCGS# 8998
- 4353 1882-S MS62 PCGS. The pleasing yellow and rose-gold surfaces of this attractive MS62 example radiate vibrant mint luster and show only minor signs of contact. The design elements are sharply detailed, aside from a touch of softness on star 13. PCGS has graded 58 numerically finer examples (10/19). NGC ID# 26BG, PCGS# 8998

## 1883-CC Double Eagle, AU55 Variety 2-A

- 4354 1883-CC AU55 PCGS. Variety 2-A. Nearly full luster appears on the satiny surfaces of this brilliant light yellow-gold double eagle. Variety 2-A is the usually encountered variety for the 1883-CC double eagles, representing nearly 90% of attributed pieces in our Permanent Auction Archives. NGC ID# 26BH, PCGS# 8999
- 4355 1883-S MS62 PCGS. The pleasing orange-gold surfaces of this impressive MS62 specimen show the expected number of minor contact marks for the grade, with sharply detailed design elements and vibrant mint luster throughout. NGC ID# 26BJ, PCGS# 9000
- 4356 1883-S MS62 PCGS. The design elements of this impressive MS62 example are well-detailed, with just a touch of softness on LIBERTY and the prongs of the tiara. The pleasing apricot-gold surfaces radiate vibrant mint luster and are lightly marked for the grade. NGC ID# 26BJ, PCGS# 9000

#### 1883-S Double Eagle, MS63 Rare Any Finer

4357 1883-S MS63 PCGS. Small Squat S mintmark. While the 1883-S has seen its ranks swell over the past few decades, the influx of Select Uncirculated or finer coins is substantially less dramatic than in lower Mint State grades. Handling during transport and bank-to-bank transactions limits the grade of European repatriates, and the 1883-S was carelessly handled during domestic transport and storage as well. This MS63 has relatively few marks on its frosted, orange-gold surfaces. We note a tiny alloy spot above A in DOLLARS, but no heavy marks or untoward abrasions. NGC ID# 26BJ, PCGS# 9000

## 1883-S Double Eagle, MS63 Popular Cherrypickers' Variety

4358 1883-S Misplaced Date, FS-501, MS63 PCGS. Small Squat S mintmark. The curve of a misplaced digit (most likely the top of an 8) peeks out from above the rim, visible low between dentils beneath the second 8 in the date. Thickly frosted, minimally abraded fields surround the sharply struck motifs of this Select Uncirculated Type Three twenty. The rich-gold surfaces radiate cartwheel luster, while isolated bagmarks are minor, visible under a loupe. The lack of surface marks and the misplaced digit make this example a prime target for astute gold specialists. PCGS# 145737 Base PCGS# 9000

## 1884-CC Liberty Twenty, AU55 Popular Branch Mint Type Coin

4359 1884-CC AU55 NGC. Variety 1-A. From a mintage of 81,139 pieces, the 1884-CC Liberty double eagle is an available issue in the context of the series and a popular choice of branch mint type collectors. This attractive Choice AU specimen exhibits only light wear on the design elements and the orange-gold surfaces show the expected number of minor abrasions for the grade, with traces of original mint luster. NGC ID# 26BK, PCGS# 9001

#### 1885-S Double Eagle, Frosty MS63

- 4360 1885-S MS63 PCGS. Mint luster is thickly frosted over each side of this Select Uncirculated San Francisco double eagle. Peachgold surfaces display accents of green and rose color, with minor scattered bagmarks and bold strike definition on the curls and stars. PCGS reports 56 finer submissions (11/19). NGC ID# 26BP, PCGS# 9005
- 4361 1888 MS62 PCGS. This impressive MS62 double eagle exhibits well-detailed design elements and lustrous reddish-gold surfaces that show the expected number of minor contact marks for the grade. PCGS has graded 37 numerically finer examples (10/19). NGC ID# 26BT, PCGS# 9008

- 4362 1888 MS62 PCGS. From a mintage of 226,100 pieces, the 1888 Liberty double eagle is rarely seen in grades above the MS62 level. This attractive MS62 specimen exhibits well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26BT, PCGS# 9008
- 4363 1888 Doubled Die Reverse, FS-801, AU55 PCGS. Doubling is best viewed on the letters of UNITED STATES and TWENTY DOLLARS on this doubled die variety. A Choice AU example, this piece considerable muted yellow-gold luster. Less than 5% of 1888 double eagles that we have handled are from this reverse die. NGC ID# 26BT, PCGS# 145738 Base PCGS# 9008
- 4364 1888-S MS63 PCGS. From a mintage of 859,600 pieces, the 1888-S Liberty double eagle is not too difficult to locate in MS63 condition, but finer coins are scarce. This lightly marked Select example displays sharply detailed design elements and lustrous orange and rose-gold surfaces with outstanding eye appeal. NGC ID# 26BU, PCGS# 9009
- 4365 1889-S MS63 PCGS. The 1889-S Liberty double eagle is a scarce issue in grades above the MS63 level. This attractive Select specimen displays sharply detailed design elements and lustrous peach-gold surfaces that show only minor signs of contact. NGC ID# 26BW, PCGS# 9012
- 4366 1891-S MS63 PCGS. The lightly marked orange-gold surfaces of this attractive Select double eagle show some die striations in the obverse fields, with vibrant mint luster and sharply detailed design elements throughout. Eye appeal is outstanding. NGC ID# 26C4, PCGS# 9018
- 4367 1892 Altered Surfaces PCGS Genuine. XF Details. The slightly granular orange-gold surfaces of this low-mintage Type Three example display an unnatural dull sheen in the open fields, but traces of prooflike reflectivity cling to protected areas around the devices. Only light wear shows on the strongly impressed design elements.

#### 1892-CC Double Eagle, VF35 Old-Time Patina

- 4368 1892-CC VF35 PCGS. Variety 1-A. A collector-grade example of this late Carson City issue, showing natural honey-gold and orange patina over smooth surfaces that retain glimpses of luster in the most protected areas of the fields. Wear is light. The 1892-CC is most often seen in the XF to AU grade range. Lower-level, VF-range collector coins such as the present are scarce. Housed in a green label holder. NGC ID# 26C6, PCGS# 9020
- 4369 1892-CC Cleaned NGC Details. AU. Variety 1-A. Only light wear shows on the highpoints of this Type Three double eagle from the famous Carson City Mint. The orange-gold surfaces are lightly abraded and retain traces of original mint luster, despite the effects of a light cleaning in the past.

## 1893-CC Double Eagle, XF40 Collectible Final-Year CC-Mint Coin

- 4370 1893-CC XF40 PCGS. Variety 2-A. The final-year Carson City issue boasts a mintage of only 18,402 pieces, although repatriated hoards of gold coinage in recent decades have revealed the survival of moderate numbers of coins in various grades to make this popular date collectible. Offered here is a coin that will appeal to collectors who appreciate old-time gold patina. Both sides display deep honey-gold and bronze-orange hues, with hints of luster in the protected areas. Wear is light, and each side is smooth with no bothersome distractions. NGC ID# 26C9, PCGS# 9023
- 4371 1894 MS63 PCGS. This impressive Type Three double eagle exhibits sharply detailed design elements and lightly marked peach-gold surfaces. Vibrant mint luster radiates from both sides and overall eye appeal is outstanding. NGC ID# 26CB, PCGS# 9025

## 1895-S Liberty Twenty Dollar, MS64 Highest Readily Collectible Grade

4372 1895-S MS64 PCGS. Double eagles in the Saddle Ridge Hoard included S-Mint twenties up to and including 1894-S coins, but none of later dates. Accordingly, the 1895-S high-grade populations were unaffected by the hoard (unlike earlier San Francisco Mint issues). The 1895-S is rare in Gem or finer grades, making MS64 coins a solid choice for the money. This Choice Uncirculated example offers rich, frosted luster and pleasing orange-gold color. Only minor marks dot the sharply struck surfaces. PCGS reports 22 pieces in MS64+ and 10 finer examples (10/19). NGC ID# 26CE, PCGS# 9028

## 1895-S Twenty Dollar, MS64 Rare Just One Grade Finer

- 4373 1895-S MS64 PCGS. The 1895-S is sometimes ignored in Choice or finer grades, viewed as a commodity at lower Mint State grades and of unappreciated scarcity at the higher Uncirculated levels. This MS64 example displays a particularly sharp obverse, with only a few tiny marks and a pinpoint-sharp strike that suggest an even finer grade. Frosted medium-gold color provides plentiful eye appeal. The reverse strike is slightly less sharp, lacking full definition at the eagle's beak and highest neck feathers. The right (facing) tailfeathers are weak from die lapping. We note a series of reeding marks above LL of DOLLARS. PCGS has graded only 10 pieces in full Gem condition, and no 1895-S finer than MS65+ (10/19). NGC ID# 26CE, PCGS# 9028
- 4374 1896 MS60 Prooflike PCGS. Sharply struck design elements stand out boldly against the reflective fields, delivering the noted Prooflike contrast. Myriad hairlines and bagmarks contribute to the grade, but the devices are unworn. Population: 1 in 60 Prooflike, 2 finer (9/19). PCGS# 89029 Base PCGS# 9029
- 4375 1896-S MS63 PCGS. Vibrant, frosty mint luster is the outstanding visual characteristic of this attractive Select double eagle, with well-detailed design elements and lightly marked orange-gold surfaces throughout. Eye appeal is outstanding. NGC ID# 26CG, PCGS# 9030
- 4376 1897 MS64 PCGS. The pleasing yellow and rose-gold surfaces of this attractive Choice double eagle exhibit especially radiant mint luster and show only minor signs of contact. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded only nine numerically finer examples (10/19). NGC ID# 26CH, PCGS# 9031
- 4377 1897 MS64 PCGS. The vivid orange-gold surfaces of this spectacular Choice double eagle are well-preserved and lustrous throughout. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded only nine numerically finer examples (10/19). NGC ID# 26CH, PCGS# 9031
- 4378 1897-S MS64 PCGS. Both sides of this attractive Choice example display radiant frosty mint luster and the vivid orange-gold surfaces are well-preserved and appealing. The design elements are sharply detailed throughout. PCGS has certified 17 numerically finer examples (10/19). NGC ID# 26CJ, PCGS# 9032
- 4379 1897-S MS64 PCGS. Collectors seeking an 1897-S double eagle will find an abundance of pieces in MS63 and lower grades, with coins occasionally seen in MS64. Finer pieces are rare PCGS has seen only 17 such submissions (10/19). This near-Gem has satiny yellow-gold cartwheel luster and a sharp strike. Faint grazes on Liberty's cheek are all that deny Gem classification. NGC ID# 26CJ, PCGS# 9032
- 4380 1898 MS63 NGC. The Mint was firing on all cylinders during the last few years of the 19th century, striking doubles eagles of the highest quality. The mintage for the 1898, however, is much lower than any other P-mint issue between 1893 and 1900 with 170,395 pieces struck. This Select twenty dollar coin boasts a full strike and swirling luster over light, even reddish-gold surfaces. A mark on the upper cheek and another above the bust truncation are nondistracting. NGC shows 23 finer submissions (10/19). NGC ID# 26CK, PCGS# 9033

- 4381 1899 MS64 PCGS. Available in MS64, the 1899 double eagle is scarce finer. This piece is lustrous and attractive. Natural peachgold and greenish hues adorn each side, and only a few minor grazes are visible. NGC ID# 26CM, PCGS# 9035
- 4382 1899 MS64+ PCGS. The 1899 Liberty double eagle becomes scarce in grades above the MS64 level. This Plus-graded Choice specimen features sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26CM, PCGS# 9035
- 4383 1899 MS64+ PCGS. Most 1899 double eagles are sharply struck with plentiful frosted mint luster, such as this near-Gem coin. Popular for its last-of-the-1800s date, the 1899 had a mintage of more than 1.6 million pieces, many of which were sent abroad. The high grade of this coin suggests it may have avoided a long period of bank-to-bank transfers in Europe. Lustrous, rich-gold surfaces show only a few light marks. NGC ID# 26CM, PCGS# 9035

## 1899 Double Eagle, MS64+ Rich Sun-Gold Color, CAC-Endorsed

- 4384 1899 MS64+ PCGS. CAC. A profound sun-gold hue blends with glittering mint luster, delivering top-notch visual appeal. This fully struck near-Gem double eagle is undeniably clean for the grade, boasting a Plus designation from PCGS and a green CAC approval sticker. Scarce any finer. NGC ID# 26CM, PCGS# 9035
- 4385 1899 MS64+ NGC. CAC. The final pre-1900 twenty dollar issue sees its certified population nosedive in MS65 condition. PCGS and NGC combined have certified more than 4,100 pieces at the MS64 level, yet the number of full Gem pieces has yet to exceed 200 pieces (10/19). This orange-gold borderline Gem is richly frosted and vibrantly lustrous. Its sharp strike adds validity to the PCGS Plus designation and CAC endorsement. NGC ID# 26CM, PCGS# 9035

#### 1899 Double Eagle, MS62+ Prooflike A Designation Rarity

- 4386 1899 MS62+ Prooflike NGC. The 1899 is typically frosty and lustrous, while examples with the Prooflike designation are rarely encountered. This boldly defined example has scattered, grade-consistent marks in the mirrored fields and on the lightly lustrous devices. Census: 14 in 62 (1 in 62+ Prooflike, 1 in 62★), 3 finer (10/19). PCGS# 779047 Base PCGS# 9035
- 4387 1899-S MS63 PCGS. An impressive Select example of the Type Three design, this coin exhibits vivid orange-gold surfaces, with vibrant mint luster throughout and the expected number of minor contact marks for the grade. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26CN, PCGS#

## 1899-S Twenty Dollar, MS64+ Rare Any Finer

- 4388 1899-S MS64+ PCGS. CAC. Sharply struck on both sides, this high-end near-Gem twenty approaches the conditionally rare (and expensive) MS65 level. With a mintage of more than 2 million pieces, the issue is readily available in lesser grades, but most survivors lack the overall quality of this Choice coin. Smooth, lustrous, and frosty surfaces display greenish-gold color and very few marks. CAC endorsement adds to the appeal. PCGS has seen only four finer coins, including three MS65 and an MS67. Population: 18 in 64+, 4 finer. CAC: 38 in 64, 0 finer (10/19). Ex: Long Beach Signature (Heritage, 9/2016), lot 8871; FUN
  - Ex: Long Beach Signature (Heritage, 9/2016), lot 8871; FUN Signature (Heritage, 1/2017), lot 7210. NGC ID# 26CN, PCGS# 9036
- 4389 1900-S MS63 PCGS. A large mintage of nearly 2.5 million pieces was mainly used for export, and a large number of those coins have returned to collectors as repatriated gold. This is a semiprooflike 1900-S, struck with the "old reverse," with feathers sticking out from the back of the eagle's neck. A two-tone obverse shows vibrant orange centers, surrounded by canary-gold margins. Marks are light for the Select Uncirculated grade, and the strike could hardly be sharper. NGC ID# 26CR, PCGS# 9038
- 4390 1901-S MS63 PCGS. An impressive Select specimen of this turn-of-the-century branch mint issue, with sharply detailed design elements and vibrant mint luster throughout. The vivid yellow-gold surfaces are lightly marked for the grade, with attractive highlights of rose and orange patina. NGC ID# 26CT, PCGS# 9040
- 4391 1903 MS64+ PCGS. A Plus-graded Choice example of this popular Type Three issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is terrific. NGC ID# 26CW, PCGS# 9043

## 1903 Twenty Dollar, MS65 Bright Mint Luster

4392 1903 MS65 NGC. The 1903 is nowhere near as frequently encountered as the 1904, yet it can still be obtained for a type coin price, even in MS65. This is a bright example with the softly frosted mint luster one expects from a Philadelphia coin. The strike details are complete throughout and there are no abrasions that merit mention. NGC ID# 26CW, PCGS# 9043

- 4393 1904 MS65 PCGS. Although a plentiful date in a grade often seen, this Gem 1904 double eagle possesses an attribute that is distinctly rare for any double eagle: rainbow toning. In the right obverse margin and around the entire reverse border, colorful rainbow hues form attractive arcs that are quite spectacular for a gold coin. The interior of each side is deep orange-gold, and the strike is sharp. No major abrasions are seen. The reverse fields are semiprooflike. NGC ID# 26CY, PCGS# 9045
- 4394 1904 MS65 PCGS. A plentiful date in the series, the 1904 Liberty double eagle is popular among type collectors and gold investors. Gem examples are especially important for the former. This piece is well-preserved and satiny, showing well-struck devices and bright straw-gold color. NGC ID# 26CY, PCGS# 9045
- 4395 1904 MS63 Prooflike PCGS. Prooflike 1904 double eagles are occasionally seen, but PCGS has thus far only graded 33 coins with that designation. This example displays bright straw-gold coloration and sharp design elements. Light, unobtrusive abrasions in the fields prohibit a finer grade. Population: 19 in 63 Prooflike, 2 finer (10/19). PCGS# 89045
- 4396 1904 MS63 Prooflike NGC. The 1904 double eagle is the most collectible issue in the Liberty Head series, but Prooflike coins are more difficult to locate. This deeply reflective example has rich orange-gold color and a razor-sharp strike that some might mistake for a proof. Lightly abraded but still above-average. PCGS# 89045

#### 1904 Double Eagle, MS63 Prooflike Vibrant Mirrorlike Fields

4397 1904 MS63 Prooflike PCGS. CAC. Mirrored fields surround lightly frosted and devices of this attractive, Select Uncirculated 1904 twenty. A high-mintage double eagle (more than 6 million pieces struck), the 1904 is the most common date of the series, yet it is scarce with fully prooflike fields, and seldom certified as such. This orange-gold piece displays both the Prooflike designation and CAC endorsement. Only light abrasions exist on the mirrored fields, while the strike is razor-sharp. Population: 19 in 63 Prooflike, 2 finer (10/19). PCGS# 89045

## 1905 Double Eagle, MS62 Low-Mintage 20th Century Issue

4398 1905 MS62 PCGS. More than 11 million double eagles were struck in 1904 at the Philadelphia and San Francisco mints combined — plenty to last for a while. The 1905 Philadelphia mintage was just 58,919 twenties. Scarce by mintage as well as demand, the 1905 is on many Type Three want lists. This frosted, lightly abraded MS62 will fit nicely in most sets. It is a grade or so finer than European repatriates that make up the majority of Mint State survivors. The coin displays sharply struck honey-gold surfaces with bold cartwheel luster throughout both sides. NGC ID# 26D2, PCGS# 9047

#### 1906 Twenty Dollar, MS63 Above-Average for the Issue

4399 1906 MS63 PCGS. The 1906 double eagle is only slightly more available than the other late-series Liberty Head scarcities (the 1902 and 1905 issues). Just 69,556 pieces were struck. This Select Uncirculated example is thickly frosted and thoroughly lustrous. Sparkling orange-gold fields show minimal marks for the grade, flanked by sharply defined motifs. PCGS reports just 47 pieces in finer grades (10/19). NGC ID# 26D4, PCGS# 9049

## 1906-S Twenty Dollar, MS64 Rare Any Finer

4400 1906-S MS64 NGC. The San Francisco Mint did the heavy lifting for 1906 double eagle production, easily outdistancing the Philadelphia and Denver mint totals combined. Just over 2 million 1906-S twenties were struck. Even so, Gem examples are rare and near-Gems are scarce. This attractive orange-gold example offers smoothly frosted, nearly unabraded surfaces and plentiful eye appeal. A sharp strike confirms its high technical quality for an MS64. NGC and PCGS combined report just a dozen coins certified MS65 or finer (10/19). NGC ID# 26F6, PCGS# 9051

4401 1907 Liberty MS64+ NGC. CAC. A popular type coin, representing the final year of the Liberty Head type. In Choice condition, the 1907 Liberty double eagle is plentiful, but Plusgraded coins are elusive. NGC has seen only 28 finer submissions (10/19). Moreover, a small fraction of the MS64 population carries CAC endorsement, which sets the present coin apart from its peers. Frosty yellow-gold luster complements bold design elements, and the surfaces are remarkably well-preserved. NGC ID# 26D7, PCGS# 9052

#### SAINT-GAUDENS DOUBLE EAGLES

- 4402 1907 MS64 PCGS. An attractive Choice Saint-Gaudens double eagle from the first year of the design, this coin offers well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. NGC ID# 26F5, PCGS# 9141
- 4403 1907 MS64 PCGS. Wisps of golden luster roll around the margins of this Choice Arabic numerals type coin. A few abrasions hardly detract, and bold devices are enjoyed by the viewer. NGC ID# 26F5. PCGS# 9141
- 4404 1907 MS64+ PCGS. An attractive, high-end near-Gem example of this first-year Saint, showing bright wheat-gold luster around the margins with swirling peach-orange hues in the centers. A well-struck piece, devoid of severe abrasions. NGC ID# 26F5, PCGS# 9141

# 1907 Saint-Gaudens Double Eagle, MS65 First Year of the Low-Relief Twenties

4405 1907 MS65 PCGS. Charles Barber's design changes lacked artistic merit but deserve credit for making the Saint-Gaudens double eagle viable for mass production. The change from Roman numerals to regular digits in the date is obvious, but of lesser importance than the substantially lower relief and other not-so-subtle changes to the epic design. Gem examples of the new format are readily available to collectors, and provide some of the most attractive pieces among all of the low-relief dates and mints. Frosted orange-gold color with radiant mint luster adorns this Gem, which is sharply struck and free of all but the tiniest of marks. NGC ID# 26F5, PCGS# 9141

#### 1908-D Double Eagle, Sharp MS65 Seldom Seen in Finer Grades

4406 1908-D No Motto MS65 PCGS. Long Rays Obverse. The bold luster, sharp strike, and overall excellent preservation are all characteristic of this nicely produced issue. Only the most minor abrasions appear on either side. Beautiful orange-gold color and blatant eye appeal make this a keeper example of this issue. PCGS reports only 15 finer pieces (10/19).

Ex: Long Beach Signature (Heritage, 6/2015), lot 4380.

From The Lithuania Collection, Part II. NGC ID# 26F7, PCGS# 9143

## 1908 Motto Double Eagle, MS64 IN GOD WE TRUST Reinstated

4407 1908 Motto MS64 PCGS. After IN GOD WE TRUST was omitted from the Saint-Gaudens double eagle in 1907 at the direction of President Roosevelt, who felt it was sacrilegious to have such a phrase on a monetary token, Congress reinstated the motto with legislation in 1908. The 1908 With Motto double eagle is scarce finer than MS64. This collectible example displays bold detail and softly frosted yellow-gold luster. Only light, unobtrusive abrasions are visible. NGC ID# BNAK, PCGS# 9147

#### 1909 Twenty Dollar, MS64 Seldom Offered in Finer Grades

4408 1909 MS64 PCGS. Rich honey-gold coloration adorns this satiny near-Gem 1909 Saint-Gaudens double eagle. The devices are well-struck, and neither side has severe abrasions. The 1909 boasts a minimal mintage of little more than 161,000 pieces. Examples are elusive but occasionally seen in MS64, while finer pieces are rare. PCGS has seen 30 submissions in higher grades than the present coin (10/19).

From The Lithuania Collection, Part II. NGC ID# 26FC, PCGS# 9150

## 1909-S Double Eagle, MS65 Rarely Available Finer

4409 1909-S MS65 PCGS. A lustrous, beautifully preserved honeygold and peach-orange 1909-S Gem, showing well-defined motifs and vibrant, satiny cartwheel luster. The quality of the Gem grade level is readily apparent on both sides. The 1909-S is occasionally available in this grade, but PCGS has seen only 22 finer submissions (10/19).

From The Lithuania Collection, Part II. NGC ID# 26FE, PCGS# 0153

- 4410 1910-S MS64 PCGS. Exceptionally bright yellow-gold luster engulfs bold devices on each side of this near-Gem. A lone mark in the left obverse field is all that detracts from the eye appeal. Finer pieces are scarce. NGC ID# 26FH, PCGS# 9156
- 4411 1910-S MS64 PCGS. Luster on this piece is frosty with rich wheat-gold and straw hues. The devices are well-struck, and only light surface grazes prevent a Gem grade from PCGS. An appealing 1910-S double eagle. NGC ID# 26FH, PCGS# 9156
- **4412 1910-S MS64 PCGS.** Radiant cartwheel luster reveals bright yellow-gold hues on this near-Gem. The is well-struck and minimally marked with good eye appeal. Finer 1910-S double eagles are elusive. NGC ID# 26FH, PCGS# 9156

#### 1910-S Double Eagle, MS65 Few Finer Pieces Are Known

4413 1910-S MS65 PCGS. This straw-gold Gem glistens beneath a light. Softly frosted luster complements the well-rendered design elements, and the surfaces are especially clean for the grade. The 1910-S double eagle is sought-after in MS65, and it is elusive this fine. In higher grades, the issue is decidedly rare. PCGS has seen only 13 finer representatives (10/19).

From The Lithuania Collection, Part II. NGC ID# 26FH, PCGS# 9156

- 4414 1911-D MS65 PCGS. Although the 1911-D double eagle is moderately plentiful in MS65, few such coins are as attractive as the present. Luminous wheat-gold luster shows remarkably few abrasions, and devices are boldly rendered. Quality for the grade is outstanding. NGC ID# 26FK, PCGS# 9158
- 4415 1911-D MS65 PCGS. Liberty's fingers and the top of the torch are boldly defined on this Gem 1911-D double eagle, complementing a sharp strike elsewhere. Luster is satiny and vibrant, yielding rich peach-gold and greenish hues. A few small ticks on Liberty's figure deny a finer grade. NGC ID# 26FK, PCGS# 9158

## 1911-D Twenty Dollar, MS66 Nearly Mark-Free, Frosted Surfaces

- 4416 1911-D MS66 NGC. Thickly frosted across finely grained surfaces, this sharply struck 1911-D represents the final readily available grade level for the Denver issue, which becomes scarce any finer. Deep and rich straw-gold color allows faint reddish highlights to shine through, softly illuminated by underlying mint luster. The strike is pinpoint sharp, while the unabraded Premium Gem fields and devices offer tremendous eye appeal. NGC ID# 26FK, PCGS# 9158
- 4417 1911-D/D FS-501 MS65 PCGS. The mintmark is boldly repunched to the west, meaning the initial punch was east of the final location. This piece has frosty light yellow-gold luster with trivial marks and sharp design definition. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158
- 4418 1911-D/D FS-501 MS65 PCGS. This Cherrypickers' Guide variety has the mintmark initially punched to the east of the final position. This boldly detailed example has fully lustrous orange-gold surfaces with a few grade-limiting marks. PCGS has examined just 56 numerically finer examples (11/19). NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

#### 1911-D/D Twenty Dollar, MS66 FS-501, HA-3

4419 1911-D/D FS-501 MS66 NGC. Dozens of minor date and mintmark variants exist in the Saint-Gaudens twenty dollar series — most of which were newly discovered by Roger Burdette in the Heritage-published reference Saint-Gaudens Double Eagles. The 1911-D/D was discovered by Walter Breen in the 1950s, and it is so obvious one has to wonder why it wasn't discovered before. The FS-501 equivalent in the Burdette reference is HA-3: "Large D is repunched left of the original position by about 25% of its width. A tiny part of the original mintmark's upper serif is visible above the stronger D." This is a bright, radiantly lustrous example that shows even reddish-gold color and minimal abrasions. Census: 42 in 66 (2 in 66+, 1 in 66★), 4 finer (10/19). NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

## 1911-S Saint-Gaudens Twenty, MS65 Sharp and Lustrous

- 4420 1911-S MS65 PCGS. A mintage of 775,750 pieces (757,580 pieces according to recent research by Roger Burdette) went primarily in two directions: 450,000 to Europe, and 250,000 to South America. Few coins were made for domestic use. About 14,000 1911-S double eagles survive today more than 75% of them from foreign holdings. This is one of the few Gem survivors, with frosted orange-gold surfaces and only isolated, tiny marks. Mint luster flows across smooth, attractive fields and devices. PCGS reports just 49 numerically finer coins, plus 18 pieces in 65+ (10/19). NGC ID# 26FL, PCGS# 9159
- 4421 1913 MS63 PCGS. From a smallish mintage of 168,780 pieces, this attractive Select specimen exhibits well-detailed design elements, with just a trace of softness on the Capitol and the eagle's belly. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26FN, PCGS# 9161
- 4422 1913-D MS64 PCGS. Roger Burdette suggests 250,000 1913-D double eagles from a mintage of 393,500 coins were shipped to Europe, explaining the prevalence of examples in MS62 to MS64 and the rarity of higher-graded representatives. Satiny mint luster and straw-gold color characterize this lightly marked near-Gem. A small planchet void is noted under the eagle's head. NGC ID# 26FP, PCGS# 9162

#### 1913-D Saint-Gaudens Twenty, MS65 Few Finer Pieces Are Known

- **4423 1913-D MS65 PCGS.** The 1913-D is a slightly better date in high grade, coming from a limited mintage of 393,500 pieces. Gems are often available for a price, but finer pieces are rare. PCGS has seen only nine submissions grading higher than the Gem level (10/19). This piece displays bold detail and vibrant yellow-gold luster. Surface preservation is outstanding.
  - From The Lithuania Collection, Part II. NGC ID# 26FP, PCGS# 9162
- 4424 1913-S MS61 PCGS. A pleasing Mint State representative of this low-mintage issue, with well-detailed design elements that show a touch of softness on the Capitol and torch. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 26FR, PCGS# 9163
- 4425 1914 MS63 PCGS. From a small mintage of 95,250 pieces, this attractive Select example exhibits well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. NGC ID# 26FS, PCGS# 9164

# 1914 Double Eagle, MS64 Pleasantly Lustrous Collector Coin

4426 1914 MS64 PCGS. Attractive, satiny cartwheel luster plays across prairie-gold surfaces on this Choice 1914 double eagle. The coin is well-struck, and few abrasions are evident. The 1914 is moderately available in MS64, but higher-grade examples are scarce. PCGS lists only 45 submissions in Gem and better grades (10/19). From The Lithuania Collection, Part II. NGC ID# 26FS, PCGS# 9164

#### 1914 Double Eagle, MS64 Rarely Offered CAC Coin

- 4427 1914 MS64 PCGS. CAC. The 1914 Saint-Gaudens double eagle is available in MS64, although such coins are available in far fewer quantities than true common dates are. Above MS64, this issue is scarce, with only 45 pieces so graded at PCGS. The present Choice example is CAC endorsed an attribute that only a fraction of the survivorship claims. Frosty surfaces are exceptional for the grade, yielding warm peach-gold color and bold detail. Eye appeal is outstanding. CAC: 62 in 64, 8 finer (10/19). NGC ID# 26FS, PCGS# 9164
- 4428 1914-S MS65 PCGS. This spectacular Gem Saint-Gaudens double eagle exhibits well-detailed design elements and well-preserved orange-gold surfaces that are lustrous and appealing. From a mintage of nearly 1.5 million pieces, the 1914-S is a popular choice with branch mint type collectors. NGC ID# 82KA, PCGS# 9166
- 4429 1915-S MS65 NGC. This highly lustrous Gem 1915-S twenty has brilliant surfaces with intense yellow-gold luster. A few splashes of dark toning are evident on the obverse. NGC ID# 26FW, PCGS# 9168
- 4430 1915-S MS65 NGC. A lovely Gem double eagle, this 1915-S is far finer than the MS63 average grade for the issue. Both sides are brilliant and frosty with light yellow-gold luster. A scattering of trivial marks prevent a higher grade. NGC ID# 26FW, PCGS# 9168
- **4431 1915-S MS65 PCGS.** A delightful Gem representative of this popular branch mint issue, with sharply detailed design elements and well-preserved orange-gold surfaces that emit radiant mint luster from both sides. Eye appeal is outstanding. NGC ID# 26FW, PCGS# 9168
- **1916-S MS65 PCGS.** The final double eagle issued prior to U.S. involvement in World War I with a mintage of only 796,000 coins. This Gem has frosty yellow-gold luster and brilliant surfaces that host trivial, grade-limiting marks. NGC ID# 34NJ, PCGS# 9169
- 4433 1920 MS63 NGC. This attractive Select representative offers sharply detailed design elements, with distinct, countable columns in the Capitol building. The bright yellow and rose-gold surfaces are lightly marked, with vibrant mint luster and outstanding eye appeal. NGC ID# 26FY, PCGS# 9170
- 4434 1920 MS63 NGC. Only minor signs of contact are evident on the pleasing yellow and rose-gold surfaces of this impressive Select Saint-Gaudens double eagle, with vibrant mint luster on both sides. The design elements are well-detailed, with just a trace of softness on the eagle's belly. NGC ID# 26FY, PCGS# 9170

#### 1920 Double Eagle, MS64 Low-Mintage Issue

4435 1920 MS64 PCGS. The Philadelphia Mint coined 228,250 double eagles in 1920, according to Mint records. Although population data shows that PCGS and NGC have certified nearly 15,000 of those coins, that total represents just 7% of the mintage. Fully lustrous orange-gold surfaces appear on this Choice Mint State piece that exhibits trivial grade-consistent marks on each side. This issue is rare in finer grades. NGC ID# 26FY, PCGS# 9170

#### 1920 Twenty Dollar Gold, MS64 Conditionally Rare

4436 1920 MS64 PCGS. Roger Burdette reports in Saint-Gaudens Double Eagles that 15 obverse dies and 15 reverse dies were created for the 1920 double eagle coinage. The average die life was just over 15,000 coins. Minimal copper toning appears on the obverse of this fully lustrous near-Gem. PCGS has certified just 84 finer MS64+ examples and only two numerically finer MS65 submissions. NGC ID# 26FY, PCGS# 9170

## 1920 Saint-Gaudens Twenty, MS64 Only Two Numerically Finer

4437 1920 MS64 PCGS. Mint delivery records show that the entire production of 1920 double eagles were delivered from the Chief Coiner to the Mint Superintendent between the dates of April 30 and June 4. Trivial marks appear on the lustrous yellow-gold surfaces of this Choice Mint State double eagle. NGC ID# 26FY, PCGS# 9170

#### 1920 Saint-Gaudens Double Eagle, MS64 First Post-War Issue

4438 1920 MS64 PCGS. The 1920 double eagles were the first gold coins issued after World War I concluded. The only other gold denomination struck in 1920 was the eagle, and those were only coined in San Francisco. Typical of other similarly graded pieces, this near-Gem twenty has brilliant luster and scattered marks. An attractive piece in the optimum collecting grade for the issue. NGC ID# 26FY, PCGS# 9170

## 1920 Twenty Dollar, MS64 Only Collectible Issue of 1920

4439 1920 MS64 PCGS. Although the annual production of the San Francisco Mint was more than double that of Philadelphia in 1920, it is the Pennsylvania issue that is collectible. None of the San Francisco issue was exported during the decade, and none have been returned from international banking channels, and those coins are extremely rare today. The Philadelphia double eagle of 1920 is collectible in grades up to MS64. Scattered marks appear on the lustrous orange-gold surfaces of this Choice Mint State double eagle. NGC ID# 26FY, PCGS# 9170

### 1922 Double Eagle, MS65 Few Certified Finer

4440 1922 MS65 NGC. The 1922 survives in sufficient number to meet collector demand at the Gem level, although finer pieces are rare. This pleasing, medium-gold Gem is lustrous and sharp across smooth surfaces that are more satiny than frosted. Aside from a nick on the arm and a few tiny marks around the knee, Liberty's portrait is unabraded and the fields show only microscopic abrasions. Eye appeal is strong. NGC reports just nine numerically finer pieces, plus 11 in 65+ and two in 65★ (10/19). NGC ID# 26G3, PCGS# 9173

## 1922-S Double Eagle, MS64 Conditionally Challenging Issue

4441 1922-S MS64 PCGS. The 1922-S double eagle is significantly scarcer in high grades than its mintage of more than 2.6 million pieces would suggest. Choice examples are typically the finest available to collectors, as Gems are rare. PCGS has seen only 23 submissions finer than the present near-Gem coin (10/19). This piece is well-struck and satiny with honey-gold surfaces. Neither side exhibits bothersome abrasions.

From The Lithuania Collection, Part II. NGC ID# 26G4, PCGS# 9174

4442 1923 MS64+ NGC. CAC. Beautiful, frosty luster engulfs this rose-gold 1923 double eagle, revealing bold design elements and outstanding surface originality. Faint, scattered contact marks prevent Gem classification, although this piece easily earns CAC endorsement and a Plus designation. NGC ID# 26G5, PCGS# 9175

#### 1923-D Twenty Dollar, MS66+ Clean and Eye-Appealing

4443 1923-D MS66+ PCGS. The smooth, satiny surfaces of this warm orange-gold twenty fail to reveal any mentionable field marks. A tick on Liberty's right (facing) arm is quite possibly the only flaw standing in the way of a Superb Gem assessment. Eye appeal is terrific for this collectible branch mint type coin. NGC ID# 26G6, PCGS# 9176

4444 1924 MS65+ PCGS. Shimmering luster yields peach-gold, yellow, and greenish hues throughout this high-end Gem type coin. A few faint grazes on the high points of Liberty's figure and in the fields do not detract. NGC ID# 26G7, PCGS# 9177

4445 1924 MS65+ PCGS. The well-known common date in the series, the 1924 Saint-Gaudens double eagle is popular with type collectors. This Plus-graded Gem displays vibrant honey-gold luster and boldly struck devices. Only a few faint surface marks prevent a finer grade. NGC ID# 26G7, PCGS# 9177

4446 1924 MS66 PCGS. Although its mintage is less than half that of the 1928, the 1924 is regarded as a type coin. But most certified examples are in MS62 to MS65 grades. Premium Gems are comparatively scarce, and in demand from those who accumulate better-grade Saint-Gauden twenties for their value relative to modern bullion. This peach-tinged representative exhibits potent luster and exceptionally smooth surfaces. Each side has a couple of tiny alloy spots, as made. NGC ID# 26G7, PCGS# 9177

4447 1924 MS66 NGC. CAC. The remarkably clean fields and exceptional preservation of the eagle's wing feathers earn this 1924 double eagle Premium Gem classification. The coin is well-struck, and the CAC endorsement is well-earned. NGC ID# 26G7, PCGS# 9177

## 1924 Saint-Gaudens Twenty, MS66+ Exceptional Type Coin, CAC

4448 1924 MS66+ PCGS. CAC. The dual awards of the PCGS Plus designation and CAC endorsement sets this Premium Gem twenty apart from more than 10,000 other 1924 double eagles certified by PCGS at the MS66 grade or finer. Smooth and lustrous rich-gold surfaces show minimal abrasions. The torch flame is sharp, while Liberty's fingers are fully defined on both hands. The Capitol dome is bold, and Liberty's facial features are undisturbed. Rose highlights decorate the fully struck eagle. An ideal Saint-Gaudens twenty for type and gold specialists. NGC ID# 26G7, PCGS# 9177

## 1927 Double Eagle, MS66+ Vibrantly Lustrous Type Coin

- 4449 1927 MS66+ PCGS. Type collectors gravitate toward the common-date Saint-Gaudens double eagles, especially the 1923-D, 1924, 1927 and 1928 issues. These dates universally plentiful through MS66, and are collectible also in MS67. High-grade examples are also just about guaranteed to be eye-appealing. This high-end 1927 coin displays a bold strike and vibrant orange-gold luster. The exceptional preservation is easy to enjoy. PCGS lists 28 higher-grade pieces (10/19). NGC ID# 26GG, PCGS# 9186
- 4450 1928 MS66 PCGS. A spectacular Premium Gem representative of this popular type issue, with sharply detailed design elements and impeccably preserved yellow-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is terrific. NGC ID# 34VK, PCGS# 9189
- 4451 1928 MS66 PCGS. From a series-high mintage of 8.8 million pieces, the 1928 Saint-Gaudens double eagle is a popular choice with type collectors. This sharply detailed Premium Gem exhibits virtually flawless orange-gold surfaces, with vibrant mint luster and terrific eye appeal. NGC ID# 34VK, PCGS# 9189

#### 1928 Double Eagle, MS66+ Conditionally Elusive

4452 1928 MS66+ NGC. The 1928 Saint-Gaudens double eagle had the highest mintage of any issue of the denomination, making an ideal choice for type collectors who seek a single representative example of the design. This piece has the usual minuscule, gradeconsistent marks on its highly lustrous orange-gold surfaces. NGC has only certified 97 finer examples of this conditionally scarce issue (10/19). NGC ID# 34VK, PCGS# 9189

#### **COMMEMORATIVE SILVER**

1893 Isabella Quarter, MS67 Hailing 'The Industry of Women'

- 4453 1893 Isabella Quarter MS67 PCGS. The net distribution of Isabella quarter dollars was 24,214 pieces, an issue designed to commemorate "the industry of women." Cobalt-blue, orangegold, and lavender patination is more extensive and deeper on the reverse of this Superb Gem. Its lustrous surfaces show careful preservation. Finer examples are rarely seen. Population: 58 in 67 (9 in 67+), 7 finer (11/19). NGC ID# BYJ9, PCGS# 9220
- 4454 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. An impressive Choice example of this popular silver commemorative, with sharply detailed design elements and well-preserved lustrous surfaces, under highlights of golden-tan and lavender toning. Overall eye appeal is outstanding. NGC ID# BYKW, PCGS# 9222

#### 1900 DuVall 1-B Lafayette Dollar, MS65+ Light Original Toning

4455 1900 Lafayette Dollar MS65+ PCGS. CAC. DuVall 1-B. With a typical grade of About Uncirculated, the appearance of a highend Gem Lafayette dollar always draws attention. This DuVall 1-B example shows the olive leaf positioned above the gap between 1 and 9 of the date, while the second L of DOLLAR leans left and is higher than the adjacent A. Lightly patinated with speckles and a broader swath of blue and reddish-orange toning that continues to encircle the borders, the interiors of this attractive dollar are silver-gray and frosty bright mint luster. The devices are well-struck for the issue and minimally abraded, with a shallow planchet flaw above the conjoined heads of Washington and Lafayette.

Ex: Houston Money Show Signature (Heritage, 12/2015), lot 3457. NGC ID# BYKW, PCGS# 9222

## 1900 Lafayette Dollar, MS65+ Sharp, Satiny Type Coin

4456 1900 Lafayette Dollar MS65+ PCGS. CAC. DuVall 1-B. The pick-up points for DuVall 1-B are the position of the branch in relation to the date and a tiny die dot on the second L in DOLLAR. The first bottom leaf of the branch points between the 19. Lafayette dollars were struck in December 1899. The small 1900 date on the reverse refers to the erection of the Lafayette memorial statue in Paris, France. This high-end Gem example of the commemorative coin is well-struck and satiny with a dusting of lilac and olive toning on each side. There are no distracting abrasions. NGC ID# BYKW, PCGS# 9222

4457 1937 Antietam MS67+ PCGS. CAC. Partial tab toning surrounds pearlescent-silver centers, with the conjoined portraits of opposing generals Robert E. Lee and George B. McClellan sharply struck and nearly unabraded. Burnside Bridge is sharp on the reverse. Orange and autumn-brown hues flank lilac-silver fields and devices. Population: 47 in 67+, 26 finer. CAC: 165 in 67, 18 finer (10/19). NGC ID# BYF4, PCGS# 9229

#### 1937 Antietam Half Dollar, MS68 Among the Finest at PCGS

4458 1937 Antietam MS68 PCGS. Superb Gem Antietam halves often display varying degrees of toning from their original packaging. Some are deeply toned, while others (like this one) acquired only light, iridescent toning — slightly deeper at the margins, surrounding nearly brilliant centers. This MS68 coin is sharply struck and well preserved, showing just a few pinprick obverse marks under a strong loupe. Gentle pale-gold and lilac hues prevail. Population: 26 in 68 (4 in 68+), 0 finer (10/19). NGC ID# BYF4, PCGS# 9229

## 1935 Arkansas Half Dollar, MS67+ Well-Preserved, Original Surfaces

4459 1935 Arkansas MS67+ NGC. The 1935 Arkansas half dollar anticipated by one year the centennial commemoration of Arkansas' admission to the Union in 1836, a celebration that lasted until 1939. In 1935, there were 13,000 halves struck in Philadelphia, and only 5,500 pieces struck in Denver and San Francisco. This half is exceptionally well-preserved with gray-olive patina over each side and strong underlying luster. A long arc of deeper russet toning is seen around the margins of both obverse and reverse. Census: 14 in 67 (1 in 67+), 2 finer (10/19). NGC ID# BYF5, PCGS# 9233

4460 1936 Arkansas MS67 PCGS. A scarce Superb Gem example of this popular commemorative type. Both sides have warm lemongold toning, although it is more prominent on the obverse. The reverse also has this ribbons of green and rose color around portions of the periphery. The devices are well-struck, and neither side has bothersome abrasions. Population: 18 in 67 (3 in 67+), 0 finer (10/19). NGC ID# BYHX, PCGS# 9237

#### 1936-S Arkansas Half Dollar, MS67+ Tied for Finest Certified

- 4461 1936-S Arkansas MS67+ NGC. From a small distribution of 9,662 pieces, the 1936 Arkansas half dollar is a rare issue at the MS67 grade level and neither NGC nor PCGS has cataloged any coins in higher numeric grades (10/19). This Plus-graded Superb Gem exhibits well-detailed design elements and impeccably preserved satiny surfaces, under shades of emerald-green, lavendergray and slate-gray toning. Census: 16 in 67 (2 in 67+), 0 finer (10/19). NGC ID# BYFA, PCGS# 9239
- 4462 1937 Arkansas MS67 NGC. Dusky surfaces reveal traces of pale gold, maintaining considerable brilliance overall. The fields are exceptionally smooth, and just a couple of minute flecks appear on the portraits. Distribution amounted to 5,500 pieces. Census: 12 in 67, 0 finer (10/19). NGC ID# BYFB, PCGS# 9241
- 4463 1937 Arkansas MS67 PCGS. CAC. Beautiful, satiny mint luster is essentially untouched on this CAC-endorsed Superb Gem type coin. Ivory hues throughout the interiors cede to golden and russet hues around the borders. Few pieces in this grade are CAC endorsed. Population: 19 in 67 (1 in 67+), 0 finer. CAC: 3 in 67, 0 finer (10/19). NGC ID# BYFB, PCGS# 9241
- 4464 1937-D Arkansas MS67 PCGS. CAC. A well-struck Superb Gem example of this Denver issue, showing satiny luster and attractively preserved surfaces. Golden-orange toning lightens toward the centers and deepens to russet around the outer peripheries. Finer pieces are virtually unknown. Population: 40 in 67 (8 in 67+), 2 finer. CAC: 21 in 67, 0 finer (10/19). NGC ID# BYFC, PCGS# 9242
- 4465 1939-D Arkansas MS67 NGC. CAC. A lovely Superb Gem with satin luster under delicate gold toning on both sides. This conditionally rare commemorative survives from a distribution of just 2,104 coins. Census: 10 in 67 (1 in 67★), 0 finer. CAC: 7 in 67, 0 finer (10/19). NGC ID# BYFK, PCGS# 9250

#### 1935 Daniel Boone Half Dollar, MS67+ Tied for Finest at PCGS

4466 1935 Boone MS67+ PCGS. CAC. Original satin luster enjoys warm golden and russet toning in the margins that lightens considerably toward the centers. The devices are sharp, and neither side has mentionable abrasions. Examples are seldom seen this fine and rarely finer. None are finer in a PCGS holder. Population: 84 in 67 (12 in 67+), 0 finer. CAC: 31 in 67, 1 finer (10/19). NGC ID# BYFR, PCGS# 9258

- 4467 1935/34 Boone MS67+ PCGS. CAC. Brightly lustrous and sharp, this high-end Superb Gem possesses extraordinary eye appeal. Some daubs of toning appear around the borders, but the interiors are essentially brilliant. This variety has the small 1934 date in the field above PIONEER YEAR, with the coinage date of 1935 at the lower border. Examples are seldom offered in this condition. Population: 78 in 67 (11 in 67+), 4 finer. CAC: 34 in 67, 1 finer (10/19). Ex: Central States Signature (Heritage, 4/2012), lot 7064; Summer FUN (Heritage, 7/2018), lot 4135. NGC ID# 34SZ, PCGS# 9262
- 4468 1935/34-S Boone MS67 PCGS. CAC. Satiny mint luster is virtually untouched on this CAC-endorsed Superb Gem. Boldly rendered design elements complement champagne-tinged pearlwhite surfaces, while the borders display deeper orange-gold and lemon-yellow coloring. A rarity this fine, with few higher-grade pieces known. Population: 24 in 67 (4 in 67+), 3 finer (10/19). NGC ID# BYFW, PCGS# 9264

## 1936-S Boone Half Dollar, MS67+ Few Peers at This Level

- 4469 1936-S Boone MS67+ PCGS. CAC. Arcs of golden-orange toning frame unabraded stone-gray interiors on this CAC-approved 1936-S Boone half dollar. An eye-appealing, low-mintage representative with few peers. Population: 88 in 67 (11 in 67+), 3 finer. CAC: 36 in 67, 3 finer (11/19). NGC ID# BYG2, PCGS# 9268
- 4470 1937 Boone MS67+ PCGS. CAC. Daniel Boone faces Blackfish, war chief of the Chillicothe band of the Shawnee tribe, on the reverse of the Daniel Boone Bicentennial half. The obverse depicts Augustus Lukeman's conception of Boone in profile portrait. This Plus-graded Superb Gem with CAC endorsement ranks among the finer-known survivors, with smooth and frosted pearlescent-silver surfaces and a hint of gold toning at the rims. Population: 21 in 67+, 3 finer. CAC: 57 in 67, 2 finer (10/19). NGC ID# BYG3, PCGS# 9270

## 1938 Boone Half Dollar, MS67+ Registry-Grade Condition Rarity

4471 1938 Boone MS67+ PCGS. The 1938 Daniel Boone commemorative is rarely offered in Superb Gem condition, even though lesser coins are moderately plentiful. With a Plus designation, this issue is even rarer, and PCGS and NGC each list just a single higher-grade representative (10/19). This piece displays sharp detail and near-flawless preservation of the satiny mint luster. Both sides have ivory-silver luster with daubs of russet in the margins. Population: 49 in 67 (9 in 67+), 1 finer (10/19). NGC ID# BYG6, PCGS# 9274

- 4472 1938 Boone MS67 PCGS. CAC. The long-running Daniel Boone Bicentennial half series features Boone and Blackfish, fabled war chief of the Chillicothe (Shawnee) tribe. This is a Superb Germ example of the low-mintage final year of issue. Lilac-gray and pale-gold toning adds eye appeal to the well-preserved and sharply struck surfaces, with bright mint luster illuminating both sides. Population: 49 in 67 (9 in 67+), 1 finer (10/19). NGC ID# BYG6, PCGS# 9274
- 4473 1938-S Boone MS67+ NGC. Wispy light gold toning appears on both sides of this brilliant and fully lustrous Superb Gem from the last year of issue for the Boone commemorative half dollar, struck in the year of the pioneer's 204th birthday. Few of the 2,100 coins distributed can match the quality of this piece. Census: 34 in 67 (2 in 67+, 1 in 67★), 5 finer (10/19). NGC ID# BYG8, PCGS# 9276

### 1925-S California Half Dollar, MS68 Splendid Top-Grade Registry Coin

- 4474 1925-S California MS68 NGC. This is a beautifully preserved California Diamond Jubilee half dollar, brilliant across the interiors with blue, violet, and amber border toning. Neither side exhibits abrasions, and in this grade the California commemorative is decidedly rare, with no higher-grade examples known. Eye appeal is fantastic. Census: 18 in 68 (6 in 68★, 2 in 68+★), 0 finer (10/19). NGC ID# BYGA, PCGS# 9281
- 4475 1936 Cleveland MS67+ NGC. Amazing. A highly lustrous Superb Gem with spectacular magenta, rose, and blue toning over all of the obverse and much of the reverse, save for a small dab of silver luster at the lower left. Census: 72 in 67 (5 in 67+, 6 in 67★, 2 in 67+★), 10 finer (10/19). NGC ID# BYGB, PCGS# 9288
- 4476 1893 Columbian MS67 PCGS. Among the most attractive coins this cataloger has described for the present sale, this Superb Gem 1893 Columbian Exposition half dollar has brilliant and lustrous centers within rings of gold and blue toning on each side. The surfaces are pristine. Population: 44 in 67 (6 in 67+), 0 finer (11/19). NGC ID# BYGG, PCGS# 9297
- 4477 1935 Connecticut MS67 PCGS. CAC. The obverse features the legendary Charter Oak in Hartford, Connecticut, said to be the the 1687 hiding place of the Connecticut charter of 1662. This Superb Gem has full satin luster beneath impressive gold and iridescent toning. PCGS has certified only one finer example (11/19). NGC ID# BYGH, PCGS# 9299
- 4478 1935 Connecticut MS67 PCGS. CAC. The Connecticut Tercentenary half dollar is seldom offered at the Superb Gem grade level. This piece displays soft, satiny mint luster and delicate pastel toning. The coin is sharply struck and easily earns CAC endorsement. PCGS and NGC each list only a single numerically finer representative. CAC: 68 in 67, 0 finer (10/19). NGC ID# BYGH, PCGS# 9299
- 4479 1936 Delaware MS67+ PCGS. CAC. The surfaces of this Delaware Tercentenary half are essentially flawless, with a sharp strike and lightly toned centers flanked by amber-gold and deepbrown obverse borders. The attractive reverse displays tan-gold hues. Superb Gem examples are occasionally available, but few command the PCGS Plus designation and CAC endorsement. Population: 37 in 67+, 6 finer. CAC: 82 in 67, 2 finer (10/19). NGC ID# BYGJ, PCGS# 9301

#### 1922 Grant Half Dollar, MS66 Scarcer With Star Variant

- 4480 1922 Grant With Star MS66 PCGS. The star above GRANT was a bit of marketing genius, but hardly an original idea. That honor belongs to the Missouri 2★4 imprint, which was released a year earlier, as were the Alabama Centennial halves with 2x2 in the obverse field. References vary on the exact number of Grant With Star halves sold somewhere around 5,000 pieces making it one of the rarities in the classic commemorative series. This Premium Gem example is richly toned in sun-gold and grayish-blue shades, with a sharp strike and bold eye appeal. The lustrous surfaces are virtually free of marks. Population: 52 in 66 (9 in 66+), 5 finer (10/19). NGC ID# BYPP, PCGS# 9307
- 4481 1928 Hawaiian MS64 PCGS. A satiny near-Gem example of this classic commemorative key, showing a trace of light champagne toning and well-struck devices. No major abrasions disrupt the eye appeal. Only 10,000 examples of this issue were distributed to collectors, including 50 matte proofs. NGC ID# BYGR, PCGS# 9309

#### 1928 Hawaiian Half, MS66 Unquestionably Original Surfaces

- 4482 1928 Hawaiian MS66 PCGS. The Hawaiian half has long been regarded as one of the keys to the classic commemorative half series. Only 9,958 pieces were struck. Gem and finer examples are difficult to come by. Many of the original survivors show a rich greenish tint, as seen on this piece. Darker russet incrustations are scattered around and within the devices on each side. NGC ID# BYGR, PCGS# 9309
- 4483 1918 Lincoln MS67+ PCGS. CAC. Satiny mint luster illuminates sharp devices and exceptional preservation. Each side has delicate champagne-yellow toning with olive and russet accents. Often called the Lincoln half dollar, this Illinois centennial commemorative is seldom seen this fine, and higher-grade coins are rare. PCGS lists five pieces in numerically finer condition (10/19). NGC ID# BYGU, PCGS# 9320

#### 1920 Maine Centennial Half, MS67 None Numerically Finer at PCGS

4484 1920 Maine MS67 PCGS. CAC. The Maine Centennial half dollar was intended to be sold at the centennial celebration in Portland in 1920, but it arrived too late to be distributed as planned and was instead sold by the state treasurer throughout the following years. The designs were prepared by Anthony de Francisci, who is more widely known for his depiction of Liberty on the Peace dollar of the following year. This Maine Centennial half displays bold design definition and warm olive-gold toning, the colors most prominent on the reverse. Population: 60 in 67 (8 in 67+), 0 finer. CAC: 32 in 67, 0 finer (10/19).

Ex: Long Beach Signature (Heritage, 9/2014), lot 3529. NGC ID# BYGY, PCGS# 9326

4485 1921 Missouri MS65+ NGC. CAC. A high-end Gem example of the "plain" Missouri Centennial half dollar. Softly frosted luster displays subdued amber-gold and light olive toning over each side, and no bothersome abrasions are apparent with a loupe. NGC lists only 49 finer submissions (10/19). NGC ID# BYH2, PCGS# 9330

## 1923-S Monroe Half Dollar, MS66+ Few Coins in This Grade Are CAC Approved

4486 1923-S Monroe MS66+ PCGS. CAC. Although the 1923-S Monroe commemorative half dollar is occasionally seen in MS66, Plus-graded coins in this grade are downright rare, as are those with CAC endorsement. The present coin possesses both attributes. Luster is frosty and beautifully preserved, and the devices are sharp. Ivory-gray interiors cede to gold and amber border toning, giving this piece pleasant eye appeal. Population: 12 in 66+, 11 finer. CAC: 26 in 66, 1 finer (11/19). NGC ID# BYH4, PCGS# 9333

#### 1939-D Oregon Trail Half Dollar, MS68 None Are Finer at PCGS or CAC

4487 1939-D Oregon MS68 PCGS. CAC. The Mint issued only 3,000 sets of Oregon Trail half dollars in 1939, including one coin from each mint. This Denver piece is among the finest certified at PCGS and boasts the added appeal of CAC recognition. Lovely violet and green-gold toning graces the margins, leaving the interiors with a light golden hue. Population: 32 in 68 (6 in 68+), 0 finer. CAC: 31 in 68, 0 finer (10/19). NGC ID# BYHM, PCGS# 9353

4488 1915-S Panama-Pacific MS66 NGC. A lovely Premium Gem, this piece exhibits attractive gold and pale blue toning on the obverse, and intense blue, magenta, and gold toning on the reverse. Looking beyond the high technical grade, this piece exhibits excellent eye appeal. A visual treat. NGC ID# BYHP, PCGS# 9357

4489 1915-S Panama-Pacific MS66 NGC. CAC. Rainbow colors wrap around golden interior obverse toning, while the reverse displays a hint of gold over pearlescent silver surfaces. Doubling of the mintmark is the norm for a Panama-Pacific half dollar, but none exists on this Premium Gem example. CAC endorsement assures above-average quality of the always-popular issue. NGC ID# BYHP, PCGS# 9357

4490 1921 Pilgrim MS67 PCGS. This impressive Superb Gem has essentially flawless surfaces that exhibit a sharp strike with delicate gold and iridescent toning. The 1921 is scarcer than the tercentenary issue of 1920. Population: 60 in 67 (11 in 67+), 1 finer (11/19). NGC ID# BYHS, PCGS# 9360

4491 1921 Pilgrim MS67 PCGS. The Pilgrim Tercentenary half dollar is one of the most iconic classic commemoratives. Depictions of William Bradford and the *Mayflower* by Boston sculptor Cyrus E. Dallin grace this early half dollar commemorative, which was struck in 1920 and 1921. The 1921 issues boasts the lower mintage of the two: 20,000 pieces. This Superb Gem is among the finer-known certified examples. Sharp devices expand the frosty, luminous luster into three-dimensional relief, amid golden, olive, and russet toning. Population: 60 in 67 (11 in 67+), 1 finer (10/19). NGC ID# BYHS, PCGS# 9360

4492 1926 Sesquicentennial MS65+ PCGS. CAC. The Sesquicentennial half dollar is usually available in MS65, but fewer than two dozen such coins are Plus-graded at PCGS. A green CAC sticker is also a seldom-seen attribute on this issue, and the current Gem has both. Each side is well-struck and satiny with warm golden toning. Flecks of russet and olive-green also appear around the outer peripheries. PCGS lists only 14 finer examples. CAC: 96 in 65, 6 finer (10/19). NGC ID# BYJ4, PCGS# 9374

## 1925 Stone Mountain Half Dollar, MS68 Among the Finest Certified

4493 1925 Stone Mountain MS68 NGC. The 1925 Stone Mountain half dollar is a popular silver commemorative, from a large distribution of 1.3 million pieces. The issue is definitely elusive at the MS68 grade level, however. This delightful MS68 specimen exhibits well-detailed design elements, with vibrant mint luster throughout. The impeccably preserved surfaces are blanketed in attractive shades of lavender and pale gold toning. Census: 15 in 68, 0 finer (10/19). NGC ID# BYJ6, PCGS# 9378

## 1936-S Texas Half Dollar, MS68 Vividly Toned, Impeccably Preserved

- 4494 1936-S Texas MS68 NGC. The 1936-S Texas half dollar claims a modest distribution of 9,055 pieces. Vivid shades of sea-green, amber, and lavender toning blanket the virtually flawless surfaces of this magnificent MS68 specimen, with sharply detailed design elements and vibrant mint luster underneath. Census: 8 in 68 (1 in 68+★), 0 finer (10/19). NGC ID# BYJG, PCGS# 9388
- 4495 1925 Vancouver MS67 PCGS. The Fort Vancouver Centennial half dollar is one of four classic commemoratives struck in 1925. Laura Gardin Fraser prepared the designs, and the coin was struck at the San Francisco Mint, despite the omission of the S mintmark. Distribution amounted to 14,994 pieces. This Superb Gem displays lovely rainbow toning around the borders with warm golden in the centers. The coin is well-struck and virtually pristine. Population: 84 in 67 (17 in 67+), 3 finer (10/19). NGC ID# BYJP, PCGS# 9399
- 4496 1925 Vancouver MS67 PCGS. The Vancouver half is not one of the usual suspects when Superb Gem commemorative halves are discussed. This is a remarkably well-preserved example whose bright, frosted mint luster shows no obvious abrasions. The centers are brilliant and ringed on each side by golden-russet toning. Population: 84 in 67 (17 in 67+), 3 finer (10/19). NGC ID# BYJP, PCGS# 9399
- 4497 1927 Vermont MS67 NGC. Pastel ice-blue and straw-gold toning graces lustrous and exceptionally smooth surfaces. Tiny freckles of deep brown toning visit the right borders. Despite their high relief, Vermont half dollars are invariably well struck. Census: 32 in 67 (2 in 67+, 2 in 67★, 1 in 67+★), 3 finer (10/19). NGC ID# BYJR, PCGS# 9401
- 4498 1927 Vermont MS67 PCGS. A stunning Superb Gem that recounts Ira Allen, his older brother Ethan Allen, and the Green Mountain Boys of colonial Vermont. This piece is brilliant and untoned with sharp design features and frosty silver luster. Population: 71 in 67 (5 in 67+), 1 finer (11/19). NGC ID# BYJR, PCGS# 9401

- 4499 1951 Booker T. Washington MS67 PCGS. CAC. Luminous, satiny mint luster complements bold design elements and exceptional preservation. Delicate champagne, lilac, and sea-green hues adorn each side. The 1951 Booker T. Washington half dollar is scarce this fine and nearly uncollectible finer. CAC-endorsed coins in this grade are rare. Population: 28 in 67 (6 in 67+), 0 finer. CAC: 22 in 67, 0 finer (10/19). NGC ID# BYK9, PCGS# 9424
- 4500 1951-8 Booker T. Washington MS67+ PCGS. CAC. Faint wisps of almond-gold color complement otherwise brilliant, radiantly frosted surfaces. The strike is strong and evidence of contact is practically unseen. Among the finest at PCGS and CAC, and visually among the finest pieces we have seen in this grade. Population: 90 in 67 (9 in 67+), 0 finer. CAC: 69 in 67, 0 finer (10/19). NGC ID# BYKB, PCGS# 9426

#### **COMMEMORATIVE GOLD**

4501 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. A tiny mark in the left obverse field of this Superb Gem appears to be as struck. This piece has sharp design definition and lovely yellow-gold luster with full mint brilliance. Tied numerically for the finest that PCGS has certified (10/19). NGC ID# BYLD, PCGS# 7443

#### 1903 Louisiana Purchase Gold Dollar, MS67 Jefferson Portrait

- 4502 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. An amazing Superb Gem, this Jefferson portrait gold dollar of the Louisiana Purchase Exposition series features virtually flawless surfaces with hints of pale blue that accompany the brilliant yellow-gold luster. This piece is tied for the finest that PCGS has certified (10/19). NGC ID# BYLD, PCGS# 7443
- 4503 Louisiana Purchase, Jefferson Gold Dollar MS67 NGC. Two gold dollar varieties were produced for the Louisiana Purchase Exposition. This variety features President Thomas Jefferson who was in office at the time the purchase was made. An impressive Superb Gem, few are finer. A sharply struck gold dollar with brilliant and frosty yellow-gold luster and pristine surfaces. NGC has only certified four numerically finer examples (10/19). NGC ID# BYLD, PCGS# 7443
- 4504 1903 Louisiana Purchase, Jefferson Gold Dollar MS67+ NGC. Semiprooflike fields complement rich tangerine-orange and yellowgold hues on each side of this high-end Superb Gem type coin. The strike is sharp, and finer Louisiana Purchase, Jefferson type gold dollars are prohibitively rare. Census: 98 in 67 (4 in 67+, 2 in 67★), 4 finer (10/19). NGC ID# BYLD, PCGS# 7443

## 1903 Louisiana Purchase Gold Dollar, MS67+ Thomas Jefferson Variant

4505 1903 Louisiana Purchase, Jefferson Gold Dollar MS67+ PCGS. From a distribution of 17,500 pieces, the 1903 Jefferson commemorative gold dollar is scarce in MS67 condition, and this Plus-graded Superb Gem is among the finest certified examples at PCGS (10/19). The design elements are sharply detailed throughout, and the virtually pristine orange-gold surfaces radiate vibrant mint luster and terrific eye appeal. NGC ID# BYLD, PCGS# 7443

## 1903 Louisiana Gold Dollar, MS66 Prooflike McKinley Portrait

4506 1903 Louisiana Purchase, Jefferson MS66 Prooflike NGC. Portraits of President McKinley and President Jefferson are found on the Louisiana Purchase commemorative gold dollars. This impressive Premium Gem McKinley coin has brilliant yellowgold surfaces and bold design motifs with fully prooflike fields. An excellent example from fresh dies. Only 17 representatives of this commemorative variety have earned an NGC Prooflike designation. Census: 2 in 66 Prooflike, 0 finer (10/19). PCGS#

# 1903 Louisiana Purchase Gold Dollar, MS67+ Spectacular McKinley Version

4507 1903 Louisiana Purchase, McKinley Gold Dollar MS67+ NGC. From a distribution of 17,500 pieces, the 1903 McKinley gold dollar can be found occasionally in MS67 condition, but finer coins are condition rarities. This Plus-graded Superb Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster and terrific eye appeal. NGC has graded six numerically finer examples (10/19). NGC ID# BYLE, PCGS# 7444

4508 1904 Lewis & Clark Gold Dollar MS64 Prooflike NGC. The 1904 Lewis and Clark gold dollar is rare with Prooflike surfaces. NGC reports 23 such submissions in all grades, most in MS63 and MS64. This is a rich, orange-gold near-Gem with reflective, jet-black fields and a bold impression on the devices. A few stray wisps define the grade, these visible mainly because of the reflective nature of the fields. Census: 8 in 64 (1 in 64+) Prooflike, 1 finer (10/19). NGC ID# BYLF, PCGS# 77447

#### 1905 Lewis and Clark Gold Dollar, MS63 Elusive Prooflike Example

4509 1905 Lewis & Clark MS63 Prooflike NGC. NGC has certified only a dozen 1905 Lewis and Clark gold dollars that are designated Prooflike, including two in this grade and six that are finer (10/19). This example is well-struck and deeply reflective. Die polish lines — a product of the prooflike fields — appear in the fields, but there are remarkably few signs of post-mint contact. Rich lemon-gold and peach-orange coloration is uniform across each side. Census: 2 in 63 Prooflike, 6 finer (10/19). NGC ID# BYLG, PCGS# 77448

#### 1905 Lewis & Clark Gold Dollar, MS64 Prooflike Rare Mirrored Finish Example

4510 1905 Lewis & Clark MS64 Prooflike NGC. Ken Bressett Signature holder honoring A Guide Book of United States Coins. This Choice Mint State Lewis & Clark gold dollar has fully mirrored fields and sharp design definition, although the borders are a trifle weak. Years ago, this quality would have been described as a proof. NGC has certified 12 prooflike examples, including five MS64 Prooflike pieces and one finer example graded MS66 PL (10/19). NGC ID# BYLG, PCGS# 77448

# 1915-S Pan-Pac Gold Dollar, MS67 Superb Type Coin

4511 1915-S Panama-Pacific Gold Dollar MS67 PCGS. Luminous olive and salmon-pink hues enrich this magnificently undisturbed Superb Gem. Although the capped portrait resembles a baseball player to the modern eye, a Panama Canal worker was instead intended. The mintmark is widely repunched southeast. Tied for the finest certified by either major service (10/19). NGC ID#BYLH, PCGS# 7449

- 4512 1915-S Panama-Pacific Quarter Eagle MS63 PCGS. A collector-grade Select Mint State example of this Pan-Pac quarter eagle. Each side is well-struck with satiny lemon-gold surfaces. Surprisingly few abrasions are evident for the grade, giving this coin pleasing visual appeal. From a distribution of only 6,749 pieces. NGC ID# BYLP, PCGS# 7450
- 4513 1917 McKinley Gold Dollar MS66+ PCGS. CAC. The 1917 McKinley gold dollar is not difficult to locate in MS66 condition, but the issue becomes elusive in higher grades. This Plus-graded Premium Gem displays well-detailed design elements and impeccably preserved orange gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# BYLL, PCGS# 7455
- 4514 1917 McKinley Gold Dollar MS67 PCGS. From a distribution of 10,000 pieces, this delightful Superb Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster on both sides. PCGS has graded no coins in higher numeric grades (10/19). NGC ID# BYLL, PCGS# 7455
- 4515 1917 McKinley Gold Dollar MS67 PCGS. Housed in an old, blue label holder with barcode on the back, this Superb Gem McKinley gold dollar has been tied for finest-known for more than two decades, and is exceeded at PCGS only by Plus-graded coins in more recent holders. Lustrous, essentially mark-free surfaces radiate orange-gold charm, while a sharp strike covers both sides. Population: 97 in 67 (13 in 67+), 0 finer (9/19). NGC ID# BYLL, PCGS# 7455

## 1922 No Star Grant Gold Dollar, MS67 Only One Coin Finer at PCGS

4516 1922 Grant Gold Dollar, No Star, MS67 PCGS. Despite identical distribution of 5,016 pieces, the No Star Grant Memorial gold dollar is scarcer in high grade than its more-famous With Star counterpart. This is an exceptional Superb Gem No Star example, with a needle-sharp strike on Grant's hair and essentially unmarked surfaces. Vibrant mint luster illuminates lemon-gold highlights that glimmer from rich, sun-gold fields and devices. Housed in an old-generation blue label holder with barcode on the back. PCGS reports just one numerically finer example (10/19). NGC ID# BYLN, PCGS# 7458

# 1922 Grant Gold Dollar, MS67+ Spectacular With Star Example

4517 1922 Grant Gold Dollar, With Star, MS67+ PCGS. CAC. The popular 1922 Grant With Star gold dollar claims a small distribution of 5,016 pieces. This Plus-graded Superb Gem exhibits sharp definition on all design elements, including the usual problem areas on the hair and cabin. The impeccably preserved orange-gold surfaces radiate vibrant mint luster and eye appeal is terrific. PCGS has graded five numerically finer examples (10/19). NGC ID# BYPS, PCGS# 7459

#### MODERN BULLION COINS

4518 1988 Silver Eagle MS70 PCGS. PCGS has certified only 48 1988 Silver Eagles as MS70 (10/19), and these are in high demand among Registry Set enthusiasts. This piece is fully struck and brilliant with pristine, satiny mint luster. NGC ID# 26J8, PCGS# 9816

#### 1990 One-Ounce Gold Eagle, MS70

4519 1990 One-Ounce Gold Eagle MS70 PCGS. The 1990 one-ounce Gold Eagle claims a mintage of 373,210 pieces, a smallish production total for a Philadelphia Mint bullion issue. This magnificent MS70 example exhibits fully struck design elements and technically perfect lemon-yellow surfaces that radiate vibrant mint luster throughout. PCGS Population: 37 in 70 (11/19). NGC ID# 26PE, PCGS# 9844

## 1992 One-Ounce Gold Eagle, MS70 Seldom Seen in This Ultimate Grade

- 4520 1992 One-Ounce Gold Eagle MS70 PCGS. The 1992 one-ounce Gold Eagle claims a smallish Philadelphia mintage of 275,000 pieces, making the issue quite elusive in the ultimate grade of MS70. This remarkable specimen exhibits razor-sharp definition on all design elements and the technically perfect yellow-gold surfaces are awash in vibrant mint luster. PCGS Population: 22 in 70 (11/19). NGC ID# 26PG, PCGS# 9864
- 4521 1993 Silver Eagle MS70 PCGS. PCGS has examined a mere 27 Superb Gem examples that they have rated as perfect MS70 pieces (10/19). This piece is one of those with sensational eye appeal that is the result of frosty silver luster and flawless surfaces with a full strike. NGC ID# 26JJ, PCGS# 9866
- 4522 1993-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC. A perfect Ultra Cameo proof, this half-ounce American Eagle gold piece has impressive field-to-device contrast with brilliant light yellow-gold surfaces. This issue is considered a semi-key from a mintage of just under 44,000 coins. NGC ID# 28YF, PCGS# 9873
- 4523 1995 Silver Eagle MS70 PCGS. A perfect Superb Gem Mint State American silver Eagle, this piece is one of only 74 similar examples that PCGS has certified (10/19). Both sides are brilliant, untoned, and sharply struck with frosty mint luster. NGC ID# 26|N, PCGS# 9886
- 4524 1995-W Silver Eagle PR69 Deep Cameo PCGS. A seemingly flawless coin, showing liquidlike mirroring in the fields and glistening, frosty luster on the devices. Eye appeal is spectacular. Neither side has toning. A visually impressive Registry coin. NGC ID# CFWX, PCGS# 9887

- 4525 1995-W Silver Eagle PR69 Deep Cameo PCGS. In PR70 Deep Cameo this key proof Silver Eagle issue is scarce and costly. PR69 coins are more obtainable. This piece displays brilliant, starkly contrasted surfaces with deep field mirroring. The preservation is virtually flawless. NGC ID# CFWX, PCGS# 9887
- 4526 1995-W Silver Eagle PR69 Deep Cameo PCGS. A white-onblack beauty that boasts a full strike and exemplary preservation. The unchallenged key to the enormously popular silver eagle series, due to its low emission of 30,125 pieces. Originally issued only as part of an American eagle gold proof set. Ex: Long Beach Signature (Heritage, 9/2007), lot 2263. NGC ID# CFWX, PCGS# 9887
- 4527 1995-W Silver Eagle PR69 Deep Cameo PCGS. Stone-gray design motifs yield white-on-black contrast when the coin is observed from a direct angle. The design elements are fully struck and the surfaces are virtually pristine as would be expected from the designated grade. With a mintage of a little over 30,000 pieces, the 1995-W proof is the key to the series.

Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1886. NGC

ID# CFWX, PCGS# 9887

#### 1996 American Silver Eagle, MS70 Mercanti Signature Holder

4528 1996 Silver Eagle, Mercanti Signature MS70 PCGS. An absolutely amazing, flawless Superb Gem, this American silver Eagle has brilliant and untoned silver luster with frosty surfaces and exceptional eye appeal. An important rarity at this top grade level destined for an advanced Set Registry Collection. Population: 9 in 70 (10/19). PCGS# 530892 Base PCGS# 9900

#### 1997 Quarter-Ounce Gold Eagle, MS70

4529 1997 Quarter-Ounce Gold Eagle MS70 PCGS. From a mintage of 60,318 pieces, the 1997 quarter-ounce Gold Eagle is seldom encountered in the ultimate grade of MS70. This magnificent specimen exhibits fully struck design elements and lemon-yellow surfaces that show absolutely no signs of contact. Vibrant mint luster adds to the terrific eye appeal. PCGS Population: 31 in 70 (11/19). NGC ID# 26MD, PCGS# 9916

#### 2000 Silver Eagle, MS70 **PCGS-Graded Scarcity**

4530 2000 Silver Eagle MS70 PCGS. The 2000 Silver Eagle's mintage of 9.2 million coins represented the second-highest production in the series to that point after the 1987, yet this is also one of the most elusive issues to locate in MS70 condition. PCGS-graded examples are particularly scarce with only 51 coins reaching this top level (10/19). Those coins are tightly held and seldom offered. We expect spirited bidding for this fully struck, all-brilliant representative. NGĈ ID# 26JZ, PČGS# 9949

#### 2008-W Buffalo Gold Piece, PR70 Ultra Cameo One Ounce, First Strike

4531 2008-W One-Ounce Gold Buffalo, First Strike, PR70 Ultra Cameo NGC. The one-ounce gold Buffalo takes its motifs from the famous Buffalo nickel, one of the iconic designs of American coinage. This perfect proof has bold design definition and excellent contrast. The fields are somewhat matte in appearance. An impressive, perfectly preserved proof. NGC ID# 26RE, PCGS# 393330 Base PCGS# 393329

## 2009 Ultra High Relief Twenty, MS70 First Strike Prooflike Example

4532 2009 Ultra High Relief, First Strike MS70 Prooflike PCGS. Modeled after the extremely rare 1907 gold patterns, Judd-1917, the MMIX Ultra High Relief double eagles were struck on 27 mm planchets that were twice as thick as the standard one-ounce Gold Eagle. This spectacular MS70 example boasts profoundly reflective, orange-gold surfaces free from any contact whatsoever. The design elements are fully raised, allowing for a complete appreciation of Saint-Gaudens' masterful design. Certified as a First Strike, having been received within the first 30 days of issue. NGC ID# 26S4, PCGS# 506614 Base PCGS# 506602

#### TERRITORIAL GOLD

(1837-1842) C. Bechtler Gold Dollar, AU53 N Reversed, K-4 Variety, 28G

4533 (1837-1842) C. Bechtler Dollar, N Reversed, AU53 NGC. K-4, R.4. 28 grains. The N in ONE is reversed and impressed over another letter (possibly another N), identifying the popular K-4 variety. Bechtler's private gold coinage was well-respected and circulated widely in the South in the days before the Civil War. This lightly worn AU53 example shows wavy lilac and orange-gold surfaces, with some planchet flaws and minor abrasions. Listed on page 398 of the 2020 Guide Book. Census: 6 in 53, 56 finer (10/19). NGC ID# 2B98, PCGS# 10055

## C. Bechtler Five Dollar, XF Details Kagin-20, 134G, With Star

4534 (1837-1842) C. Bechtler Five Dollar, 134G, With Star — Cleaned — NGC Details. XF. Kagin-20, R.4. The German immigrant Christopher Bechtler, along with his son, August, and his nephew, Christopher, gained the trust of the citizens of North Carolina and Georgia, and produced a series of gold coins from locally mined gold, struck from 1831 until about 1852. Even after the U.S. Mint opened branched in Charlotte and Dahlonega, the Bechtler family maintained their business. While lightly cleaned, this rich green-gold piece has traces of peripheral rose toning. Listed on page 399 of the 2020 Guide Book.

#### CALIFORNIA FRACTIONAL GOLD

1859 Liberty Round 25 Cents, MS67 Tied for Finest Certified BG-801

- 4535 1859 Liberty Round 25 Cents, BG-801, R.3, MS67 NGC. Frontier, Deviercy & Co. are credited with the design for BG-801, the only 1859-dated round quarter variety. The motifs are crudely rendered, featuring a homely Liberty and an awkwardly entered denomination. This remarkable Superb Gem exhibits exquisitely preserved orange-gold surfaces, with deeply mirrored fields and well-detailed devices. Tied with two examples at PCGS for finest certified. Census: 1 in 67, 0 finer (10/19). NGC ID# 2BSN, PCGS# 10662
- 4536 1873 Indian Round 25 Cents, BG-874, Low R.6, MS66 Prooflike NGC. Tied with one other example for the finest certified (11/19), this piece is a spectacular example of the rare BG-874 variety. It is also a popular year, 1873, one that Harry X Boosel made famous in the 1960s. This Indian Head 25 cent gold piece has deeply mirrored fields and lustrous devices. A lovely lemon-yellow California gold piece. NGC ID# 2BV7, PCGS# 710735
- 4537 1870 'Goofy Head' Octagonal 1 Dollar, BG-1118, Low R.5, MS62 PCGS. This popular Period Two octagonal dollar is from an unidentified maker. The obverse is known for its lantern-jawed portrait (a rather belligerent-looking Liberty) and dramatically repunched overhead stars. The reverse shows hollow wreath leaves and multiple repunching on O of DOLLAR. Gold-plated over a silver core, this BG-1118 has a few light hairlines on prooflike fields, with sharply struck and frosted devices. Population: 9 in 62, 5 finer (10/19). NGC ID# 2C3K, PCGS# 10929
- 4538 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS64 PCGS. California gold dollars are scarcer as a type than their quarter and half dollar counterparts. BG-1127 was among the numerous die varieties issued by San Francisco jeweler Christopher Ferdinand Mohrig. This example exhibits pleasing cameo contrast between the frosty motifs and the reflective fields. No marks are apparent, though struck-in threads accompany stars 8 and 9. A retained lamination crosses the second L in DOLLAR and the R in CALIFORNIA. Population: 11 in 64, 2 finer (9/19). NGC ID# 2C3V, PCGS# 10938

#### **COINS OF HAWAII**

4539 1847 Hawaii Cent MS64 Brown NGC. Medcalf 2CC-2. Crosslet 4 in date. Medcalf identifies six varieties, two with the Crosslet 4 and four with a Plain 4. This variety is rated the most common of the six varieties. Fully lustrous chocolate-brown surfaces have a few splashes of darker toning and a few marks, along with unusual traces of red mint luster. NGC ID# 2C52, PCGS# 10965

## 1883 Hawaii Half Dollar, MS64+ Brilliant and Well-Preserved

4540 1883 Hawaii Half Dollar MS64+ PCGS. Soft mint frost shines from the brilliant, slightly dusky surfaces of this Hawaiian half dollar, one of 700,000 pieces struck at the San Francisco Mint in 1883. Minimal abrasions and a crisp impression will appeal to collectors. Always a popular single-year issue. Population: 79 in 64 (7 in 64+), 17 finer (10/19). NGC ID# 2C5B, PCGS# 10991

## **PATTERNS**

## 1858 Flying Eagle Cent in Copper-Nickel Judd-202, Five-Leaf Clusters, PR65

4541 1858 Flying Eagle Cent, Judd-202, Pollock-245, Snow-PT19, R.5, PR65 PCGS. CAC. The frequently seen hooked-neck eagle pattern obverse, usually attributed to Longacre, was paired with several reverses during the year. Judd-202 displays ONE CENT in a simple laurel wreath with clusters of either five (Pollock-245) leaves (seen here) or six (Pollock-246) leaves. Struck in coppernickel with a plain edge. The bright, mirrored fields enhance the rose-lilac patina seen over each side. NGC ID# 29BH, PCGS# 11867

## 1858 Hooked-Neck Cent in Copper-Nickel Judd-203, PR65

4542 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR65 PCGS. CAC. The obverse shows a hooked-neck eagle flying left with tall wings. On the reverse the denomination is set within a wide oak wreath with an olive sprig and a group of three arrows are wrapped into the bottom of the wreath. Struck in copper-nickel with a plain edge. The Mint sold these pieces as part of 12-piece sets. As a result, examples are relatively common by pattern standards. The surfaces are clearly copper-nickel but the muted patina on each side tends to subdue the obviously bright reflectivity that lies just beneath the toning. Only a few specks of carbon are noted, and those are limited to the obverse. NGC ID# 29BJ, PCGS# 11869

## 1858 Indian Cent in Copper-Nickel Judd-208, Pollock-259, PR65

4543 1858 Indian Cent, Judd-208, Pollock-259, R.1, PR65 PCGS. There are four notable subvarieties of Judd-208; these include each combination of centered or low-date obverses paired with either five or six-leaf cluster laurel wreath reverses. The present piece pairs the centered-date obverse with five-leaf clusters on the reverse wreath. Struck in copper-nickel with a plain edge. The fields are remarkably bright and reflective and each side retains most of the original "white" color of the original copper-nickel alloy. NGC ID# 29BP, PCGS# 11885

## 1861 GOD OUR TRUST Half in Copper Judd-280, PR50

4544 1861 Half Dollar, Judd-280, Pollock-331, Low R.7, PR50 NGC. A regular dies obverse is paired with a reverse the same as the regular issue, except that the motto GOD OUR TRUST is set directly onto the upper field. Struck in copper with a reeded edge. Struck in silver and copper, only a dozen pieces are known in each metal. Most likely this was carried as a pocket piece. The surfaces are evenly worn and deep, even brown patina is seen over each side. NGC ID# 29DP, PCGS# 12108

## 1864 Two Cent Pattern in Copper-Nickel Large Motto, Judd-371, PR65

4545 1864 Two Cents, Judd-371, Pollock-440, Low R.6, PR65 NGC. 92.9 grains. Regular dies trial issue of the Large Motto two cent piece. Struck in copper-nickel (rather than bronze or copper) with a plain edge. The metallurgical make-up of this piece is listed on the insert: 87% copper, 12% nickel, and 1% silicon. The surfaces are slightly muted with deeper red in the fields; yet, each side is brightly mirrored. An attractive, carbon-free example of this pattern. NGC ID# 26VJ, PCGS# 60541

## 1867 Five Cent Pattern Struck in Nickel Judd-570, Pollock-638, PR66 Deep Cameo

4546 1867 Five Cents, Judd-570, Pollock-638, PR66 Deep Cameo PCGS. Liberty wears a coronet and faces left on the obverse, showing UNITED STATES OF AMERICA around the periphery and the date below. The top of the 7 is distant from the curl, distinguishing the Pollock-638 variety from the Pollock-640, which shows the 7 close to the curl. The reverse offers 5 CENTS centered within a laurel wreath and IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. This nickel-white piece is attractive, well-mirrored, and free of mentionable abrasions despite a few minuscule ticks on Liberty's cheek. PCGS# 506988

## 1868 Cent Pattern in Nickel Judd-605, PR64

4547 1868 One Cent, Judd-605, Pollock-670, R.5, PR64 PCGS. CAC. The design is similar to the as-issued three cent nickel, with a single pillar (or Roman numeral 1) enclosed in a laurel wreath to signify the denomination. Struck in nickel with a plain edge. These cent patterns were issued in sets along with the three cent and five cent variants. This nickel striking is relatively common, while the copper strikes are much scarcer. The surfaces are slightly granular and do not show complete reflectivity in the fields (a common occurrence on early nickel products). Most easily identifiable by a carbon spot at the top of Liberty's hair bun. NGC ID# 29UU, PCGS# 60817

## 1869 Standard Silver Dime in Silver Judd-696, PR66

4548 1869 Standard Silver Ten Cents, Judd-696, Pollock-775, R.5, PR66 NGC. CAC. On the obverse, a head of Liberty faces right, with three large stars on a Phrygian cap. The reverse is the only Standard Silver reverse dime die of the year: STANDARD SILVER around the upper edge, with 10 CENTS inside an oak and laurel wreath. Struck in silver with a reeded edge. The Judd-696 is one of the more common dimes in the Standard Silver series. This is a sparkling Gem that has multiple layers of gray, blue, and rose toning. NGC ID# 29R9, PCGS# 60921

4549 1870 Half Dime, Judd-815, Pollock-904, Low R.7, PR64 PCGS. William Barber's Seated Liberty design shows her facing left, holding a shield in her right hand and with a free-standing Liberty pole behind. Regular issue half dime reverse. Struck in silver with a reeded edge. A lightly toned Choice pattern that boasts a razor-sharp strike and an undisturbed appearance. The frosty motifs contrast strongly against the reflective fields, although not recognized on the PCGS holder. Population: 1 in 64, 7 finer (11/19). NGC ID# 3ZSB, PCGS# 61059

## 1870 Standard Silver Quarter in Copper Judd-879, PR65 Red and Brown

4550 1870 Standard Silver Quarter Dollar, Judd-879, Pollock-976, R.7, PR65 Red and Brown NGC. William Barber's Seated Liberty design for the Standard Silver series, posed with shield, pole, and a small cap. The reverse carries the denomination inside a wreath of corn and cotton with STANDARD above. Struck in copper with a plain edge. On the obverse the copper has turned a deep iridescent blue and cherry-red, while the reverse is almost exclusively deep red. Sharply detailed. NGC ID# 29WM, PCGS# 71123

## **ERROR**

## 1979 Jefferson Nickel on a Lincoln Cent MS63 Red and Brown

4551 1979 Jefferson Nickel — Double Denomination on a 1978 Lincoln Cent — MS63 Red and Brown PCGS. An unblemished rose-red, sun-gold, and olive-brown "six-cent" piece. Struck flush with the collar die at 2 o'clock. The nickel date is full and clear. The cent date is inverted and surprising sharp, located on Jefferson's nose. Lincoln gazes west relative to Jefferson. The Lincoln Memorial is visible where it overlaps Monticello. A majority of IN GOD WE TRUST and more than half of E PLURIBUS is off the flan. Muted red luster is seen over each side.

#### U.S. MINT MEDAL

1876 U.S. Diplomatic Medal Restrike, MS64 Brown Julian CM-15, Made for the U.S. Centennial

4552 1876 U.S. Diplomatic Medal, Julian-CM-15, MS64 Brown NGC. The original Diplomatic medal was produced in Paris using dies engraved by Dupre in the early 1790s, but unsigned by him. When Charles Barber made copy dies, he included the Dupre signature, along with his own "C. Barber" signature and 1876 date. While the dies for this medal were the work of Charles Barber, it was his father, chief engraver William Barber that notified Mint superintendent James Pollock that the hubs were finished. This lovely example exhibits rich mahogany-brown surfaces with impressive detail. There are no spots or other imperfections evident on either side.

## SO-CALLED DOLLARS

- 4553 1900 Lesher Dollar, A.B. Bumstead, Type One, Serial # 109, Silver, Z-2, HK-788, R.5, XF45 PCGS. Joseph Lesher was the owner of a silver mine in Victor, Colorado and A.B. Bumstead was a local grocer. Lesher produced his famous souvenir coinage in support of the "free silver" movement. This Choice XF specimen is lightly worn and lightly abraded, with pleasing lavender-gray toning on both sides. Approximately 210 examples were struck. Listed on page 428 of the 2020 *Guide Book*. Population: 2 in 45, 43 finer (11/19). NGC ID# 2F6D, PCGS# 19001
- 4554 1900 Lesher Dollar, A.B. Bumstead, Type Two, Serial #734, Silver, Z-3, HK-789, R.5, AU55 NGC. HK-789 dollars use the second reverse, which is distinguished from the first reverse by the absence of the line above COLO and lack of scrolls on each side of the seal at the top. Just the slightest high-point friction is evident, and it actually gives this dollar is most appealing "circulated cameo" appearance since the fields are charcoal-gray. No distracting abrasions are noted on either side. Listed on page 428 of the 2020 *Guide Book.* NGC ID# 2F6F, PCGS# 19002

- 4555 1901 Lesher Dollar, J.M. Slusher, Silver, Z-6, HK-792, R.5, XF45 ANACS. Civil War veteran Joseph Lesher owned a silver mine in Victor, Colorado and championed the cause of "free silver" at the turn of the century. J.M. Slusher was a merchant from Cripple Creek. This Choice XF So-Called dollar shows only light wear on the design elements and the lightly abraded surfaces retain traces of original mint luster, under pleasing shades of lavender-gray toning. Approximately 260 examples were stamped. Listed on page 428 of the 2020 Guide Book. PCGS# 19007
- 4556 1901 Lesher Dollar, Boyd Park, No Serial #, Silver, Z-10, HK-796a, R.7, AU53 PCGS. Within the Imprint Type, there are approximately 150 dollars that were stamped Boyd Park. This type is further divided into serial number coins and those with a serial number. This is an attractive coin with overall color is light gray, but the recesses display deeper shadings of gray that give it a pleasing two-toned appearance. Listed on page 428 of the 2020 *Guide Book.* PCGS# 19013
- 4557 1905 Denver Mint Opening, Bronze, HK-876, R.6, MS63 Red and Brown NGC. 35 mm. Struck in bronze with a reeded edge. These medals were struck as witness to the opening of the Denver Mint, although the facility produced their first circulating coinage the next year. The obverse has DENVER and the date prominently displayed, while the reverse is blank aside from border details. This example has considerable faded mint red with medium brown toning. Census: 2 in 63 Red and Brown, 2 finer (10/19).

## 1826 Erie Canal Completion Medal, MS62 Struck in Silver, HK-1000

4558 1826 Erie Canal Completion Medal, Silver, HK-1000, R.6, MS62 NGC. The 1826 Erie Canal Completion medal was designed by Archibald Robinson and engraved by Charles Cushing Wright. The Greek mythology-based obverse shows the seated figures of Pan and Neptune, while the reverse is strictly American with the classic eagle-on-globe motif. This is a richly toned silver medal (HK-1000), with deep bluish-gray patina and golden highlights. The surfaces are well-preserved with good rims. Faint hairlines exist beneath the toning. NGC ID# 2FCY, PCGS# 643756

7990 1961 War Between the States, Civil War Centennial Gold Medal, #18, MS67 NGC. 40 mm, 34.7 grams. Struck in 10k gold.

**End of Auction** 

## **Terms and Conditions of Auction**

#### Auctioneer and Auction:

This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions - Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog

#### Buver's Premium:

- All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- For Domain Names & Intellectual Property Auction lots the Buyer's Premium is fifteen percent (15%) subject to a minimum of \$19 per lot;
- For US Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
- For Wine Auction lots the Buyer's Premium is twenty-three percent (23%) subject to a minimum of \$19 per
- For European Comic Art Auction lots, the Buyer's Premium is twenty-five percent (25%) subject to a minimum of \$19 per lot;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve point five percent (12.5%) of any amount over \$3,000,000.

Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine) are conducted solely on the Internet. Signature\* Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions

- Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- 6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

#### Credit:

In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Internet bids will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Auctioneer may, in its sole discretion, require a deposit in good funds of twenty-five percent (25%) of the amount of each bid prior to acceptance of the bid. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security so a credit check may be performed prior to Auctioneer's acceptance of a bid. Settlement via check and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction.

#### **Bidding Options:**

- Bids in Signature\* Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at http://www.ha.com/c/ref/web-tips.zx#biddingTutorial.
- 9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) and floor bids must be on-increment or at a half increment ("Cut Bid"). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- 10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding or entry of bids. When identical mail or fax bids are submitted, preference is given to the first received. To ensure the greatest accuracy, written bids should be entered on the standard printed bid sheet and received by Auctioneer at least two business days prior to Auction start. Auctioneer is not responsible for executing mail bids or fax bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, fax, email, Internet, or in person once Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- 11. Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

Current bidding increments during any live auction session or components thereof (e.g. mail/fax bids and LiveProxy bidding) (see HA.com/c/ref/web-tips.zx#guidelines-increments) are

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

Note: Half-increment bidding is available prior to the live auction session.

12. If Auctioneer calls for a full increment, Bidder may request Auctioneer to accept a Cut Bid only once per lot. After offering a Cut Bid, Bidder may continue to bid on lot only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature\* Auctions. Bids solicited by Auctioneer at other than the expected increment will not be considered Cut Bids.

#### Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION: ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE

- "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. Any successful bid placed by a consignor on his property on the Auction floor, by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
- 14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless of placed bids, Auctioneer reserves the right to withdraw any lot, or any part of a lot, from Auction at any time prior to the opening of any such lot by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live Internet bidding or the beginning of any
- 15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- 16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances
- 17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate) In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold or the Auctioneer may place a protective bid on behalf of the consignor.
- 18. All items are to be purchased per lot as numerically indicated and no lots will be broken.

  19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion.
- 20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, bidding may be extended at Auctioneer's discretion. Bidders unable to place their bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- 21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or its affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- 22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

- 23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the merchandise; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, thirty days when drawn on an international bank. Clients with pre-arranged credit may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 business days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website. Payment via credit card (Visa, Mastercard, Discover, and American Express) will be accepted upon prior approval by Auctioneer. All payments by credit card will incur a surcharge of 2.5%. Payment by eCheck, wire transfer, or check will not incur a surcharge. This fee only applies to credit transactions, and does not exceed Auctioneer's cost of
- 24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after Auction close. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer
- 25. Purchased lots may be subject to taxes or fees imposed by various foreign taxing agencies. Buyer is responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to Buyer, or Buyer's representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, Buyer agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Buyer agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- 26. In the event that Buyer's payment is dishonored upon presentment(s), Buyer shall pay the maximum statutory processing fee set by applicable state law. If Buyer attempts to pay via eCheck and Buyer's financial institution denies this bank account, or the payment cannot be completed using the selected funding source, Buyer agrees to complete payment using your credit card on file (subject to the surcharge detailed in paragraph 23).
- 27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, Buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.

  28. In the event Buyer fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the
- invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Buyer agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Buyer is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.

  29. Title shall not pass to Buyer until all invoices are paid in full. Auctioneer shall have a lien against the
- merchandise purchased by Buyer to secure payment of any and all outstanding Auction invoices. Auctioneer is further granted a lien and the right to retain possession of any other property of Buyer then held by Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due Auctioneer or affiliates from Buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale

(including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). Any Heritage foreclosure auction venue, whether or not the same venue as when the debt was incurred (e.g. Signature, Internet, or weekly), is deemed a reasonably commercial sale. In addition, with respect to payment of the Auction invoice(s), Buyer waives any and all rights of offset he might otherwise have against Auctioneer and the consignor of the merchandise included on the invoice. If Buyer owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Buyer, and it may secure by possessory lien any unpaid amount by any of the Buyer's property in their possession.

#### Delivery; Shipping; and Handling Charges:

- 30. Buyer is liable for all shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.xx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Merchandise will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer (subject to the surcharge detailed in paragraph 23).
- 31. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot.
- 32. On all shipments in which Auctioneer charges the Delivery, Handling, and Transit Fee infin, any risk of loss during shipment will be borne by Auctioneer until the common carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Buyer, if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
  - a. <u>Scope of Transit Services</u>: Merchandise for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The merchandise will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, Buyer will provide a Secure Location to which the items will be delivered. NOTICE: Auctioneer is neither an insurance company nor a common carrier of any type.
  - b. <u>Auctioneer's Compensation for Transit Services</u>: Auctioneer will provide transit services to Buyer for ¾ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). Buyer agrees to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth herein.
  - c. <u>Auctioneer's Limitation of Liability for Transit Services</u>: Buyer understands and agrees that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. Any claim that property has sustained loss or damage during transit must be reported to Auctioneer within seventy-two (72) hours of the delivery date. Any recovery for loss of or damage to any merchandise is limited to the lesser of actual cash value of the merchandise or the Insured Value. Under no circumstances is Auctioneer liable for consequential or punitive damages.
- 33. It shall be the responsibility for Buyer to arrange pick-up or shipping in a timely manner (within 10 days). Merchandise will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the merchandise is not removed within ninety days, the merchandise may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
- 34. A. NOTIČE OF CITËS COMPLIANČE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
- 34. B. California State law prohibits the importation of any product containing Python skin into the State of California. No merchandise containing Python skin will be shipped to or invoiced to a person or company in California
- 34. C. Auctioneer shall not be liable for any loss caused by or resulting from:
  - a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
- 35. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

#### Cataloging, Warranties, and Disclaimers:

- 36. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of merchandise or second opine contained in this Auction is for the sole purpose of identifying merchandise for those Bidders who do not have the opportunity to view merchandise prior to bidding, and no description of merchandise has been made part of the basis of the bargain or has created any express warranty that merchandise would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, e.g. Fine Art, may have express written warranties and Bidder is referred to those specific terms and conditions.
- 37. Auctioneer is selling only such right or title to merchandise being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the merchandise. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
- 38. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
  39. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with
- 39. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any merchandise by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
- 40. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for return or reduction in purchase price.

#### Release:

- 41. In consideration of participation in Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein, and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
- 42. Notice: Some merchandise sold by Auctioneer is inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Buyer accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

#### Dispute Resolution, Arbitration, and Remedies:

By placing a bid or otherwise participating in Auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein.

- 43. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to, and/or arising out of Bidder's participation in Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description, and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation, or any claim made by Bidder of a lot or Bidder's participation in Auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer {which claim Bidder consents to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent) and Auctioneer each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. In the event that any Claim needs to be litigated, including actions to compel arbitration, construe the agreement, actions in aid of arbitration, or otherwise, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. A Claim is not subject to class certification.
- 44. Choice of Law: Agreement and any Claim shall be determined and construed under Texas law.
  45. Fees and Costs: The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought versus awarded or the successful defense of a Claim based on damages sought versus awarded) may be awarded reasonable attorneys' fees and costs.
- 46. Remedies: Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. After one (1) year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. Exemplary or punitive damages are not permitted and are waived. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Buyer; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, refund Buyer's purchase price without further obligation. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return.
- 47. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

#### Miscellaneous

- 48. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
- 49. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
- 50. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

#### State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 1364738-DCA ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 0762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Additional Terms & Conditions: COINS & CURRENCY

- COINS and CURRENCY TERM A: Signature\* Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any thirdparty organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be preapproved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.
- COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.
- COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.
- COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FI. 34230, http://www.ngccoin.com/services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.
- COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470; PCGS Gold Shield, PO Box 9458, Newport Beach. CA 92658. Third-party graded notes are not returnable for any reason whatsoever.
- COINS and CURRENCY TERM F: Notes graded by PCGS Currency between February 4, 2009 and January 30, 2019 were graded and authenticated by K3B, Inc. under license from Collectors Universe, Inc. K3B, Inc., now operating as Legacy Currency Grading, has expressed in writing that notes graded under the license during this time period will still be covered by the full written guaranty of PCGS Currency. Warranties may be available from Collectors Universe, Inc. for all PCGS Currency notes graded prior to February 4, 2009.

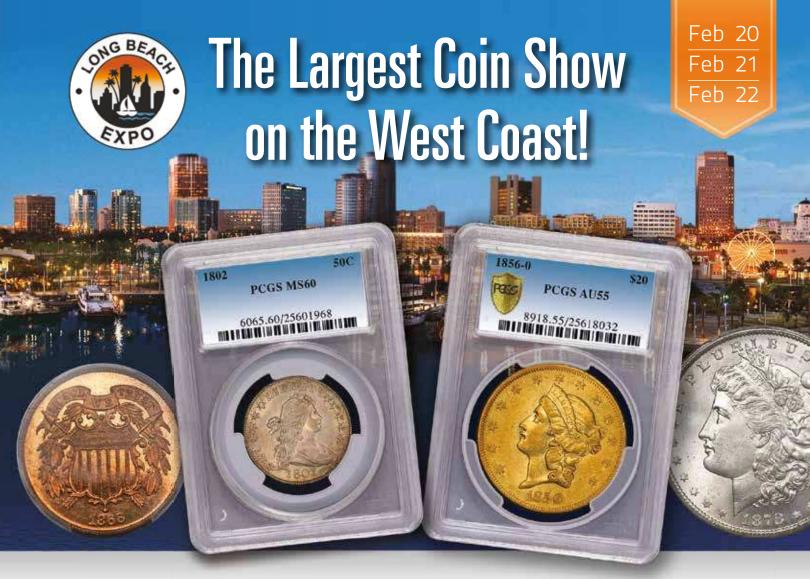

- COINS and CURRENCY TERM G: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.
- COINS and CURRENCY TERM H: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.
- COINS and CURRENCY TERM I: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.
- COINS and CURRENCY TERM J: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.
- COINS and CURRENCY TERM K: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.
- COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.
- COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration
- COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.
- COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

#### Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 1364738-DCA ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 0762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

## The Long Beach Expo offers a complete collectibles experience including:
